- D] In Para. said to be sold to 'Norton' at the Christie sale: '14-16 June 1849': there is something wrong here: the sale was in 1917; is 1849 the catalogue number? Both three- and four-stroke sigma.

(1)"the style is of somewhat the same nature as in the last [which is compared to the Xenokles Painter], but the hand is not clearly the same." (Beazley). (2)so *ABV*; Beazley in *JHS* says: Judgment of Paris. (3)Beazley follows R.-R. in giving the first letter as kappa [which may be erroneous].

- D] Eschbach 18 attributes to the same year as Berlin inv.
3980, CAVI 2478, i.e. 392/1, on the basis of the column
figures (which he thinks changed for each year). Neils
(obviously following him) also dates to 392/1, in the
archonship of Philokles(1), because of the column figure of
Ploutos on both columns. Beazley attributed to Asteios Group
of 373/2, the year of Asteios' archonship. E. Bell, in
'Midwestern' 222/125 (ill.) dated the vase to 375-370. -
Attic, except Ionic lambda; the second o seems = a circular
phi.(2)

(1)so Neils, but this is not certain as the archon name on
Berlin 3980 (q.v.) is quite fragmentary. (2)Neils, p. 32,
though distorted, shows the letter forms: the strokes of
the letters are sometimes close to calligraphic and
slightly disjointed, e.g. in epsilon, theta, nu, etc. Alpha
lacks the diagonal. Lambda has the second bar in the shape
of a hook. This is like writing with a pen.

Detroit, Lawrence A. Fleischman.

- A] BF amphora. Painter of Berlin 1686 (Bothmer). Third quarter sixth. Ca. 540 (Cat.). *K. Wight and R. Guy in: J. Paul Getty Museum and Cleveland Museum of Art, A Passion for Antiquities: Ancient Art from the Collection of Barbara and Lawrence Fleischman (1994) 81/34 (ill., A, B). Atlantis Antiquities, Greek and Etruscan Art of the Archaic Period (New York 1988) 38-40, fig. 35 (A, reversed) and p. 41 (part of B).
B] A, B, each: Heracles and Geryon.
C] Nonsense: A: behind Heracles, along the margin: eight letters. To his right, facing him: ειοτοχειοτ(ο)σε(.)(1)
Between Geryon's legs: ειοτολολ.(2) Behind Geryon's legs: eight letters. B: replica of the scene and of the inscriptions, except that the inscription on Heracles' right is placed between his legs. The number of letters also differs: 10 letters - 10 letters - 10 letters - 13-14 letters (smear at end).
D] The inscriptions are typical of this painter.

(1)letter 11 = a filled upside down triangle; letter 14: a thick dot. (2)the sixth letter perhaps upsilon: ειοτουολ.

Detroit, Lawrence A. Fleischman.

- A] BF Panathenaic amphora. Three-line Group (Bothmer). Third quarter sixth. Ca. 530 (Cat.). *J.B. Grossman and R. Guy in: J. Paul Getty Museum and Cleveland Museum of Art, A Passion for Antiquities: Ancient Art from the Collection of Barbara and Lawrence Fleischman (1994) 83/35 (ill.) (no bibl.).
B] A: wedding procession of Admetus and Alcestis in a chariot. B: frontal chariot; at left, woman and youth; at right, woman and boy.
C] A; above the woman at left (Peitho), curving around her head but referring to Alcestis who is standing in the chariot, hence retr.: Αλκεστεις.(1) To right of Admetus'

face: Ασμητοσ.(2) Above Artemis' head, to right of Apollo's lyre: Απολλων. To right of two of the horses, at some distance from Artemis' back (she faces left): Αρτεμις. At right are two women and Dionysus with a boy, none of them inscribed. A has a horse brand: a dotted circle with a dot in the center [theta?].

- D] The scene is very compact and the painter put the inscriptions where he could. Letters are clear but very small in the photo.

(1)so the text. (2)Apollo's lyre intervenes.

3364.

Dresden, Albertinum 236.

- A] Fr. of RF cup. Manner of Euergides Painter.(1) Last quarter sixth. *ARV(2) 97/5, Add.(2) 171.

B] A: Heracles. B: Cycnus. [So ARV(2).]
C] A: Heracles is inscribed: nonsense: αθετο ενος. B: the adversary: νοαχ.
D] L.-J. (referring to Boardman) says that Beazley [where? Not in ARV(2)] thought the inscription on B should be read [Λυ]καον, retr., but Boardman knows no other vase with Heracles fighting Lykaon. L.-J. thinks the inscription on B

should be nonsense as is that on A.

(1)the vase resembles neck amphoras decorated by or near Euphronios, "but the figures are not Euphronian, though contemporary" (Beazley).

 D] Hoffmann says: Once Dresden 464, destroyed in World War ii. [But Oakley does not seem to know this?] Hasty writing.

(1)might be from his hand (Beazley). (2)Oakley gives the first alpha as missing but but I thought I could see it in the photos. ARV(2) has Ευαιὼν κα[λ]ος. - Ευαιὼν κα[λ]ος (Hoffmann).

without kalos, whence Beazley says he might be the athlete.
Sigmas: three-stroke and reversed; four-stroke(?).(3)

(1)Beazley; earlier attributed to Euthymides. (2)partly
effaced. (3)Beazley prints the sigmas of the inscriptions

- B] A: Triptolemos in his winged seat holding out a phiale, which is being filled by Persephone from an oinochoe. At left, Hekate; at right, Demeter. B: at left, a draped youth

with a stick, holding a strigil; in the center, a draped and hooded youth (or boy?); at right, a draped youth with a lyre.

- C] A: $\eta\kappa\alpha\tau\epsilon$. To right of T.'s head, horizontal:

(1)T.'s scepter intervenes. All but the first two letters are visible in pl. 26 of 'Generation' and are in the Attic alphabet. (2)Stanley refers the inscription to the lyre player as representing the educational effect of the symposium, but I think it might refer to the boy in the middle, despite the location. B may refer to a conflict between two lovers offering athletics and music respectively.

- D] S. refers the inscription to the Eros. - Most inscriptions on vases by the Bowdoin Painter are nonsense, frequently involving sigmas. But London 1906.12-15.5, CAVI 4718, has

κα[λο]ς, and Oxford 265, WG, CAVI 5883, seems to have Νι[κε].

- D] CV compares London B 402, CAVI 4303 [attributed to Sakonides];

Λι.(3) A Gr. line crosses the foot.
- D] The readings mainly from CV. See Toronto 350, CAVI 7723.
Johnston's readings differ in part, both in G&R and in TGV.
The Gr. is hard to read. The alphabet is not Attic. For letter forms see the text in AJA: υδρικαι (implied by Johnston but not in CV) and αρυστηρ seem to have different letter forms.

(1)Alpha lacks the cross-stroke. (2)TGV reads the former. The rho resembles an Ionic gamma. (3)= 31? But TGV reads (or implies) υδρικαι. I thought: 31 ladles for Charias = Chairias.

- D] Based on a hasty note and on CV. The inscriptions seem to me to represent illiterate attempts to write kalos-inscriptions rather than nonsense. Is the left one for Neokleides (despite the kale)? CV calls the left hero Achilles, the other Ajax.

(1)so the photo. and autopsy; the previous word inaccurate in CV, text. Referring to the shield? Or καλε? (2)so CV, text;

I did not read it; the photo. shows: ...κοσ^νιδος; i.e., the last two inscriptions go together.

- B] On the lid: RF chest with an open lid, in perspective.
- C] On the bottom of the pyxis and on the underside of the lid, Grr.: NC.
- D] Lunate sigma should not occur until later in the fourth century (see 'Script' 160): the pyxis may be dated too early in CV; the drawing of the chest also suggests a later date to me. The marks make it possible to place the right lid on the pyxis; see TGV, subs. list 4.

- A] Plain lip cup. From Elche.(1) Unattributed. Third quarter sixth. Mid-sixth (Olmos). *R. Olmos, 'Original Elements and Mediterranean Stimuli in Iberian Pottery,' Mediterranean Archaeology 3 (1990) 7, pl. 7.
- B] Int.: in the center, a large reserved area with a dot in the center and a marginal line; on the inside of the lip, a band of parallel lines. Ext.: lip: plain.
- C] Handle zone: A: ἠοπαίς υ. καλός. B: similar (not ill.).

- D] The inscription is not clearly visible. The heta is in a break (there is definitely a letter there) and lambda and sigma are clear. The inscription is therefore Attic and so must be the vase, although its inside decoration resembles Ionian cups (Olmos refers to Samian cups and to R. Ramos, *El Museo Arqueologico de Elche* (1987) 57). *ho pais kalos* on a LM cup is most unusual and this is one of the earliest appearances of this formula. Cf. perhaps Athens, Agora P 12, CAVI 222, fr. of a BF (LM?) cup; and Athens, Agora P 17,827, CAVI 5433, Gr. on a BG skyphos of the mid-sixth cent. ('Script' 56).

 D] From the right-hand part of the plaque. A generation earlier than Euphiletos the kalos.

(1)Ευφιλετο[ς εποιεσε]ν, vulgo. Ευφιλετο[ς εγραψε]ν, rather than [ανεθεκε]ν?, Beazley. See Beazley, BSA: C. Robert, RE, s.v., suggested the kalos may have been a painter in his youth, but Beazley thinks the chronological gap is too great. He also says that *epoiesen* is as good as *egrapsen* or *anetheken*, but in ABV he mentions only *egrapsen* and *epoiesen*.

[These must be ABV 414/1 (Eleusis 2703, CAVI 3436) and 414/2-3 (the former, Eleusis 2696), Add.(2) 108, CAVI 3435.] The two features are: Athena while still facing left, has the wrap of the later right-facing type; the columns have acanthus capitals.

He discusses the spelling 'ou', which he thinks is for the impure diphthong, and gives some parallels (more are in GAI i, 240). But it is not an impure diphthong, but from *βωυ-κολος. The name Boukolos seems to be mythological, at least in this period (see Pape); it can refer to a worshipper of Dionysus.

- D] On p. 55 Robertson gives the history of the attributions of Eleusis 618 and 619: Karouzou: Euphronios. Beazley: Eleusis Painter (includes RF). D. Williams: very early Onesimos (Panaitios Painter): grouped with the Berlin/Vatican Ilioupersis cup. The reff. are in n. 70. Cartwheel theta. (1 or 2 in chart in 'Script').(2)

(1)connected with the Proto-Panaitian Group. (2)depending on how the sherd is poised. ARV(2) prints cartwheel theta and Robertson shows this too, as does the photo.

- A] Frs. of BF epinetron. Sappho Painter. Ca. 500. Still sixth (Haspels 105). *Haspels, ABFL 28.54, 94, 98, 228, pl. 34. Eph. 1895, pl. 8,1-3. *Photo. F. Lissarrague, The Aesthetics of the Greek Banquet (tr. Szegedy-Maszak 1990) 127, fig. 97 (sketch of fr. a, with inscriptions). *A. Belis, BCH 108 (1983) 99-104 (reads the inscriptions as musical notation). *H. Metzger, 'Bull. Arch.', REG 99 (1986) 67/17 (the first inscription there read .ETOTOY, the rest from my readings).
B] Amazons arming.
C] Nonsense: fr. a: ?](.)ετοτοτ. h(.)οτ. Fr. b: τειτ. πεηι.(1)
D] See Haspels 96 for a discussion of the Sappho Painter's use of nonsense inscriptions. (.) preserves a bit of a letter. Lissarrague lists this vase as an example of nonsense in the position of a song [from the mouth].

(1) D. Philios mentioned the possibility that the letters attached to the fighters imitate barbarian war cries and those attached to the trumpeter, music. This is strongly supported by Belis. Lissarrague follows her.- My readings differ from Belis' readings and I do not believe that the inscriptions are musical notation:

Immerwahr

fr. 1: ?](.)ετοτοτ

hττοτ

fr. 2: πεηι

fr. 3: τειτ

Belis

τοτοε

το<τ>η

Γεηι

τειτ

I think that none of the inscriptions are retr. as Belis assumes.

- A] Fragmentary BF strainer.(1) From Eleusis. Unattributed.(2) Last quarter sixth.(3) *F. Brommer, 'Bilder der Midassage,' AA 1941, 39, 41, 42/I2, fig. 2 (bibl.). *H. Bulle, 'Midas und Silen,' AM 22 (1897) 387-404, pl. 13 (dr. by Guilleron). R. Zahn, AM 24 (1899) 399. Beazley Archive db, no. 15,555. RA 25 (1946) 213, fig. 1. M. Miller, 'Midas as the Great King in Attic Fifth-century Vase Painting,' AK 31 (1988) 80 and n. 6, pl. 18,2 (part of A).
B] Shoulder: lower part of two clothed figures; branch;

palmette. Body: A: Capture of Silenus: Midas seated; herald (not Hermes, Brommer, but see below); a naked satyr, chained, looks back; man with a spear and two chains.(4) B: parts of three males. Bulle identifies B as a ploughing scene (see below).

- C] Nonsense: A: seven imitation inscriptions, with many tau's and upsilon's. B: three imitation inscriptions are preserved.
- D] Bea. Arch. db gives a third decorated area (really B): agriculture: youths, one with pick, one ploughing(?), man with sack, mule or ox.

(1)'Siebgefäss'. (2)not in Beazley. Circle of the potter Nikosthenes (Bulle). (3)Bea. Arch.: 575-525. (4)the figure behind Silenus is a hunter; that in front is considered to be Hermes by Miller, after Bulle (he carries a caduceus of sorts); Brommer calls him a herald.

Edwards, AJA 90 (1986) 316 and n. 72 (bibl.), pl. 21, fig. 11 (ph. showing Gr. in large letters in BG area below the scene). *Vidi. *LGPN ii, s.v. Αυθηπη. *S. Kaempf-Dimitriadou, Die Liebe der Götter in der attischen Kunst des 5. Jahrhunderts v. Chr. (11th Beiheft, Antike Kunst 1979) 35, fig. 5 (dr. after AM 21), 105/339.
- B] A: Rape of Persephone: Hades abducting Kore in a chariot; at left, two women; at right, Hermes and another figure; behind the horses, another female figure (Demeter? Hartwig); above the horses' heads, Eros with a wreath and a torch. B: not preserved unless the fr. of Hartwig's p. 379 belongs there.
- C] A: to Eros' left, at head- and shoulder-height, facing him: Ερῶς, retr. Below the bottom margin, Gr.: left-aligned horizontal stoich. two-liner if the first sign is disregarded (as Hartwig does who considers it a false start): (.)αυθηπη[πη] | αυθηκεν.(1)
 ^

- D] The museum no. is given in Add.(2) Neither Edwards nor Simon agree with my original reading from Hartwig: the photo. shows: (.)α(ν)θηπηη | αυθηκεν. The first letter is unclear in the photo.; it looks more like a reversed three-stroke sigma than a xi. My own observation agreed with the dr. (see below) in that I saw a sign ^. The first nu seems to

lack the first stroke (= V), but that is probably because that stroke does not go all the way through to the clay. The dr. shows the first letter as a kind of caret: ^. The nu is shown complete. Can we read: (Ξ)ανθιππη|ανεθηκεν or [X]σανθιππη? In both pictures the alpha of the anetheken is below the alpha of the name; this would support the reading Ανθιππη, ignoring the first sign. This seems also LGPN's opinion. - The Dip.: mixed alphabet with triangular rho and four-stroke sigma. The Gr.: Ionic alphabet, unless the first sign is a sigma. K.-D. gives the dedicator as Anthippe.

(1)Hartwig's dr.: before the alpha of the name the ill. shows the 'caret', but the text gives the reading:

Ανθιππη ανεθηκε (without the final nu!).

- B] Persephone with staff (scepter?) and phiale.
- C] Valomenou: to right of P.'s staff, starting at elbow height, vertically down, facing the figure: Φερροφαττα. C. gives (in caps): ΦΕΡΡΟΨΑΤΤΑ, with an odd psi, no doubt a slightly miswritten phi. Whence Bea. Arch.'s alternative.(1)
- D] The first phi has an extended vertical.

- A] BF oinochoe. Unattributed. Approaches the Altenburg Class, see ABV 423. Last quarter sixth. 510-500 (Froning). *H. Froning, *Katalog der griechischen und italischen Vasen*, Museum Folkwang, Essen (1982) 142/58 (ill.); G. Neumann, *ibid.* 146-47. Froning, *Gnomon* 55 (1983) 515. Para. 182. 'Script' 1177a.
- B] Female flautist with three female dancers.(1)
- C] Left to right: Ορωνπις (dancer), the last four letters retr. Χορονικε, retr. (dancer). Behind the flautist's back: Αυλεσι(ν)ομε. Ορχεισιλλε (dancer).
- D] For the names see Neumann. West Greek alphabet.(2) The vase is Attic, but the inscriptions are not.

(1)called maenads by Beazley, but this is rejected by Neumann and Froning who rightly consider them Greek professional dancers. (2)in *Gnomon* Froning suggests a Euboean artist working in Athens.

- A] BF amphora. Leagros Group. Last quarter sixth. Ca. 510 (S.). *K. Schauenburg, *Ars Antiqua* v (1964), 30/122, pl. 29. Para. 166/108 bis, Add.(2) 98.
- B] A: Ajax and Achilles playing at an altar; behind the altar, Athena (to right, spreading out her aegis, but her face is turned to left). B: Artemis(?) mounting a chariot to right; behind, Apollo citharoedus to right.
- C] A: on the WG center block of the altar, in BG: Αθηναιας. Nonsense: imitation: to left of Athena, curving down from her face: 9 letters. To her right, 9 letters, apparently scattered.(1)
- D] Ex Lucerne Market (A.A.). - Schauenburg does not discuss which of the heroes is Achilles and which Ajax. Note that the hero on the right has a double helmet plume. On the other hand, Athena's spreading her aegis toward him while looking at the other should have some significance. The game takes place in a sanctuary of Athena.

(1)at least I cannot group them into separate inscriptions. Are the inscriptions meant to 'name' the two heroes?

Robertson, AVCA 269 and 321 n. 29. H.A. Shapiro, Myth into Art: Poet and Painter in Classical Greece (1994) 133-34, fig. 93 (A).
- B] A: Orestes and Electra at the tomb of Agamemnon: at upper left, a reclining youth; below, to left of the tomb: head of a seated girl, and Orestes who is cutting off a lock of his hair; on the steps of the tomb at right: Pylades seated, with spears; at right, two women to left; the larger one, nearer the tomb, holds a water jar. B: three youths.
- C] A: On the middle step of the tomb's three-stepped base, in BG: [Αγα]μεινονος. The names of Orestes and Electra seem also inscribed: above the girl with the water jar, horizontal: Elektra. No other inscription shows and Shapiro does not mention any other. But Robertson mentions the inscription, by mistake, of "a second girl": Ismene (not Chrysothemis as expected).

- B] Int.: dancing girl with krotala. Ext.: plain.
- C] Int.: traces of an inscription around the edges of the field: to left, and below, the lower arm: a four-stroke sigma; perhaps an alpha above the dancer's right foot; an illegible letter between these two letters; indications of a kappa and of other letters in the right-hand portion of the tondo. Perhaps *καλος*, *καλος* by analogy to the cup in South Hadley, Mt. Holyoke, CAVI 7485.(1)
- D] Ex Basel Market (M.M.). - 57.27.29 is the number given by Maule and Add.(2); 56.24.15 is the number given by Neils, which is probably wrong. - Neils also compares the dancer on the RF cup by Oltos in South Hadley, Mt. - B] Funeral Games for Pelias: A: before the contests: Atalanta and Peleus with other figures (see inscriptions). B: after the contests: a bearded victor (Heracles?); Akastos seated as judge; Polydeukes victor; Pheres seated (fellow judge); Idas.
- C] A: [--]χος. Κλεομολπος. Ιππομενης.(1) Αμυκος.(2) B: Πολυδευ[κης].(3) [Ιδ]ας.(4)
- D] = T 404. - On A the artist has conflated the fight at the games with the fight between Polydeukes and Amykos (Beazley). For inscriptions and subject see *AJA* 64. - Matheson 229f. also discusses the subject which has been disputed: reversing A and B, she suggests [Πηλι]ας rather than [Ιδ]ας for the standing figure (if the inscription refers to him): the shade of the dead man attending. For B, Matheson follows Korshak who interprets the scene as the foot race between Hippomenes and Atalanta; Hippomenes is tying his sandal rather than wrestling. But there are difficulties (Amykos does not fit and Kleomolpos is an unknown name); hence the interpretation is uncertain.

(1)Peleus misnamed. (2)boxer; misnamed. (3)being crowned.
 (4)standing; the complement [Ιδ]ας is Beazley's; another suggestion is [Πε]λι]ας.

- C] Ευμαχη. Περιθῶς. Ανδρομαχη.(1) Πυργομαχη, retr. Θεσευς.(2) Αντισπεια. [Αξιοπ]ειθης | καλ[ος].(3)
- D] = VT T 1052. The surface is in poor condition; the phs. do not show the inscriptions. Ionic alphabet (except perhaps Θεσευς). Mended in antiquity. The scene probably inspired by a wall painting (see Oakley 50 n. 169) [note that the scene ignores the handle divisions between A and B]. Oakley prints Ionic letters except for three-stroke sigma in καλ[ος], which he mentions on p. 11. According to Oakley 10 the inscriptions are incised; so also Denoyelle; I had not noticed it.

Bothmer, *Amazons* 198/132, pl. 83,7. *ARV(2) 1029/21, Para. 442, Add.(2) 317. TGV 39 and 59 (n. 5 of ch. 4). S.B. Matheson, *Polygnotos and Vase Painting in Classical Athens* (1995) 351/P23, pl. 51A-B (A).
- B] A: two Amazons on horseback; between them, another Amazon. B: two women fleeing to a man.
- C] A: the left Amazon on horseback: $\eta\pi\pi\omicron\mu\alpha\chi\epsilon$. Amazon on foot: $\Pi\epsilon\iota\sigma\iota\alpha\nu\alpha\sigma\sigma\alpha$. The right Amazon on horseback: $\Delta\omicron\lambda\omicron\pi\epsilon$. B: between the two figures: $\kappa\alpha\lambda\omicron\varsigma$. Under the foot, Gr.: complex ligature: $\Lambda\Delta\epsilon$ or $\rho\Delta\epsilon$ plus three unit strokes, two short and one long.(1)
- D] = T 411. Peisianassa: Beazley in *AJA* refers to the Peisianakteion = the Stoa Poikile. Bothmer in 'Amazons' cites the expulsion of Dolopians from Skyros when the bones of Theseus were brought to Athens and the Theseum was built. The Amazons on this vase are inspired by paintings in the Stoa Poikile and the Theseum.

- A] Fr. of RF calyx krater. From Spina. Near Talos Painter. Late fifth. *Nsc 1927, 190-91, pl. 19,1 (retouched to show the inscription). ARV(2) 1340, middle, Add.(2) 367. Robertson, *AVCA* 257, fig. 260.
- B] A: Death of Talos: in the center, the body of Talos flanked by the Dioscuri.
- C] A: at the extreme left, at the height of Polydeukes' knees: $[\text{M}\eta]\delta\epsilon\iota\alpha$.
- D] = 'erratico' near T 312. The figure of Talos repeats that of the Jatta vase (CAVI 7322); Polydeukes' attitude and chlamys

are similar; but it is by a hand different from that of the Talos Painter (Beazley).

- B] Symposium: at left, two naked youths dancing, one with a wineskin of unusual shape, the other with two long sticks; in the center a burning lamp [so L.-H.; it looks more like a kottabos-stand]. At right, a couch, on which sit a girl playing the flutes and a man.
- C] Above the left dancer: Δικκιος. Above the girl: Διψιω.(2)
- D] = T 108 A VP (so listed in L.-H.). Theatrical names? Dipsio is curious, since women were not allowed to drink, at least in public.

- B] Symposium with komos. The photo. shows: at left, a bearded figure reclining on a couch; youth with a stick; youth with a cup and oinochoe at a large dinos on a stand; woman playing

the flutes; another figure.

C] ΑΠΕΥΟΡΙΣ.(2) ΚΛΕΑΙΝΟΣ.(2)

D] = T 11 C VP. ΑΠΕΥΟΡΙΣ is listed, ca. 430, in LGPN ii.

B] Int.: youth seated frontally and playing the lyre; on the wall, a bag and a 'cross'. Ext.: school: A: two seated youths facing, with book rolls; at right, a youth seated frontally, with stylus and tablets; two tied-up tablets (satchels) and a 'cross' are on the wall. B: a seated youth with stylus and tablets; in the center, a seated youth holding up a lyre; at right, a seated youth with a book roll; on the wall, tied-up tablets (satchels) and a 'cross'.

C] Int.: above the youth's head: καλος. A and B: the book rolls have letters on them, both inside and on the rolled-up parts. Pöhlmann mentions: A, E, Z and 'Argive' lambda.

D] = T 45CVP. Pöhlmann thinks this the earliest example of the combination of book rolls, tablets and musical instruments.

B] Sacrifice by Leto and her children at Delos: Leto with a phiale; a doe and a palm tree; Apollo with kithara and phiale and Artemis with an oinochoe, on either side of a kind of a low altar; olive tree; Delos with a phiale is seated to left on the Delphic omphalos; Hermes; tripod.

- A] RF cup. From Spina, Valle Pega. Eretria Painter. Third quarter fifth. 430-425 (L.-H.). *Lezzi-Hafter, Der Eretria-Maler (Kerameus 6, 1988) 36, 316/39, pls. 38-39. ARV(2) 1254/77.
- B] Int.: trainer and athlete (both young). A: discobolus; young trainer; jumper; youth; acontist. B: three athletes, that in the center a discobolus; youth and trainer.
- C] A: above the scene, widely spaced: Μελανιπ<π>ος κ[α]λος.
B: similar: [Χ]ρυσιπ<π>[ος] [κ]α[λ]ος.(1)
- D] = 9368. The kalos-names are not in Beazley. LGPN ii has both names but not these instances. Mixed alphabet. Ionic lambda. Three-stroke sigma.

(1)L.-H. writes both names with a single pi, as she does also for Hip<p>olytos in Ferrara T 128, q.v. below, which is also by the Eretria Painter. Is this her mistake? (By this time long consonants should be written out.)

- A] RF cup. From Spina. Eretria Painter. Third quarter fifth. 435-430 (L.-H.). *Lezzi-Hafter, Der Eretria-Maler (Kerameus 6, 1988) 33, fig. 7,b (dr. of detail) 148, 316/37, pls. 34-35. S. Aurigemma, Il R. Museo di Spina(1) (1935) 179,i,5, pls. 32-34. *ARV(2) 1252/52, Add.(2) 354.
- B] Int.: Apollo with a lyre, and the muse Kleo. A: departure of two youths, with two women with phiales and a bearded man with a scepter at left. B: departure of two youths, with a woman holding two phiales; youth and a bearded man with a scepter at left.
- C] Int.: above Apollo: Απολλον. Beside the muse: Κλεω. Ext.: the pertinence of the names is unclear, but see below: A: Αντενορ. Χρυσες.(1) Κλεο.(2) B: Ιπ<π>[ο]λυτο[ς].(3) Θεανδ.
Beazley's readings are less complete: A[v]τενορ. Χρυσι... Ιπ[πο]λυτο[ς] [note my suggestion below.] ...οε.(4)
- D] = 3035. L.-H.: the Ext. depicts the departure of Trojan heroes before the Trojan War: note Antenor (here the old king); Theano, the woman holding two phiales, is his wife. Their two sons are Hippolytos and Chryses. Is Kleo's name influenced by the name of the muse on the Int.? Note that Apollo was on the Trojan side. Cf. the departure of Achilles on Munich 7638, CAVI 7638 L.-H., cat., no 43, which is also by the Eretria Painter. - Note that Beazley in ARV(2) does not give a mythological explanation. He refers to

Ἑλένης Ἀπαίτησις 243-44. - Mixed alphabet. Ionic lambda.
Three-stroke sigma.

(1)so L.-H. in the cat.; the sketch on p. 33, fig. 7,b, shows the inscription starting above the head of the youth in the center and stretching out to the right (the woman with the phiale): Χρυσ[ε]ς. (2)L.-H. has an unclear note in the cat. about the position of Antenor and Kleo on A. (3)L.-H. has: |π[ο]λυτο[ς]. Could it be (Beazley's reading): |π[πο]λυτο[ς]? For the spelling with single pi (if that is right) see Ferrara T 11C VP, above. (4)the inscriptions are mostly taken from the sketches in L.-H.'s cat.

- C] Int.: Kleio.(1) Mosaios.(1) A: Ναια. B: Ν[αι]α. [K]λεῶ. - Q.'s readings differ from Beazley's but are also very poor: Int.: Μοσαιος. A: (I convert her '...' to '[-]'): [-]α. Μοσαο. [-]αεο. [Should this not be: [K]λεῶ(?)] A[-]ς. [Sigma printed as three-stroke.] B: |[-]α. |Α. Κλ[-]εο. [i.e., Κλεῶ(?)] Πολοι. ['arrow' lambda.] The pictures do not show the inscriptions. On p. 92 n. 9, Q. says that Clio appears twice, on the Int. and on B, at right [but I wonder if she does not appear on A also.] Musaeus appears both on the Int. and on A, left. (1)listed in section xv of the chapter on the potter Nikosthenes and compared to Vatican 456, CAVI 6999 (ibid.; see also 'Script' 226, fig. 68) for the position of the same inscription and other features. (2)Vatican 456 has a dot surrounded by two circles on the interior; I wonder if this is true of the Florence fr. too.

- A] Small neck amphora in Six' technique. From Saturnia. Unattributed.(1) Late sixth or early fifth. *ABV 672. *Vidi (A only).
 B] A: satyr dancing. B: similar.
 C] A, B, each(2): Πεισανδρ[ι]δεσ καλος.(3)
 D] Both Peisandros and Teisandros are found in Attica, but neither form in -ides is listed in PA or Pape; LGPN ii has P. only here.

(1)for similar vases see Beazley in ABV and Para. 318.
 (2)probably once on each side; Beazley simply says that it occurs twice; he does not say that it is Gr. (3)so ABV. My reading: starting to right of the satyr's face, diagonally downward, Gr.: (Π)εισ<α>νδρ[ι]δεσ καλος. The "pi" has a proper hook (though short), but the horizontal extends to the left of the long vertical, whence I considered (Τ)εισ<α>νδρ[ι]δεσ, no doubt wrongly. I think Beazley's reading and mine are from different sides.

- B] Neck: A: fight. B: arming: the right half is clear: a nude and bearded man is confronted by three women, two of whom carry shields, the third a sword(?). Body: upper zones: A: Amphiaraios leaving home. B: chariot race.(1) Lower zones: A: Heracles and Amazons. B: Dionysus with satyrs and maenads.
- C] Nonsense: neck: B: at the extreme lower right, facing the margin: (α)(ε)φχι.(2) Shoulder: A: to right of the head of the charioteer of the second chariot: γ(τ)ο(ε).(3) Between the wheel and the rear of the horses of the front chariot: στοακγ.(4) Between the horses' legs: γτο(ε).(5)
- D] + Berlin 1711. Very peculiar letter forms, characteristic

of the Castellani Painter.

(1)Shapiro thinks the subject is the Funeral Games for Patroclus: three chariots are racing; the last is crashing to the ground; at right, a goal post with a cauldron on top; bleachers with six unlookers; a tripod. (2)the first letter is a blob; the second is uncertain but perhaps an epsilon, though not lying on its side as the others; the third letter is a phi or perhaps theta. (3)the tau is not clear; the epsilon is horizontal with short vertical strokes; this could also be read retr. (5)epsilon as the last. The inscription is identical with the first in this scene.

- B] Shoulder: Heracles and Cycnus. Body: Peleus and Thetis in chariot (The Wedding, according to Shapiro).
- C] Body: to left of the heads of the pair in the chariot: Θυονε.(1) Διονυσος. Second pair: to right of their faces: Θετις. Between spokes of a wheel: Πελευς. Behind the horses, Apollo playing the lyre: Απολλων. Facing Apollo, the pair of Heracles and Athena: to left of their faces: ηρακλες, retr.(2) To right of their legs: Αθηναιας. Hermes: ηρ{ε}μες. Between the horses' legs: Αφροδιτε. Between the two figures at right: Ανφιτριτε, retr. Under the foot, Gr.: ligature of alpha and D-shaped rho. Hackl 340. TGV 131/9E 27.
- D] In ARV(1) attributed to the Andokides (i.e., Lysippides) Painter, in ABS and ABV to his manner. Recalls Exekias' North Slope krater (Beazley). - On Thyone-Semele, mother of Dionysus, see Shapiro, pp. 88 and 92. Phi with a long hasta. Threatte in GAI i and ii has a different reading for Hermes: ηρεμ[ς, adding that CV, p.12, gives the inscription incorrectly as ηρμες); he considers ηρεμε[ς a less likely reading. This is most fully discussed in vol. i. T. makes the error of thinking the vase is by the Lysippides Painter himself. - Rho once with extended vertical, as on the North Slope krater by Exekias.

(1)Körte identified Thyone with Ariadne, but Beazley points out she is Semele. (2)because of glare I could only see: ηρακ... , retr.

C] Shoulder: to Dionysus' lower right: Διονυσ[ος].

- A] RF cup. Oltos. Last quarter sixth. *ARV(2) 61/72, *1622. Bloesch, FAS 49/1 (poor reading). *A. Magi, CV, Italy 30, pl. 73,1-3 and 116,1 (much bibl.). A.M. Esposito and G. De Tommaso, Firenze, Museo Archeologico: vasi attici (1993) 50/66 (A).
B] Int.: horseman (jockey?) to left. A: heroes quarreling: two warriors, rushing at each other, are separated by a bearded man with a spear.(1) B: man or youth mounting a chariot.
C] Int.: to left of the horse: [M]εμ^νδ[ο]ν, retr.(2) Behind the rider: καλος, not retr. A: right under the lip: [Mε]μ^νδον καλος Αμοροχο̄.(3) B: right under the lip: Με[μ^νδον κα]λος.

(1)perhaps Odysseus and Ajax (ARV(2) 1622). (2)noted on p. 1622. The horses' forelegs intervene. (3)I take the name to be misspelled and in the genit. (father's name?). Beazley, p. 61, takes it to be a separate inscription and says: "I do not understand the second inscription on A." Αμοροχο does not show in the picture of CV; the photo. in Esposito and Tommaso (which has most of A) shows the letters AM only, at the right edge. The text in CV gives the inscription complete fore.

C] Int.: nonsense: on the left, starting near the foot: about

11 letters. At right, interrupted by the skyphos(?): about 9 letters?

- D] The inscriptions are quite prominent but the picture is too small to read them.

- A] RF cup. Makron. Hieron potter. First quarter fifth. Ca. 480 (Magi). *ARV(2) 460/15, Add.(2) 244. Meier, AZ 1884, 248. Beazley, VA 103/13. *A. Magi, CV, Italy 30, pl. 95,1-5 (cleaned; bibl.). Bothmer, 'Notes on Makron,' in: D. Kurtz and B. Sparkes, edd., *The Eye of Greece* (festschrift M. Robertson, 1982) 30 (added frs.).
- B] Int.: mostly missing: a winged goddess. A: Achilles and Ajax playing a board game; at left, trumpeter; behind the board, Athena. B: six warriors rushing to left.(1)
- C] On one handle, in red: $\eta\epsilon\rho\acute{\omicron}\nu\ \epsilon\pi\omicron\iota\epsilon\sigma\epsilon\nu$.
- D] + New York 1973.175.5; + 1972.70.1; both join. + Louvre C 12,222 (B: added by Guy). - The signed handle does not certainly belong (Beazley). The handle "potrebbe essere pertinente" (CV). For painted Hieron signatures see B. Cohen, 'The Literate Potter,' *MetMusJ* 26 (1991) 70-71.

(1)the subject is connected by Beazley with A.

- B] Int.: splanchnopt testing the entrails at a flaming altar. Ext.: between palmettes between eyes: a young athlete about to pick up halteres. B: a young athlete about to pick up a pick axe.
- C] Int.: $\kappa\alpha\lambda\omicron\varsigma\ \eta\omicron\ \pi\alpha[\iota]\varsigma(?)$.(1)

(1)so CV, text; the photo. shows four letters in front of the splanchnopt's face and three letters behind his back; they look more like nonsense than a proper kalos-inscription.

3559.

Florence 3944.

- A] RF cup. Colmar Painter. Euphronios potter. First quarter fifth. 500-490 ((Magi). *A. Magi, CV, Italy 30, pls. 85,1-3 and 116,10. Beazley, VA 81/3. Hoppin, RF i, 197/3. ARV(2) 353/4.

- B] Int.: a naked youth decanting wine from a large column krater. A-B: battles.
- C] Int.: 'iscrizione corrotta'.(1) A: above the scene: undecipherable inscription. B: illegible letters.
- D] + a Florence fr. Probably nonsense inscriptions on the Int., A, and B. The Ext. inscriptions do not show in the photos.

(1)the photo. shows, above the krater, some letters that suggest a nonsense inscription: (.)λο (not likely to be kalos).

- B] Int.: a nude warrior running. A-B: battles of nude warriors (on B, with horses).
- C] Int.: around the figure and along the margin, starting to left of the warrior's helmet and interrupted by the feet: $\text{ho } \pi\alpha\iota^{\wedge}\varsigma \text{ } ^{\wedge}\text{καλος}$, retr.(3) A: above the scene: nonsense(?) inscription.(4) B: a similar inscription.
- D] + fr. (see below). The pi strongly pinched in.

(1)attributed to the Painter of the Paris Gigantomachy.
(2)added fr., part ex Villa Giulia. (3)pl. 82,2 shows some of the letters. (4)CV says undecipherable.

(1)CV has a kind of facs., in which letter forms are given, I do not know how accurately.

- A] RF pelike. Berlin Painter. First quarter fifth. 500-490. Very early, ARV(2). *CV, Italy 13, III I, pls. 31,2 and 32,1-3. CV, Italy 8, p. 1. CV, Scheurleer 1, III I c, pl. 3,1 (neck fr.). ARV(2) 204/110, Add.(2) 193. 'Script' 491. A.M. Esposito and G. De Tommaso, Firenze, Museo Archeologico: vasi attici (1993) 53/72-73.
- B] A: Theseus and the Minotaur. B: Theseus and Skiron.
- C] A: to right of Theseus' middle: ΘΕΣΕΥΣ. B: To left of Theseus' back: (ε)ν γε. To right of his head: καλλιστος.
- D] + [Amsterdam?], Once Hague, Scheurleer Collection: neck. Beazley in ARV(2), following M. Robertson in JHS 70 (1950), attributes the vase to the very early Berlin Painter, but others had attributed it to Euthymides or the Kleophrades Painter and ARV(1) had given it to a "Vienna Painter." - The epsilon of εῦ γε is a clear nu and the inscription has been read νῦν γε by D. Levi (see 'Script', p. 82 and n. 11), but I think the nu is a copying error for epsilon ('Script', p. 173). Furtwängler saw καλε instead of καλλιστος on B; see FR ii, 80-81. - The letter forms are somewhat idiosyncratic: alpha with horizontal cross bar? Gamma = a vertical half-arrow.(1) Theta perhaps with diagonal cross stroke.(2) Upsilon with one hasta curved.

(1)so in the text of CV. (2)so my reading from the photo. in CV, but in another photo. I saw only a regular dotted theta.

Florence 3991.

- A] RF column krater. Chairippos Painter. First quarter fifth. 500-490 (CV). *CV, Italy 13, III I, pls. 38,3 and 41,1-2 (facs. in text). ARV(2) 236/1.
- B] A: fight: duel over a fallen comrade. B: komos: two youths (one with a cup).
- C] A: nonsense: imitation letters: between the heads of the duelists: λ(ν)(ο)(κ)γεσ.
- D] CV suggests E|υνοκλες, referring to Bechtel, Pers. 166; but it is clearly nonsense.

- B] A: Eos and Tithonos. B: companions and Laomedon seated.
- C] B: between the heads of the second and third of the last four companions, stoich. two-liner:
ε[γ]ραφ[σ]εν.
- D] + Florence 14 B 9 and two other Florence frs. In the signature, CV gives omicron, ARV(2), omega. Otherwise the alphabet is Attic in both.

- B] A: symposium: oinochoos; a bearded man reclining on a couch; a bearded man on a couch, seen from the back, holding a skyphos. B: a draped youth; a draped bearded man; and a pillar.
- C] A: on the skyphos, horizontal: (κ)(α)λ<ο>. (1) B: on the pillar: κ(α)λ<ο>. (2)

(1)the first letter a short vertical stroke. The reading is doubtful; I thought I saw (λ)δi in the photo. (2)alpha a triangle; sigma = >.

- B] Satyr and maenad.
- C] Under the foot, on the navel, Gr.: V>=.
- D] Johnston suggests interpreting the Gr. as '20 culixva' (i.e., kylikes). A similar Gr. on 'Unlocated', Attic krater from Poggio Sommavilla, CAVI 7860, cited TGV 62 n. 20. The Gr. was previously unpublished (J.). For kylichna see Colonna, ArchClass 25-26 (1973-74) 136-39.

- B] Upper zone: woman; chest; flying Eros with a lyre; woman with a lyre; youth leaning on his stick; woman seated with a [book?] roll(1); woman playing flutes; girl pyrrhic dancer on a platform; another waiting to dance; woman with a lyre; chair; two women conversing. Lower zone: Theseus (youth

with spears) pursuing a woman (ARV(2)).(2) At left, two women and a male (called Poseidon in CV).

- C] Upper zone: above the youth with the stick: Καλλίας.(3) Above the seated woman at left: Νικοπολις. Above the pyrrhic dancer: Κλεοδοξα. Near the flautist: Σελινικη.(4) Above the second pyrrhic dancer: Δορκα. Above the woman with the lyre: Πηγασίς.
- D] CV says the inscriptions are very incompletely preserved and uncertain. For Κλεοδοξα see LGPN ii. Some names are not entered there.

(1)so CV, but I do not have this in my articles on book rolls, since I thought the 'roll' was too thin and might be a pair of flutes. (2)CV says, Peleus pursuing Thetis. (3)so ARV(2) 1588. (4)Pape has Σελινικός from CIG 4.8450, which is this vase; LGPN ii has the feminine.

- C] A: to right of her head, in tiny letters: κληκίς.(1) B: to right of the youth's head: κ(α)λος.(2)
- D] All the letters are very idiosyncratic and peculiar.

(1)I merely try to give the shape of the letters; this is not a true heta. CV speculates: Κακίς = Χακίς. I thought of Κλυκίς = Γλυκίς (Γλύκη is known). Obviously badly miswritten.

(2)alpha lacks the cross stroke.

Theta 1 in Dip., 1 in Gr., but mainly 3 (see chart in 'Script').

(1)so FR i. Boll. has : Μα[ρ]φ[.]., retr. W. reads

Μαρφ[σο], after a Centaur name on a Chalcidian vase; see
his 93, top. (2)usually Ανκαιος (W.); cf. his 93/17.

(3)so fig. 157 in Boll.; Αντιμαχος, FR i, Boll., text, and

W. (4)my supplement (as most editors, according to W.); FR i

and Boll. read Εβολος. Threatte in GAI ii, 736 and

755-56 prefers Ε<μ>βολος (see SEG 34.50), [but this is not

read by Cristofani]. Ε<ν>βολος, Pugliese Caratelli, cf. W. 88

n. 11 and 93/24. (5)W. does not dot the last letter. (6)Ηπικπρ[.]ὸν, W.; see also 89 note 19 and 97/46. (7)so FR i; Boll.: very much rubbed in photos., figs. 74 and 212; text in Boll. has: ἡφαίστος. (8)so FR i and apparently the photos, figs. 75 and 213 in Boll.; the text has [O]κεανος. W. argues that the first extant letter cannot be a kappa; see 89 note 26 and 99/91. (9)mother of Thetis. (10)so Boll.; FR i has Νερ[ε]υς. Νερ[ε]υς, W. (the upsilon once clear). (11)for the non-Attic ending, see GAI i, 132, and W. 108, both citing Schulze. (12)so FR i; Ερα[τῶ], Boll. Ερατ[ῶ], W. (the tau once clear). (13)for Πολυμνις in lieu of Πολυμνία, see GAI ii, 104. (14)pi miswritten for delta. Considered a copying error in 'Script' (repetition of ΠΟ) but not by W. 99/69. (15)the triple punctuation is given by FR i, but not in the text of Boll.; however, I see a faint trace of it in the photos, figs. 80 and 197; the name of Kleio is written very close and a bit lower. See also W. 90 note 29. (16)Threatte in GAI ii, 262, says the true reading is Κλεῶ, but the photo. in Boll. d'Arte, p. 186, fig. 197, shows a faint iota very close to the letters epsilon and omicron. W.: Κλε{ι}ῶ; cf. 99/71 (the iota added later; the two forms much discussed, pp. 108ff.). (17)Δε[μετερ], Boll. W. has Δεμ[ετερ], a trace of the mu once extant). (18)βο[μος], Boll. (19)or Τρόον, as W. 100/101 points out. (20)[Πολυχ]σενε, W. (21)W. 95/24 notes that on Leyden PC 47 (CAVI 4196) there is a name Φαινικπρος. (22)see W. 88 note 13. (23)[E]υρυσθενες, FR i. The same name on Acr. i, 598 (CAVI 970). (24)so FR i; Κορ[ον]ις, Boll. Κορονις, W. (ον once visible); for the kappa see his p. 95/34, where he ponders whether to read Χορονις. (25)so FR i; --[ος], photo. in Boll.; beta for heta by error. W. gives {B}Ευχαισατο[ς]. On p. 95/35 he denies that this beta stands for heta (he is attempting to disprove that this (or any other mistakes) are copying errors as I have claimed in 'Script' p. 25; W.'s lengthy attempt at refutation, pp. 101-104, assumes that copying necessarily denotes illiteracy, which I would deny. (26)ἡρμιπο[ς], wrongly FR i. W. reads ἡρμιπκρος, thinking from the photo. that the final figma was never written. The fourth letter he also reads as a mu (in 'Script' p. 25, I wrongly followed Furtw.). (27)so FR i and W. ([Π]ροκριτος, the rho once clear); [Πρ]οκριτος, Boll. The name recurs on Leyden PC 47 (CAVI 4196). (28)Heta for beta; see figs. 65 and 173 in Boll. W. reads: [..?]επιhoia (for -βοια); see his p. 96/42 (he assumes that two letters are missing at the beginning). (29)the final epsilon not in FR i. Αρα.ν]ε, W., cf. 96/45 (he thinks the letter preceding the missing nu may be delta, nu, or gamma. But nu is unlikely as consonants are not written double on this vase). (30)the kappa is apparently incomplete but certain; see W., 97/55, who however dots it; 105 he suggests that Hes., Scut. 186 Αρκτοντ' for Αρκιον may be an error of transmission. (31){H}Ασβολος, W. (32)in BG on the white of the rock; given only by FR i (restoration called probable), not by

Boll. = W., no. 56a; see also 89 note 21. (33)FR i and Boll. fig. 190 show some traces of the missing letters, but they are unclear; FR iii reports that Wolters read Μελαγχαιτης. Boll. reads Μελαν[---], Μελαν[ιπ<π>ος](?). W. reads Μελαν[χα]ιτες (the iota and ες once clear); cf. 98/61, relying partly (and rightly) on Pugliese Caratelli. (34)not in FR i, since the fr. was discovered after the vase had been smashed; see FR iii, after Milani; gamma for delta. Cf. W. 98/62 with discussion of further possibilities. (35)Οροσβιος, W.; note also 89 note 24. (36)not in FR i. See Boll. W. follows E. Simon in reading [Ποσειδῶ(?)ν, because of the stick of what could have been a trident. (37)the theta only partly preserved now, see Boll., fig. 237. Αθ[ενα]ια, W. (38)gamma for delta; or an incomplete delta. {H}Αφρογίτε (for -δίτε), W., cf. also 100/121. (39)the iota perhaps added later. W. prints Ηεφα{ι}στος, by which he means that iota was added later; see 100/123.

- C] Body: above the horses' backs, at a distance from the humans: Ορριπῆπος.(2) Below this inscription, but starting further to left (not stoich. and not correlated with it as a two-liner): Ανχιπῆπος. Under the horses' bellies: Πεγαδας, retr.(3) To horses' right, not facing them: Καλλικόμε, retr.
- D] = inv. 1853. Anchippos is found also on Louvre F 53, Group E, signed Exekias as potter, ABV 260/30, CAVI 6291. Two human and two horse names. Orrippos should be the charioteer. Kretschmer derives Πηγαδας from πηγός 'compact, strong' and compares Pegasos (which is not derived from πηγή).

(1)i.e., not in Beazley. CV attributes to the Zürich Painter (see ABV 92). (2)a break passes through between the rho and iota. (3)so CV, text. The photo. does not show a clear gamma;

the letter is near a break and could be a tau. But Kretschmer also reads Πηγαδας. (4)the dotted letters are incomplete but certain.

Addendum: *Vidi: I read A: καλὸν εἶ. B: κύνα ἡμί, saying that this inscription is not Attic.

D] I do not think the inscriptions are nonsense, though they are probably partly miswritten. On A the seller is praising the oil.

- D] The signature from ARV(2), other inscriptions are given in Para. after CV. Tailed rho.

(1)The number is given in Para. as 73,759, but ARV(2) and CV have 74,750. Not in Add.(2). (2)or εγραψεν(?); see ARV(2). CV brackets the final nu. The photo. seems to show Δο[-]ς, etc., but that would imply a gap in the lost portion, unless the hare intervenes, which does not seem likely. The inscription is extremely well spaced. CV's reading Δ[ορι]ς gives the right spacing. The final nu must have been on the other side of the youth's head. (3)The bracketed tau is given as a chi in Para. (4)I assume the vertical line to be part of a chi and the inscription to be as on A. The rendering in CV is unclear.

- D] On p. 667 of ABV Beazley says that Helbig suggested Erasip(p)os. This would be $\eta\rho\alpha\sigma\iota\pi\langle\pi\rangle\omicron\varsigma$, but the heta needs to be explained. LGPN ii reads $\eta\rho\alpha\sigma\langle\iota\pi\rangle\omicron\varsigma\ \kappa\alpha\lambda\omicron\varsigma$, for $\epsilon\rho\alpha\sigma\iota\pi\omicron\varsigma$. But I wonder if the inscription, because of its position, does not bear a relation to Herakles, i.e a pastiche of $\eta\rho\alpha\langle\kappa\rangle\lambda\epsilon\varsigma$ and $[-]\sigma\langle\iota\pi\rangle\omicron\varsigma\ \kappa\alpha\lambda\omicron\varsigma$. 'Script' 166.(1) A.M. Esposito and G. De Tommaso, Firenze, Museo Archeologico: vasi attici (1993) 25/19 (A). *J. Kluiver, BABESCH 70 (1995) 59/2 and 65/2 (inscriptions done by C.J. - B] A: Liberation of Prometheus. B: Centauromachy.
- C] R.'s readings: A: ηερμε[ς]. Αθελαια. Προμηθε, retr. The end, -υς or -ς, was never written. ηερακλε[ς]. [Αιετ]ος, retr. Most of this name has disappeared with some repainting. The restoration is very probable. Δεμετερ. [Ποσει]δων. My earlier reading Απ{π}ο[λδων] was a mistake; 'Script' 166 needs correction.
- D] Restored. The readings of the third and fourth names are uncertain. Open heta. Dotted theta.

- A] BF lip cup. From Tarquinia. Xenokles potter. Third quarter sixth. 540-530. *Beazley JHS 52 (1932) 173. *ABV 185. Cf. 'Auktion' 34 (M.M.), no. 130. 'Script' 277. GAI ii, 184 and 186.
- B] Lip: A: hen between cocks. B: the like.
- C] Handle zone: A: Χσενοκλεες : εποιεσεν : .
B: [Χσ]ενοκλεες : εποιεσε[ν :].
- D] Beazley says that the cup is hardly by the same hand 'as the preceding' (which are also not certainly by the Xenokles Painter). Cahn thinks the vase is by the same hand as his no. 130. The signature also seems to differ from those done by the X. Painter (see 'Script'). But I have only ABV to go by. - Attic alphabet, except that according to ABV

the third sigma is four-stroke. - Threatte in GAI ii points out that the two signatures having the name in -εες (this and Athens 1045, CAVI 732) are [said by Beazley to be] different from the other signatures, all of which have -ες.

- B] Komos: A: youth playing the lyre; a young flautist, draped and wreathed.(1) B: youth with a skyphos and an oinochoe.
- C] A: around the flautist's head: καλ[ο]ς. B: to left and right of the head: καλος.

Hoppin, BF 201 (after Milani, with an alien piece). *Boardman, ABFV, fig. 153 (0arts). H. A. Shapiro, Art and Cult under the Tyrants in Athens (1989) 97, 136-37, 162, pls. 45,b and 46 (signature).
- B] Body: Heracles in Olympus (all seated). Lid: fight.
- C] Body: along the top margin and starting to right of Heracles' head, interrupted by his club, by Zeus' head and scepter, and ending at the head of the next figure:
Νικοσθενης εποισεν.(1)
- D] The line of the inscription is straighter than would be usual for Painter N. - Hoppin had added an alien piece, Philadelphia, BF pyxis [University Museum], which is discussed in Para.

- C] Int.: above the left youth's shoulder, non-stoich. near-horizontal two-liner(1): καλος|καλος. B: between the second and third figure, two-liner: καλο[ς]|καλος.
- D] A very sloppy vase. Coarse lettering. Ionic alphabet.

(1)not clearly left-aligned, as the kappa of line 2 is squeezed a bit to the right because of the shape of the youth's head.

- B] Int.: Hephaestus with his hammer and a flower [but see below] in a winged chair. A: youths bringing a bull to sacrifice; at left, a youth with two large knives; at right, a youth with a stick precedes. (1) B: three youths preparing their horses for a race; at right, a trumpeter.
- C] Int.: around the figure: an illegible inscription. A: along the lip, an illegible inscription [i.e. nonsense?]. Under the foot, Gr.: A.
- D] Cf. Berlin 2237, CAVI 2320, by the Ambrosios Painter, q.v.; there Cook interpreted the 'hammer' as a double axe and the figure as Dionysus, but Beazley and others do not follow him; see S.B. Matheson, *GRBS* 35 (1994) 351 and n. 22.

(1) behind his raised right arm is a reserved rectangle, the longer side vertical: taken by Magi with Beazley as a tablet to register the names of victors, but the 'tablet' has no markings whatever.

LIMC, numerous entries: Aphrodite, Chrysogeneia, Demonassa II, Eudaimonia, Himeros, Hygieia.

- D] Aphrodite is about to take part in a festival in her honor: note the chariot drawn by Erotes; the ritual objects carried by them; the names Herosora and Pannychis. Found in the same tomb as Florence 81,948 (below): the vases are a pair (Burn 44). Burn, p. 43 n. 94, cites E. Simon for the opinion that Demonassa is a form of Aphrodite Pandemos (further bibl. in the note). - Inscriptions after the transliteration in Simon, GV, except those marked (1), which are from AJA. The old drs. are rather unreliable. Erosora is translated "Frühlingshore" by Simon. For parallels to Demonassa see Malibu 82.AE.38, CAVI 4958, and 'Script'. - Ionic alphabet.

(1)see D]. For Ηροσωρα, see also Threatte in GAI ii, 115: probably formed from a gen. ἥρος of ἔαρ. T. cf. Εροσανθη on London E 718, CAVI 4642. (2)Chrysope (Burn).

Boardman, Athenian Red Figure Vases: the Classical Period (1989), fig. 285, above: dr. after Pfuhl, fig. 594 (shows inscriptions). [The picture in Pfuhl is from Milani, cf. LIMC, numerous reff.: Adonis, Aphrodite, Eudaimonia, Eurynoe, Eutychia, Himeros, Hygieia. *TGV 64, ch. 10 n. 4, 118/18C 78, 165/21F 13, fig. 13,1 (facs.).
- B] Adonis and Aphrodite: Chrysothemis seated; Eros; below: Eutychia with a mirror; Eudaimonia seated; higher up:

Eurynoe, with a sparrow, seated; Eros playing the iynx; Adonis and Aphrodite (seated); below: Eros pursuing a hare; girl with cymbals; a small Eros faces her.

- C] 1. Readings after 'Script' (Milani with some corrections from CV):

Χρυσοθεμις. Ευρυνοη. Ιμερος. Αφροδιτη. Υγεια. Παιδιά.

Παυθ(?)α[.....]. Ευτυ[χια]. Ε[υ]δα[ιμονια]. Αδωνιος. (1)

Ιμερος(?). One other.

2. Readings from CV: above the head: Χρυσοθεμις. Above Eutychia, the dr. shows: Ευτυ(^wing) vac. Not given in the text. To left of Eudaimonia's forehead: Ευδα(^forehead). No more in the text, dr., and photo. There is very little space for the rest of the name. Above Eurynoe: Ευρυνοη. Between the wings of the Eros with the iynx: Ιμερος. Above Adonis' head: Αδωνιος. Similar for Aphrodite: Αφροδιτη. To left of the left shoulder of a girl with cymbals (?): [-]ννυυ. (so the dr., after Milani). CV suggests Pannychia, saying that any traces are now completely gone. [I think: [Πα]ννυ[χισ], as the name of the girl with cymbals.]

3. Shapiro: Eutychia. Eudaimonia. Himeros. Hygieia. Paidia. Adonis. Aphrodite. Pandaisia. Pannychis. Eurynoe omitted?

4. Copies of the dr. in Nicole (Shapiro, fig. 16; Burn, fig. 24,a): Χρυσοθεμις. Ευτυ[χια]. Ευδα[ιμονια]. Ευρυνοη.

Ιμερος. Ιμερος. Αφροδιτη. Αδωνιος. Υγεια. Παιδια.

Πονος.(2) The companion with the tambourin has a short name of three letters which I cannot read; Burn says the name is Pannychis; see above. [Under the foot, Grr.:] a Gr. line across the foot. (υ)δ || M |||||. (3)

- D] These readings are not complete and do not agree with my original readings from the dr. in Milani that I used in 'Script' together with some corrections from CV, pp. 55-56. Ionic alphabet. - TGV, p. 64, chapter 10 n. 4: the Gr. seems to refer to the companion vase found with the present one in a grave of Populonia; i.e., it mentions two hydriai.

(1)Threatte in GAI ii, 108 considers this gen. and poetic.

[The gen. form in -ιος is cited by LSJ from Pherecrates Comicus, but the regular form is in -ιδος. A nom. Αδωνιος is cited by LSJ from Plutarch, Moralia 2.756c. The other names are apparently not in the gen.] (2)unclear: is this Panda[isia]? (3)according to the facts., the upsilon is in ligature with a rho 2: is this a writing error for υδρ<(?).

Tübingen fr.: a draped youth with his spear; hand: to left of the youth: [---]α^[---]. B: no inscription mentioned or seen. Under the foot, an Etruscan Gr.: see CV, pl. 101,3-4 (photo. and facs.).
- D] + Tübingen S/10 1535 (= E 23). CV does not indicate clearly where the Tübingen fr. fits in, but I think it gives part of Helen, in which case the alpha on this fr. should be that of παις on A.

(1)manner of the Brygos Painter. (2)attributed to Brygos. (3)from CV, text; faint in the photo. Alpha lacks the cross stroke.
(4)the heads of Theseus and Helen and that of the bearded man intervene. Clear in CV, pl. 100,1, which I think does not include the Tübingen fr.

- B] Int.: Head and foot of a satyr, dancing.
- C] Starting to right of head and continuing to left of foot, up and down, in orange approximating incision or reserved technique (Cohen): Αμα[---] and ε[---].(1)
- D] New frs. added prove the existence of the potter's signature of Amasis and an attribution to Skythes; see Mertens. Hence not all vases potted by Amasis are by the Amasis Painter (Isler). It is clear that the potter Amasis worked for RF at end of his career. - M.B. Moore, Attic Red-figured and White-ground Pottery (The Athenian Agora 30, 1997) 80 n. 8: ref. to Mertens in 'Papers ... (1987)' 173-75: she discusses 2 fragmentary cups in Florence from the AMA Group and 2 frs. in the Cahn collection, Cahn 696 and 695, CAVI 2607-8. [The Florence frs. are: the present vase and A, B 1, the first RF, the second bilingual. The second is uninscribed.] Cahn attrib. his frs. to Skythes; the inscriptions are: 696:]μασις. 695: [-]ς εποιεσεν. Mertens accepts the attribution and thinks Florence A, B 1 [which Beazley says is near Florence 1 B 6 (CAVI 3619) which he thinks probably has the sig. of Amasis] may also be by Skythes.

(1)Αμα[σις(?)] | ε[ποιεσεν(?)], Beazley. But see Mertens. On the question of the style, see 'Script'.

(1)unclear where this is listed in ARV(2): the index refers to Florence 1 B 52; under that number the index has: 1 B 52-53: [p.] 65. ARV(2) 65/106 is however listed as Villa Giulia (part ex Florence) and Heidelberg 4, and gives (for Florence) only 1 B 52. The subjects are: A: satyr, maenad, and B: satyrs. This does not correspond to the description in CV, for which see above. (2)sic. All readings from the text of CF.

the best reading is εποιε, complete. There was no proper name.

(1)so Beazley in CF: complete, rather than εποιε[σε]ν. But I did not see the final epsilon.

- B] Int.: two youths.
- C] Int.: Etruscan Dip.: metru.menece.(1)
- D] Fiesel 1934 suggested menece = made it or gave it. Gill prefers the former and thinks the vase was actually made in Italy (after Richter 1946), the clay being exported there. The inscription is painted before firing, in the regular manner (see Richter). Brendel thinks the subject is a youth and a boy in conversation. He discusses the possibility of the inscr. being Greek: the second word could be $\text{Μενελε}[\delta\varsigma]$ or voc. Μενελε [sic]. But the first word cannot be explained as Greek. An Etruscan worker in Athens or an illiterate Greek worker? - *TGV* 49: the vase is mentioned a propos the question of Etruscan participation in the trade, which had been claimed by Hackl 93.

In JHS Beazley notes that the Pacini cup, according to Pollak, incorporates frs. of two cups, one with a Tleson signature, the other with the Ergoteles signature. This is not mentioned in ABV, nor is there an entry for the Tleson portion. Perhaps Pollak was misled by the occurrence of Nearchos in the fragmentary signatures. I have not made an entry for a Tleson signature, but I would suggest (after JHS): A: Εργοτ[ελε]ς εποιεσεν [ho Nεαρχῶ]. B (or another vase): [ho δεινα εποιεσ]εν ho N[εαρχῶ].

- B] Seated woman (bride?) with Eros and a woman (Hera?). Behind her, two women (Aphrodite and Peitho?). See ARV(2).
- C] On the lip, in faint red: Φιντίας Αθηναιος εποει.
- D] The inscription recently discovered in a cleaning and claimed to be genuine, but see 'Script'. Note that the sixth-century Phintias produced two cockle-shell aryballoi signed by him as potter on the mouth: ARV(2) 25/2-3. L.-H. obviously accepts the signature. Her photos. do not show it. - Note that the writing imitates sixth-century letter forms. Threatte in GAI ii also accepts the signature and discusses the word Αθηναιος, when the name Phintias was originally that of a foreigner.

- D] Ex Roman Market (Penelli). Formerly Kunstgewerbe-Museum inv. 1391. For the names see Greifenhagen's discussion. He raises the question whether the Penelli vase is Frankfurt/Main, Museum für Kunsthandwerk WM 03, which is listed in Para. 140/9 bis, as Three-line Group, with bibl.: Die Kunstsammlung des Herrn Wilhelm Peter Metzler (1897), pl. 1. AA 1957, 770. CV, Frankfurt/Main 1, pl. 33,1-3. [I believe it is clearly the same vase (Loeschcke's readings being incomplete) and I am so listing it.] - One sigma sideways.

(1)K.-D. reads Οπισ (ῶπισ?), 'die mit dem eindruckvollen Blick,' after Greifenhagen, AA, p. 12. (2)Greifenhagen considered σφοδρός, with the possibility that the two inscriptions are continuous. Beazley suggested Χαροφος, retr. But K.-D. is probably right in supplying Σφο[λεας], which is for Φσολεας; cf. Cervetri, Museo Nazionale, CAVI 3126, BF Tyrrhenian amphora, which has the satyr name Σφολεας. See the discussion by G. Neumann, *ibid.* (3)Fränkel 21 compares the Homeric and Hesiodic Nereid Σπεώ.

A similar inscription to right of the rightmost dancer, also beginning with epsilon. (The photo. shows remains of six inscriptions, some to left of the couch.) B: similar.

(1)the photo., pl. 99B, shows the letters probably stoich., and on the same fr.; I am puzzled by the fact that the last two letters are in the same stoichoi, although line 1 has 9 letters and line 3 has 11. - D] O.-D. and according to her letter, Bothmer and D. Williams, declared the vase false, but I was not told whether the shape was ancient and whether the WG could also be ancient. My feeling is that the inscription cannot be proved to be a forgery from the xeroxes, but that I strongly suspect the whole scene and thus also the inscription. The vacat between words and the sigma with a squiggle can be paralleled; however the former gives rise to suspicions. - Williams thought the model for the satyr's face was the

centaur on Munich 2640, CAVI 5331, by the Foundry Painter; O.-D. thinks another model was Munich 2645, CAVI 5332, by the Brygos Painter. Attic alphabet. Three-stroke sigma with a squiggle.(1)

- B] Wedded Pair (Peleus and Thetis? Steinhart) in chariot to right; behind, Apollo with kithara and Dionysus with drinking horn; at right, a goddess to left.
- C] Along the right-hand margin, vertically down and facing the scene: *καλος Στεσιλεος*. Under foot, Gr.: delta with a vertical through it (see TGV 11E) and chi (cf. Warsaw 142,333, CAVI 8002, TGV 11 E 16).
- D] Ex Freiburg Market (Puhze). Inscription well spaced, filling the vertical dimension. ARV(2) only gives *Στεσιλεος*, which needs to be corrected to a regular kalos-inscription.

- B] Satyr with a thyrsus holding out a kantharos from which wine is spilling (libation).
- C] Nonsense: to right of his beard: *ππππππ*.(2) Below the end of the thyrsus stalk, to right of the satyr's legs: *γε(.)υ(σ)*.(3)
- D] Ex Philadelphia Market. Ex Basel Market (M.M.). The location of the vase is given in ARV(2) 1665. Pi with verticals of equal length.

(1)so Beazley in ARV(2); but a note from Cahn in *AK 16* (1973) 59 n. 15 says that he has abandoned the attribution [which had appeared in 'Auktion' 22]. I too would be doubtful of the attribution as the hand-writing differs from that of the Bowdoin Painter. (2)to the edge of the photo. in AK; the inscription may continue. (3)unclear in the photo.

B] Owl to left of an olive branch.(1)
C] To left of owl, downward and facing out: [h]ο παις.(2) To
its right, similar: καλ(ο)ς.(3)

(1) this is to left of the single handle; there must be
further decoration on the other side. (2) there is space in
the WG for the initial heta but it looks as if nothing had
been written there; however the disappearance of BG on WG
is common so [h] is probably justified. (3) the omicron looks
like an epsilon, somewhat disjointed, but that may be a
coincidence.

Gela. Duplicate of 7173 (Villa Giulia 50,321), q.v.

- A] Fr. of RF skyphos. From Gela. Unattributed. Second quarter
fifth. *P. Orsi, NSc 1900, 276/(c). Beazley, JHS 68 (1948) 27,
fig. 1. T.B.L. Webster, Potter and Patron in Classical Athens
(1972) 77.
B] A: Death of Hipparchos (story of tyrannicides): a raised
arm holding [a sword] above the head; at left, a bearded
man.

- C] Above the bearded man: Ἰππ(α)(ρ)χός. Above the other figure:
[Ἀρμ]οδῖος.(1)
- D] Orsi thinks another RF skyphos fr., also from Gela, NSc 1900, 276/(d), q.v. (see next number), may belong, but the subject is evidently different and (according to Webster) Beazley does not connect the two frs.; it could of course be from the other side. Webster thinks the four representations of the Murder of Hipparchus, being all of 475-460, are reflections of the post-Persian Group of the Tyrannicides by Critias and Nesiotes. - Now in Palermo?

(1)Orsi gives the inscriptions in the Ionic alphabet, but I am not sure that this is right.

- B] Aeneas leading Anchises (shield device: trumpeter).
- C] Nonsense: partly imitation letters: above Anchises' head: γν(.) υ. (.)(.). Below the shield: διν(.)α.
- D] Ex Navarra collection. Fairbanks read traces of: ΑΙΝΕΑΣ. ΑΥΧΙΟΣ. This must be wrong. But the nonsense inscriptions 'name' the two figures and perhaps imitate the two names.

C] On the phiale, below the rim, nonsense, in BG: λασασα.(1)

- C] Int.: between the satyr's legs: $\kappa\alpha\lambda\omicron\varsigma$. To right of his left foot (continuing the inscription?): $\lambda\omicron(\varsigma)$.(1) A: below the rim, widely spaced: $\kappa\alpha\lambda\omicron\varsigma$ and three letters: $\alpha\lambda(\cdot)$.(2) B: in a similar position: to left of the face of the second figure from the left (who is moving left): $\kappa\alpha\lambda\omicron\varsigma(?)$, retr.(3) Between the third and second figures: four more letters.
- D] The lettering is extremely free and casual. Mixture of sense and nonsense, or badly written ho pais kalos?

(1)so CV. Could this be: $(h)\omicron(\pi)\alpha\iota\varsigma?$ (2)so CV. The photo. seems to show the first two letters as: $\pi\alpha$. (3)so, it seems, the photo. CV reads a nonsense inscription on B.

- B] Int.: youth seated, with his stick. A-B: komos.
- C] Int.: starting above the youth's head, curving downward and ending to right of the stick: Πολυ^δεμος.(1) Along the stick and parallel to the last 5 letters of the name, vertically down and roughly stoich.: καλος.
- D] Type B. Attic alphabet.

- B] A: man with his staff, listening to: B: a youth with a lyre.
 C] Between the figures, in two lines: ἡοπαῖς καλός.
 D] So the text in 'Ars'. The figures are on the two sides of the oinochoe; hence the inscription must be in the front. S. does not say how the inscription is written.

 B] Int.: satyr squatting frontally, a drinking horn in the right hand. Ext.: plain.
 C] Int.: ἐποίησε^ν.(1)
 D] For ἐποίησεν without a name in Epiktetos see 'Script' 62.

(1)the picture shows the inscription to the satyr's left, along the left margin: ἐποίησε ends close to the head. The nu must be on the other side of the head, as indicated in Cahn's text; it does not show in the photo.

- A] RF lekythos. Providence Painter. Second quarter fifth. Ca. 470 (Cahn). *'Auktion' 34 (M.M.) 83/162, pl. 53. Para. 401, Add.(2) 274. E. Papoutsaki-Serbeti, *Ο Ζωγράφος της Providence* (Athens 1983), pl. 1.
 B] Nike flying with a sash.
 C] In upper right: ἡιππῶν and πα[-].(1)
 D] Ex Basel Market (M.M.). Cahn compares the lekythos New York 07.286.67 with Nike carrying a hydria and ἡιππῶν καλός, also by the Providence Painter; and Gela, ARV(2) 641/91.

(1)Cahn says the inscription is hard to read; he prints: ἡιππον/πα... I conjecture that the slash in 'Auktion' means that the words are in two lines; hence perhaps: ἡιππῶν [καλός] | [ἡο] πα[ῖς καλός], or some shorter version of this combination.

- A] BF Nikosthenic neck amphora. From Etruria. Painter N. 530-520. Ca. 530 (CV). *ABV 221/44, Add.(2) 58. The Marquess of Northampton, *Archaeologia* 32 (1847) 255-623, pls. 15-16. Burl. 1888, 47/107 and 1903, 94/G 3, pl. 89. Hoppin, BF 194 (A). Philippart, *AntClass* iv (1935) 212. Beazley, 'Notes on the Vases in Castle Ashby,' BSR 11 (1929) 6/11. *J. Boardman and M. Robertson, CV, Great Britain 15, Castle Ashby (1979), no. 18, pl. 19,4-8.
 B] Mouth: dolphins. Neck: floral. Handles, each: youth. Shoulder: between palmettes: A: duel over a fallen warrior. B: duel. Body: lotus frieze; below it: animals including an alien piece with cocks fighting, with a hen on either side.
 C] On the shoulder, under the handle (left, seen from A):

Νικόσθενης ἐποίησεν. On the alien fr.: nonsense: above the left cock, slightly curved: χακάσα.(1) Above the right cock, similar: [-]χα.(2)

- D] Ex Northampton, Castle Ashby. Much repainting; the surface damaged. The readings of the alien fr. in CV are there said to differ slightly from those given by others. CV seems to consider the two inscriptions as parts of one inscription, which seems to me doubtful as they are obviously related to the two cocks. The Second Marquess read the first inscription ΑΙΑΚΙΔ and referred it to Achilles whom he identified in one of the duels. Klein and Hopkins read a kale-name; Burl. 1888, the names of the cocks (see Beazley, 'Castle Ashby'). - It is unclear whether the foot is also alien as Beazley thought it might be.

(1)so the text of CV, with three-stroke sigma printed. (2)the inscription is clearly incomplete fore, but possibly also aft.

Gerhard, AZ 1846, 342/10. Furtwängler, AZ 1881, 302. Hoppin, RF i, 45. VA 93, top. O.S. Tonks, Brygos, no. 25. Philippart, AntClass 4 (1936) 213, para. 3/2. Beazley, 'Castle Ashby,' 19/28, pl. 10,3. D. Buitron, AJA 86 (1982) 458. *J. Boardman and M. Robertson, CV, Great Britain 15, Castle Ashby (1979), no. 63, pl. 41,1.
- B] A: upper parts of figures: hair, arm, thyrsus of a maenad; satyr playing the flutes; Dionysus seated with kantharos and thyrsus; satyr with a wineskin holds out an oinochoe to fill the kantharos; maenad with snake and thyrsus.
- C] A: in front of the right maenad's head: see CV, p. 25: Hartwig, following Furtwängler, read $\mu\alpha$ and suggested $\mu\alpha[\nu\alpha\varsigma]$, but pointed out that there was no trace of letters to the right of the maenad's head and that the existing letters might be nonsense. Beazley pointed out (this is confirmed by Hartwig's dr.) that there are only two letters, a lambda and a blob. K-.D. refers to CV, Castle Ashby, p. 25.
- D] Ex Northampton, Castle Ashby. - Furtwängler's error of combining this fr. with the Apollodoros fr. in Castle Ashby (no. 64, CAVI 2962, q.v.) was repeated by Klein, Brunn and Hoppin, but corrected by Hartwig.

(1)so ARV(2) 1649 (tentatively) and Para. 365 and 372. Attributed to the Brygos Painter in ARV(2) 371/16. NB: Hartwig accepted Furtw.'s att. to the Brygos Painter and so did Beazley (still in ARV(2) 371), but on p. 1649 tentatively, and in Para. definitely, he changed to the Dokimasia Painter.

- C] Under one handle, Gr.: *ηισχυλος εποιησεν*.
- D] Ex Rome, private (? seen by Rumpf, ARV(2) 162/14). The same

Cerchiai, AK 38 (1995) 84-85 and n. 23, pl. 23,3-4 (A, after Hornbostel).

- B] Neck: A: lotos-palmette. B: head of a bearded male. Body: main frieze: A: fragmentary: Achilles and Memnon fighting over a fallen warrior; at left, Hector and Eos; at right, Thetis and Diomedes. B: a boar and a lion, facing. Lower frieze: animals.
- C] Body: main frieze: A: to Hector's lower right, facing him: $\eta\epsilon\kappa\tau\omicron\rho$. Between Memnon's legs: $\text{Μενμ}\ddot{o}\nu$, miswritten for $\text{Μεμν}\ddot{o}\nu$. Above the head of the fallen warrior: $\Phi\omicron\kappa\omicron\varsigma$, retr. Below Achilles' shield (he is mostly missing): $[\text{Α}\chi\eta(\lambda)\lambda\epsilon\upsilon\varsigma$, retr. Between the legs of Thetis and Diomedes (both figures are fragmentary), facing him: $[\Delta\iota\omicron]\mu\epsilon\delta\epsilon\varsigma$.(1)
- D] Untidy lettering. Irregular variations of epsilon. Lambda without the short stroke? Peculiarities of the treatment of the myth are: Hector was killed before the fight with Memnon; Phokos (a half-brother of Peleus and cousin of Achilles on the mother's side) is not known as having been at Troy; the regular victim is Antilochos. Diomedes at the fight with Memnon occurs also on a Tyrrhenian neck amphora in Cervetri (Bothmer, referring to CV, Met. Museum 4, pp. 3f.).

Hornbostel, ed., *Aus der Glanzzeit Athens: Meisterwerke griechischer Vasenkunst in Privatbesitz* (cat. of an exhibition in Hamburg, Kiel and Bremen, 1986-1987) 40/4 (A, B).
- B] A, B, each: Boar Hunt: in the center, a boar to left; on either side, a woman (Atalante duplicated?); at left and right, each, a horseman; on the boar: two dogs.
- C] A, B, each: numerous nonsense (imitation) letters and dots. E.g., B: above the boar, along the margin, horizontal: 23 letters, including many Attic lambdas and some kappas. Between the dogs, vertically down: 11 'letters', mainly dots. Under the boar's belly, curving upward: 15 letters, including a largish omicron S 14 (see the chart in 'Script') and some lambdas. A has at least seventeen inscriptions; B has 22; under one handle: one more. These are long strings of tiny imitation letters.
- D] Hornbostel gives no location or bibl.

- C] A: nonsense: between the left palmette and horses, in an uneven line: 11 letters (many sigmas). Between the warrior and the right-hand palmette, similar: $\sigma\epsilon\omicron\nu\epsilon\tau\nu\chi\sigma\iota$, retr.

- B] Int.: surrounded by a tongue border: a doe to left, scratching its head with its left hind leg.
- C] Int.: above the doe, nonsense: $\phi\iota\lambda\epsilon\delta\iota\epsilon$.(1)
- D] Hornbostel does not mention the inscription; he gives no location or bibl.

(1)the third letter = V-shaped upsilon; the fourth letter no doubt an epsilon with one stroke omitted. One is tempted to read $\phi\iota\lambda\epsilon\delta\iota\epsilon$ 'delight', referring to the scratching, despite the non-Attic ending.

- B] No figured decoration.
- C] A: between handle palmettes: $\chi\alpha\iota\rho\epsilon\ \kappa\alpha\iota\ \pi\tau\epsilon\iota\ \epsilon\nu$. B: similar.
- D] Mentioned by P. Heesen in CV, Netherlands 8, Allard Pierson 2, p. 50, and attributed to the Tleson Painter. - Other

- C] Nonsense: A: to left of the scene, horizontal: at least 15 letters. Above the chariot, roughly horizontal: a long inscription: the beginning has 4 letters, then comes a long gap, the end has at least 6 letters. To right of the scene, bearing slightly downward: at least 16 letters.

- B] Int.: (not ill.): komos: a youth with his stick and his cloak on his arm rushes to right, looks back. A: four naked warriors, all with shields, three with Phrygian caps, one with helmet and greaves, two with horses (these have peltae). B: naked warriors with helmets and shields fighting with spears.
- C] Int.: ho pais kalos (so the text, not ill.). A: the photo. shows letters along the top margin, not mentioned in the text. B: the photo. shows nonsense letters on the shield of a falling warrior: $(?)\pi\alpha^{(i)}(\cdot)\sigma.(1)$

D] Hornbostel connects the vase with the 'Coarser Wing'.

(1) this somewhat resembles πας. The first letter is a slight dot, perhaps not a letter; the fourth letter is a stroke ending in a blot; the fifth letter resembles a gamma; the sigma is four-stroke. The leg of a warrior intervenes.

- D] Cahn's handling of the inscriptions leaves many questions unanswered. Tiverios discusses the relation to Pherecydes. Mixed alphabet?

(1)so Cahn. The first is supposed to be for Peirithoos. Probably: Πε[ρ]ι(θ)ῶς. (2)Guy, who identified this fr. (3)possibly hē[ρ]ακλεε(ς). (4)should be Ἄδρῶ. (5)see Cahn, p. 109. A similar Gr. is found on a pointed neck amphora by the Copenhagen Painter, Zürich, University (loan): see C. - B] Shoulder: Heracles and the Lion, between Athena and Iolaus. Body: three horsemen to right with three dogs, getting ready for the hunt; a fourth man on foot.
- C] Body: nonsense: the photo. shows three letters to right of the left horseman's face; two letters (the second an epsilon) to left of the middle horseman's (who looks left); two letters by his spears; three letters, vertically down, to upper right of the right horseman; four letters vertically down to right of the right horse.(2)
Note from Steinhart: The inscriptions are partly imitation, very slight and unclear; also not well preserved: to right of the leftmost horseman's face, not straight: (v)(.)^(.). (two spears intervene). To left of the second horseman's face (he looks back): γε. To right of the second horse's head (near the head of the third horseman), vertically down: κyo. (Steinhart reads KLO but he misreads the gammas as lambdas.) To right of the third horse's upper body, downward: vye(i). Under the head of the rightmost dog: perhaps two letters, horizontally.

- D] Cahn compares two hydriae attributed by Beazley to Antiope Group I: Oxford 1947.264, CV, Oxford 3, pl. 40,2 (not in CAVI), same body picture, probably same hand; and London B 306, Para. 165/68 (CAVI 4276), probably also by the same hand.

- D] Steinhart reports on an interpretation that all three images refer to the evening of 12 Anthesterion and the time of the marriage of Dionysus with the Basilinna.

(1)her pose is that of the sleeping maenad but her eye is open; Steinhart thinks she is awaiting the visitor.

(2)Steinhart thinks this could refer to the shepherd. He does not refer to inscriptions on the Ext., but I seem to see a few letters in the ph. of A on p. 100.

- D] Mixed alphabet in a peculiar manner. Note the confusion between epsilon and eta on A.

(1)said to be probably a 'Steinhuhn' by S.-E., whatever that is. (2)the sigma is written vertically; it is not a nu. (3)the lambda has a crook in it, making it look like a four-stroke sigma. - The word for spindle (ἄτρακτος) can be masculine; and κάλαθος certainly is; this may explain the two kalos', although they are not placed near these objects; otherwise they ought to refer to unseen admirers.

(1)the first delta has an upright cross, or chi, scratched over it, which S.-E. takes to mean that it

has been crossed out, changing the numeral 28 to 18; she thinks this refers to the number of pots of this kind delivered. [The photo., pl. 47,3, gives the impression that the cross is more casually drawn than the original letters and may thus be by another hand, which supports S.-E.'s interpretation.]

- D] CV: Hieron and Pasiades are now rejected by most. The vase is very poorly preserved, having been repainted and later cleaned in Berlin in 1959-60. Rohde does not discuss the inscriptions. The old dr. in 'Mon.' as reproduced by FR is probably unreliable; it shows many letters on the Int., A and B. ARV(2) gives the two inscriptions on A as being on two different sides and does not mention the inscription given in FR for the other side of the exterior.

(1)influenced by Euphronios and the Sosias Painter. (2)potter and painter. Robertson inclines toward an attribution to the Eleusis Painter. (3)said by Hauser to have disappeared; see FR iii, 17 n. 8. Furtwängler had read ἠερῶν ἐποίησεν, which is impossible. (4)the dr. in 'Mon.' shows traces of letters for the omicron sigma of the name. (5)The pi is very uncertain. Hauser had read [Π]ασιαδης [εγραψεεν]; see FR. Ohly-Dumm considers Pasiades the name of the symposiast. (6)so FR after Mon. This should be a name ending in -αγορας.

- D] Beazley lists as 'Once Gotha 51,' but Add.(2) without the
'Once'. Listed in 'Script' as having a dotted delta. Matheson
omits the inscription for Iolaus. Webster read the
Nike-inscription [Πυθ]ια. Mixed alphabet.

(1)the iota is a dot. (2)so the facs. in CV; these should be

B] Race of Pelops and Oenomaus.
C] Nonsense: under Pelops' winged horses, horizontal: (.)ε)εh, retr. The inscription runs into the horses' rear legs. It is very peculiar: the first letter is very large and looks

like an Ionic gamma; it touches the top of the next letter so that it is not quite clear that that letter is an archaic epsilon. The next letter is a rectangular epsilon with very short hastae; it is much smaller; the last letter is a normal heta, still smaller.

- D] Acquired 1872/73, but previously unpublished. Schwarz suggests that the woman is a hetaera rushing to accompany the lyre player to the symposium. - The sigma is very peculiar: first there is a raised dot, then a four-stroke sigma with horizontal top and bottom (Σ), but facing left. A similar sigma is found on Mainz, University inv. 112 (CAVI 4916); peculiar sigmas are frequent in the Penthesilea workshop. The inscriptions are exceptionally well preserved. Ionic alphabet.

- B] Int.: horseman. A-B: symposium with kottabos players.(1)
- C] Signature of Apollodoros (see Giroux). A: at right, a youth to right and a bearded man with a lyre to left, on a couch; the youth holds two cups with offset lips, one raised for the kottabos; on each cup, on the lip: καλος. Under the handle A/B: a flat pan, on which is a small tripod surmounted by a phallos bird (taking the place of a kottabos stand); on the pan's body: κότκταβος.(2) B: at left, two youths on a couch; that on the left raises a cup for the kottabos throw; that on the right holds a cup; the kottabos cup is apparently shown in profile

with an inscription on the inside: καλῆ; on the body of the other cup: καλος. Neither cup has an offset rim.

- A] RF cup. Penthesilea Painter (Kurtz, Robertson). Second quarter fifth. *E. Keuls in E. Bohr and W. Martini, eds., Studien zur Mythologie und Vasenmalerei: Konrad Schauenburg zum 65. Geburtstag am 16. April 1986 (1986) 83-86, pls. 14,1-2 and 15,1. Sammlung Holger Termer: Kunst der Antike, Katalog I (Hamburg, ca. 1982), no. 30. W. Hornbostel, ed., Aus der Glanzzeit Athens: Meisterwerke griechischer Vasenkunst in Privatbesitz (cat. of an exhibition in Hamburg, Kiel and Bremen, 1986-1987) 127/61 (all, showing some inscriptions; also exc. detail of one two-liner, on p.127) (listed as Germany, Private).
- B] Int.: youth with two spears(1) pursuing a fleeing woman; at right, an altar. A, B, each: three pairs of satyr and maenad.
- C] Int.: two left-aligned stoich. two-liners: between tops of heads, bearing slightly upward: ἡο παν|καλον. To right of the youth's upper right, diagonally downward, two-liner in oblique stoich.: ἡο παν|καλον.(2) A: Hornbostel's text says, three kalos-inscriptions; photo. shows one, horizontal,

near each pair of figures. B: text says, three inscriptions, photo. shows a few unclear traces. Inscriptions are probably all left-aligned stoich. two-liners. I am not sure that all replace final sigmas with nu's.

- D] The nu's are clearly found on both inscriptions on the Int.; one inscription on A seems to have $\kappa\lambda\omicron\nu$ also; I cannot tell about the rest. But this is not the 'upside down' four-stroke sigma one sees on other vases by the Penthesilea Painter, but a substitution of real nu's.

(1)Theseus (Termer cat.). (2)this is the inscription of which there is an enlarged detail on p. 127 in Hornbostel.

B] Int.: youth leaning on his stick and contemplating a pillar (stele?). A: three youths: that in the center presents a hare to a youth, who is leaning on his stick(1); that on the right holds out an astragalon; at right, a pillar. B: a youth in the center, between two other youths leaning on their sticks; in the field, halteres.
C] Int.: to left and right of the youth: $\eta\omicron\pi\alpha\iota\varsigma$ and $\kappa\alpha\lambda\omicron\varsigma$. On the pillar, in BG: $\eta\omicron\pi\alpha\iota\varsigma$. A: to left and right of the central youth's head: $\pi\alpha\iota\varsigma \wedge \kappa\alpha\lambda\omicron\varsigma$. On the pillar, in BG: $\eta\omicron\pi\alpha\iota\varsigma$. B: to left of left youth's head (he faces right): $\eta\omicron\pi\alpha\iota\varsigma$. Between the left and central youths: $\kappa\alpha\lambda\omicron\varsigma$. To left of the head of the right-hand youth (who faces left): $\eta\omicron\pi\alpha\iota\varsigma$.
D] Done from the text in CV. Is one 'ho' really missing? - Youths leaning on sticks are not usually eromenoi, I think.

B] A: Apollo citharoedus between Hermes and Athena. B: Heracles and the Lion, between Iolaus and Athena.
C] Under the foot, glaze Dipp.: three separate lines, not parallel: 1. in small letters: νοι(σ).(2) 2. in larger lettes: γαβ, if Attic; or λαβ.(3) (F. does not have an explanation.) 3. in medium-sized letters: Σμδν.(4)
D] Simon(5) perhaps a trader; see TGV, p. 189. Johnston also refers to his article in PP in which he pointed out that the first letter in γαβ is hard to interpret as Attic (it may be an Ionic lambda); but he prefers to read it as a gamma. This is the only letter in the glaze dipinti which may not be Attic. J. implies a date in the last quarter of the sixth century when he compares Munich 1686, CAVI 5188, which he dates 520-515.

(1)not in Beazley. (2)Follmann takes the first two letters (which touch) as one, but cannot decipher them; the others, she suggests, are most likely: iota, nu, iota xi or sigma. For the the first letter, F. cites Munich 1706 (cf. TGV 86/33A 11, Hackl, pl. 2) and Munich 1384 (TGV 86/33A 1); hence my reading may be quite wrong. (3)Johnston prefers gamma. (4)so also F., but she thinks the omicron (which has a squiggle added to the circle) is an omega. She cites as a parallel the Gr. on Munich 1686, Hackl 105, TGV 77/19A 2 [see further], CAVI 5188. Johnston too thinks the inscriptions

are connected. (5)Johnston says the name Simon occurs twice, but I do not have this information from CV.

- D] = 1925.30124A (so Bea. Arch.) - Olympias is the spirit of Olympia. The same figure is mentioned on a painting ordered by Alcibiades from Polygnotos' brother or son, in which he was seen being crowned by Pythias and Olympias (one ref. is Athenaeus 12.47, cf. also Plut., Alc. 16). According to Robertson, the meaning of the figure is that the winner of the Panathenaea will go on to the much more prestigious Olympic festival. The column symbols have the same reference; they reappear on Louvre MN 706, CAVI 6697, which must be of the same year. - The athla inscription is Attic, the archon inscription and the name are Ionic.

D] Ex D.M. Robinson. Now in the Sackler Museum where I saw it in 1991. Possibly the potter's dedication, giving his name. The coarse lettering might conceivably fit Lydos' hand.

(1)not [σοφί]ῆς ἔργον, poetic, which does not scan. Possibly [περικαλλ]ῆς ἔργον. For τέχνη ἔργον see DAA no. 244 as restored. Robinson had read Ἐριν ἔς ἔργον or Ἐριδες ἔργον, which will not do.

Prat, Salas de arte antigua (1956) 5, 9, and 16 [since cleaned]. R. Olmos, Vasos griegos de la Coleccion Condes de Lagunillas (1991), no. 11.
- B] A: Athena. B: four hoplitodromoi.
- C] A: to right of the left column: vac.1 $\tau\omicron\nu\ \text{A}\theta\epsilon\nu\epsilon\theta\epsilon\nu\ \alpha\theta\lambda\omicron\nu$ vac.1. B: the shield device of the front runner: A (white on BG background).
- D] Ex Lagunillas collection. Probably = Brandt, Arch. Panath. I, 8/66, and J. Frel, AAA 2 (1969) 384, fi5 (A). Olmos thinks the front runner on B is Achilles; this is denied by R. Lindner in Kotinos (Festschrift E. Simon, 1992) ca. 196ff., n. 16; I think he is an Athenian.

- A] RF lekythos. Pan Painter. Second quarter fifth. *H. Comfort,

- B] A servant girl ladling from a skyphos into a phiale and a seated woman holding the skyphos and a loaf(?). Plemochoe on the floor, kylix on the wall.
- C] To left of the woman's mouth, above the skyphos, but not retr.: ο(ρ)ευς. Above her head: καλε.
- D] Ex Haverford, Alden Simpson. The first word looks like a proper name, but is unexplained, although M. Lang tries to decipher it in 'Aspects of Ancient Greece' (Allentown Art Museum) 84 n. 2. The καλε refers to the mistress. The rho miswritten; could perhaps be alpha or kappa? - Fairbanks, *Ath. Lekythoi* (1907) Gp C, Class 5, no. 39 and p. 218 n. 1, refers to this lekythos; he has no accurate information beyond the fact that it has the Hygiainon kalos inscription [which it does not].

- B] Woman holding out an oinochoe; at right, a chair.
- C] To right of her head, stoich. left-aligned tabella: Ευαι(δ)ν|καλος|Αισ(χ)υλο(.). Αισσχυλō corrected to Αισχυλō by changing the sigma to chi and the chi to upsilon. A blot after the name.
- D] Mixed alphabet. Omicron miswritten in the name Euaion; this last is read omega in ARV(2), but that is uncertain. I am now not sure that 'Script' is correct in calling the alphabet near-Ionic.

Heidelberg.

- A] Fr. of pottery. Unattributed. Date? *R. Hampe, *AA* 1969, 107-108.
- B] No figured decoration mentioned.
- C] Gr. on sherd apparently in four lines:
[-ca.5-]ς
[-ca.3-]λευς
[.]πολωνιδες(1)
- D] If the Gr. is really in four lines, it should be a list of names, not an ostrakon (Hampe).

(1)the first extant letter in line 2 could be sigma. Line three is uncertain; if pi is read correctly, [O]πολωνιδες could be for Ophelonides, cf. DAA 120 and 291 (Ὀφολονιδες). Why not: [A]πολλωνιδες(?).

- A] Fr. of BF/RF cup. Manner of Onesimos (Beazley). Onesimos (Williams). First quarter fifth. Early (Beazley, Williams). *D. Williams, 'Onesimos and the Getty Iliupervis,' GVGGettyMus 5 (1991) 42 and 44, figs. 3,a-b. *Beazley, JHS 51 (1931) 45/15. ARV(2) 52, 330/1. Cohen, Bilinguals 526/B 133.
B] Int.: top of a satyr's head, with drinking horn. Ext.: coral red.(1)
C] Int.: above the satyr's head: καλος, retr.
D] + Florence fr., which may give the lower half(?) (Beazley). The inscription refers to the satyr, as there is a large vacat fore.

(1)Williams says that the coral red suggests that the Ext. may once have been decorated with figures, possibly BF. For the latter, cf. Basel BS 458, CV, Switzerland 6, pl. 3, CAVI 1990; and Louvre MNB 2042, ABV 400. See also Cohen, Marsyas 15 (1970-71) 9-10. Beazley in ARV(2) says about the Ext.: "A, in bf. on a coral-red ground, (bit of cloak)."

(1)sigma with what may be the lower arm of an epsilon before it (Beazley). I read from the photo.: [-](.)ς. [The photo. shows that this is definitely a final sigma. The date of the fr. suggests [ηικετ]ες.]

- A] Fr. of lip cup. Tleson Painter. Tleson potter. Third quarter sixth. *ABV 181/9, Add.(2) 50. *H. Gropengiesser, CV, Germany 31, pl. 154,1; facs. p. 30. Beazley, JHS 52 (1932) 184.
- B] Undecorated.
- C] A: handle zone: starting at some distance from the left handle palmette: Τλεσῶν ho Νεαρχῶ [---].
- D] The typical hand of the Tleson Painter. A slight backhand in some letters, e.g. sigma. The question whether any of the Heidelberg frs. S 28, S 29, S 30, S 31 are from the same cup has not been resolved.

3977.

Heidelberg S 29.

- A] Fr. of lip cup. Tleson Painter. Tleson potter. Third quarter sixth. *ABV 181/7, Add.(2) 50. Beazley, JHS 52 (1932) 180. *H. Gropengiesser, CV, Germany 31, pl. 154,2 (no facs.).
- B] A: lip: partly missing; it could have had a picture.
- C] A: handle zone: [Τλεσῶ]ν ho Νεαρχῶ εποιεσεν.
- D] From the same cup as S 30? (Beazley); but CV does not mention any possible connection with S 28 or S 30. The hand is typical of the Tleson Painter. The epsilons have longer strokes than on S 28.

3978.

Heidelberg S 30.

- A] Fr. of lip cup. Tleson Painter. Tleson potter. Third quarter sixth. *ABV 181/8, Add.(2) 50. Beazley, JHS 52 (1932) 180. *H.

Gropengiesser, CV, Germany 31, Heidelberg 4 (1970), pl. 154,3; facs. p. 31.

B] Most probably undecorated.

C] A: handle zone: [Τλεσδ̄ν ho Νεαρχ̄δ̄ εποιε[σεν].

D] From the same cup as S 29? (Beazley); but CV does not mention any connection with S 29. The hand is typical of the Tleson Painter.

3979.

Heidelberg S 31.

A] Frs. of plain lip cup. Tleson Painter. Tleson potter. Third quarter sixth. *ABV 181/10, Add.(2) 51. *H. Gropengiesser, CV, Germany 31, pl. 154,4. Beazley, JHS 52 (1932) 184.

B] Undecorated.

C] A: [Τλεσδ̄ν ho Νεαρχ̄δ̄ εποιεσεν.(1) B: [χα]ιρε και πι[ιει ευ].

D] The fr. of B mentioned by Beazley in ABV is lost (Gropengiesser). Note the combination of signature and greeting. Epsilon with very short hastae; the sigma in backhand.

(1)CV: εποιεσε[ν].

3980.

Heidelberg S 32.

A] Fr. of lip cup. Unattributed. Third quarter sixth. *H. Gropengiesser, CV, Germany 31, pl. 154,5 (no facs.; no bibl.).

B] A: no figured decoration preserved (only a bit of the lip).

C] A: handle zone: [--- ε]ποι[εσεν].

D] Gropengiesser does not mention any connection with Tleson and the letter forms do not suggest it to me.

3981.

Heidelberg S 33.

A] Fr. of lip cup. Unattributed. Third quarter sixth. Mid-sixth (G.). *H. Gropengiesser, CV, Germany 31, pl. 154/8 (no facs.; no bibl.).

B] A: lip: no figured decoration preserved.

C] A: handle zone: at right, a trace of the handle palmette; at left, nonsense in large letters: [--](.)ο(σ)λ(ρ)λι vacat.

D] I assume the inscription is Attic, although Gropengiesser thinks the vase perhaps an Ionian imitation of an Attic LM cup; but the writing looks more like an illiterate attempt. The letters are uncertain and lack direction.

3982.

Heidelberg S 34.

A] Fr. of BF lip cup. Unattributed. Third quarter sixth. *Beazley Archive db, no. 4055. *H. Gropengiesser, CV, Germany 31, pl. 154/7 (no facs.; no bibl.).

D] Done from the photo. Nonsense: the inscription may mock

epoiesen but not as closely as S 35.

(1)the first letter is no doubt an iota. The fifth letter and the ff. are faint but clear.

3983.

Heidelberg S 35.

- A] Fr. of BF lip cup. Unattributed. Third quarter sixth. *Beazley Archive db, no. 4054. *H. Gropengiesser, CV, Germany 31, pl. 154,6 (no facs.; no bibl.).
- B] Lip: A: bull.
- C] A: handle zone: probably well centered: nonsense:
εποιεποσυποισποισυ(·)[-].(1)
- D] Mocking an epoiesen signature. Small letters. For the mock inscription Gropengiesser refers to Beazley, JHS 52 (1932) 194f. and to Berkeley 8/358, CAVI 2200. Cf. 'Script' 282-284. Fellmann in CV, Germany 56, Munich 10, compares Heidelberg S 35 to Munich 9422, CAVI 5382 (which has a different animal on the lip and long nonsense inscriptions with repeated ωπ and ων) saying that the former has a bull on the lip and inscription with ωπ pattern. He asks: is coincidence excluded? [I rather think it is.]

(1)the last letter is in the break.

To right of the second warrior's forehead: λονονογ.(1) Under the boar's belly (and above a dying warrior): γογογογ. Between the dog on top of the boar and the first warrior to its right: λονογ(.)(1) B: between the legs of the third warrior: νο(.)[--]. Above the shields of the second pair of duelists: νοονογ. To left of the upper part of the male with the wreath: (ι)ονον. To left of his lower legs: νοουνο(ο).(2)
- D] Listed as Germany, Private in Hornbostel, *Schätze*; as Hamburg, Kropatschek in the Kropatschek cat.; I have changed this to Helgoland. - The style of the inscriptions differs from those of the Kropatschek cat. 73/49, by the same painter. - Listed also as Basel Market.

(1)the last letter damaged. (2)this could also be read: γογογο(ο), retr., i.e. facing the figure.

- C] A: at left: [Αρι]σ[τ]ειδες. Under the foot, Gr.: Mo.(1)
- D] Ex Basel Market (M.M.)(?): so ARV(2) and Add.(2). Langridge

told me, Helgoland, Private. Add.(2) has a reference to the cat. of the Kropatscheck Collection; the statement that it is now in the Basel Market may be an error or the Kropatscheck collection is being sold. - Shapiro thinks this should be Aristeides the Just whose birth he puts ca. 535. Davies, APF, had been vague on the birth date, 530 or 520. A. was a grandson of Kallias I of the family of the Kerykes.

(1)the readings are taken from the Sonderliste and Hornbostel. I assume that the kalos is lost.

C] A: τῶν Ἀθῆνῶν ἐθῆεν ἀθλῶν.
D] Eschbach dates the Kuban Group later than Süsserot. Mixed alphabet. Ionic are lambda and omega, Attic is epsilon for eta; 'syllabic' heta is used after theta: see Sprunt Studies. - GAI i, 46 misunderstands my analysis of θῆεν in Sprunt Studies.

Hillsborough, CA, William Randolph Hearst 20.

- A] RF bell krater. Kadmos Painter. Last quarter fifth. 435-420 (I.K.R.). *I.K. Raubitschek, *The Hearst Hillsborough Vases* (Mainz 1969) 71/20, (A, B and parts). *E.M.W. Tillyard, *The Hope Vases* (1923) 82/139, pl. 23. W. Tischbein, *Collection ... Hamilton* (1791-95) i, 82/139, pl. 33. Inghirami, pl. 327 (after Tischbein). *Élite*, ii, pl. 62 (after Tischbein). Gerhard, *Auserl. Vasenb.* i, 210. Kretschmer, *Vas.* 145. C. Fränkel, *Satyr- und Bakchennamen* (1912) 70, 96/u. RE, s.v. Molkos (Scherling). ARV(2) 1185/13, 341, Add.(2) 341. H. Froning, *Dithyrambos und Vasenmalerei* (1971) 37 with n. 234, and 40/K 10. *A. Kossatz-Deissmann, *GVGettyMus* 5 (1991) 163, MOLKOS 1.
 B] A: in the center, a satyr (Marsyas) seated on a rock and playing the flutes; to his right, a tripod; at left, a woman holding a torch; at right, a youth (Apollo) with his staff ending in laurel.(1) B: three youths.
 C] A: above the woman: Νοσσ. Above the satyr: Μολκος. Above the youth: Αλκισ.(2)
 D] Gerhard had suggested reading Μολπος and this and the reading Αελιος are found in *Élite*. Kretschmer, who read Μολκος, relates this name to μολπή. G. Neumann apud K.-D. rejects Kretschmer's connection of Μολκος with μέλομαι unless the name is emended to Μολπος; he suggests perhaps a dialectal variant to μαλακός ('schlaff'), possibly Cretan, but considers the word obscure. I.K.R. compares the scene on A with the neck of the Kadmos Painter's volute krater, Ruvo 1093, ARV(2) 1184/1 and cites Sichtermann for considering its pictures theatrical (note the tripod). If so she thinks the names may be the names of dithyrambic choreutae, reading Νοσσ<ος>(3). Kossatz-Deissmann lists Molkos as a satyr name.

(1)Apollo and Marsyas (Tillyard). (2)so I.K.R. Tillyard had Αλκος or Αλχος, and the inscriptions in a different order. Not in LGPN ii, but see Pape (both mythological and human). (3)Cf. Νόσσοις, iv B.C., LGPN ii.

Martini, eds., *Studien zur Mythologie und Vasenmalerei: Konrad Schauenburg zum 65. Geburtstag am 16. April 1986* (1986) 21ff., fig. 1, pl. 4,1-2 (A, B). London Market (Sotheby, cat. 17-18 July 1985), no. 513.
- B] A: conversation of two bearded men, between two horsemen and eagles facing the center. B: duel of nude hoplites between similar horsemen and eagles.
- C] Nonsense: imitation inscriptions: A: between the bearded men: 6 letters. Between the legs of the right man and the right-hand horseman: 6-7 letters. There is no inscription on the left. B: above the shields of the combatants, horizontal: σι.(o).(.)αλ.
- D] Overlap. Very sloppy letters; those on A are quite illegible. Brijder considers whether the inscriptions [on B], although nonsense, are meant to lift the scenes to the heroic plane. For the idea, he refers to P.A.L. Greenhalgh, *Early Greek Warfare* (1973) 98.

Bakchios potter. 375/4. Archon Hippodamas. *Beazley, AJA 47 (1943) 456f., fig. 9 (after Blinkenberg, Lindos i, pl. 139).
ABV 413/2, Add.(2) 107. Robertson, AVCA 276 and 292. P. Valavanis in: J.H. Oakley, W.D.E. Coulson, O. Palagia, Athenian Potters and Painters: The Conference Proceedings (1997) 88 and n. 38.
- B] A: (Athena): part of the right-hand column shaft.
- C] A: to left of the shaft, not facing it: Βαχχ[ιος εποιοησεν].
To its right, starting at about the same height, facing: Ιππο[δαμας ηρχεν].
- D] Blinkenberg wrongly thought Bakchios was an agonothete. The inscriptions start some way below the (missing) column capital. This is the earliest certainly restorable archon name; the restoration for 392/1 in Berlin inv. 3980, CAVI 2478, is uncertain. For the family of Bakchios see Robertson 292-95. - Valavanis considers this, and all signed Panathenaics, 'competition samples' (in Beazley's phrase) submitted in the second year of the Panathenaic cycle for the contract for the subsequent (not the immediately following) games.

- B] Shoulder: A: wedding of Menelaus and Helen; two chariots

- C] A: two men in the left-hand chariot. On their right, above
the horses' backs: Πολυδ[ε]υξ[ε]ς.(1) Below it, parallel but
not a two-liner: [Κ]αστόρ. The relation is:

...../..../

On the right-hand chariot, man and woman: at the upper right, at some distance: $\eta\lambda\epsilon\upsilon[\epsilon]$. (2)

D] Closed heta.

(1)(after Bakir). Boardman gives: $\text{Πολυ}[\delta\epsilon\upsilon]\kappa[\epsilon\varsigma]$. (2)my note from Boardman has: $\eta\lambda\epsilon[\upsilon\epsilon]$.

- B] A: the neck is missing. Body: top frieze: Heracles and the Amazons. Second frieze: horse race to right. There was a third frieze. B: neck: symposium: male symposiasts on couches. Body: Top frieze: hoplite battle.
- C] Nonsense: A: top: to right of Heracles' face, downward: $\sigma(\rho)\sigma$. Above the shield of an Amazon coming to rescue Heracles' opponent, nearly horizontal: $\sigma\delta\gamma\epsilon\sigma$. Second frieze: under the horses' bellies, short rows of imitation letters (two show in fig. 1, another in fig. 6; not all horses have them). B: the frs. show no inscriptions.
- D] The photos. are not very clear. - T.-N.'s article is on Tyrrhenian vases exported to the East (an important article for the location of Tyrrhenian in Attica). The clay has been identified as Attic (see p. 444).

(1)T.-N. earlier attributed to Guglielmi Painter.

- D] Cartwheel theta.(1)

(1)see the rendering in Sotheby as reproduced in TGV 177. But Johnston on p. 59 n. 14 says he read a phi rather than the theta given in the Sotheby cat. Hachili, 'A Neck Amphora in the Israel Museum,' Scripta Classica Israelica 2 (1975) 26-37. Boardman, 'Heracles, Theseus, and Amazons,' Eye of Greece (1982) fig. 5,a. LIMC i, 602 Amazones 234; 859 Antiope 19.
- B] A: Theseus and the Amazons: at left, an Amazon; in the center: Theseus nude and armed; at right, an Amazon defending herself.
- C] The left-hand Amazon: Αντιοπε. The hero: [Θε]σευς.
- D] Sold at Christie's in London on July 12, 1972. - Hachili thinks Antiope as Theseus' bride is supporting him; Boardman and Matheson argue against this. Antiope is Theseus' opponent on Cab. Méd. 421, CAVI 6129, by Polygnotos and on Ferrara 2890 (T 1052), CAVI 3473, by the Achilles Painter.

(1)so LIMC and Matheson (see 332 n. 10); Polygnotos (Boardman after Bothmer).

- B] A: Adrastus comes to Athens to ask for help against Creon,

with Polyneices and Tydeus of Calydon?(1) B: Dionysus with oschos and drinking horn between two satyrs, that on the right also holding a drinking horn.

- C] A: on one warrior's shield: imitation letters, perhaps: *καλος* (Berge). B: on the drinking horns: imitation letters (three on that held by Dionysus). Under the foot, *Grr*. (see 'Midwestern', p. 157).
- D] Ex Jacob Hirsch collection.

(1)so Berge (see Add.(2); Berge's interpretation depends on one by Erika Simon of a similar scene on a vase at Ferrara); Beazley says: unexplained subject: Athena, two warriors and an old man (see ARV(2) further). G.F. Pinney and R. Hamilton, *AJA* 86 (1982) 581-84, pl. 77,1 (A), suggest a secret ballot: two heroes are shown, each depositing a leaf in a phiale held by Athena [the open shape of the phiale seems to me an obstacle to their interpretation]. On p. 582 n. 7 they raise the possibility that the leaves are thought of as inscribed.

- A] WG squat lekythos. From Apiro (Macerata)? Eretria Painter. Last quarter fifth. 420-415 (L.-H.). Ca. 420 (Shapiro). *Photo. *ARV(2) 1248/8, Add.(2) 353. *I. Jucker, 'Kephalos im Göttergarten,' *AK Beiheft* 9 (1973) 63, pl. 20. *A. Lezzi-Hafter, *Der Eretria-Maler* (*Kerameus* 6, 1988) 233-34, 344/240, pls. 156-57. *H.A. Shapiro, *Personifications in Greek Art* (1993) 237/30, 80-82, figs. 33-34, 182, fig. 139, 204, fig. 164 (the last three pictures show several inscriptions). LIMC s.vv. Aglauros, Herse and Pandrosos; Aphrodite; Eukleia; Eunomia.
- B] Shoulder: a woman (Aphrodite?) and Eros.(1) Body: a young mother, with a baby facing her; at left, Antheia and Peitho; at right, Eunomia (or Harmonia) and Paidia.
- C] Body: above the head of the woman at left: *Ανθεια*. Similar for the second woman from the left: *Πειθω*. Woman seated with a bird in her right hand: the inscription lost.(2) A baby boy moves toward her. To right of the woman's chest: *Κεφαλος*.(3) Woman with a platter; above her: *(Ε)υνομια*.(4) Woman with a necklace; above her: *Παιδιά*.(5)
- D] Mixed alphabet. Omega nearly pointed, typical of Eretria Painter. - Shapiro: for the central figure in the body picture, Jucker suggested Eukleia or Aphrodite. U. Kron, following H.R.W. Smith, suggested Herse, the mother of Kephalos (see Kron in LIMC i, 291, s.v. Aglauros, Herse, Pandrosos, no. 36). E. Simon, 'Kephalos,' *Studiengenossenfest Humanistisches Gymnasium Aschaffenburg* (1990) 67-83, returns to Kephalos. L.-H. thinks of a funeral connection, whence the identity of the woman is not so important. I think the inscriptions are hard to read, but it is likely that Kephalos and perhaps other names are

miswritten. Kephi/emos does not exist in Pape.

(1)so ARV(2), but it does not agree with my notes from the photo. (2)the area above her head is restored; Jucker speaks of illegible traces. (3)so ARV(2) in transcription and AK Beiheft and LIMC in Greek letters. The photo. is not clear: my reading differs: the second letter is probably an epsilon; the fourth letter is NOT alpha; the fifth letter is miswritten, perhaps intended for a three-stroke sigma, but the sigmas are irregular. I thought the reading ought to be K(ε)φι(σ)ος, but that is hardly likely. L.-H. reads: to right of the woman's face, and above the baby: Κεφημος [but the eta seems quite clear in the photo., very narrow]. Shapiro: Jucker read Kephalos; L.-H. and others cited by her read Kephimos or Kephemos. [See L.-H., p. 233 and n. 371: Κεφαλος, I. Jucker.Κεφιμος, Bloesch. Κεφημος, H.R.W. Smith. Κεφημος, L.-H.]. Shapiro himself, vidit: KEA[.]MOΣ. (4)so my reading of the photo.; the second letter is upsilon, not rho. L.-H. reads: Εγνομια or ηαρμονια; Shapiro argues against Harmonia. Shapiro reads EYNONIA, i.e. Ευνοια misspelled (see p. 82 n. 173). (5)except for the first, the inscriptions are taken from my notes.

- D] The surface is not well preserved, especially on B, where no inscription can be seen. For the date see also the discussion in CV, p. 79: cf. Lullies, in Sammlung Ludwig I 224, but the vase belongs to Cardon's 'Frühphase IV' and is earlier than the dinos in the Ludwig collection [now in Basel, Antikenmuseum, CAVI 1971]. The date given by van Ufford is too late, as the vase combines late archaic and early classical features. The Berlin Painter is fond of Eleusinian scenes; the Raubitscheks emphasize the political background.

- B] A: Athena (device: gorgoneion). B: men's foot race (sprint).

A] RF cup. Related to Douris (Bea. Arch.). Douris (Weiss, Buitron).(1) First quarter fifth. *Add.(2) 393. *C. Weiss, CV, Germany 60, pls. 30,2-4, 31,1-2 and 32,1-6, fig. 18 (profile); pp. 66-68, facss. of inscriptions (much bibl.). Beazley Archive db, no. 4704. J. Thimme, Antike Meisterwerke im Karlsruher Schloss (1986), no. 44. D. Buitron, 'A Cup for a Hero,' GVGettyMus 5 (1991) 65ff.

B] Symposium: Int.: youth assisting a reclining man who is vomiting; in upper left, a flute case and lyre hung up. A: three couches with five bearded symposiasts: 1. One singing and another playing the flutes; 2. One playing kottabos, another with two cups, and at left, standing, a naked oinochoos; 3. At right, seen from the back, a symposiast drinking; at the extreme right, kottabos stand; at the extreme left, a flute case; in the middle, a lyre hung up. B: komos: six drunk and boisterous komasts, fighting, five bearded, one a youth; column krater.

C] Int.: above the figures, the upper line curving along the margin, left-aligned non-stoich. two-liner:

Αρισταγορας | καλο(ς).

.

.(2)

A: above the scene: ho [π]αις κα[λ]ος. B: above the scene: h[o παις κ]αλος.

D] Bothmer and Buitron, in her diss. on Douris, attributed the vase to the manner of Douris, but she now (GVGettyMus) attributes it to Douris himself (so CV). I have no note from her book on Douris. For further information on the attribution, see CV, p. 68.

(1)the shape of the cup suggests the potter Kleophrades (Weiss). (2)the lambda of kalos is below the two sigmas of the name, which are close together.

Bérard et al., A City of Images: Iconography and Society in Ancient Greece (tr. D. Lyons, 1989) 61, fig. 86 (traces of inscriptions).

B] Sanctuary of Hermes: at left, a column from which hangs a dead ram ('Böckchen'); altar with a herm on a base; above, a pinax depicting a satyr.

C] To left of the pinax: nonsense: four blobs.(1) On the top step of the two-step base of the herm three BG blobs, the middle one perhaps an omicron; I am not sure that these are letters; Weiss does not mention them. Under foot, Gr.: ΠΙΙΙ.(2)

- D] Ex Nocera de' Pagani, Fienga. Ex Basel Market (M.M.). Weiss on p. 81 discusses the vertical position of the inscription by the pinax, which is a favorite position for both nonsense and sense. Weiss cites the ff. sense inscriptions: Würzburg ZA 1 (Sammlung Ludwig I, 233, and 237f.) and H 4978, CAVI 8041 [sic].

(1)so CV, text; not visible in the photo. (2)Attic pi. The numeral 8. Johnston (by letter, see CV) agrees it may be a batch-mark for sending 8 vases, as the number is too high for a price.

D] Frs. a - c.

(1)Attic gamma. Bottom of a left diagonal line as of an alpha. (2)Attic lambda. Epsilon with two horizontals only. Weiss reads this as part of a kalos-inscription, perhaps reading the epsilon as an open and somewhat angular omicron, which is possible: [--κλ]λo[s](?).

(1)Connor attributes to the Nikosthenes Painter. I noted that the writing resembles him. (2)is he masturbating or urinating into it? Why is he putting his ear to the amphora (the face frontal, which indicates excitement)? (3)the amphora and the tail intervene. $\epsilon\pi\omicron\iota\epsilon\sigma\epsilon\nu$ is upside down. - B] No figured decoration.
- C] On the bottom, Gr.:
εὐχάμηνος
Ἄνθιππος
Διον[ύ]σῳ
ἀνήθ[ε]κην(1)
τὴν κύλικα
τῆνδῃ
ἡο ἰολιέτης.(2)
On the resting surface, a Gr., very hard to read:

ἡδὲ ἀκόρεσ{σ}τος καυ[χ]όμενος νικᾶ]ν τὸσδε ἰτα[μ]ὸς ἔστῶ. (3)

- D] In the museum at Chora on Kea? - The first five lines are written across, one under the other; the sixth line is written along the righthand margin, in a curve; Caskey thinks that it was an afterthought. He puts this line at the end of the main text, Mendoni as the continuation of line 2 [a later addition to it?].- Mendoni refers to other inscriptions with Dionysus from Kea: see Caskey, AJA 84 (1980) 200 and Keos ii.1 (1986) 39-41, pl. 64. M. thinks the main Gr. (7 lines) and the rim Gr. are related, although written by different hands; the second he thinks refers to a drinking contest in the the symposium. - Kean alphabet.

(1)the third letter is an epsilon corrected to eta or vice versa (Daux). (2)In general: eta for epsilon, which should give epsilon for eta: but this is not the case in τηνηδη or ἰολιειτης; hence Johnston puts a question mark with the restored epsilon in line 4. Note the confusion of eta and heta (Mendoni has a discussion). (3)this reading is largely due to Vanderpool whose notes are found in the Caskey archive (Mendoni). - For the second word of the second graffito Κορέσσιος may be suggested; καυχόμενος is almost certain (Caskey in Hesp.). Caskey compares Bacchylides fr.16 Jebb, POxy 1361, fr. 1 (so Daux).

B] No figured decoration preserved.
C] In large letters: Gr.: [---ε]μ(?)
D] No doubt in the museum in Chora on Kea. - There are numerous frs. with Grr., many Attic, some with Grr. on the bottom (perhaps owner's inscriptions), others with Grr. on the sides of pots (perhaps dedicatory). Not entered in CAVI, except for this one.

B] Heracles and Acheloos; at left, Athena; in front of Acheloos, Oineus; at right, Deianeira.
C] Nonsense: four inscriptions: between Athena and Heracles, facing him: ἰλχυχχ, retr. Between the legs of Heracles and Acheloos: ἰλχιυ. Above Acheloos, close to Oineus: υ(σ)υχιυ. Between Deianeira's lower legs and Acheloos'

- C] Fr. 456: A: to right of the youth's raised knee: a short row of 5(?) small dots, very close together. Diagonally downward from youth's crotch: a similar row of 6 dots.
- D] It is unclear whether the rows are meant to simulate inscriptions (reduced to ornaments, F.-S.). The position is very odd. F.-S. cites a parallel at Brauron, Para. 196/8 quater, by the same painter. Not in Beazley.

- C] To right of the left handle, Gr.: $\Phi\lambda\iota\delta\alpha$.
- D] Probably a Boeotian name. N. Ehrhardt suggests $\Phi\langle\upsilon\rangle\lambda\iota\delta\alpha\langle\varsigma\rangle$. For parallels to the name, its location near a handle, for the omission of the vowel and of the final sigma (E. thinks the name is in the nom.) see Johnston and Ehrhardt in CV, p. 111. Pape lists Κύλλης and Κύλλος .

Between the right-hand woman and Hermes: $\nu\omicron\upsilon\sigma\omicron\upsilon$. (2) B: under the overlapping shields of the duelists: $\nu\omicron\kappa\lambda\omicron\iota$. Neater than the inscriptions on A.
- D] Thick letters, often unclear. Note the confusion of the two kerykeia.

(1)different shapes of incomplete omicrons? (2)the sigmas reversed.

- B] Int.: Heracles and the Ceryneian Hind. Lip: A: Bellerophon and the Chimera. B: two antithetical cocks, with a flower between. Under the foot: BG circles.

B: similar: $\chi\alpha\iota\rho\epsilon : \kappa\alpha\iota \pi\tau\epsilon\iota \epsilon\upsilon$.

(1)F.-S. attributes this cup to the same hand as the BF lip cup London B 417, ABV 162/2, CAVI 4316, which is signed with the name of the potter Eucheiros and is also very similar in shape; it too has circles under the foot.

- B] A: Heracles and Pholos; in the center, a young Heracles at the pithos; on either side, a centaur with his rump cut off at the margin. B: two young komasts.
- C] A: near the head of the right centaur: traces of a kalos-inscription (two letters are shown in the facs.). Just below the lower right-hand corner of the picture on A, Gr.: $\Lambda\chi$. (1)
- D] The two letters shown in the facs. are at some distance from each other and are unclear. The position of the Gr. is very odd.

(1)Ionic lambda (hardly Attic gamma) and upright chi.

C] Fr. 592a: [--]λοτ(.)ενοσμανεθε[κεν].(1) Frs. 592b and c:

D] Frs. a-c; from the foot. A similar foot fr.: Heidelberg S 43, CAVI 3986, with a similar dedicatory inscription in the same style.(3) The names of dedicator and painter (or potter) are unknown.

(1)the first epsilon looks like a fourstroke sigma; the letter before that shows only two dots; the final sigma of the name preserves only the tip at the top. (2)Bea. Archive db has: GOT.ENOS MANETHE. Also: signature: ...NOGENES. The signature could be the painter's or the potter's. (3)"eine im Schriftduktus übereinstimmende Weihinschrift," F.-S.; see Kraiker, Die RF attischen Vasen, Katalog Heidelberg I(2) (1978) 33/113, suppl. pl. 6. B] Int.: in a zone round the omphalos: four crouching satyrs in pairs of two; between the pairs: amphora and lug(?) krater.

D] Mixed alphabet. Ionic lambda; three-stroke sigma.

- A] Fr. of cup, probably East Greek, resembles a Siana cup. Unattributed. Third quarter sixth (P.). *M. Prange, CV, Germany 64, pl.45,5; p. 70 facs. of Dip.
B] Int.: thick dot surrounded by a circle within reserved circular area.
C] Int.: around the circle, facing in, in BG:
[--]ργες: [--(?)], retr.
D] Another possible reading is: [--]δγες: [--], but the first letter is probably a D-shaped rho. The second letter is a sideways 'Attic gamma'. The sigma is three-stroke, reversed in retr. LGPN ii has a name Θρασούργης, 4th cent. P. says the inscription cannot be read. I wonder if the fr. cannot be Attic after all. The name would be a kalos-name.

- B] Six armed men ('heroes', Beazley) riding on dolphins.
- C] By each rider, from the mouth: ἐπι δελφῖνος, retr.
- D] Listed in Add.(2) as: New York L. 1979.17.1 (on loan from Schimmel). - I interpret the inscriptions as ornamental additions to the pictures; Sifakis thinks they are words sung by a dolphin chorus. Beazley in ARV(2) points to parallels which add a flute player. It is clearly a chorus, but it does not follow that the words are a song. Drougou agrees with Sifakis. - Lissarrague reads *epidelphinos* 'mounted on a dolphin'; is this a printing error or does he think it is an adj.? L. notes the shield devices, three of which are vase shapes. When the psykter is set in a krater the dolphins swim in the wine-dark sea. He has more on dolphins and symposium scenes.

- D] The inscriptions from 'Auktion''s text. Pompeus and Dosippos are apparently unknown. Mixed alphabet (Attic with omega). I think B is about sending out the sons of Theseus. (Phaleros is the eponymos hero of the deme of Phaleron.) Hence A is probably about sending out the Dioscuri.

(1)Cahn thinks they are being sent out, but they are not on horseback. (2)the omega corrected from an omicron (Cahn).

- C] Nonsense: between the two left women: (.)ἴστῃ. Above the right edge of the table and the right-hand woman's knee, irregular: (.)ἄστῃ. Above the skyphos and the right-hand woman's shoulder: ἄστῃ.
- D] Ex Hirschmann and Fleischman collections. The readings of the first two inscriptions are not quite certain. The inscriptions are typical of the Sappho Painter.

Bérard et al., A City of Images: Iconography and Society in Ancient Greece (tr. D. Lyons, 1989) 92-93, figs. 126a-d (shows inscriptions faintly).
- B] A: between trees, a bearded man draws water from a well with a *kados*. B: palaestra: at left a small bearded man works with a pick axe; at right, a large bearded man sprinkles water from a *kados*. Under the handle B/A: a pillar; above it, sandals and, separately, aryballos and strigil hung up; at right, also under a handle, a large wash basin on a fluted stand.
- C] On the pillar, vertically: kalos.(1) On the rim of the basin, horizontally: kalos.(1)
- D] Listed in 'Images' as Küsnacht, Private. - L.-H. thinks rightly that the man drawing water and the small man with

the pick axe are slaves; she wonders whether the large man sprinkling is not foreign too. [Are all three, despite the difference in size, slaves preparing the palaestra, which is indicated under one handle?]

(1)so L.-H. in the text; the photos. in 'Images' are unclear as to individual letters.

B: a bearded man leaning on his stick to right; a dog barking at a leopard sitting in the center on top of a cloth-covered folding chair [so L.-H.]; behind the leopard a youth; at right two further figures. [L.-H. thinks the leopard is a gift from the man to the boy behind the animal.]
- C] Int.: along the margin, starting at mid-height [which seems to be typical], ending above the basket: Δορις εγραψε. A: [ἡἰπποδ]αμ[ας].(2) B: καλος. Etruscan Gr.: 8EDCVS, retr. (3-stroke sigma).
- D] Listed as Küsnacht, Hirschmann Collection, no. 33, in B.-O., but G 64 is right. - Hippodamas may be the general who fell in 459/8.

(1)the cage is said by L.-H. to be a cage for the hare the youth is playing with; a note on p. 103 says round cages were for hares and rectangular ones for birds. (2)Bea. Arch. has: HIPODAMAS.

- A] Frs. of RF calyx krater. From Larissa. Painter of Munich 2335. Third quarter fifth. Ca. 440-430. *M.A. Tiverios, Περικλεία Παναθήναια: ένας κρατήρας του ζωγράφου του Μονάχου 2335 (Thessalonike 1989) 128-34; English summary 141-42. *P. Valavanis, 'La proclamation des vainqueurs aux Panathénées,' BCH 114 (1990) i, 344, fig. 18. *Shapiro in: Neils et al., Goddess and Polis (1992) 61 and nn. 59-60, fig. 39.a-b.
B] Upper row: A: at the right as preserved: *auletike*: flautist, with a wreath offered him from the right. From left to right: a column; a bearded and wreathed man seated [judge?]; flying Nike bringing a hydria; a column; youth with his staff seated [trainer?]; lower part of a flautist; Nike (see Tiverios: hand with wreath to left). B: *aulodia*: at near left: two figures on a platform, no doubt flautist and aulode, both facing to right; at left, a figure and a column; to right of the platform: a bearded and wreathed man, seated with his staff [judge?]; a standing figure and traces of another(?). Lower row: A: lower parts of three hoplitodromoi; at left, a bearded trumpeter. B: uncertain contest (perhaps victory in the boys' foot race [Tiverios], but see also note 1 below): left to right: head of Nike; head of a boy(?); a bearded man with his staff, standing [judge or trainer?]; a boy walking.(1)
C] Inscriptions horizontal and above the heads: upper row: A: 1.: above the seated man at left: Αριστων.(2) 2.: Νίκη. 3.: above the seated youth: Νεοκλης.(2) B: 4.: above the seated man: Αμφικλης. Lower row: A: 5.: above the trumpeter: Σιγαλος.

B: 6.: above Nike: Νίκη. 7.: above the first boy (victor?): Λυσικλῆς. 8.: above the bearded man: Ἀντιφάνης. 9.: above the right boy: Θρασυκλῆς.

- D] Tiverios thinks these are real persons: see him for identifications. He connects the vase with the Panathenaea. Some names are historical, known from other contexts (Shapiro). A bespoke vase, probably commissioned by a man from Larissa. Lower row of B: Lysikles is the victor, Antiphanes the umpire, and Thrasykles the loser (so Valavanis, see below). Note that many of the names end in -κλῆς. Ionic alphabet.

(1)proclamation of a victor: part of Nike; victor; umpire; loser (Valavanis, no doubt correctly). (2)Tiverios thinks both named figures are athletes - or one of them (Ariston) is perhaps the archon of 454/4.

- B] A: in the center, a fawn being captured; from the left comes a maenad with a thyrsus; from the right, a satyr with a panther skin; both rushing toward it.
- C] A: to right of the maenad's head: να[χί(?)].(1) To left and right of the satyr's head: κ[αλ]ο[s].(2)

(1) the nu looks more like kappa 1, but we cannot read kalos because of the vertical stroke for the third letter (the top is not preserved); Ionic lambda seems excluded by the date. Beazley in ARV(2) reads [---]παι[s---]. If this is right (the pi being miswritten), we could have: [ho]παι[s]κ[αλ]ο[s]. (2) a head intervenes.

- D] Two frs. Peteos was the father of Menestheus, not previously known to have participated in the battle of Lapiths and Centaurs (Beazley).

(1)two-row. (2)Beazley's suggestion, in AJA: if καλος is correctly restored, the next word is hardly Πετραιος, a centaur name; the third letter of the name can be epsilon, zeta, chi, or tau, whence Πετ[-] is almost certain. Beazley gives parallels for mythical kalos-names.

(1)"may be", Beazley. (2)Beazley in ARV(2) 193 had listed the subject of T 3840 as the Wedding of Peleus. (3)"parts of Peleus' name, written retrograde," Williams, p. 197. (4)"between [Chiron] and Peleus the end of [Chiron's] name," ibidem. (5)Beazley read Μεγα[κλες καλος] under his Megakles I (see below, 4184) whobelongs in the late sixth century, but Williams points out that the chronology does not fit once the fr. is given to the later Kleophrades Painter, and that the latter does not have any kalos-names. He suggests a signature; if Leipzig T 3771 (q.v. CAVI 4182) belongs it might be the painter's signature. W. suggests that the Kleophrades Painter's name was Megakles. [This seems to me unlikely: there are many names beginning Μεγα[-] and the name may be a label (in which case W.'s tentative interpretation of B would have to be revised.) (6)see Williams, n. 44; for other inscriptions below the glaze, W. refers to 'Script' 174 n. 6. - D] Ex Antwerp, Private = Leiden, Private = Once Leiden, Cramers G 36 [so Burn.] The plate perhaps a copy of a pinax celebrating a dithyrambic victory because of the tripod; subject of dithyramb might have been the childhood of Asclepius (Simon apud Cramers). Burn calls it the first mention of Asclepius whose introduction to Athens in 420/19 the dithyramb may have celebrated. - For the double sigma, see 'Script'.

(1)listed by Robertson as 'Once Leyden, Cramers G 36'; the same number in *Bea. Arch.* (2)Ευ[κλεια] has been suggested; it is likely (Burn after Simon and Cramers); Shapiro does not decide between Eukleia, Eunomia and Eutychia.

- D] = xv e 28. Broad and messy writing. Burow notes that the writing becomes neater in the later works by the Antimenes Painter, but he thinks it is mostly by the same hand with only two doubtful cases. See Burow further.

(1)So Burow, rightly. The nu is reversed, see pl. 11,d; it is not a sigma (cf. also Vos in CV). Wernicke follows CIG in reading φιλῶσε; see K. Wernicke, Die griechischen Vasen mit Lieblingsinschriften (1890) 20 and n. 2. Beazley in JHS 47 (1927) read Φίλωνσε with aposiopesis. He mentions as another possibility φιλω{σ}σε. Heydemann had wrongly restored Φιλοξενος. Cf. also Robinson-Fluck 83f. and n. 17.

(2)Burow thinks the kalos-name may refer to the bather. Beazley suggests restoring Antimenes on the NY psykter with athletes by Oltos; ARV(2) 54/7, CAVI 5591. Another restoration proposed is on a BF lekythos, Wernicke 19, but Beazley, ABV 664, s.v. Ainos objects (Once Lord Guilford, CAVI 3853).

B] Neck: A, B, each: head of a man. Body: A: male between antithetical sphinxes. B: antithetical lions.

C] Body: A: on either side of the man, along the sphinxes' legs: six and five large dots respectively.

D] Ex Paris Market (Segredakis). A replica, with the same kind of dots: Munich 1446, q.v. It is not clear to me that the dots are intended for letters.

B] Woman playing the lyre; woman dancing, with krotala; crane.

C] Between the crane and the lyre player: $\eta\omicron\pi\alpha\lambda\varsigma$. Miswritten. Between the two women: $\kappa\alpha\lambda(\omicron)[\varsigma]$. For $\eta\omicron\pi\alpha\iota\varsigma\kappa\alpha\lambda\omicron\varsigma$.

D] Large and coarse letters suiting the style of the Sappho Painter. Some strokes are rubbed off, e.g. the top of heta. CV and I think the form is $\pi\alpha\lambda\varsigma$, not $\pi\alpha\upsilon\varsigma$. For the latter, see now GAI ii, pp. 278-79. The omicron of kalos looks more

like a badly written epsilon, but καλε seems excluded.

- D] The letters are extremely sloppy and disjointed. Fellmann points out that the epsilons are lacking the third hasta, with the other two sometimes coalescing, which makes them look like rho's as they are printed by Beazley. Also misspelled are inscriptions on the band cup Berlin inv. 3680, CAVI 2472, by the same painter, ABV 250/29: A: χαιρε και πι<ει>. B: χαιρε και πι<ει>.

B] At left, middle part of a triple or quadruple herm; portions of armed dancers; upper portion of a young flautist.
C] At the herm's highest preserved portion, remains of BG dots, perhaps of two horizontal lines, which P. considers an indication of a simulated inscription, perhaps rightly. Under the foot, around triple circles, well spaced and ornamental, in a circle, facing out:

- B] A: warrior with a lyre in each hand, between cocks. B: two sphinxes.
- C] Λευρος, retr. λυραειμι, retr. Μοσις, retr. λυραειμι. Χαίτος, retr.
- D] A small neck amphora (K.). K.: the koppa is one of the very few in the oeuvre; the other is on Cervetri (K., no. 17, CAVI 3127a) [but I doubt that that is a koppa.] Hence I was wrong to say in 'Script', p. 42, that koppa occurs only in the Kyllenios Ptr. Leukos means 'the white one'. Chaitos, 'crest,' or 'horse's mane'; the name recurs on Leiden PC 47 (K., no. 35) [but on Liverpool surely a cock not a horse!].

(1)so K.; does that mean that Bothmer has changed his mind from what is printed in Para.? Para. has 'Closest to the Timiades Painter according to Bothmer'. In CV, USA 16, New York 4, p. 3, Bothmer says, a propos of New York 59.11.25 [CAVI 5719] by the Prometheus Painter: "For comparison, see Liverpool 56.19.19 ... and other works by the Prometheus Painter ..." This sounds as if B. had changed the attribution of Liverpool 56.19.19 to the Prometheus Painter. The vase is not listed in AJA 1944.

- B] Not mentioned.
C] On the bottom, in a complete circle, Gr.:
τῆνδὶ σοὶ Θόδεμος δίδοσι ἴ.
D] The inscription is probably in the Attic alphabet. Crossed theta; unusual sigma. Hence a possible memorial of the Attic colony; the pot poorly preserved, but probably 1/4 6; the inscription not later than 550 (Jeffery). Irregular spacing: the first half close together, then more widely spaced, but again close at the very end; the punctuation marks the beginning of the line and has no letter space of its own. [Probably a gift inscription rather than a dedication. The anonymity of the recipient is odd.]

D] W. thinks the scenes funerary, but see, for the subject, Adolphseck 134, CAVI 15. Ionic lambda. Is the vase Attic?

(1)Walters reads Πλ(α)νόν, but I rather think the name is miswritten. The chi of chaire is given as a Roman 'I'. I think the inscriptions are nonsense, although that on A may be a miswritten kalos-inscription.

2. Θυφειθιδες | εποισεν.

Beazley is clearly right. For upsilon = ou see GAI 1, 260-61 and 'Script' 162. Beazley in ABV states that the sigmas in one signature are four-stroke, but that is not born out by the photos. in JHS. - GAI i, 61 n. 1 points out that LSAG 74 n. 8 wrongly states that the signature is stoichedon.

- D] = 1856.5-12.10. - The identification of the statue with Cybele was maintained by K. Schefold, 'Statuen auf Vasenbildern,' JdI 52 (1937) 38, and has recently been reiterated by F. Naumann, Die Ikonographie der Kybele in der phrygischen und griechischen Kunst (1983) 117. But M.A. Tiverios, Ο Λύδος ... (1976) 116 n. 357 and independently C. Bauchhenss-Thüriedl, Der Mythos von Telephos (1971) 100 n. 49, have suggested Apollo. Shapiro thinks the vase dates from 540-530 (it is unusual and hard to date) and may commemorate the building of the Temple of Apollo Pythios in Athens, which according to Hsch. was executed by Peisistratus. The inscriptions are arranged as in a pediment. First inscription: the second letter consists of two parallel horizontal strokes; lambda faces left. Second inscription: the first letter is a dot; the second is open at right; the pi's are like Ionic gamma's.

D] = 1849.11-22.1. - ΔΥΝΝΙΚΕΤΥ for ΔΥΝΝΙΚΕΤΩ = ΔΥΝΝΙΚΗΤΟΥ; see Fifth Ep. Congress and GAI i, 260. The same sp. in IG i(2), 1002 corrected to omicron (cf. GAI i, 239). ΔΥΝΝΙΚΗΤΟΣ: see PA 4580, IG II(2) 1436,13, Hesp. 7 (1938) 281/16, A 31. - Probably not a Panathenaic victory, since tripods were not awarded there (Neils); but Kyle, *ibid.* 207 n. 120 says: "possibly in the Panathenaia ca. 530-525."(4)

(1)so Beazley; near the Princeton Painter, Böhr. (2)Shapiro thinks the man is Dynniketos and Hermes is greeting him, not Athena who is a statue (Athena Promachos). (3)Webster, PP 64 suggested the jockey is Dynniketos' son; and Shapiro thinks D. might be a nickname rather than a proper name, see n. 114. I doubt this: the vase commemorates the omen of the name. (4)Shapiro accepts Webster's answer to Beazley's statement that it cannot be a victory at the Panathenaia, since the prize on B is a tripod: Webster had said that the tripod was here a generalized token of victory; all other elements fit the Panathenaia.

- B] A: Struggle for the Tripod: at left, Artemis; Apollo and Heracles; doe; at right, Athena. B: preparations for a sacrifice? In the center, Apollo playing the lyre; behind him, a bull; at left, Dionysus; at right, Hermes, leading.
- C] A: to left of the figure, starting at head level: Αρτεμ[ι]δος, retr. Above Apollo, horizontal, the end curving downward around his face: Απολλῶν. Above Heracles: ηρακλες. - D] = 1843.11-3.89.

(1)the final sigma, separated from the rest of the name because of intervening figures, comes to be above the rho of Καρ. (2)so Beazley in Class. Rev.; Walters read Καρ[υστιος] after Wernicke; so also in CV. Beazley refers to Karion, Lydos, Mys, Phryx, Thrax, Kolchos, and Kilix as similar names.

D] The intention in B was to give the warriors regular human

upside down.

(1)read Ποσιας as a horse name in the BM Cat. and in CV. But
see Beazley in AJA. The sigmas are reversed, as are many
other letters. (2)Considered a horse name "unless Διος means
(the chariot) of Zeus" (CV). Dios is suitable for a horse,
but Sosias should be a human name. (3)I could not read the
first letter, which looks more like a smeared kappa than a
pi; Beazley in AJA reads Πυλες for the second occurrence
and that was no doubt the intention. (4)Beazley also reads
ΔΙΚΕ, which is a repetition of the preceding name. (5)I
thought I saw a possible tip of a final sigma by a break,
but Beazley read ΔΕΥΤΕΡΕ.

- D] For the nonsense inscriptions see JHS; cf. Boulogne 417 (ABV 260/32, CAVI 2835, manner of the Lysippides Painter) and Brussels R 291 (ABV 270/52, CAVI 2929, by the Antimenes Painter). In ABV Beazley states that the vase is a replica, by a different hand, of Würzburg 304, CAVI 8072.

- C] Body: four nonsense inscriptions: to right of the 2 girls at left: σκε(ν). Around the left spout: χελκο. Around the fourth girl's head: χε(ν)οελ, retr. To right of the heads of the 2 women at right: νε(ν)(σ).
- D] = 1837.6-9.53. The inscriptions small and not very clear; the nu's idiosyncratic (mostly reversed).

ABV 266/3, 678, Add.(2) 69. *Vidi. 'Script' 1091. Robertson, AVCA 12, fig. 7. *J. Burow, Der Antimenesmaler (Kerameus 7, 1989) 42, 43.122, pl. 120.
- B] Shoulder: warriors leaving home, one in a chariot. Body: Women at the Fountain (seven women).
- C] Body: ten nonsense inscriptions, two for each woman (where applied), one near the head, the other by the legs: αρχνομ.(1) πογυοννον. - ποι(π)ο.(2) νυχεονο. - (.)εοσεο.(3) πο(σ)νο(.)ν.(4) - στονον.(5) εγ(.)ποσγ. - By the head of the fifth woman: (Σ)ιμεκαλε.(6) χαργκεχσ.(7) - No inscriptions between the sixth and seventh women. The inscriptions are not directly related to the individual women. Under the foot, Gr.: ΣΟ (three-stroke sigma). The omicron is drawn with a compass, showing the central dot. See TGV 21A/49.
- D] Done mostly from the photo. in Burow. The readings in CV are often inaccurate. Beazley says in JHS: "The inscriptions, with one possible exception, are meaningless: they are genuine, but look as if ... written in French hotel ink with a Waverley pen." I noted that this color is not found elsewhere on this vase. - Burow 42 notes parallels for Sime: Berlin pinax by Exekias, ABV 146/22-23; maenad on cup by Kallis Ptr. in Naples, ABV 203/1. See n. 6 below. - Burow 41 notes that the sigmas are peculiar. There are at least two three-stroke sigmas, the rest are four-stroke of two shapes. The lettering is small and hard to make out, but I see at least one high-kicking alpha and several nu's that are different from the Antimenes Painter's nu's. The inscriptions are not in his hand. - Burow 74 discusses fountain scenes.

(1)the last letter looks more like a low mu than a four-stroke sigma turned 90 degrees. (2)with four-stroke sigma. (3)sigma three-stroke. (4)sigma three-stroke? (5)sigma three-stroke twice? (6)four-stroke sigma reversed? The iota is a thick blob. I do not think that this inscription refers to either figure. H. Mommsen, Exekias I: die Grabtafeln (Kerameus 11, 1997) 50 and n. 354: thinks this is a servant or a hetaera rather than a citizen "wegen des abwertenden Namens"; she refers to Hannestad, Symposium Amsterdam 1984, 254. [But there are other names of respectable persons that make fun of them; e.g. Pordax]. Sime occurs on the Exekias plaque fr. F 1814, see CAVI 2249, probably as a servant's name, and as a maenad name on Naples Stg. 172, CAVI 5495. (7)done from CV.

right: (ν)οχει. Under the foot, Gr.: pi with attached
diagonal. See TGV 76/16A 22.
D] Beazley compares London B 328 and B 337. Smith calls the

The name is spelled Archikles on London B 418 and Munich 2243, CAVI 5251. e for i is rare on vases; see GAI i, 138. Kretschmer is right in stating that this form is of a different composition from the form with iota, after Archemachos/Archimachos, Archelaos/Archilaos, etc.

D] CV.'s reading of A before cleaning is worthless; the side was cleaned in 1947. On this type of inscription see 'Script' 48 and n. 44. For πρίω see GAI ii, 456 and 554. GAI ii, 457, wrongly relies on CV's reading (χαίρε και πριε με), not knowing 'Sprunt Studies' here, and cites Schulze's correction of Smith's reading in GGA 1896, 254 n. 2 (= KS (2) 715) (π(θ)'εμε for π[ρ]ο με).

Beazley in Para. compares New York Market, CAVI 5768, and London 54.5-19.2, CAVI 4674, both plain lip cups with the same inscriptions and palmettes. - The iotas are slightly curved. Pi resembles a pointed rho.

(1)close enough to the Tleson cups in script and drawing of the palmettes to be probably by [the Tleson Painter], Beazley. (2)the photos. seem to show the tenth letter to be Attic lambda or near the 'Aegive' form, but autopsy showed a clear iota.

- D] Beazley in ABV: "the drawing is not by the Tleson Painter; the inscriptions may be by the same hand as usual, but they are damaged, and one cannot be sure." The probable omission of final nu argues against the inscriptions being by the hand of the Tleson Painter.

(1)CV; from Capua? ABV. (2)apparently no final nu, although CV gives it in the text. BM Cat. agrees with me. (3)CV reads Νικᾶ Ἀφροδίτη, but there is no room for an iota adscript. This is clearly not Attic; is it ancient?

AJA 47: except for the Burgon amphora, this and Brussels A 1703, CAVI 2908 [of the same Group] are the only Panathenaics which have punctuation. The athla inscription is Attic with Ionic lambda; the signature is Ionic. The Gr. letters ΥΗΥ reported by CV as on Athena's shield are rifts in the glaze; the letters ΠΙΡ (the last letter reversed) reported by Klein, MS 86, together with ΥΗΥ, are part of the star that is the shield device. The archon inscription is omitted. Robertson calls it a specimen(?) amphora, since it has no archon name. Peters attributed the amphora to the Jena Painter, Karouzou to the same hand as Athens 1435, which Beazley attributed to the Oinomaos Painter. For the workshop (under the influence of the Jena Painter) see Robertson. A 'competition sample', see Istanbul L. 3149, CAVI 4019. On the survival of the Attic athla inscription see 'Script' 185 n. 4 and Beazley in AJA who says that this is the latest example of the athla-inscription in the Attic alphabet. He says B 608 is generally similar to B 607, CAVI 4370, which is also from Cervetri, but is not by same hand. AA 1935 discusses the Gr. The athla inscription is Attic, but with Ionic lambda lying sideways. The archon inscription is Ionic. The Gr.: alpha with horizontal cross stroke.

For the second inscription ABV has: Χσενοδο[κ]ε 3-4 (.) (.) παυ καλε [..]. This is better than the text in JHS 49, 44, n. 30, as corrected on p. 311. Walters restores: Χσενοδό[κ]ε [μοι (?) δοκε]ῖ παῖς καλέ, but the inscription is surely miswritten. Cohen: the lettering is Charinos', note the angular rho. The 2-dot punctuation is old-fashioned: this is the earliest signature of Charinos.

- A] Stamnos in Six' technique. Unattributed.(1) Late sixth. *P. Jacobsthal, *Ornamente griechischer Vasen* (1927), pl. 87, b-c. Walters, BM Cat. ii, 301. ABV 672 (mention). *Vidi. 'Script' 1079.
B] A: a bearded discobolus and a bearded flautist. B: discobolus and jumper, both bearded.
C] Nonsense: A: to left of the discobolus: $\nu\chi\delta\kappa\epsilon(\nu)(\rho)\omicron$. Between the figures: $\nu\kappa\nu\kappa\nu$. To right of the flautist, upside down: $\nu[\kappa(\rho)\gamma$. To the flautist's lower right: $\nu\kappa\omicron(\rho)$. B: to the discobolus' upper left, upside down: $\nu\kappa\omicron(\rho)\kappa$. To his lower left: $(\nu)\kappa\nu\kappa\epsilon(\nu)\kappa$. To right of the jumper's back: $\nu\kappa\kappa\omicron(\rho)\omicron\nu\kappa(\nu)\gamma$. Under the foot, Gr.: $\Sigma\omicron$, the omicron not compass-drawn.
D] Typical Leagran letters. The reversed nu could also be a sideways sigma. Rho always with a very exaggerated high vertical. The Gr.: cf. Hackl, 32/XXX and TGV 80/21A (this vase is not listed).

Add.(2) 236. *D. Williams, CV, Great Britain 17, 18/4, pl. 6, fig. 4,d (profile of lip). LIMC iv, Europa I 37. Robertson, AVCA 55.

- B] Int.: WG: Europa and the bull. Ext.: WG: A: Struggle for the Tripod: Heracles (see below); at left, tip of a lance. B: fight.
- C] On the inside of the lip, Gr.: [---]ια[---].
A: above the lance diagonally downward: ηε[ρακλες], retr. [Απολλ]ῶν.(2)
- D] A Gr. dedication. - JHS 25, which has the inscription, is not figured in the earlier publications.

(1)Hartwig attributed to Euphronios, Beazley to early Douris, Robertson to very early Douris (earlier than his WG lekythoi; affinity with Proto-Panaitian and Panaitian), Williams to early Onesimos. (2)According to the information given to Beazley by Corbett, the fr. with this inscription was removed from the vase (see ARV(2) 1652 and below, London (ex D 1, below)), but Williams still gives it.

To right of the goose's legs, stoich.: Γλαυκῶν|καλος.

Boardman, *Athenian Red Figure Vases: the Classical Period* (1989), fig. 73,1 (Int., showing inscriptions).
- B] Int. (WG): the making of Pandora (Anesidora). Ext.: RF: A: youth with a horse, and other figures. B: a similar subject.
- C] Int.: above the head: Αθε[ν]αα. Above the head: [Α]νεσιδορα. Behind Hephaestus' back: ηεφα[ι]στος.
- D] Simon follows G. Neumann in explaining Anesidora as an ancient etymological explanation of Pandora, 'she who sends up, or releases, gifts.' Cf. Oxford 525, CAVI 4915, q.v. Robert had considered A. a cognomen of Demeter and the earth goddess. Ἀνησιδώρα is listed by Pape as epithet of Earth or Ceres from *Plut.*, *Quaest. Symp.* 9.14,4, *Hesych.* and *Paus.* 1.31,4. My readings omit restored letters. For crossbun theta see 'Script'. - The letters are all in the preliminary sketch, then painted over; all in the same size and shape. Addendum: the picture in Boardman seems to show that the letters ιστος are in a restored area, so that only ηεφα is preserved; but the missing letters of the other names are not restored in the picture. Should I read: ηεφα[ιστος](?).

Hoffmann, *Sotades: Symbols of Immortality on Greek Vases* (1997) 120-26, figs. 66-69 (66 is a dr. by Lissarrague showing inscriptions; 68 shows location of Glaukos inscription).
- B] Int.: Polyidos in the tomb of Glaukos. Ext.: plain.
- C] Γλαυκος. Πολυιδος.(1) [Σοτ]αδες.(2)
- D] From the same tomb in Athens as London D 6 and D 7, below, all by the Sotades Painter. According to Burn (who is followed by Robertson), London D 5 and D 6 and the two Sotades phialai,

found in the same tomb with five (originally six) other vases, are a set. Robertson thinks the Sotades signature here indicates the potter, not the workshop owner; and that Sotades worked in the workshop of Hegesiboulos. For the myth of Glaukos, see Apollodoros 3,2,3 and Roscher i, 1686f. For the sanctuary see P.J. Callagan, 'Excavations at a Shrine of Glaukos,' BSA 73 (1978) 1-30. Glaukos was a son of Minos who drowned in a honey pot but was brought back to life by the seer Polyeidios.

(1)so Beazley in AJA, "so far as I can make out." Smith and others had read Πολυειδος. Sophocles has Πολυιδος with short iota, Homer with long. (2)so ARV(2); Smith had restored: [Σοτ]αδες [εποιεσεν].

Hoffmann, Sotades: Symbols of Immortality on Greek Vases (1997) 119 n. 7 (former interpretations), 127-33, figs. 71-73 (fig. 71 is a dr. by Lissarrague showing inscriptions; 72 is a photo. of Int.; 73 is a detail of same showing the signature well).
- B] Nymphs(?): at left, remains of a girl, shorter than the other, or seated(?); at right, a girl gathers apples from a tree. Ext.: coral red.
- C] At right, a woman picking apples; three letters of her name survive: alpha or Attic gamma, rho and omicron.(1) At left was a crouching woman (perhaps picking apples from the ground), mostly lost: Μελισσ.α.(2) Between border and lip, a two-liner: [Σοτ]αδες | εποιεσεν.(3) For the inscriptions see Beazley in Gnomon and Daux.
- D] For the 'set' of Sotades vases, cf. entry D 5. Burn gives 3 possible interpretations: 1. women in an orchard. 2. The Garden of the Hesperides (with funerary connotations). But there is no snake and the apples are not golden. 3. Melissa and companions as honey nymphs (note: a Melissa discovered honey; a Melissa fed honey to the infant Zeus; Melissai were the daughters of the honey-king of Paros (see Roscher). D 5, D 6 and D 7 (the last not inscribed) are all concerned with honey, which has a connection with death and afterlife: the whole group was made for funerary use (see Burn 104-105; D 7 is interpreted by B. as Aristaios, the snake and Eurydice, cf. Virgil, Georgics 4.457-59; this cup is the only one not part of a pair; Burn thinks its mate is lost.) Robertson says the woman at left (Melissa) was

probably crouching, to pick up fallen apples. He thinks the subject was funerary; he mentions the Hesperidae and other interpretations, but says one cannot be sure. Apple picking in a funerary context: see Burn 94, with notes 8 and 9.

(1)I.e., [-]απο or [-]γο? But it need not be the end of the name. C. Smith has λδο. (2)so Burn; C. Smith has Μελισι. (3)two-liner, Smith; ARV(2) gives as a one-liner. If a two-liner, is it non-stoich.? It is written in the zone below the tondo in two horizontal lines, cf. Hoppin, RF 430.

- B] Inside white with black lip and black nipple.
- C] On the lip, Gr., near-stoich. left-aligned two-liner: Σοταδες | εποιε.
- D] As Boston 98.886, ARV(2) 772/δ, CAVI 2663, but without the cicada (Beazley; the inscription similar but fragmentary). The inscription is in very thin lines, quickly engraved, clear and small, but not neat. The vase is part of a set, from one tomb: see London D 5, above. Omicron round and rectangular; cf. Louvre CA 3825, CAVI 6687. Attic alphabet.

- A] WG oinochoe. From Locri. Foundry Painter. Brygos Painter (D. Williams).(1) First quarter fifth. *Vidi. C. Smith, BM Cat. iii, 394. ARV(2) 403/38, Add.(2) 231. *D. Williams, JbBerlMus 24 (1982) 18-21, figs. 1-3, 27, figs. 9-10. Boardman, ARFV, fig. 267. D. Williams in: The Eye of Greece (1982) 18-21. Robertson, AVCA 98, fig. 93. E.J.W. Barber in: Neils et al., Goddess and Polis (1992) 105, fig. 64.
- B] A woman spinning.
- C] To right of the distaff, in dark brown: ηε παις καλε.
- D] Williams connects the inscription with the woman (whom he considers a free woman). He compares Cab. Méd., ARV(2) 624/81, CAVI 6081, q.v., with the inscription φιλεργος [I think he takes this as an adj.; I take it as a name].

(1)Beazley attributed the pot to the Foundry Painter, but Williams to the Brygos Painter, with Robertson concurring.

Lissarrague in: Istituto Universitario Orientale, Annali, Sezione di Archaeologia e Storia Antica 10, further sezione tematica, La Parola, l'Imagie, la Tomba (Atti del Colloquio Internazionale di Capri) (Naples 1988), fig. 14,2.
- B] Woman at a laver.
- C] On the laver: $\text{ho}(\pi)\alpha\langle\nu\rangle(\varsigma)$.(1) To left of the woman's head: $\kappa\alpha\lambda\omicron[\varsigma]$. To right of her face: nonsense: $\chi\sigma\eta\lambda$.
- D] Small letters, hasty: near imitation. — R. Cromey, letter of 1 left of woman's head: $\kappa\alpha\lambda(\eta)$ [kappa 6 angular; lambda 2, leaning only slightly; 'eta' miswritten (but surely not omicron sigma).] To right of face: $\chi(\mu)\epsilon$. On the laver: $\kappa\omicron\mu\alpha\varsigma$ [the mu noted by C. as 'lame'; that on the last inscription is disjointed: nu + a vertical. Sigma 2, z-shaped.] The letter says further: 'my note says: "It can't be read and may mean nothing." There is no $\text{ho } \pi\alpha\iota\varsigma$, certainly.' C. also says: 'letters small, light brown, difficult to read.'
- [I think: consider the kind of writing the Karlsruhe Painter does. Perhaps $\kappa\alpha\lambda\eta$ and two nonsense words? For letter forms see the chart in 'Script'.]

(1)My reading, which is very doubtful for the second word. The third letter is perhaps a μ ; Smith read $\kappa\omicron(\nu)\omicron\alpha\varsigma$, with a dot by the nu, which could make it into a mu (I too saw such a dot); Fairbanks has $\kappa\omicron\mu\alpha\varsigma$, which could be a name:

ho Κομας |καλο[ς](?). But note the nonsense inscription.
Nonsense is common with this painter.

 B] Mistress and maid: woman to right carrying an offering tray from which hang many fillets; woman seated to left, her hands ready to receive the tray; above her head, mirror and oinochoe hung up.
 C] To right of the carrier's head, at top and above the basket, horizontal near-stoich. left-aligned three-liner:
 Λιχας | καλος | Σαμ[ι]ως. (1) The third line is not quite stoich.:

 D] Second white used.

(1)= Σαμῶς. In ARV(1) Beazley wrongly gave the father's name as Samios, nom., but this is corrected in ARV(2) to Samios, gen.; see Meisterhans(3) 141, para. 10. The father's name is Σαμειός. - The sigmas are printed by C. Smith as four-stroke, in ARV(2) the last two are printed as lunate, while Kretschmer gives only the second and fourth as lunate (this is criticized by Smith). - My notation: Sigma 4 very flat (twice) and once near S 15 (see chart in 'Script'). Further, there is a lost area after the fourth letters of lines 1 and 2, which makes the final letters to come at an unreasonable distance; I wonder if this is restored properly. The position of the three final letters to each other also seems to me questionable.

- A] BF/RF cup. From Vulci. Painter of London E 2.(1) Late sixth. *Photos. *H.B. Walter, *History of Ancient Pottery* (1905), pl. 37,1 (Int.). ARV(2) 225/1, 1636, ABV 390/1, Para. 346, Add.(2) 198. F. Lissarrague, *The Aesthetics of the Greek Banquet*, tr. by A. Szegedy-Maszak (1990; orig. 1987) 113-14, fig. 87 (photo. of Int.).
- B] Int.: youth lifting a pointed amphora. Around the tondo, BF: ships. Ext.: komos: A: two youths dancing; between them, a pointed amphora. B: similar.
- C] Nonsense: Int.: to the youth's left: νχδει. On his right: (ν)δεινο. A: to left of the left youth's head: (ν)δεν. To left of the right youth's face: (ν)δει. To right of his body: α(.)ε.(2) Between his legs: δεν. Starting from the youth's head: (ν)α(ε).(3) To right of his body: να. To left of the right youth's face: (ν)αει. To right of his body: αιοιου.(4)
- D] Typical Leagran nonsense. Delta and omicron are hard to distinguish; the reversed nu's are probably sigma's lying sideways. Cf. also Bonn 315, CAVI 2586, by the same painter.

(1)related to the Nikoxenos Painter. (2)The photo. shows a raised horizontal line for the second letter. (3)the epsilon is smeared. (4)perhaps διοσοσ(?).

- B] Int.: BF: horseman. Between eyes: A: satyr with pelta and drinking horn. B: satyr with pelta and trumpet.
- C] Int.: on either side of the horseman: ηισχυλος and

εποιεσεν. A: to left and right of the satyr's head:
Επικτετος. B: to right of the satyr's face: εγρασφεν,
for εγραφσεν.

- A] BF/RF eye cup. From Vulci. Unattributed. Hischylos potter.(1)
Last quarter sixth. *C. Smith, BM Cat. iii, 42. *Photo. ARV(2)
44/90, Add.(2) 160. Beazley Archive db, no. 200,297.
- B] Int.: BF: doe. Ext.: RF: A: petal. B: lost.
- C] Int.: around the doe: ηο παις ^ καλος, retr.(2)
- D] The handles, with the LM signatures of 'Thypheithides,'
have been removed; see London (ex E 4), CAVI 4226, 'Script'
1119.

(1)Class I of Standard Eye Cups. (2)so Smith; my reading from a
photo. differs: starting to left of the head, facing in,
and going around to the muzzle: καλος ηο παις, NOT retr.

4419.

London E 5.

- A] RF cup. From Vulci. Near Winchester Painter. Class II of
Standard Eye Cups. Last quarter sixth. *C. Smith, BM Cat. iii,
42. ARV(2) 48/161, 171/1, Add.(2) 183.
- B] Int.: jumper, bending over. Ext.: between eyes: A: athlete
bending. B: nose.
- C] Int.: around the jumper: ηο παις and καλος, retr. On the
base, Gr.: Κακασανος, retr.(1)

(1)so Smith, text, who compares Munich 2606 (Jahn 1087),
RF cup by Oltos, ARV(2) 64/102, which has on B a dipinto
once read Κακας καλος (Smith only gives Κακας). But see CAVI
5309 where the reading is different: κακασ σεμονι.

4420.

London E 6.

- A] RF eye cup. From Vulci. Pheidippos. Hischylos potter. Last
quarter sixth. *C. Smith, BM Cat. iii, 43, pl. 1 (A, B).
*Beazley, AJA 45 (1941) 593. ARV(2) 49/168, 166/11, Para. 337,
Add.(2) 182. *drs. (A). AJA 93 (1989) 556, fig. 3 (shows the
signature of Pheidippos quite well).
- B] Int.: archer. A: four athletes.(1) B: between eyes:
hoplitodromos.
- C] Int.: around the archer: ηισχυλος, retr., and εποιεσεν.(2) A:
above the athletes: Φειδιπ<π>ος εγραφε.(3)

(1)no eyes. (2)the first 6-7 letters written from the center
and retrograde, the others forward and from the outside
(Beazley, AJA). (3)complete, Beazley. C. Smith has Φειδιππος,
but that must be a mistake.

4421.

London E 7.

- A] RF cup. From Vulci. Manner of the Epeleios Painter. Last

- quarter sixth. *C. Smith, Cat. iii, 43 (not ill). ARV(2) 149/16, Add.(2) 179.
- B] Int.: warrior. A: two warriors fighting; on each side a warrior leading a horse. B: two groups of fighting warriors.
- C] A: around the shield device of the fallen warrior:
 ἡππῶν καλὸς ῥ.(1) In the field: ἡπ(α)ῖς καί.(2) B: nonsense.
- D] Beazley compares Fayetteville, Uni. of Arkansas, ARV(2) 151/59.

(1)the inscription is a complete circle, with καλὸς retr. (2)so Smith. Alpha, as printed, lacks the cross stroke.

4422.

London E 8.

- A] RF cup. Oltos. Last quarter sixth. *C. Smith, BM Cat. iii, 345-46. ARV(2) 63/88 (bibl.), Add.(2) 165.
- B] Int.: a boy running, with lyre and meat. A: Heracles and Cycnus. B: Dionysus and a giant. Facing each handle, a warrior with a horse, probably belonging to A (Beazley).
- C] Int.: nonsense: imitation inscriptions. A: above Heracles: ἡρ(α)κλᾶς(?).(1) Imitation inscriptions. B: under the left handle: imitation inscriptions.

(1)Smith prints ΗΕΡΛΕΣ with three-stroke sigma and reads ἡρ<α>κλᾶς, but that gives an Ionic lambda; I prefer alpha lacking the cross stroke. I wonder if this is not also a nonsense, or at best a mock, inscription.

4423.

London E 9.

- A] Fragmentary RF cup. From Vulci. Euergides Painter. Last quarter sixth. *C. Smith, BM Cat. iii, 45 (combined with an alien fr.; much old bibl.). CIG 4.7395. ARV(2) 89/13, 1625, Add.(2) 170.
- B] Int.: missing. A: between sea-horses: Peleus and Thetis; on each side two Nereids. B: between sea-horses: Nereids bringing the news to Nereus, seated at left; Hermes; woman (Amphitrite?).
- C] A: above Thetis: ΘΕΤΙΣ. B: ΝΕΡΕΥΣ, retr. Behind Hermes: ἡρμῆς.
- D] With the Int. removed as alien; see ARV(2) 1625 and London (ex E 9), below.

4424.

London (ex E 9).

- A] Fr. of RF cup. From Vulci. Near Scheurleer Painter. Last quarter sixth. *ARV(2) 170/4, 1625, cf. 89/13. C. Smith, BM Cat. iii, 354 (combined with E 9). Beazley, JHS 33 (1913) 348/1, 354.
- B] Int.: komast.
- C] καλὸς Φειδῶν.
- D] London E 9 is by the Euergides Painter, ARV(2) 89/13, of

which the Int. is missing, the above Int. having been removed as alien (see ARV(2) 1625).

4425.

London E 10.

- A] RF cup. From Vulci. Euergides Painter. Euergides potter. Last quarter sixth. *C. Smith, BM Cat. iii, 46f (much early bibl.). Caskey-Beazley iii, 2 n. 2, (4). Bloesch, FAS 52/10. ARV(2) 90/33, Add.(2) 170.
- B] Int.: sphinx. A: three armed Trojans (one on horseback) attack; one is named Hector. B: warrior; youth on horseback; a naked youth, named Telephos; all running (probably coming to the rescue, Boardman). On each side of one handle: Ajax and Achilles playing; the board is under the handle. Under the other handle: Troy.(1) Differently Beazley in CB: the players are between an attack party of Trojans led by Hector and an advancing party of Greeks probably led by Telephos.
- C] Int.: around the sphinx: ἡοπαῖς καλός. A: above the scene, at right: ἡεχῆρ.(2) B: youth running; above him: Τελεφος.
- D] The vase has been injured by acid.

(1)Beazley's description of the subject(s) in ARV(2) is misleading. (2)for ἡεκτορ; formerly read ἡεχθορ, but cleaning revealed the upper part of a tau (C. Smith).

4426.

London E 11.

- A] RF cup. From Vulci. Unattributed.(1) Pamphaios potter. Last quarter sixth. *C. Smith, Cat. iii, 47. *AJA 88 (1984) 351/39, pl. 43, figs. 20-21. *Photos. *Vidi. ARV(2) 129/22 (bibl.), 130, Add.(2) 176.
- B] Int.: warrior. Ext.: between pegasi: A: Dionysus between two satyrs. B: maenad between two satyrs.
- C] Nonsense: litter of letters: Int.: starting to left of the warrior's head and following the margin: υσοσ^υεεεε^ε(σ)εσ^νοσε[1-2].(2) In the field: χ(α)ον. Single letters: ον 9. ηοεφ. A and B: similar. Frequent are: εεε, εον, and combinations. Under the left pegasus, horizontal: ον(φ)σε. On the reserved foot profile, in BG: Παν(φ)αῖος εποίησεν. Under the foot, Gr.: ΣΕ, retr.(3)
- D] All sigmas reversed and many sideways. The letter marked 9 looks like a schwa, but is no doubt a miswritten omicron. Phi with diagonal or with horizontal hasta.

(1)"...very like the roughest cups of the Nikosthenes Painter, such as London E 14, CAVI 4429." "The same litter of letters as in London E 14 and E 815 [CAVI 4664]." (ARV(2) 130.)
(2)this looks a bit like mocking the signature of Nikosthenes. C. Smith thinks the litter of letters is taken from the signature.
(3)not in TGV or Hackl. Perhaps an owner's Gr. (since it is Attic, with three-stroke sigma)?

4427.

London E 12.

- A] RF cup. From Vulci. Nikosthenes Painter.(1) Pamphaios potter. Last quarter sixth. Ca. 520. *FR iii, 244, pl. 156 (dr.). ARV(2) 126/24 (much bibl.), Para. 333, Add.(2) 176. *AJA 88 (1984) 344, 350/33, pl. 43, figs. 16-17. 'Script' 1131. *Vidi. Robertson, AVCA 39 and 300 n. 135. fig. 31. H.A. Shapiro, Personifications in Greek Art (1993) 247/68 and passim (bibl.; discussion).
- B] Int.: satyr. A: Hypnos and Thanatos with the body of Sarpedon. B: Amazons arming.
- C] On the upper edge of the reserved foot profile:
Παν(φ)αιος εποίησεν.
- D] Robertson gives the history of Beazley's attributions. Phi with diagonal hasta.

(1)"cannot be denied to the Nikosthenes Painter," Beazley.

4428.

London E 13.

- A] RF cup. From Vulci. Unattributed.(1) Cachrylion potter. Last quarter sixth. *C. Smith, BM Cat. iii, 49 (early bibl.). ARV(2) 109, middle (bibl.), 1626, Add.(2) 173. H. A. Shapiro, Art and Cult under the Tyrants in Athens (1989) 123, pl. 55,c (Int.).
- B] Int.: Eros flying. A: *Hoplion Krisis*: Ajax and Achilles quarreling (restrained by two Greeks; Agamemnon between them). B: Achilles and Troilos; fountain; a girl; Polyxena.
- C] Int.: above and below Eros: καλος. καλος. A: καλος. καλος. καλος. B: να[.]ος.(2) ναχι καλος.

(1)has some kinship with Florence 91,456, an unattributed cup signed Cachrylion, ARV(2) 108/27, CAVI 3613. (2)so C. Smith, in Attic caps; perhaps for καλος.

4429.

London E 14.

- A] RF cup. From Vulci. Nikosthenes Painter.(1) Last quarter sixth. A.S. Murray and C.H. Smith, Designs from Greek Vases in the British Museum (1894), no. 11 (Int.). ARV(2) 125/21, 130. *Vidi (Int. only).
- B] Int.: a maenad dancing. Ext.: between sirens: A: Dionysus between two satyrs. B: satyr and maenad.
- C] Int.: nonsense: at left, facing out: νοσενοσε. At right, facing out: ποσενοσ.
- D] The foot is not preserved. I noted that the letters (on the Int.) are rather neat [i.e., compared to London E 11, CAVI 4426, q.v., and other parallels]. But Beazley, ARV(2) 130 speaks of 'litter of letters,' as on London E 11 and E 815, CAVI 4664. I have no note on the Ext.

(1)"Very hasty, but I think by the painter himself," Beazley.

4430.

London E 15.

- A] Fragmentary RF cup. From Vulci. Poseidon Painter (Coarser Wing

- ii). Cachrylion potter. Last quarter sixth. *C. Smith, BM Cat. iii, 50-51 (much early bibl.). ARV(2) 136/1, 1705, Add.(2) 178.
- B] Int.: young komast with drinking horn and wineskin; around the inside of the lip: frieze of large palmettes. All RF.
A: Birth of Athena. B: Peleus and Thetis.
- C] Nonsense: Int.: to left of his face: 4 letters. To right of the back of his head: 5 + letters. Between his feet: 6 letters.
A, B: imitation inscriptions.
- D] A very large cup.

4431.

London E 16.

- A] RF cup. From Vulci. Oltos. Last quarter sixth. 520-510. *C. Smith, BM Cat. iii, 51-52 (not ill.). CIG 4.7655. *Beazley, AJA 39 (1935) 480/9. ARV(2) 61/75, Add.(2) 165. *Vidi. 'Script' 344. F. Lissarrague, L'autre guerrier: archers, peltastes, cavaliers, dans l'imagerie attique (1990) 108.
- B] Int.: boy lifting a hydria. A: departure of Ajax, with a chariot. B: Dionysus with maenads and satyrs.
- C] Int.: in a circle, starting to left of the youth's forehead and facing out: Μεινῶν καλος. A: above the old man: [1-2](.)ρ(α)λος.(1) Αιας.(2) Between Ajax' legs: χ(α)τσο, the σο perhaps separate. To right of a woman's face: ΑΤΟΛ(Ε). Above a warrior: Μει[μ]νῶν and καλος. αυκ, complete(2)? B: ΕΛΑ is clear once. Other inscriptions are similar, all short.
- D] Hard to read. Extremely sloppy writing; it is hard to tell what is sense and what is nonsense. Lissarrague says that the vase has Αιαςκαλος, but that is not what I read.

(1)C. Smith suggests [Πα]ραλος, but Beazley in AJA says it is doubtful whether there was ever anything before the rho [see however my reading; I thought the first extant letter probably an iota]; Beazley rightly suggests that the inscription may be meaningless. Smith himself suggests that the old man is Telamon.
(2)the location not noted by me.

4432.

London E 17.

- A] RF cup. From Vulci. Oltos. Last quarter sixth. *C. Smith, BM Cat. iii, 53 (much early bibl.). CIG 4.7855. ARV(2) 62/80.
- B] Int.: youth with oinochoe (cup bearer). A-B: fights: A: two groups of two.(1) B: similar.
- C] Int.: around the youth: Μεινῶν καλος.(2) A: above the scene, widely spaced: Σμιαδες καλ[ο]ς. B: καλος Μεινῶν.(3)
- D] According to Bloesch, by the same potter as Berlin 4220, ARV(2) 61/76, CVI 2434.

(1)Smith says Greeks and Amazons. (2)Beazley has: καλος Μεινῶν.
(3)Smith prints a peculiar alpha that looks like an angular omega with the two feet touching.

4433.

London E 18.

- A] RF cup. From Vulci. Oltos. Last quarter sixth. Ca. 520-510 (Beazley in CB ii). *C. Smith, BM Cat. iii, 53-54 (not ill.). CIG 4.7760. *Bothmer, Amazons 131/4, pl. 69,2 (A). *Caskey-Beazley ii, 60-61 (discussion of B). ARV(2) 62/86, 1700, Para. 327, Add.(2) 165. *Mus. photo. (B). 'Script' 340.
- B] Int.: a naked woman tying her sandal. A: Heracles and the Amazons. B: Anacreon and two companions (komos).
- C] Int.: καλο[ς] Μεμν[ο]ν.(1) A: ηερακλες. Λυκοπις. [Κυ]δοι[με].(2) κα[λ]ο[ς], retr.(3)(?). B: to Anacreon's left: καλος, retr.(4) On his right: Ανακρεον. To right of the youth in the center: Νυκ[υ]φες. To right of the (missing) head of the right figure (youth or man): [---]ον.
- D] For the iconography of Anacreon in Athens see CB ii and AJA 69 (1965) 152-54.

(1)so C. Smith and Bothmer; ARV(2) gives Μεμν[ο]ν καλος. (2)Bothmer, on analogy with Arezzo 1465, CAVI 165; Smith suggests Δω(ρ)[ι]ς(?). See the BM Cat. for early readings; Bothmer is surely correct. (3)given by C. Smith, but not by Bothmer. (4)probably not to be connected with Anacreon, although this is possible (see CB ii).

4434.

London E 19.

- A] RF cup. From Vulci. Oltos. Last quarter sixth. 520-510. *C. Smith, BM Cat. iii, 54-55 (not ill.). CIG 4.7854. Kretschmer, Vas. 133. Bloesch, FAS 50/5. *ARV(2) 63/95 (bibl.), 1573. *'Script' 335, Fig. 81 (Int.).
- B] Int.: a young archer. A-B: komos (three figures on each side).
- C] Int.: Around the circle, starting at lower left and facing out: Μεμν[ο]ν καλος. A: youths: Νικ[ο]ν. καλος, retr. Χιλ[ο]ν, retr.(1) Σολ[ο]ν, retr. καλος. B: Μολ[ι]πις (head missing). [κα]λος. Θαλ[ι]νος (bearded)(2). Χσανθος.(3)
- D] "The kaloses are but loosely attached to the names of the revellers" (Beazley).

(1)for the sp. see GAI i, 194; the sp. [Χ]ειλων, found on an early fourth-century inscription (IG ii(2) 31.3) is probably a different name; cf. LGPN ii, s.vv. (2)Θαλ[ι]νος, Schefold, but the name is Θαλ[ι]νος (see LGPN ii). (3)C. Smith says the figure is similar to Thalinos, so bearded?

4435.

London E 20.

- A] RF cup. From Vulci. Euergides Painter. Last quarter sixth. *C. Smith, BM Cat. iii, 55-56. CIG 4.7670. Beazley, JHS 33 (1913) 348/3, 354. ARV(2) 90/35, Add.(2) 170.
- B] Int.: komast: a youth dancing. A: Menelaus fighting a Trojan (Paris?); at left, a warrior. B: a youth holding two horses.
- C] Int.: ho παις καλος. A: above the scene: Μενελεος.(1) B:

above the scene: Πλεξιππος.

- D] Plexippos: Pape gives several mythological figures of that name, but also refers to inscriptions. London E 21, side A (below) suggests that this is a 'real' name, not mythological; so listed in LGPN ii (only on E 20).

(1)uncertain to which figure it belongs.

4436.

- A] RF cup. From Vulci. Euergides Painter. Last quarter sixth. *C. Smith, BM Cat. iii, 56. CIG 4.7827b. Beazley, JHS 33 (1913) 344/4, 354. ARV(2) 91/49. *Photo.

- C] Int.: around the youth, starting from the back of his head: ho παεις καλος. A: above the scene: ηιπποκριτος. B: above the scene: Π[λεξιππος](?).
- D] For Plexippos, cf. London E 20 (above), side B. An earlier Hippokritos appears on two BF band cups: London B 400, CAVI 4301, and Berlih 1799, CAVI 2244; ABV 667.

- C] Int.: above and to the right of the youth's head, along the top margin: Επιδρομος, and below it: καλος. To left of the last: ναιχι, retr.
- D] The inscription is written in relation to the youth's head.

(1)Hartwig attributed the cup to Cachrylion, Beazley left it unattributed, Williams also does not attribute but makes comparisons with the Apollodoros Group. (2)hunter(?), Beazley. Komast(?), dancing(?), Williams.

C] Int.: around the youth: ἠοπαῖς and καλός, the latter retr. (but each letter faces left to right), apparently making one large curve.(1)

(1)the information is from the picture in JdI, which is probably not a photo. and perhaps unreliable.

The Int. is influenced by the Eretria pediment where Robertson, Neils agreeing, reads the inscription on the chariot rail as [Θ]εσε[υς]. But Greifenhagen, *JBBerlMus* 3 (1961) had denied any mythological interpretation, citing Oxford 1927.4065, CAVI 5960, where the woman on the Int. is a hetaera. Cartwheel theta?(7)

(4)Theseus and Helen (Neils). (5)often considered a greeting, but in 'Script' I consider it rather the painter's comment.
(6)the verb is on the Villa Giulia fr. (7)'Euphr.' has dotted theta; the photo. is not clear: it could be a cartwheel theta. Very small letters; neater than elsewhere for Oltos, but in the early style of Euphronios.

- B] Int.: lovers: a woman and an old man.(2) A: Heracles and Eurystheus. B: a chariot (youth, man, Hermes).(3)
- C] Int.: around the upper part of the tondo, facing in:
Πανατιος ^ καλος.(4) A: on the rim of the pithos, in BG: Ευρυσθευς. To right of E.'s mother's head: καλε. B: to left of the youth's head(5): καλος.(6) To right of the hoplite's face: [κ]αλος. On the underside of one handle, Gr., each

word starting at the handle root: Ευφρονιος and εποισεν.
Under the foot, Gr.: X with two hooks on top; see TGV
105/20B 3, and 198.

- D] For the Gr. signature, cf. Malibu 79.AE.19, CAVI 4936, as discussed in 'Script' 85 n.17 ('Script' 515), now superseded by Cohen, who thinks both words of the signatures are written on one handle and are written by Euphronios. Bothmer in 'Eye': the Gr. signature [on London E 44] is incised on the two halves of handle B/A, going from roots to arch, differently from Malibu 79.AE.19.+ - Boardman in GVGettyMus cites the placement of Eurystheus' name as a parallel for the name 'Anakreon' on the lyre of Copenhagen 13,365, CAVI 3252: in both cases the object is particularly significant (Eurystheus had prepared the pithos for this eventuality; reff.). - The signature has some different letter forms from the Dipinti: tailed rho; sigma with sharp corners (typically Euphronian), phi with diagonal hasta. Kunisch thinks the Gr. signature may have been influenced by the practice of Hieron/Makron [rather than the opposite, as Bothmer think suggested.]

(1) shows part of inscription well: ... αιπιος ^ κα... (2) on the subject and recent misunderstandings see CV, GB 17. The hetaera ties up her zone. (3) perhaps the chariot of Odysseus; see ARV(2). (4) a basket intervenes. (5) i.e., behind him. (6) Williams has [κ]αλος.

A: Heracles and three Amazons: to right of the right leg of the leftmost figure (an Amazon): ηιπ<π>ο, retr. ηερακλες, retr. (2) Above one Amazon: Ανδρομαχε. A third Amazon is not named. B: three Amazons come to the rescue: over the shield of the leftmost: Καλλ<λ>ι[...], retr. (3) The central Amazon (an archer) is not named. To left of the right Amazon's face (hoplite): Ενοπε, retr.
- D] Hartwig attributed the cup to Euphronios; Beazley, at first to the Panaitios Painter, later to the Proto-Panaitian Group; Williams, to early Onesimos (in JbBerlMus). The lettering is larger and more firm than on earlier vases attributed by Williams to Onesimos; the alphas and lambdas are different, while the kappa is similar. According to GAI i, 46 this is the vase cited as London no. 820 by Kretschmer, Vas. 98 with the wrong reading ΗΠΑΚΛΕς (with 3-stroke sigma).

- B] Int.: Chrysis served with wine by Zeuxo. A-B: Hera

and Iris attacked by satyrs.

- C] Int.: to right of Chrysispos' mouth: Χρυσίππος. Behind the woman's head along the margin: Ζευχσοῦ. A: Above a crouching satyr: Τερπῶν. To right of a satyr's mouth: Βαβακχος. Similar: ηυδ(ρ)ις.(2) Similar: Στυῶν. Similar: ηερμες, retr. Similar: ηερρα, retr. Similar: ηερρακλες, retr. (The last three persons face left). B: Similar: Δρομις. Similar: Διονυσος. Similar: Εχῶν. To right of Iris' middle: Ιριν. Behind a satyr's head: Λεφοις.(3) - On the reserved foot profile, in BG: Βρυγος and εποιεσεν.
- D] The phiale held by Chrysispos is gilded. Iris' name is in the accusative; it depends on the verbs implicit in the satyr names, Echon and Lepsis. The signature is in large letters widely and evenly spaced: Brygos is on one side and epoiesen directly opposite, filling exactly one half of the circle; there is one letter space between the words on either side. Williams in CV notes that the name is under side A and the verb under side B. For the separation of name and verb W. compares London E 44, CAVI 4457 (on a handle); perhaps the Getty Iliupersis cup [Malibu 83.AE.362.+, CAVI 4972]; and New York 1981.11.9, CAVI 5731 (Euthymides). FR thinks Chrysispos and Zeuchso are names of heroes (but Robertson does not; LGPN ii lists them as historical names); the picture resembles those on votive tablets, cf. the votive marble plaque, Furtwängler, Sammlung Sabouroff 1, 37 and n. 4. Simon in 'Eye' discusses the Ext., which she thinks is from a satyr play (as did FR), perhaps 'Iris,' perhaps by Pratinas; see also FR and Cambitoglou; Beazley, JHS 30 (1910) 57; Haspels, ABFL 20; A. Kossatz-Deissmann' LIMC iv, 696-97 (Hera) and v, 751-52 (Iris); Williams in AJA, who says that Hera has sent Iris to a sanctuary of Dionysus to stop the sacrifice, but the satyrs have caught her and other satyrs threaten Hera herself, but the imminent arrival of Heracles will probably save her. Simon links the satyr names on B with names of dogs. Attic alphabet, but sigma mainly four-stroke. Dotted delta. Tailed rho in the signature only.

(1)on the Brygos tomb, see Beazley, AJA 48 (1945) 156-58, and Williams in AJA. Found with London E 140, CAVI 4501. (2)the rho written over another letter, perhaps iota. C. Fränkel suggests miswritten for ηυβρις. Williams says that the first letter is cramped and may be miswritten for kappa. [Κυδρις, which W. translates as 'lusty', is not in Pape, but names in Κυδρo- are.] The photo. in CV, pl. 63,a, seems to show a miswritten letter having three vertical strokes. (3)C. Smith wrongly read Νεφοις.

- C] Int.: to right of the girl's head: Καλλιστῶ. A: above the group at left (referring to the standing youth with a lyre): Πιλῶν. Above the head of a seated woman: καλος, for Φιλῶν καλος. Above the scene: Πιλιπος, retr., for Φιλιππος. The girls are not named. On the cup held by a seated woman, in BG: καλε. Above the head of a reclining youth: Δεμονικος. The bearded man: Αριστοκρατες. B: to right of the head of a young oinochoos at left by a column: ho παεις καλος. Above a bearded man reclining in the center: Διπιλος. Further to right: καλος, for Διφιλος καλος. Above and to right of a seated girl's head: Νικοπιλε. To right of a reclining youth's head: καλε, for Νικοφιλε καλε.
- D] The letters are variable, e.g. the kappas. Tailed rho. For the "psilosis" see Hartwig, Meisterschalen 320-21; also Cambitoglou 11, with my suggestion in n. 37 that the figures are thought to be drunk; further 'Script' 88 and Williams, CV, p. 56. Kretschmer deduced that [the] Brygos [Painter] was a foreigner, and this is accepted by Cambitoglou. The same misspelling occurs on Florence 3949, ARV(2) 376/90, CAVI 3562, but not on other vases. "Tag-kalos," ARV(2) 1606. Kallisto as the name of a hetaera: Aelian, Var. Hist. 13,32. For Nikophile, see Peschel 184.

the irregular use of *eta*; see Kretschmer, Vas. 107. Does Θητις
have syllabic heta: Θη̄τις(?). Αρη̄ος(?). I give the
inscriptions mainly after Beazley, *Kl.-Maler*. For the
Nereid names, see *BM Cat.* The vase was a family heirloom

B is interpreted by Williams as Briseis being taken out of Agamemnon's tent to be returned to Achilles, but Kossatz-Deissmann in LIMC iv, s.v. Briseis, pp. 157-66, esp. 166, keeps the old interpretation that she is brought to Agamemnon. Cf. also Schefold, Sagen 181-82. Beazley, lectures, p. 96: "This is not exactly a learned picture, but very nearly; and one sometimes wonders if the painter has not been in consultation with a learned man. Perhaps with a member of the Eumolpid family? Or perhaps with a poet, a native of Eleusis?" Beazley also discusses the winged throne (not chariot), Eleusis, and Eumolpus as a poet. - This and the other skyphos by Makron (Louvre G 146, CAVI 6487) have (in the signature) four-stroke sigma; one has tailed rho. These are rare on the cups (so Cohen). Cf. also her n. 124. - For the signature, see 'Script' 89, Cohen, p. 70 and Kunisch. [The position is unusual, as are the letter forms; the lettering in the scenes is quite different, I think.] Skyphos-type horizontal handles (cf. Kunisch, p. 15). - Attic alphabet. Wavy and irregular lines. Horizontal strokes also somewhat wavy. Three-stroke Sigma (in the scene) and four-stroke (in the signature). Tailed rho in both, but not pointed in the signature. The writing of the signature seems quite

different from that on Boston 13.186, CAVI 2775..

- D] C. Smith: the first mention of Jason's renewal is schol. Arist., Equ. 1321; without the inscription one would have thought of Medea renewing Aison (his father); Heydemann thought $\lambda\alpha\sigma\omicron\nu$ miswritten for $\text{A}\iota\sigma\omicron\nu$. Herakles, no. 2717 (with earlier LIMC reff.).
- B] Upper row: Rape of the Leucippidae by Castor and Pollux:
the rape victim of Pollux is Elera (see below; perhaps for
the usual Hilaeira). Castor's rape victim is Eriphyle
(usually Phoibe). Chrysippos is Castor's charioteer. Burn
26 thinks the archaic statue (not named) is Aphrodite.
Lower row: Heracles in the Garden of the Hesperides [once
interpreted as the Argonauts' visit to the Hesperides, FR
i, 43; Walters in CV; this made Medea more explicable]: 7
figures around the apple tree guarded by a serpent:
Chrysothemis picks apples. Asterope leans on her shoulder.
Lipara holds out apples. Heracles, seated, looks toward
her. Iolaus. Klytios points at the tree. Hygieia is with
him. - Opposite this group are: in the center, three Attic
heroes: Akamas, Hippothoon, Antiochos. At left, Philoctetes
talks to Akamas. At right, Klymenos. - To right of this
group: Oineus, Demophon, with the Hesperid Chryseis. -
Medea with a small casket, Elera and Arnioppe.

Κλυμενος. Οιν[ει]υς. Δημοφων. Χρυσις (girl). - Horse brands:
X of upright shape (+).
- D] Burn gives the early history of the vase (Hamilton). The
readings are a combination of BM Cat., CV and FR. The
inscriptions are said to be very hard to read. - For the

mythology see FR and Burn: this is a an Attic garden paradise, whence the Attic heroes (tribal plus Demophon). Burn 22-23: notes the erratic use of names: Elera is found in both scenes. Note also the rape victim's names in the upper row. Agave is elsewhere Pentheus' mother. Philoctetes seems out of place, but Burn 23ff. speculates on the significance of Medea in her Oriental costume. - The Dioscuri in the rape scene show a pro-Spartan attitude by the painter; but the Hesperid scene is pro-Athens. Both scenes are suitable for a tomb: rape is death; the Hesperid garden is = the Isle of the Blessed. - The alphabet is Ionic, with some three-stroke sigmas.

(1)sigma written above eta for lack of space. (2)given with Attic lambda in CV, with Ionic in BM Cat. (So also for other inscriptions). Kretschmer 208 explains it as Ἰλάειρα, a known name of a daughter of Leucippus. (3)the last letter written above; cf. n. 2. (4)BM Cat.gives three-stroke sigma. (4)a for -εα (with short e), see GAI i. (5)BM Cat.: the first sigma four-stroke, the second three-stroke. (6)so FR. Not Aietes or Atlas as read before C. Smith established the right reading. (7)but there is space between two lances for a letter after the theta.

- B] A: Warrior leaving Home. B: citharode.
- C] Nonsense: A: to left of an archer: *[.]φοισαογι*. To right of his head: *τοπ[1-2]οιο*. To right of the legs: *εοιο*. To left of a hoplite's face, not facing: *τονει*. To left of his legs, retr.: *εοποι*. To right of the head: *ιοπι*. To left of an old man's chest and legs: *τοτεν*. *οποεναι*. To right of his lower body and legs: *ιοπο(γ)μ*. B: to left of a youth's head, not facing: *ποε[---]ι[-]ε[-]*.(1) On his right: *ουμαοπαεϋ*. *ιπο*. To right of the lyre player: *εοποπαερμιο*, not certainly complete at end. To right of the other youth: *χοπαοπ*.
- D] My readings, which supersede those in CV. C. Smith in BM Cat. notes that the inscriptions, which are very clearly written, recall Euthymides.

- A] RF amphora. From Vulci. Dikaios Painter. Last quarter sixth. 510-500. *CV, Great Britain 4, III I c, pl. 3,1a-b. C. Smith, BM Cat. iii, 192. *Beazley, AJA 33 (1929) 364/7. ARV(2) 31/2, Para. 324, Add.(2) 157. *'Script' 409. GAI i, 272.
- B] A: The Struggle for the Tripod. B: Warrior leaving Home.
- C] A: *Αθεναια*.(1) *παλοσ*. *δεχιοι*.(2) *Απ[ολ]λῶν*. *Αρτεμις*. B: nonsense only: *κιοι*. *γεχογοκ*. *χλε[.]οι*, retr., except the first sigma. *χεχοιοχοχογε*. *χλειοπχοιο*.
- D] The inscriptions here taken from 'Script'. Large and coarse letters, especially on B.

(1)GAI i reads *Αθεννα*. (2)C. Smith, rejecting previous readings

Δεξιόπαλος, Δέξιος καλός, read δέξιος πάλος, but Beazley in AJA considers the two inscriptions probably meaningless.

- A] RF amphora. From Vulci. Recalls Bowdoin-Eye Painter. Last quarter sixth. *CV, Great Britain 4, III I c, pl. 3,2a-b. *C. Smith, BM Cat. iii, 193-94, pl. 10 (A, dr.). *JHS 37 (1907), pl. 19 (B, dr.). CIG 4.7423. Kretschmer, Vas. 79. Cf. Caskey-Beazley ii, 4-5. ARV(2) 168, Add.(2) 183. TGV 132/9E 48.
- B] A: Apollo, with a deer, playing the lyre; at left, Leto; at right, Artemis. B: three athletes: discobolus; acontist; boxer.
- C] A: above Apollo's head: Απολλωνος. B: to left of the acontist, facing him: [Φ]άυλλος, retr. To left and right of his head: κα^λος. On his right, facing him: Λαδαμας, retr. Under the foot, Dip.: O on navel; Gr.: ΑΡ with a stemless rho.(1)
- D] The assignment of the inscriptions to the figures is not quite clear: CV assigns Phayllos and the kalos to the discus thrower and Ladamas to the middle figure. Beazley in CB also assigns Phayllos to the discus thrower. The dr. in JHS suggests that attribution, giving kalos to the middle figure and therefore Ladamas to the boxer. There is thus no kalos-name. I ignore the way the inscriptions face the middle figure.

- A] RF amphora. From Vulci. Oltos. Euxitheos potter. Last quarter sixth. *CV, Great Britain 4, III I c, pl. 5,1a-d. *C. Smith, BM Cat. iii, 145. CIG 4.8201. ARV(2) 54/4, 1622, Add.(2) 163. *Photo.
- B] A: Achilles. B: Briseis.
- C] A: to right of the figure's middle and legs: Αχιλλ^λευς. B: in the same position: Βρισεις. On the reserved handle, in BG: Ευχοιθεος. Similar, on the other: εποιεσεν, retr.
- D] Neat lettering, fairly large, according to my notes. I take it the words of the signature both go toward the middle.

- A] RF amphora. From Vulci. Diogenes Painter. First quarter fifth. *CV, Great Britain 4, III I c, pl. 4,2a-b. *C. Smith, BM Cat. iii, 147. CIG 4.7475b. Hartwig, Meisterschalen 385. ARV(2) 248/2, 1574, Add.(2) 202. Hackl 66. TGV 80/21A 26, 179/suppl. list 2/26. Robertson. AVCA 122, fig. 125 (A).
- B] A: three draped youths conversing with a draped boy (the third figure from the left), offering him a flower and a wreath. B: Dionysus between two satyrs.
- C] A: to left of the left-hand figure: Αντιμενον, retr. To left of the second figure from the left: Θρασκλειδες,

retr. To left of the boy: Διογενες, retr. Above the head of the right-hand figure: καλος. B: one satyr is inscribed: καλος. Under the foot, glaze Dip.: ΟΣ with three-stroke sigma. Gr.: = alpha with vertical bottom stroke.

- D] Diogenes is considered by Robertson a kalos-name referring to the boy depicted (tag-kalos); the other instances of this kalos-name are listed by him. This vase seems the earliest occurrence of the name, a fact consistent with his depiction as a boy. Differently, Beazley: "Diogenes seems to be the boy, and the kalos may go with the Diogenes" (ARV(2) 248; on p. 1574 described as tag-kalos). I rather think each figure is inscribed, the fourth having the kalos.

Smith, BM Cat. iii, 202. Beazley, Der Kleophrades-Maler (1933), no. 13. ARV(2) 183/15, 1632, Para. 340, Add.(2) 187 (much bibl.). *Vidi (A). M.F. Vos, 'Aulodic and Auletic Contests,' Enthousiasmos (Amsterdam 1985) 122-23. Shapiro in: Neils et al., Goddess and Polis (1992) 203 n. 131.
- B] A: a bearded rhapsode on a bema, reciting. B: flute-player.
- C] A: from the rhapsode's mouth, in a large curve: ἠὸδέ ποτ' ἐν Τύρινθι vacat.(1) On the bema, in BG: καλὸς(ς) εἶ.(2)
- D] Shapiro does not believe that this is a rhapsode, rather he is an aulode accompanied by the flautist on the other side. For this, S. cites his article: 'Hipparchos and the Rhapsodes,' in: L. Kurke and C. Dougherty, eds., Cultural Poetics in Archaic Greece (forthcoming in 1992). - On p. 1632 of ARV(2), Beazley argues against a suggestion made in

JHS 78 (1958) 37 n. 22 (which he does not name) by saying that the first vowel of Τίρυνς is long (Il. 2.559, etc).

(1)for the metathesis (Τυρινθι for Τίρυνθι) see GAI i, 266 and 391 (with a slight error). (2)The first four letters are large, the fifth letter, 'nu', still larger, the rest quite small. Presumably sigma sideways; I took it to be a clear nu, but both C. Smith and Beazley (JHS) read καλος, probably correctly. The painter may have mistaken a sideways sigma for a nu.

- C] A: from Phineus' mouth: θεοί.(2) On the right and below: Χ(α)ρμιδης κ(α)λος.
- D] The shape of the alphas is given in C. Smith and ARV(2) without cross bar as in London E 290 and 292. This seems to be a workshop characteristic.

(1)CV thinks she could be Erichtho, Phineus' wife. (2)according to C. Smith, CIG reads θεω.

- B] A: two Amazons setting out. B: a third.
- C] A: between the Amazons: Καλλι<α>(δ)ες καλ(ο)ς.(1)
- D] Two alphas lack the cross stroke. Delta is a triangular blob, clearly intended for delta.(2) The omicron is distorted.

(1)ARV(2) reads K(α)λλι<δ>ες καλ(ο)ς, but lists the name as Kalliades on p. 1587, compares Athens, Acr. ii, 1498, CAVI 1693, and refers to Caskey-Beazley ii, 8, C 1. CV prints Καλλιοες after the BM cat., where the reading is Καλλιδης καλος, which is followed by CV and ARV(1) 927. (2)Beazley in ARV(2) says that the letter is rather shapeless and might also be an alpha; I do not think so.

D] The triangular omicron is typical of this painter, whence he was once called the Dionokles Painter.

B] A: Nike at a tripod on a three-stepped base.
C] A: on the top step of the tripod base: Ακαμαντις | ενικα φυλε. On the bottom step: Γλαυκων καλος.
D] Pickard-Cambridge(2), Davies and Webster think Glaukon won a choral victory of his tribe, but Glaukon is a very common kalos-name in this period (see 'Script', p. 100 n. 10). The same(?) victory is remembered on Athens, Acr. ii, 504, CAVI 1381. The victory inscription is Attic, the kalos-inscription, Ionic. The same handwriting is found on Boston 68.163 CAVI 2821 [see Para. 402-403], which has Γλαυκων καλος, Ionic, on a herm and Charmides kalos in the field in Attic letters. Since that vase is attributed to the Nikon Painter, I think London E 298 should also be, as the letter forms are identical.

C] A: ηεὸς. One horse: Λακῶπῶν.(2)
D] Matheson 209: Eos not Nike, since (in addition to the name) a dolphin shows that she is emerging from the sea. Unnamed winged figures related to the sea should therefore always be Eos and not Nike.

(1)near Polygnotos himself (Beazley). (2)Beazley in AJA compares the maenad name Λακῶπας on the krater fr. by the Kleophon Painter, Once Naples, Kleinenberg, ARV(2) 1144/22, CAVI 5514, q.v.

D] Epimedes is a heroic name; cf. 'Midas kalos' on London E 447, CAVI 4596. Dotted delta.(2)

- B] A: sacrifice: a bearded man pouring wine; Nike above an altar; two youths with spits; a young male flute player. B: three youths, one with a lyre.
- C] A: above the man's (priest's) head: Αρχεναυτης. Above the head of the left youth: Νικοδημος. Above the head of the right youth: καλος.(1) The flautist: Σ(ψ)ΣΙ(φ)ΟΣ.(2)
- D] A scene from daily life, not mythological as Gerhard had thought (see Tillyard and Kretschmer). Archenautes may be the general(?) of 433 B.C.; see D.M. Lewis apud 'Script', p. 111. A possible parallel for Nikodemos is listed in ARV(2) 1603. The vase is a close replica of Once Gotha 51, ARV(2) 1028/10, CAVI 3828, also by Polygnotos, and similar to London E 456 (Group of Polygnotos), below, but both name the sacrificer Diomedes. Found with London E 456. - Now cleaned. Webster, PP 51 said the flying Nike holds a book roll but it is in an area of restoration; see Matheson n. 31. Webster read Sosibios, Matheson reads Σωσι(β)ος. Ionic alphabet.

(1)this has been read as Νικοδημος καλος, but the καλος may go with the second youth: see ARV(2). (2)perhaps for Σώσιπ<π>ος [but this should have ππ], or Σωσίθεος, C. Smith. The 'digamma' is not that, but a miswritten letter; its top horizontal is that of a tau, the rest of the letter looks like an F. Σώσιβος(?), Thraette in GAI i, 39.

Matheson, *Polygnotos and Vase Painting in Classical Athens* (1995) 46-49, 276-77 and nn. 29 and 32, 347/P9, pl. 36.
- B] A: Diomedes sacrificing (replica of E 455, above). B: three youths (as E 455).
- C] Above the head: Διομεδης. To left of Nike's head: Νικε.
- D] Found with London E 455. A distinctly different hand from E 455. The vase is now cleaned and attributed to Polygnotos himself by Matheson. Webster, PP 51 and n. 1 identifies Diomedes with the historical PA 4070 [but LGPN ii does not list the vases as referring to a historical Diomedes]. Diomedes also appears on Gotha 51, CAVI 3828, and a RF fr. in Palermno by the Achilles Painter, ARV(2) 992/64, CAVI 6038. My view is that, as in the case of Deinomache (see the RF neck amphora by Aison in Chantilly, ARV(2) 1176/25, CAVI 3133), the name is mythical but was chosen because there was also a historical personage.

(1)not the foot of a stamnos, as suggested by C. Smith and Hoppin, RF ii, 294/11. (2)Only four letters are missing in the break (ABV 204). επ[οει] or επ[οει] are also possible.

B: athlete and trainers.

D] The readings are from the BM cat. Attic, with omega twice for omicron.(2) Syllabic heta.

(1)K.-D. suggests that [Με]θυσ[ε] is another possibility.

(2)GAI i states that omega is used for both ω and ο; but I do not see why we should here assume the epic form of Dionysus.

- B] A: the right portion of a scene, perhaps from a Death of Orpheus: two Thracians: one with shield and spear; the other seated, with a cap, shield and spears; at right, handle attachment.
- C] A: above the group, perhaps referring to the seated Thracian: Ευδ(η)μος.(2)
- D] The figures may be peltasts rather than Thracians. Ionic alphabet. The eta is miswritten.

(1)Smith says a fr. of a krater, but it has no rim. (2)or a kalos- or artist's name as Smith suggests and as is accepted in LGPN ii.

- B] A: Calydonian Boar Hunt: two hunters; a tree; a boar charging; a third hunter attacking; at right, a horse's muzzle, leg, and spear.
- C] A: to left of the tree, stoich. two-liner:
γυ...|κ(α)λ...(1) Above the boar, to left of the attacking hunter: (Γ)ιδυμος.(2)
- D] Very sloppy writing with miswritten letters. Mixed alphabet? Attic except for the eta as given by Smith in the first inscription (see below). Dotted delta.(3)

(1)Smith reads γυαισ|κ(α)λη and thinks it perhaps miswritten for ηπαισκαλη. I saw only the first three letters and say in my note: there may be more, but the letters cannot be distinguished from tree leaves. I wonder if the eta is right. (2)Smith prints (Δ)ιδυμος and queries it; the first letter is given as an Attic gamma, which is correct. The iota has a small hook at bottom right. (3)so Smith, probably correctly, although the delta is smeared.

- D] For the three-line inscriptions by the Pantoxena Painter

(λ)λο
επ υ.(2)

(1)hastily. (2)my reading from the vase, which does not quite

correspond to 'Ullman Studies' or Beazley in AJA, but the letters are not very clear. The first letter is an alpha with a horizontal cross bar; the second letter is probably an omicron with an extended loop rather than a rho as Beazley thought; the third letter is either an Attic lambda, in which case the next two lambdas would have to be read as Attic gammas (see also Beazley in AJA), or an incomplete delta, certainly not an iota; the fourth letter is disjointed and has a curving right hasta; the rest is clear.

- B] Pyrrhichist(2); at right, a dipros with a cloak.
- C] Nonsense: σοτσο. τοσαεσ.
- D] Clear writing.(3)

(1)appended to manner of Bowdoin Painter: shape is Bowdoin
Painter's, but shoulder palmettes are RF. Haspels lists
with three other lekythoi as having been made in the
workshop of the Athena Painter. (2)so ARV(2); Smith calls her
an Amazon. (3)Haspels, p. 74 gives: (σ)στ(σ)ο (the first
letter, four-stroke sigma reversed; the fourth a 'Z' reversed)
and (.)οσδεσ (the first letter = lambda 6; both sigmas, sigma 1;
see chart in 'Script').

(1)the first letter a blob, the second quite unclear. Wrongly interpreted in CIG (Beazley).

- A] RF squat lekythos. From Marion. Manner of Meidias Painter. Late fifth. *C. Smith, BM Cat. iii, 344-45. *Beazley, AJA 54 (1950) 311 n. 2. *ARV(2) 1325/49, Add.(2) 364. *L. Burn, The Meidias Painter (1987) 47-48, 111/MM 78, pl. 32,a-c.
- B] In the center, Oedipus, before an Ionic column, slaying the sphinx; at left, Aeneas, a tree, and Athena; at right, higher, Apollo seated, Castor and Pollux.
- C] Most inscriptions above the heads: Αινεας. Αθηνα.(1) Οδι^απ^ως.(2) Beside Apollo's head: Απολλων. Καστωρ. Πολυδευκης.
- D] Oedipus slays the sphinx with his spear (an alternate version); Burn thinks the scene is atticized because of the presence of Athena, whence Oedipus is more militant, like Theseus.

(1)see GAI i, 272. (2)on either side of the column. C. Smith wrongly read Οδιπους (Beazley in AJA).

- A] RF squat lekythos. From Athens, Hill of the Muses. Manner of the Meidias Painter.(1) Late fifth. 410-400 (Shapiro). *FR ii, 99-101, pl. 78. (dr.). ARV(2) 1324/45, Para. 478, Add.(2) 364. Eunomia.

- B] Aphrodite and companions, with Eros.
C] The inscriptions above the heads: Κλεοπατρα.(2) Ευνομια.
Παιδιά. Α(φ)ροδιτη. Πειθω. Ευδαιμονια.
D] Burn: Peitho arranges leaves in a kanoun and Eudaimonia
picks fruit: preparations for a procession; cf. New York
11.213.2, CAVI 5593 (Pompe with kanoun). There is an
inscription with Eros, but the photos. in Shapiro and Burn are
too small to read it.

(1)"May be by the painter himself," ARV(2). (2)i.e., of noble
birth (FR).

- A] RF squat lekythos. From Ruvo. Manner of the Meidias Painter

*A. Brueckner, 'Athenische Hochzeitsgeschenke,' AM 32 (1907)

The Meidias Painter (1987) 33, 101/P 1, pl. 20,c-d. LIMC iv,
47, s.v. Eudaimonia, no. 4.
B] Eudaimonia and other companions of Aphrodite: at left:
Hygieia. Pandaisia. In center: Eudaimonia seated, with Eros
flying toward her; a youth with spears; woman.
C] Υγεια. Πανδαισια. Ευδαιμονια.(2) Πολυκ[λη]ς.(3) καλη
(a companion).
D] Burn 33: the seated Eudaimonia takes the place of
Aphrodite. Pandaisia with a basket of fruit could allude to
a wedding feast which she personifies. Brueckner thought
Poly... is the bridegroom and καλη (the woman at right) is
the bride. Alpha with vertical cross stroke. Some letters
disjointed, all small.

(1)"Laboured copy of the Meidias Painter by a poor artist,"
ARV(2). (2)vidi; so also BM Cat.; ARV(2) and Shapiro give
Eudaimonia. (3)vidi; ARV(2) gives Poly[kle]s; the reading is
not certain; ΠΟΛΥΙ.ΟΣ, Πολυ[ειδ]ος(?), C. Smith. Brueckner
reads Πολυλ.ος and does not supply. Polykles (Beazley's
restoration) is unknown and presumably fictitious
(Shapiro). [The name is common: see LGPN ii, s.v. There
might be a person who can be identified with this one. Or a
punning name: the women promise the youth 'much fame,' in
war(?), or athletics(?)].

- A] RF alabastron(?).(1) Unattributed. Meidian.(2) Late fifth. *C.
Smith, BM Cat. iii, 348. C. Fränkel, Satyr- und Bakchennmen
(1912) 51, 104/σ. A. Kossatz-Deissmann, GVGettyMus 5 (1991)
147.

- B] Eros pursuing a female; at left, a woman fleeing.
 C] Beside the fleeing woman: (Θ)άλια.
 D] Thalia is a Muse, a Nereid (in Sicily), a Grace, a human (PA 6569, IG ii, 1761), etc. What is going on? Wrongly listed by Fränkel as a maenad, as K.-D. points out. Alpha with vertical cross stroke? Theta lacks the dot?

(1)it ought to be a squat lekythos, as E 701 and E 703 are.
 (2)C. Smith says: 'style of Meidias.'

4641.

London E 717.

- A] RF alabastron. From Greece. Group of Paidikos Alabastra γ.(1) Last quarter sixth. *ARV(2) 99/10.
 B] Youth and women.
 C] Nonsense(?): on the topside of the mouth: [---](.)κοσλ[---].(2)
 D] Beazley seems to indicate that he thinks this may be nonsense, since he says: "Most of the alabastra on the lists that follow, pp.99-100, have inscriptions on the topside of the mouth, but usually meaningless ones."

(1)may be by one hand with the others in this group; manner of Euergides Painter. (2)the trace of the letter before the kappa is not of an iota (Beazley).

4642.

London E 718.

- A] RF alabastron. Unattributed.(1) Early fifth. *C. Smith, BM Cat. iii, 354 (not ill.). *ARV(2) 306, 1614 (no ill. mentioned). L. Talcott, Hesp. 5 (1936) 348 (mention). *'Script' 529, Fig. 115 (lip only).
 B] A: woman. B: maid.
 C] A: at right: Ἀφροδισία καλέ. At left: τὸς δοκεῖ Εὐχίροϊ.
 B: at right: Ἐροσάνθε ὁ καλέ. At left: ἡο παις καλος. On the mouth, in BG: Αφροδισια καλε.
 D] With Ηροσανθη Beazley compared Ηροσωρα on Florence 81,947, ARV(2) 1312/2, CAVI 3607, and Οϊνανθη, Καλλιστανθη. He also suggested as probable the vocative in the Ηροσανθη inscription. For parallels to the latter, see 'Script'. Cf. also GAI ii, 115 (from gen. ἡρός of ἔαρ).

(1)compared by Beazley to the Painter of Würzburg 517 who is connected with the circle of the Diosphos and Sappho Painters.

- A] RF alabastron. From Elateia in Boeotia. Unattributed. Second quarter fifth. *C. Smith, BM Cat. iii, 354-55. Murray, AA 1894, 177 (not ill.). Rodenwald, AA 1932, 13 (mention). ARV(2) 1560.
 B] A: a youth leaning on his stick and taking a necklace from a box; alabastron. B: a woman tying her girdle (apoptygma in teeth); at right, kalathos; at left, alabastron; at

right, lekythos.

- C] To right of the youth's head: καλε. Below the box, stoich. two-liner, the second word starting under the third letter of the first line(1): Αλεξομενός|καλος. B: to left of the woman's head: καλε, retr.; at right: ηε παις.
- D] The kalos-name only here in Beazley; not in PA, but Pape has Keil, Inscr. boeot. 76; LGPN ii has the name also from IG i(3) 1475, ca. 550(?). The more common form is Alexamenos (Αλεξαμενός), see Pape, s.v. (this name is not in PA or LGPN ii). Mixed alphabet. The letters are Attic except Xi and sigma in Alexomenos. It is interesting that the inscriptions are Attic, while the proper name alone is in Ionic.

(1)according to Smith's text.

- A] RF psykter. From Vulci. Dikaios Painter. Last quarter sixth. 510-500. *CV, Great Britain 8, III I c, pl. 104,1,a-c. CIG 4.7857. C. Smith, BM Cat. iii, 362-63. Kretschmer, Vas. 151. Pottier, CV, France 8, II I c, under pl. 30,3. JHS 51 (1931) 122. *ARV(2) 31/6, 1573, Para. 324, Add.(2) 157. - B] Komos: A: two bald-headed revelers preceded by a boy; the leader plays the lyre. B: two bearded revelers, one playing the flutes.
- C] A: the leader: Κυδίας. χαίρε. χαίρε. B: near the flautist: καρτα. By the leader: Δικαιος. [--]χαρχον. The pertinence of the names to the different figures is not clear.
- D] A: Kydias is the musician from Hermione, cf. Pl., Charm. 115D. I do not take the χαίρε's with this name.
B: [Nι]χαρχων καρτα δικαιος, CV. But as Pottier points out in CV the name Δικαιος appears with καλος on Louvre G 45, CAVI 5420, by the same painter. In 'Script' I suggest that the final letter in [--]χαρχον may be a sigma lying sideways, whence Νικαρχος is a possibility (cf. PA 10,718 ff.; LGPN ii). Nikarchos is unknown in Attica, but is accepted in LGPN ii.

- A] RF psykter. From Cervetri. Douris. Early middle (Beazley). Transitional II (Bare) (B.-O.). First quarter fifth. *CV, Great Britain 8, III I c, pl. 105,1a-d. C. Smith, BM Cat. iii, 363. *FR i, 246-48, pl. 48 (much reproduced, e.g., Hoppin, RF i, 242). Caskey-Beazley ii, 7, A, A 20 (shape). Robertson, AVCA 92, fig. 86. *D. Buitron-Oliver, Douris (Kerameus 9, 1995) 42, 78/84, pls. 54-55.
- B] Revel of eleven satyrs.

- C] Above two satyrs dancing over a kantharos: to right of the first satyr's head: Αρισταγορας; to left of the second satyr's head: καλος. Below the name, starting at the second alpha and extending to the face of the second satyr, in smaller letters: Δορις εγραψε. (1)
- D] Now cleaned. Robertson follows Beazley in noting the influence of the Berlin Painter. One satyr dressed up as Hermes. Delta not dotted. Tailed rho.

(1)B.-O. 42 says the signature is placed above a satyr in an unusual position of which Douris may have been especially proud.

- A] RF pyxis with lid. From Tralles. Unattributed. Gaurion potter. Late fifth. *C. Smith, BM Cat. iii, 364. *ARV(2) 1360/2.
- B] Lid: a shield with a device of an arm holding a sword. (1)
- C] Below the elbow of the arm, stoich. two-liner, the second word centered(2): Γαυριων | εποιε.
- D] For the name, Beazley refers to Blinkenberg, Hermes 66, 119-22. There are three signatures of Gaurion, two with εποιε (once restored), the third with εποισεν. Mixed alphabet?

(1)so C. Smith; Beazley says: "arm holding sword"; he does not say it is on the lid. (2)so C. Smith's printed text. He reads Μαυριων. Μαυριων is also given by Murray in AA 1894, 177/33.

- B] Body: Hesperides? (four women, idealized). Fountain, hydriai, an apple tree with a snake; one girl is picking fruit.
- C] Inscriptions above the figures: Ιππολυτη : Μαψαυρα, not aligned with the preceding. Θετις.
- D] The pertinence of the names is not clear. Hippolyte could be the first or second figure from the left, Mapsaura is

probably the third and Thetis clearly the fourth. For the names see FR and ARV(2). Mapsaura: Hes., Theog. 872: αἰ δ' ἄλλαι μὰψ αὔραι ἐπιπνεῖουσι θάλασσαν. The figure work is not by the same hand as London E 773, below (ARV(2)).

- B] Six women at home (seated woman working wool, with standing companions). One girl looks out from a door, perhaps the bride [Furtwängler].
- C] Inscriptions above heads: Ἰφιγενεία. Δανάη. Ἑλένη. Κλυταιμῆστρα. Κασσάνδρα. On woman is unnamed.
- D] ARV(2): Helene is seated. Iphigeneia (at the door) may have been thought of as a bride. Cassandra may be the right-hand woman in the third pair, since she is the more dignified. Cassandra is παρ' ἱστορίαν, the artist may have meant Timandra. Furtwängler points out that the names are all from the Argive royal house. Mixed alphabet. Ionic Gamma and Lambda; Attic sigma. E 772 (above) has figure work by a different hand; the alphabet too is different.

- B] Body: Wedding preparations: seven Nereids and a little girl (servant tying a seated Nereid's (Kymothea's) sandal); at left, a closed door and in front two lebetes on stands.(2)
- C] Body: above the head of the first Nereid: Ποντομεδεία.(3) Δοσω. Γλαυκε. Θαλεια. Κυμοδοκ[ε]. The sixth figure (the servant girl) has no preserved inscription. Κυμοθεα. Γαλενε.
- D] All figures except the servant girl are inscribed. L.-H. 249: the subject are the Epaulia, when the women are in the

courtyard, hence the closed door. The lebetes show that the subject is related to weddings. Mixed alphabet. Ionic lambda; Attic sigma.

(1)the lid is alien. (2)O. and S. consider both Thaleia and Kymothea as brides; the vase plays with the double meaning of *nymphē*. (3)the sketch in the cat., and the ph. pl. 154,b, show the tau to be incomplete, although this is not indicated in fig. 1,e.

 C] To the boy's upper right: ἡο παις καλος, ἡο παις.(2)

(1)two winged females are pursuing a boy (Tithonos or another); Williams wonders whether the second female could be Eos' sister Selene. (2)so CV, text; unclear whether this is all in one line. [Actually, the photos. show that there are three inscriptions: 1. above and to right of the left female; 2. to right of the right female; 3. to right of the back of the boy's head (he looks back). All very roughly horizontal. But I do not have the readings.]

(1)"A fine artist, in spirit akin to the Achilles Painter and the Persephone Painter," Beazley. (2)see also 'Studies Ullman' (it could be a chest). (3)the name is lost. (4)After C. Smith; I did not see the letters. (5)vidi; not transcribed by C. Smith. The final epsilon is very faint.

Böhr and W. Martini, eds., Studien zur Mythologie und Vasenmalerei: Konrad Schauenburg zum 65. Geburtstag am 16. April 1986 (1986) 80 n. 19. T. Hölscher, Griechische Historienbilder (1973) 48f., pl. 4,2.
- B] Fight, with Persians: face and left arm of a Persian (with a moustache) fleeing.
- C] Above the raised arm, Gr.: Αρτοβα[ζανης].
- D] Artobazanes was the oldest son of Darius, from his first wife, a daughter of Gobryas: Hdt. 7,2-3; he unsuccessfully contested the royal succession with Xerxes. Williams: Hölscher suggests that the fr. shows the murder of Xerxes by Artabanos (cf. Schauenburg, AM 90 (1975) 106), but that is impossible as the Persian is only defending himself, not slashing down at anyone: the inscription must be horizontal. It is incised and Williams thinks it is probably not ancient. False?

- B] Int.: a naked woman using olisboi. A: Hermes playing the

Above the third cow from the left: επο[.]σε. Above the
fourth cow: ν[3-4]πον. B: not inscribed.
- D] A: four heads of cattle, four nonsense inscriptions.

(1)According to Bloesch, deep in the fifth century, cf. early
Brygos. (2)cf. London E 11 and E 14. Smith thinks the

[note επο[.]σε, above]. ARV(2) 130: litter of letters.

Ext.: plain.
- C] Above the man's back: Λεαγρος. To right of his face (from
his closed mouth): καλος.
- D] Hartwig attributed the cup to Euphronios, Beazley to near
the Eleusis Painter, Williams to his Painter of London E

gives six works, including Munich 8703, CAVI 5356, and

B] A: homoerotic love-making: at left, a boy climbing on a seated youth's lap; column; a bearded man watching; at right, a woman is watching from the upper part of a door. B: three draped youths.
C] A: horizontal, above the heads: dots, vertical strokes and once an imitation inscription: above the seated youth: three strokes and two dots. Above the mounting youth: λ(λ)(.)(.)(.). Above the bearded man: three dots and a stroke.

B] The inside is divided into four equal compartments, each with a lid. (1) lid: Eros seated and a goose. (2) lid: a woman seated; a flying bird. (3) lid: Eros seated on an altar. (4) similar to (2).
C] Grr.: (1) under the lid: K. At the bottom of the compartment: K. (2) under the lid: N. (3) under the lid: Δ. (4) under the lid: Δ.
D] The lid, F 140, probably does not belong, as claimed in the old cat. - Walter's account does not make sense for nos. (3) and (4), which are said to be the same. The letters are obviously intended to place the right lid on the right compartment and should be different. Not listed in TGV.

- B] Symposium: Int.: two bearded men reclining: that on the left plays the flutes, the other sings (his arm is bent over his head). A: three bearded men reclining on couches: the leftmost is frontal, the second to right is speaking, the third is about to throw the kottabos cup. B: at the far left, a cupbearer, with a ladle; next, three males on three couches: a youth tuning his lyre; at right, a bearded man talking to another bearded man, seen from the back.

- C] All Grr.: Int.: from the singer's mouth:
 ὄ ^ διὰ τῆς θυρίδος, retr., but the individual letters left
 to right.(2) A: to left of the kottabos player's mouth: τοι,
 retr. Between the second man's hand and the third man's
 knees: [Λ]άχετι.(3) B: to left of the right man's face:
 φασὶν, retr., but the letters face left to right.
 Immediately below, left to right (i.e., boustrophedon in
 relation to the last line): ἀλεθε̃; continued to right of
 the right man's head: ταῦτα. The inscription is certainly
 continuous: φασὶν ἀλεθε̃ ταῦτα.(4)
- D] The cup was first declared a Boeotian imitation of Douris
 by Jacobsthal (1912), but in a review in Gött. Gelehrte
 Anz. 1933, p. 10, he recanted. Later, M. Robertson
 persuaded Sparkes that shape, glaze and details of potting
 pointed to Attica. The graffito inscriptions were doubted
 in the BM Registry (see Hesp. 60, p. 368), but not since.
 Campbell dissociated the inscriptions from the pictures as
 later additions and so did Weber. Czapo and Miller consider
 the inscriptions archaic Attic, but perhaps added by
 another hand, possibly from a model (see Hesp. 60, 371).
 The vase is somewhat earlier than the floruit of Praxilla
 (451), hence she is perhaps quoting an earlier drinking
 song, or the quote given in note 2 below is not genuine
 Praxilla. Dotted delta.(5)

(1)if Laches is correct on A, this is a bit too late. (2)the
 bent arm intervenes. Lyric fragment; see Page, PMG, fr. 752
 (Praxilla 8: ὦ διὰ τῶν θυρίδων καλὸν ἐμβλέποισα | παρθένε
 τὰν κεφαλὰν τὰ δ' ἔνερθε νύμφα. See Page's comments on the
 singular vs. the plural. (3)Visible is AXETI. The τοι can be
 interpreted as a (Sicilian) dialect form for σοι in the
 kottabos formula: τοὶ τάνδε λατάσσῳ 'to you'; or as the
 definite article, τῷ, i.e. 'to him (who is absent); but
 Czapo and Miller opt for τῷ = τίνι, a question, which is
 answered by the second man: 'to Laches'; see Hesp. 60,
 373ff. with many parallels. αχετι, as formerly read, was
 interpreted as non-Greek by Jacobsthal (1912, p. 61), and
 as the beginning of a song by Wilamowitz (αχετι, name of
 the cicada, cf. ἠχέτα τέτιξ (loc. cit.)). C. and M.
 discovered a restored area, which allows for a letter
 between head and arm of the second symposiast. The formula
 would then be: 'To whom [to throw this drop]? Answer: to
 Laches,' a kalos especially of the Antiphon Painter. Cf.
 the datives on Munich 2421, CAVI 5285, and Louvre G 114,
 CAVI 6457. C. and M., if I understand them, argue for Laches
 as an imaginary prize for the winner of the kottabos game. I
 would doubt this and would still prefer: 'to you, Laches,'
 despite the placement of the words. (4)taken to be a song by
 Jacobsthal and Herzog, Umschrift (1912) 20, by Wilamowitz
 (p. 121) as prose introducing a coming poetic saying. It
 probably introduces a story. ταῦτα = τάδε: see Hesp. 60, 372 n.
 32. (5)on the letter forms, see Hesp. 60, 369 n. 12; on dotted
 delta 369-70 and notes.

But see below note 2. The alphabet is Attic with psi.
Tailed rho.

(1)so ARV(2); CV, however, says 'Heracles and Centaur.
Deianeira(?). Oineus.' (2)Matheson, p. 217 and n. 16, clearly
shows that Eurytion is not inscribed, nor are any other
figures on A. In the cat. she does not mention an
inscription for Eurytion. Robertson must be mistaken in
giving Eurytion as inscribed. The ref. to Heracles and
Dexamenos comes from R. Vollkommer, *Herakles in the Art of

is in praise of the painter's citizenship, since his deme
is in the tribe Antiochis. For the inscriptions ARV(2) refers
to Fröhner, p. 33. Beazley also states that the man in a
himation on A cannot be the Basileus as he is white-haired;
he may be Prometheus. [The torch race started at the altar
of Prometheus]. Robertson, AVCA 250 lists Ferrara T. 563,
ARV(2) 1286, middle, Alfieri (1979), fig. 216, as having on

- B] A: Achilles dragging Hector's body; chariot with a charioteer; a winged goddess (Erinys?). In front of the horses, Odysseus and a dog; at the extreme right, the tomb of Patroclus, with a serpent and the shade of Patroclus above. B: Five mounted Amazons with dogs.
- C] A: above Hector's corpse: ἡκτῶρ. Above Achilles: Ἀχιλλᾶεϋς, retr. To left of the shade's face: Πάτροκλος, retr. Above the winged goddess and to left of the driver's head: Κο(υ)ίλος, retr.(1) To right of Odysseus' head: Ολ[υ]τ[ε]υ[ς]. Behind the dog, in BG on white: Θά[.]ρος. retr.(2) B: the fourth Amazon: Ἀνδρομαχε. Behind the fifth: χαῖρε πῶ(?).(3)
- D] Sloppy writing. Hammond and Moon (AJA 82 (1978) 379, etc.) discuss the relation of the scenes to tragedies.

(1)closer to the the winged goddess and ascribed by CV to her, which seems unlikely. Probably the name of the charioteer. The third letter looks like a mu, but the short

vertical is smeared; CV also reads a nu. The fifth letter is in a break, with only a low short diagonal to left showing. CV and I (from the photo.) read a sigma, but I rather thought it was part of a lambda, when I saw the vase. Κονίλος is found in Pape; LGPN ii has Κομίλος (4th cent.). (2)CV wrongly reads: Φα[ιδ]ρος. Surely the name of the dog. The letters are poorly preserved. (3)Beazley, CR 57 (1943) 102/ii: Walters [in CV?] read: χαιρεπο..., but B. points out that the inscription is complete and reads: χᾰῖρε πῶ, 'Hail, drink'. Etym. Magn. has χᾰῖρε καὶ πῶ τάνδε, usually attributed to Alcaeus. Other reff. include two bronze vases from Dodona. B. admits πῶ is not Attic, but mentions dialect transfers in drinking inscriptions. B. also discusses the (assumed) omission of καί.

- B] Theseus and the Amazons.(1)
- C] To right of one head: [Πε]ριθῶς. Similarly: Θεσευς. Above the figure: A[νδ]ρομα[χε].(2) To left of an Amazon's horse, retr.: ἡππο[λυ](τ)ε.(3) To right of another hero, retr.: Ακαμας. To left of an Amazon's head: [---]φε.(4) Similarly for another: [--]α[---]. Above a fallen Greek: Μεγαρευς.(5) To right of the rightmost hero's head: Σθε[ν]ε[λο]ς.(6)
- D] Attic with four-stroke sigma (once). Megareus here as ally of Athens?

(1)Beazley compares Madrid 11,013, CAVI 4890. (2)so CV and FR; Bothmer gives the name as completely extant, probably rightly. (3)so FR; CV has ἡππολ[υ]τ[ε], Bothmer has ἡππο[λυ]τ[ε]. (4)so Reichhold's dr.; the text has [---]ε. (5)FR interprets this as Μελα[ν]ε[υ]ς, which is surely wrong; FR says that Melaneus and Sthenelos are free inventions, but Sthenelos can be an Argive name. (6)so FR; CV and Bothmer have Σθε[ν]ε[λο]ς.

ABV 163, top.

- B] A: No figured decoration preserved.
- C] A: [E]ργοτι[μ---].
- D] In JHS 52 Beazley says that the signature may be of a son of Ergotimos rather than of himself, because the lettering is of the later, smaller type. But in ABV 162-63 the fr. is listed under the heading: 'A Son of Eucheiros?'; read perhaps: 'A Son of Ergotimos?' As Beazley says immediately following the heading, the signature should either be of Ergotimos or perhaps of Eucheiros. Unless the handwriting demands it, we should not postulate a second, and unknown, son of Ergotimos. Hence: [E]ργοτι[μος εποιεσεν] or [ho]ργοτι[μο hυυς], with the potter's name on the other side of the cup.

- B] Preserved is a part of the BG floor.
- C] Gr.: Τέως : τῷ ἐστὶ : τοῦστρακον.(1)
- D] I wonder if the Gr. is genuine; there are false inscriptions from Naukratis. το = τοῦ, for τοῦδε.

- B] Youths with horses. (The pattern work above and below is WG).
- C] Grr.: Καλος Καρυστιος. Σμικριδων | καλος. Μορυλος.(1)
- D] The Grr. are done with a fine point.

(1)Μόρυλος or Μωρύλος? LGPN ii has Μόρυλλος. The name seems to be otherwise unknown. The only parallel is Μόρυλλος, a place name (Pape). I no longer believe that this and similar inscriptions by Psiax and others are modern; cf. 'Script', p. 58 n. 6. In ARV(1) 9/12 and in ARV(2) Beazley gives the inscriptions without comment.

- B] Int.: boy, seated, opening a bird cage on his lap; above, a stick with a cross. Ext.: conversations: A: youth leaning on his stick; sandals hung up; youth seated; by him, a bag and a cross; a male, fragmentary, holding out a writing tablet with the string untied; tablets hung up. B: a cross on the wall; youth leaning on his stick and holding out an open writing tablet; youth with a stick seated on a stool; by him, a satchel (tablets tied up with the stylus stuck in); the right-hand figure is missing.
- C] Int.: to left and above the boy: [ho π]αι[ς] καλος. A: [ho π]αις κα[λ]ος. B: (h)o πα[ι]ς κα[λ]ος.(2)
- D] Sambon, Hoppin and Walters attributed the cup to Douris. For the (unexplained) crosses see Williams 30.

(1)related to the Antiphon Group. (2)so Williams; Walters gives: αοπα.οκα, with an alpha that makes little sense.

- C] Int.: to left of his head: ho[παις(?)], retr. To left of his face: καλο[ς], retr. To right of the back of his head: ν[αχι].
 D] Foot and stem missing. Walters had attributed the cup to the Panaitios Painter, but it was never included by Beazley.

 C] On the topside of the mouth: [ho π]αις κ[αλος].(1) A: around the woman's head: προσαγορευῶ. B: to the woman's right: ΕΠΟΙΗΣΕΝ.

- A] BF prize Panathenaic. From Benghazi. Kuban Group. Late fifth.(1) *CV, Great Britain 1, III H f, pl. 1,1a-b. *Beazley, AJA 47 (1943) 453/1. ABV 411/1, Add.(2) 107. Neils et al., Goddess and Polis (1992) 35 and (Kyle) 93-94, fig. 60 (B); 198 n. 96. N. Eschbach, 'Eine Preisamphora in Giessen und Überlegungen zur Kuban-Gruppe,' JdI 107 (1992) 54/1.
 B] A: Athena; shield device: tyrannicides. B: javelin-throwing on horseback.
 C] A: to right of the left column, facing it: των Αθηνηθεν αθλων vacat.
 D] Undersized but with prize inscription. Ionic alphabet.

(1)or early fourth: Eschbach dates the Kuban Group later than Süssetrot. In AJA 47, Beazley says, the vase is smaller and earlier than London B 605, CCAVI 4368, which also has the tyrannicides as the shield device; it is also by a different hand; the alphabet of B 605 is Ionic (as well as calligraphic), see 'Script' 184/1214.

- A] WG lekythos. Painter of London 1905.(1) Second quarter fifth. *Fairbanks, Ath. White Lekythoi (1914), Group C, Class 5, no. 21b, pl. 34,1, app., p. 247. ARV(2) 750/2.
 B] A youth and a woman at a tomb.
 C] Before the youth's head, an irregular two-liner: Νομος | καλος.(2)
 D] Much restored. The alphabet is mixed Archaic and Ionic. The inscription is false.

(1)recalls the Inscription Painter; also brings to mind the Tymbos Painter (Beazley). (2)AA 1907, 383,VII,3 reads: Ευνομος καλος. This is better than Fairbank's reading, but still false. The name Eunomos is common in Athens; see LGPN ii.

- A] RF lekythos. From Rhodes. Bowdoin Painter. First quarter fifth. *Walters, JHS 41 (1921) 127/6, fig. 7. ARV(2) 684/154.
B] A young athlete at a laver.
C] κα[λο]ς. On the laver, below the rim, nonsense in BG:
σ^τ-κ^ο.(1)
D] Walters says: Gift, 1916, which must be a misprint.

(1)note the uneven spacing. The dot is probably accidental.

London 1907.10-20.1.

- A] RF cup. Akin to Nikosthenes Painter. Pamphaios potter. Last quarter sixth. *AJA 88 (1984) 344, 351/38, pl. 43, figs. 18-19 (foot with inscription). ARV(2) 129/21, 131, Add.(2) 176. *Vidi.
B] Int.: a warrior running. A, B, each: warriors running.
C] On the reserved foot profile: Π[α]ν(φ)αιος εποιεσεν.(1)
D] The lettering resembles the Nikosthenes Painter, but the letters are placed on the lower half of the foot profile. According to L. Talcott, Agora P 24,061 is by the same hand (ARV(2) 131). Phi without the center line.(2)

(1)other publications, including ARV(2), give the first alpha as extant, which it clearly is not now; perhaps a recent break? (2)there may be a dot on the bottom of the circle, or it may be that the paint has thickened there.

4720.

London 1910.2-12.1.

- A] BF lekythos. Sappho Painter. First quarter fifth. *F. Brommer, 'Bilder der Midassage,' AA 1941, 39, 42, and 43/I 5, figs. 3-5. *Walters, JHS 31 (1911) 10, fig. 9 (poor dr.). Haspels, ABFL 227/32. ABV 507/32, Add.(2) 126. M. Miller, 'Midas as the Great King in Attic Fifth-century Vase Painting,' AK 31 (1988) 80 and n. 9, pl. 18,4 (part of A). F. Lissarrague, *The Aesthetics of the Greek Banquet*, tr. by A. Szegedy-Maszak (1990; orig. 1987), fig. 4 (sketch with inscriptions).
B] Capture of Silenus: in the center, Silenus in an enclosure lying down, to drink from a spring; above him, a clothed figure is crawling on top of the enclosure, noose in hand; on either side, a seated man holding a spear and facing the center (that at left is Midas), and a palm tree.
C] Nonsense: under the outstretched arm of the seated man at right: (.)^(o)εσ.(1) Under the right-hand palm tree: λτ(i)τ^(i)(i)^(2)
D] Lissarrague has slightly different readings.

(1)the readings are from Brommer: the first two letters may be imperfections in the glaze; the spear intervenes; the omicron is smeared. According to Miller, Midas is inscribed. The photo. perhaps shows, at top right of his middle: Μ(.)^δεσ (so in Walters', but not in Brommer's reading: (M)[i]δεσ). The mu perhaps partially preserved.

(.) looks like a dot at the bottom of the line. [I wonder if the reading is right: nonsense? But bad misspellings are found in the Sappho Painter.] Walters has other readings that differ. (2)the tree and the spear intervene; the 'iotas' are vertical strokes with small hooks at the bottom.

London 1910.6-15.1.

- A] RF pelike. Painter of Athens 1163 (Latest Mannerists). Last quarter fifth. Ca. 430 (Shapiro). *Walters, JHS 41 (1921) 138/4, pl. 7 v 4. ARV(2) 1123/2. Shapiro in: Neils et al., Goddess and Polis (1992) 200 n. 55.
- B] A: Two flautists, one on a base, the other on its steps; at left, Nike flying, with three phialae; at right, Nike flying, with a taenia. B: two youths and a boy.
- C] A: above the left flautist, near the left Nike: καλος. [Probably above the right Nike:] καλη.
- D] Attic alphabet except for the eta. The kalos is clear in the photo., but the kale is only in Walters' text. For the subject, Walters, who calls it a contest, compares London B 188 [? B 141, CAVI 4239?] and Louvre G 103, CAVI 6447. Mixed alphabet.

- B] Two Nikai holding fillets fly toward a tripod on a two-stepped base.
- C] Three lines in BG: on the top step: δγημελος|αριριλος. Continuation on the bottom step: τος φιλος.
- D] Compare Acr. 504, CAVI 1381, and London E 298, CAVI 4561, which have tripods for a victory of Akamantis. But here the inscription is a miswritten amatory inscription (not nonsense). Possibly: \acute{o} δεῖνα (i.e., ΑΓΗΜΕΛΟΣ)|ἄρι{ριλο}σιτος φίλος. Mixed alphabet.

- B] No figured decoration mentioned.
- C] On the underside, on a glazed band, Gr.: αμικαρτοψ, retr.(1)
- D] Much worn, perhaps a reserved band around the central bowl. J. says the name is scarcely Greek but Egyptian parallels are lacking. The retr. is most unusual.

(1)complete. The psi is clear despite an earlier reading as upsilon.

- B] Two warriors separated by Athena.
- C] Between the figures:
ho παις καλὸς [ν]α[ί]χι δοκεῖ ἐμοί, ναίχι. (1)
- D] I am not certain whether the number is 1920.12-21.1 or 1920.12-21.2, as my note from Haspels is defective. Broken and incomplete. Not listed by Beazley. Large coarse letters.

(1)so Haspels 53. I had read parts of the inscription as follows: to right of left warrior, curving down: σεναίχι(σ). (The last letter no doubt a crooked iota: ναίχι; but I do not know what the first two letters stand for. I saw the vase only in the case.) To right of the left warrior's face, horizontal: εμ, retr. (There is no doubt more.) To left of the right warrior, downward: α[.]χι. (No doubt part of ναίχι.) Further: ho παις {ι}ς | καλὸς | δοκεῖ (the iota repeated because a leg intervenes). There may be more inscriptions on the right. Except for the doubling of iota, my readings, although reported earlier in CAVI, are worthless.

- A] RF hydria (kalpis). Group of Polygnotos. Third quarter fifth. Mid-fifth (Williams). *CV, *Great Britain* 8, III I c, pl. 83, 1a-d. ARV(2) 1060/138, Para. 445, Add.(2) 323. *Studies Ullman* 24/13, figs. 7-10. TGV 90/2B 29, 156/8F 8, 165/21F 7. S.B. Matheson, *Polygnotos and Vase Painting in Classical Athens* (1995) 478/PGU 162 (not ill.; inscriptions incorrect, after CV). *D. Williams, *RA* 1996, 228, fig. 1 (detail of foot with Gr.).
- B] Concert of two seated women with lyres, with five other women; a column; a chest; at left a flying Eros with a

wreath; tablets hung up. The woman at right holds a (partially preserved) book roll, not inscribed.

- C] Under the foot, Gr.: AY or AN , ΠΟΙ (Attic pi), VΔΠΙ .(1)
D] ΠΟΙ is for ποικίλος , 'decorated,' cf. Basel, Antikenmuseum BS 407. - Williams translates: "hydria two drachmai painted," and transcribes in Roman: *hy 2 drach poi*. The photo. seems to show, curved around the center, facing out: $\nu\delta\langle\rangle|\delta\rho\alpha\chi\langle\rangle\text{ποι}\langle\rangle$ (without word separation), and the ligature of alpha and upsilon: AY . I think W. reads a second vertical stroke which is very faint in the photo.

(1)so Johnston in the three places where he lists this vase. CV has: ΥΔΙΔΡΑΧΠΟΙΑ/ , and explains: 1 hydria for 5 dr. 1 obol, which is certainly wrong. The reference in CV to Hackl 51, 71 does not yield intelligible information. - I have a letter from ... (illegible) of 9/30/67 reporting that Anne Birchall at the BM considered the Gr. on London 1921.7-10.2 done before firing. But Johnston in TGV does not think that any of these Grr. are pre-firing.

- A] RF lekythos. From Sicily. Oinophile Painter (manner of Onesimos ii). Early fifth. *Haspels, ABFL *74, 89, pl. 22,4a-b. *ARV(2) 332/1, Add.(2) 217. *Vidi. 'Script' 919. Robertson, AVCA 131.
B] Komos: an old woman with a wineskin and oinochoe and a youth with a skyphos. A large skyphos on the floor.
C] To the woman's left: Οινοφιλε , retr. On the wineskin: κα[-](.) . Starting from the woman's mouth and continuing above the youth, with a small break between (hence, I believe, two separate inscriptions): $(.)\rho\omicron\varsigma$ and $(\eta)\iota\langle\rangle\text{πο}\delta(\alpha)\mu\alpha\varsigma(?)$.(1) On the large skyphos, ornamental: καλος .
D] Οινοφιλε and the καλος on the large skyphos are very clear, but the other inscriptions are badly miswritten. The two bracketed letters of the inscription on the wineskin are blobs. The first letter coming from the woman's mouth now looks like an iota, but is partly rubbed. προς is not excluded: an invitation ("forward!")? The first letter of what I take to be the youth's name resembles nu; the alpha has the shape of an omicron. I do not think that this is part of what the woman says. See also ARV(2). Dotted delta. For Oinophile Haspels compares $\text{Μαρωνις η φιλοινος}$ in an epigram of Leonidas, who had an empty cup on her tomb (Anth. Pal. 7.455) (Ibid., p. 74 and n. 1).

(1)Haspels prints: !ΡΟΣΗΙΔ(Α)ΜΑΣ . with three-stroke sigma, dotted delta and the eighth letter resembling an open triangle. She says: "the first letter is smudged; the second rho, or perhaps phei(?); the eighth, omikron or alpha."

(Haspels). Late sixth. *Haspels, ABFL 68. JHS 54 (1934) 91. ABV 471/117, Add.(2) 118.

- B] Female bust between rearing snakes.
- C] Above, in large letters: ΜΕΔΕΙΑ.
- D] Haspels 68: "The London vase bears in black the inscription ΜΕΔΕΙΑ, which Beazley suspected to be modern (JHS 54, p. 91)." Haspels discusses the unusual ornaments on this vase and continues: "Mr. Pryce had the vase chemically tested, and all three features - inscriptions, tongues, rosettes - proved to be genuine, although the inscription had been touched up." Haspels considers the lekythos Attic and not, as Beazley had thought (*ibidem*), a Boeotian imitation.

- C] A: on the BG lip, Gr.: Φοινιονιδεμι.(1)
- D] I have not seen B. - Small letters; my transcription is probably not exact.

(1) this should be an owner's inscription. The first letter is a circle the size of an omicron with a short diagonal line attached at 5 pm. The delta should be an omicron: Φοινιονιό ἐμί(?).

- A] RF amphora. From Nola. Briseis Painter. First quarter fifth. *CV, Great Britain 7, III I c, pl. 59, 2a-b. Caskey-Beazley ii, 40 (mention). ARV(2) 409/48, 1651, Add.(2) 233. LIMC i, pl. 223 Agon 4 (A). E.D. Serbeti, 'The Oionokles Painter,' Boreas 12 (1989) 40.
- B] The Sons of Boreas(?): A: Zetes and an umpire: a bearded man seated in a chair, holding a forked stick; a nude bearded figure running; pick axe and poles. B: Kalais to right.
- C] A: nonsense: [--](.)λιοσκ(γ)[--].(1)
- D] The subject of the scenes is copied from Beazley who follows Hutton, BCH 1899, 158 and 160. CV suggests that the winged figure on A is probably Agon and does not identify the other figures. For parallels to the Briseis Painter's

nonsense inscriptions see CB and Boston 01.8028, CAVI 2705.

- C] Int.: to warrior's upper left, ending at his head: ηε παυς. To warrior's upper right, starting near his face: καλε.
- D] Extremely sloppy letters, some disjointed, not all of which are recognizable in the photo. h^ε: a spear shaft intervenes. The lambda is in a break, although Williams gives it as complete. He gives parallels for warriors under fire, esp. from arrows. An extraordinary inscription, given the scene!

The Getty frs. show: [Δ]εμετε[ρ]. Ιρις, retr. Πελευς. Have these frs. been inserted (they are said to be on loan) in the original or the photos? Some wrong restorations have been discovered; note a gap in the signature. According to Beazley, ABV 37, the artist's name could be: Σώφιλος [so also LGPN, but that should be Σωφίλος(?)], Σοφίλος [that should be Σόφιλος(?)], or Σόφιλλος. D] Burn does not seem to comment on Helen on this vase. L.-H. in n. 332 thinks it possible that the lekythos was made by the potter of the Frankfurt acorn lekythos, and she appears to accept the Phintias inscription on that vase. Cf. also p. 96. In the cat. she says: 'Vom Töpfer Phintias?' Beazley in ARV(2) 1705 says: "there is also something of the Shuvalov Painter". Other acorn lekythoi perhaps by the same potter:

Berlin 2707; Louvre MNB 1320 [CAVI 6703, L.-H., nos. O 21 and O 22.]

(1)tallboy. (2)so Shapiro and Burn. Lezzi-Hafter attributes the vase to a follower of the Shuvalov Painter. (3)Beazley says: "Naked woman bathing, combing her hair; she is waited on by two Erotes; Aphrodite gives the order, and two seated goddesses look on."

London Market (Ede).

- A] Handleless stamnos in Six' technique. Unattributed. Late sixth (Ede). *Letter from Charles Ede of 25 January 2000 with *photos. Xerox of part of a *letter from A. Johnston containing his readings.
- B] Continuous: two pairs of satyr and billy goat to right of a tree: billy goat to right and satyr to left approaching each other; satyr buggering a billy goat to right.
- C] Nonsense: between the goat and satyr who approach each other, at mid-height, starting from the satyr: κλ(.)ε, retr.(1) Between the backs of the two satyrs are two inscriptions: along the right arm of the satyr at left, diagonally downward: οχι. Between the two at head height, horizontal: αεγ.(2)
- D] There could be a fourth inscription to the right of the second goat (of which area I have no picture), in which case there would be one for each figure.

(1)I cannot make out the third letter which is miswritten. Johnston says someone might suggest κλυε, 'listen', although the upsilon "is not quite written as it should"; he thinks it is nonsense. (2)I am quite uncertain of the alpha; Johnston reads καλ (but the last letter should be an Attic gamma, since the lambda in the the first inscription is Attic). The second inscription is imagined by Johnston as ο<ὐ>χι, 'not', but he obviously considers all inscriptions nonsense.

- A] Frs. of RF cup. Unattributed.(1) Last quarter sixth, *Bothmer, *Amazons* 133/20 and 143. Furtwängler in: *Roscher i*, p. 2203 (cited by Bothmer). Corey, *De Am. ant.*, fig. 31 (also cited by Bothmer).

(1)"Etwa im Stile des Epilykos [Skythes]", Furtwängler. (2)where is it on the cup? The description is from Corey (who had seen a dr.) as cited by Bothmer. (3)as reported by Furtwängler. There is clearly something wrong with the $\alpha\gamma\alpha\theta\omicron\varsigma$, especially since it is given with a cartwheel theta. False? Modern?

- A] RF cup. Unattributed (Beazley). Near Euphronios (Bothmer).(1) Last quarter sixth. *Bothmer, *Amazons*, 151/51 and 155. Ill. in *Roman Institute*, whence Klein, *L.*(2) 73, fig. 13. ARV(2) 1593/45. *D. Williams in: M. Denoyelle, ed., *Euphronios peintre* (1992) 91 and n. 60, fig. 21 (dr. after Klein).

- D] Coral red inside and out. Bothmer interprets the Int. as two Amazons.

(1)Williams attributes the cup to Euphronios. (2)Bothmer has the kalos retr.; ARV(2) has $\kappa\alpha\lambda\omicron\nu$, not retr.; Williams,

καλος, not retr.; perhaps the letter was a sideways sigma.
The kalos starts under the rho and is written in two
groups: κα and λος. Both words are unevenly spaced.

4818.

Lost.

- A] RF cup. Unattributed. Late sixth or early fifth. *ARV(2)

(γ)ι^ουιχ. To right of his forehead: στισ. To left and
right of Athena's head: τισ^ι and further down: υ.
Scattered near Hypnos: ι(ο)τ, τιν and ισισ.(1) The readings
are not certain.
- D] Ex Hamilton collection. Andreae uses the inscriptions for
the attribution, referring to Haspels, ABFL 96.

(1)Danali-G. reads τίσις and ἄλσει (I do not know to which of
the nonsense inscriptions she is referring for the second)
and compares ἄλσει on Athens, NM 460, CAVI 711. She considers
the latter a stage direction, which may be right, although her
readings of the Sappho vase are not acceptable.

ἡέρμαιός με εὔρε κειμέλιον ἄλλ' ὄν.
- D] Once in the collection of N. Saripolos. Is the vase really
lost or is it in the National Museum? The mouth is missing.
'Eph.' speaks of a reclining βουκέφαλος ἀνήρ. The design is
exceedingly sloppy, but the letter forms would date the
inscription about 500. Note the pun on the name Hermaios:
the vase is a ἔρμαιον.

Moret, *L'Ilioupersis dans la céramique italienne* (Geneva 1975) 74.

B] A: Dionysus with maenads and a satyr. B: Theft of the Palladion [so Burn, but see below]: Helen stands between two heroes armed with spears and swords (Diomedes and another [Odysseus? Sthenelos, Beazley]).

C] A: the satyr: Σιμος. The maenads: Διώνη. Θυώνη. B: [E]λενη. Diomedes.(1) ...ειο.(2)

D] Ionic alphabet.

(1)his name must be inscribed. (2)this should be Odysseus, but as Burn 64 n. 29 points out, it is hard to convert the letters into his name. [Also, there is obviously no palladion preserved in this scene. Contrast Naples 3235, CAVI 5459, where the palladion is shown. Note that Beazley suggests Sthenelos for the third person, i.e. he is not thinking of the theft of the Palladion. Did he read: [--]ελο[s](?). Moret follows Jahn in considering the scene a genre scene.

Rolfe, HSCP ii (1891) 96-97. J.L. Ussing, De nominibus vasorum Graecorum Hauniae (1844) 8 and 1412. O. Jahn, Beschreibung (1854), p.xcviii. Leake's ms. notes in Cambridge. D. Williams, RA 1996, 231 (mention, for the price).
 B] No figured decoration.
 C] The inscription in three circles around the bottom of the pot: Κηφισοφῶντος ἡ κύλιξ· ἐὰν δέ τις κατάξει, δραχμῆν ἀποτεῖσε, δῶρον ὄν παρὰ Ζενύ(λ)[ο]υ.
 D] Once in Athens, Fauvel's house. κατάξει is Bockh's emendation of κατάξει. Leake has κατάξει, but wrongly νωχον for δῶρον. For αποτεῖσε (ε for ει), see GAI i, 300/10. For the last word, Leake has Ζευχ without the final upsilon; E.V. accepts Böckh's Ζενύλ[ο]υ, but should this not have double lambda? LGPN ii lists Ζενύλος (from this vase) with one lambda as distinct from Ζένυλλος. E.V. gives four parallels for kylix = skyphos: see Oxford 1956.311, CAVI 5992; skyphos base from Kea, Hesp. 33 (1964) 333-334, CAVI 4087. Two other skyphoi are not listed as Attic (thought they may be): Zürich inv. 2531, and one found at the Cimmerian Bosphorus (see E.V., p. 189). Ionic alphabet.

Beazley suggests perhaps Homeric influence. Ionic alphabet. GAI ii, 472, discusses ἠργάσατο and points out that the inscription had been suspected; 725 refers to the form Ἀθηναίαι.

- A] BF/WG mastoid skyphos. Related to Sappho and Diosphos Ptrs. Pistias Class M (Kurtz). Last quarter sixth. Ca. 515 (Moon). *Moon in: W.G. Moon and L. Berge, eds., Greek Vase-Painting in Midwestern Collections (Art Institute of Chicago 1979, 2d printing 1981) 123/70. F. Lissarrague, The Aesthetics of the Greek Banquet, tr. by A. Szegedy-Maszak (1990; orig. 1987) 128, fig. 98 (sketch of A or B, after Moon, with inscription).
- B] A: an old man, in himation and with a sakkos in his hair, seated and playing the lyre (kithara) while singing. B: similar.
- C] Nonsense: imitation letters: A: from the mouth, in a large downward curve: $(h)(\sigma)\omicron(\theta)(i)\pi(\cdot)\rho\omicron\chi\omicron\iota$. B: a similar inscription.(1)
- D] The letters are exceedingly sloppy and often only approximate. Moon rightly thinks the inscription imitates a song, whence he calls the figure a poet. Moon's picture of A is better than his picture of B.

(1) Lissarrague gives a longer inscription than the above, hence it may be of B: $hh(\delta)(h)\iota\pi\sigma\omicron\chi\sigma(\cdot)\chi\omicron\iota$.

- A] BF amphora. Painter of Berlin 1686 (Bothmer). Third quarter

sixth. Ca. 550 (Moon). *W.G. Moon in: Moon and L. Berge, Greek Vase-Painting in Midwestern Collections (Art Institute of Chicago 1979, 2d printing 1981) 54/32.

- B] A: Departure of a Warrior: in the center, a hoplite, with two children; at left, a man, a youth and a woman; at right, an old man and two other men. B: unexplained subject: in the center, a bearded man with a spear; at left, a group of three: an elderly Hermes and a man talking to a warrior; at right, another group of three: a young Hermes talking to a warrior and a bearded man.
- C] Nonsense: some imitation letters: A: to right of the woman's face, facing her(?): λεοχ(.). To right of the warrior's face: εοκκ^οο(α).(1) B: to right of the leftmost warrior's leg: εοο(χ)οο(.). To lower right of the man talking to the warrior: ιοο(τ)οι. Behind the back and legs of the older Hermes: εο(ι)^εογφοο.(1) Between his and the central figure's heads: εοο(.). To right of the young Hermes' face: εοογο(.). Between his and the right warrior's legs: σεο^γοοεο.(1) (The seventh figure on the right has no inscription.) Under the foot, Dip. and Gr. (not in TGV); the shapes are unclear to me.
- D] Perhaps on loan to the Elvehjem Museum of the University of Wisconsin: see Moon-Berge. Moon thinks the painter is illiterate (I think all his inscriptions are nonsense of a certain type). The same Dip. and Gr. under the foot occur on a BF amphora by the same painter, Chicago, Art Institute 1978.114, published by Bothmer in Moon and Berge 52/31, see the fig. on p. 53. Moon discusses the appearance of two figures of Hermes (if both are Hermes) as well as the inscriptions. For other vases by this painter with similar inscriptions see Beazley, AJA 29 (1933) 361-62.

- B] Int.: two cocks facing. Lip: A: head and shoulders of Zeus to right, brandishing a thunderbolt in each hand. B: a man riding a galloping horse.
- C] Handle zone: A: [-](.): εἰμι ποτῆρι[ον].(2) B: signature of Eucheiros.(3)

(1)so the caption; the text says: from Extremadura (area of Tartessos); found 1968. (2)I cannot read the first letter in the photo.; it should be: καλο]ν. (3)by inference, as Chamorro attributes the vase to Eucheiros.

B] A: Athena. B: chariot.

C] Along the right side of the left column: τον Αθηνεθεν αθλον.

B] A: Athena. B: two hoplites fighting.

C] A: on the left column, in red(2): τον Αθηνεθεν αθλον.

D] The inscription is painted in red on the column; the painter thought of a columnar monument of which there are many on the Acropolis (Neils). Despite the inscription, both Brandt (9 n. 5) and Neils declare the vase not to be a prize vase. The subject on B is not standard as the hoplomachia's prize was not oil (see Neils 198 n. 82). Kyle says the hoplomachia was not a Panathenaic event.

- B] A: Heracles and Eurystheus, with Artemis and Athena. B: Dionysus with two maenads.
- C] A: at Artemis' right, starting above the head and curving down: Αρτεμιδος and καλος.(1) Under the foot, E with the top horizontal extended. See TGV 141/16E 4.(2)
- D] Leroux also reads Αρτεμιδος καλος as one inscription, separating the words, however; he says the inscription is "above", between Artemis and Heracles, vertically down. Tailed rho if the facs. in CV is to be trusted.

(1)although the facs. separates the words, the photo. shows that they are not separated; nevertheless the καλος should refer to Heracles. (2)The mark under foot should be a Gr. TGV p. 216 suggests either lambda plus epsilon or tau plus epsilon.

- B] A: Heracles at banquet, with Dionysus. B: Heracles and the sons of Eurytus.
- C] Mainly after Leroux: A: above D.'s head: Διο(ν)υσο(ς) <IN.(2) To right of the lyre: χιοιο.(3) To right of the reclining Heracles, and above the head of the standing woman: κιο.(4) B: above the collapsing archer: πι^ονο, retr.(5) Starting above Eurytus' head and ending above Heracles': Ευρυτος, retr.(6) Below the fallen archer's head and between Eurytus' legs, which puts it to left of the second fallen warrior's body: φι^τος.(7) To left of the running warrior's face, in a curve around it and facing it: Αντιφολο(ς), retr.(8) In front of the woman, starting at the shoulder, slanting downward and continuing vertically between her arms: ιολ^εα^ς), retr.(9)
- D] Is there confusion of Iole and Iolaus? There seems to be no trace of the latter, although there is a curious object by Iole's neck into which several arrows have fixed themselves. Attic alphabet.

(1)emulates Leagros Group (ABV). (2)nu reversed; first sigma three-stroke, second sigma reversed. CV: Διο(ν)υσο(ς) <IN. The last three letters vertical. (3)interpreted by Leroux as Χίοιο, sc. οἴνου. CV: χιοιο. (4)Leroux: κιο (pour κίττου(?)). CV shows: κιο(.) and ο. (5)Eurytos' hand intervenes. (6)so the text; the ph. seems to show: Ευ^[ρ]υτος, with the tip of Heracles' bow intervening. (7)Leroux refers this to the fallen warrior at the right, no doubt because he thinks of tiono as a garbled name of the fallen archer. But tiono could be a nonsense word and Ifitos the archer's name leaving the other nameless. (8)Leroux: 'Αντιφολο (pour Αντιφονος(?))'. The letters run into the warrior's arm, hence there was no room for the final sigma. Αντιφονος(?), CV. Αντιφονος or Αντιλοφος, Richter. (9)the two arms intervene. Leroux prints the final sigma as a nu; I think from the photo. that it is sigma S 11 (<); see the chart in 'Script'.

Body: to right of the Oriental's (Paris') face: Παρικ<ς>καλος. Above the bearded man leading a horse: Τελες (retr.) υ. καλος.(3) To right of the horses' bodies: κιονις.(4)
- D] Small letters. The readings are from CV. The three 'meaningless' inscriptions are probably miswritten names, not nonsense. Alvarez-Ossorio has some very peculiar readings: First chariot: πλατοοκ-νιγιον. (Ionic gamma.) κινια-νικιοσκιος. Παρι - καλος - Τελες - καλος - Χιονις.(5)

(1)is a name hidden here? (2)CV reads Κινια[ς]; or a mock inscription related to κινειν? (3)Beazley in ABV says rightly that this does not refer to the man, but is a regular kalos-inscription. (4)is this nonsense or the name of a horse? (5)only the last 5 words show in O.'s photo., and those not at all well.

- C] Under the foot, Gr.: Κωρινθιωργεῖς Π.(1)
- D] 'Five column kraters.' Parallels in Beazley. - GAI ii, 688, seems to have a different reading in mind.

(1)Beazley prints the two letters of the adjective preceding the final sigma as heta 1 (although he also suggests it may be epsilon corrected to epsilon iota): if heta is right, it would be miswritten. Johnston, p. 232, thinks the inscription is Attic, written by an Athenian unfamiliar with omega; but omega for omicron occurs throughout the fifth century on Attic vases ('Script', p. 167). - Leroux prints as in Ionic alphabet, with omega twice. He also has the penultimate letter of the word as closed heta. His interpretation: κωρινθιωργος π, is of course impossible. Does he think the 'heta' is a miswritten omicron? I think the 'heta' must be epsilon plus iota written close.

Olmos discusses the status of the two women (hetaerae or free women). I do not reproduce the readings of Alvarez-Ossorio. - D] Leroux has: A: satyr dancing with large amphora before two reclining symposiasts (whom he does not identify). B: similar but the satyr carries an oinochoe. Printed letters only: Int.: $\chi\omicron\chi\pi\omicron\ \chi\omicron\lambda\delta\lambda\omicron\lambda\omicron\lambda\omicron$ (with Attic pi). A: $\text{NOXNX NXONONO NONOLO LO\Delta EO}$. - C] A: on the terma, vertically down, in BG: $\kappa\alpha\lambda\iota$ vac.1.
- D] $\kappa\alpha\lambda\omicron\varsigma$ miswritten. See Würzburg inv. 4803, ARV(2) 1219/1.

(1)most of the vases in Mainz included in CV were originally in the Preyss collection, which was at one time loaned to Erlangen, whence they were listed in Grünhagen. (2)Beazley calls it a stele.

- A] RF pyxis with lid. Oppenheimer Group (Beazley). Third quarter fifth. Ca. 430 (Böhr). *E. Böhr and G. Pohlein, CV, Germany 63, pl. 26,1-5, Beilage 12,2; p. 44, facss. of inscriptions (bibl.). W. Grünhagen, Antike Originalarbeiten ... Erlangen (1948) 86 Pr. 87. R. Hampe and E. Simon, Griechisches Leben im Spiegel der Kunst (1959, (2)1985) 28. C. Bérard, Anodoi (1974) 57 n. 1. ARV(2) 1224/2, Add.(2) 350. Sarian, LIMC v (1990) 410, s.v. Hestia 27, pl. 294. J.H. Oakley and R.H. Sinos, The Wedding in Ancient Athens (1993) 14, figs. 6-8.
- B] Body: in the center, a woman with a torch (goddess: see below), seated between two columns; at left, two women running while holding hands, the front one also holding a wreath; at right, two women bringing gifts (a skyphos and a necklace repectively); at the farther right, a woman with a taenia and a seated woman holding out a plemochoe (exaleiptron).
- C] Body: to upper left of the left running woman: $\kappa(\alpha)\lambda\eta$. To left of the right running woman's head: $\kappa(\alpha)\lambda(\eta)$. To left of the torch bearer's head: $\kappa(\alpha)\lambda^{\wedge}\nu$.(1) To right of her head: $\kappa(\alpha)\lambda(\eta)$. To left of the chin of the woman with the skyphos: $\kappa(\alpha)\lambda\nu$. To left of the back of the woman with a taenia, at chest-height: $\kappa(\alpha)^{\wedge}\lambda\nu$.(1) To upper left of the seated woman with the plemochoe: $\kappa(\alpha)(\lambda)(\eta)$.

D] Very sloppy writing. Ionic alphabet. Eta miswritten, sometimes as a reversed or regular nu. Seven women and seven kale's, but some of the latter are oddly placed. Hampe and Simon interpreted the woman with the torch as Hestia supporting newly-weds; so also Sarian. Bérard and Schwenck interpret the scene as in a sanctuary of Artemis, with the bride (the only figure with unbound hair) bringing her necklace as a gift. Böhr prefers the identification as Hestia. By the same hand: the pyxis San Simeon, Hearst, ARV(2) 1224/1 (photo. in Beazley Archive).

(1)a column intervenes. The last letter is clearly a nu.

Böhr and G. Pohlein, CV, Germany 63, Mainz, Universität 2 (1993), pls. 27,1-4 and 28,1-4, Beilage 12,4; p. 46, drs. of parts, with inscriptions (much bibl.).
- B] Aphrodite with companions: six women: only Aphrodite and Eunomia are seated, at opposite ends of the circle, both to left, Eunomia with a bird on her finger; the other four figures bring them chests and incense burners. Eukleia rushes toward Eunomia and brings her a chest.
- C] To left of the knees of the seated Aphrodite: Π̄α(φ)α.(1) On the rocks on which Eunomia sits: Εὐνομία.(2) To lower left of the bottom of Eukleia's himation: Ε[ψ]κλειῶ.
- D] Hampe (RM 62, 107-21) suggests Eukleia is inviting Eunomia to participate in her already established cult. Paphia for Aphrodite(?) is also found on Naples 2296, ARV(2) 1327/28, CAVI 5415, q.v. (cf. LIMC iv, 407, s.v. Halia, no. 1) with Nereid names. Böhr discusses Eunomia and Eukleia. Wehgartner, *JdI* 102 (1987) 190 n. 18 and 193 n. 93, mentions the vase. Böhr thinks it was a commissioned wedding present, as Wehgartner has proved for Berlin 2705, CAVI 2414, *ibidem*, 186ff., figs. 1-3.

(1)the pi incomplete near a break; phi is semi-circular with the vertical projecting above and with only a half-circle to the lower right of the vertical. (2)no trace of the alpha, but perhaps read: Εὐνομία[α].

- B] Undecorated.
- C] Under the foot, Gr.: Φαυ<, with the last two letters in ligature? Or possibly: Φαι<, with the bottom of the iota touching the alpha, but the photo. makes this unlikely. There seem to be some further scratches to the right of these letters, but they are not in the facs.

- C] Shoulder: A: on the youth's right: ΝΙΚΟΣΘΕΝΕΣ ΕΠΟΙΗΣΕΝ.
- D] Ex London Market (Sotheby). The hand is typical of Painter N. Differently Eisman: not the usual signature but short stubby letters. E. compares Brussels R 388, CAVI 2954, and JHS 94 (1974) 172. Also Copenhagen, Ny Carlsberg inv. 13,809, Para. 105/4 bis, CAVI 3254, which is to be separated from the usual Painter N (note the spelling: ΝΙΚΟΣΘΕΝΕΣ ... and the different thiasos).

- B] Shoulder: boxers. Body: a seated man greeted by a woman and five boys.
- C] Under the foot, circular, facing out, Dip.: ΑΜΑΣΙΣ vac.1-2 ΜΕΠΟΙΗΣΕΝ.
- D] See the discussion of the signature in 'Script': its general character resembles those on vases by the Amasis Painter, but the writing is coarser and the glaze less brilliant; I express some doubts about the genuineness. J. Frel says that the Amasis signature is in the handwriting of the Taleides Painter. H. Mommsen: the lekythos resembles others by the Taleides Painter and NOT those painted by the Amasis Painter; the writing resembles the signatures on vases by the Amasis Painter, but is larger and coarser and the glaze is less shiny. "Die Amasis-Signatur ist daher äusserst

unglaublich, auch wenn sie sich als antik erweisen sollte." (1)

[Ευφρωνιος επο]ισεν.(2) Ext.: [Τε]λα[μω]ν.(3) h[---].(4) On one handle fr., Gr.: [Ε]υφρωνιος, retr.(5) On the other, Gr.: εποισεν.(6)
- D] + 82.AE.33. + frs. added by Bothmer. Ohly-Dumm considers the Gr. signature false; Williams agrees. Cohen restores it as on one handle, each word starting from the outer end of the handle toward the root, the potter's name being retrograde. Thus the signature differs from the Gr. signature of Euphronios on the handle of London E 44, CAVI 4457, where both words start from the handle root of one handle and retr. is avoided. [The handwriting is also different. It is very coarse.] The problem with Cohen's reconstruction is that both words face out rather than toward each other. I had therefore assumed that the two words on the Malibu cup were on opposite handles and written from the outside toward the cup. The inscription could be read easily by someone holding the cup by both handles and lifting it to drink from. In either case, it is unlikely that the words were written on the frs., and the signature is surely genuine. See also 'Script'. The fragments with the inscriptions on the Exterior are new and unpublished. The rendering in Add.(2) is not accurate.

- B] Int.: satyr. A: a naked youth holding his erect penis and handing(?) a calyx krater to a fat hetaera on his right. B: a fat hetaera manipulates a youth's erect penis. Under each handle, an eye.
- C] Int.: (Φ)ιντίας(.) γ̣εγρα[φο]εν. A, B, each: signature of Phintias.
- D] Ex Swiss Private. "The letter after the alpha of the name [on the Int.] is fragmentary and amorphous; the letter after it might be gamma or kappa. The signature [on the Int.] and the other inscriptions are very hard to read," ARV(2). There are three signatures, as on Karlsruhe 63.104, CAVI 4057, q.v. Robertson thinks the old hetaera on the Exterior may be a picture of a real one called Syko and so named on Euphronios' krater Munich 8935, CAVI 5363, where the hetaera is equally old. Frel argued that the youth(s) is (are) Phintias himself, but Weiss points out that the color of the eyes differs on A and B. Keuls also disagrees with Frel and thinks the vase might be a joke on Smikros. Frel also thought A showed a potter (perhaps Phintias himself) offering a pot to a hetaera as a token of love. But Keuls and H.-P. show that the theme is the drinking lust of old women, the krater being thought of as containing wine. - There are other inscriptions, it seems, which I have not registered; see *GAI* ii, 641, where [h]εδομα is cited.

- D] Malibu 83.AE.217, signed by Douris, has a similar signature, q.v. Four-stroke sigma. Stemmed upsilon.

(1)as Bothmer points out (p. 3), the handwriting is the same as on Cab. Méd. 535, ARV(2) 191/103, CAVI 6163. by the Kleophrades Painter; it is not clear, however, whether he considers the signature that belongs to the Douris cups Berlin 2283 or 2284, CAVI 2328, 2329 (which has mostly disappeared in a cleaning) also to be by the same hand; cf. ARV(2) 429/21 and 22.

Boardman, BSA 50 (1955) 63/39 (listed as Athens Market, the only ref. is Beazley, Eph. 1953/4, 204.)
- B] Valediction (funeral scene): two pairs of mourners (three bearded, one young); at right, the capital of a column.
- C] To right of the left pair of mourners, not facing: ΚΕΔΕΣΤΕ, i.e. κεδεστε<ς>. (1) To right, along the back of the youth's head, facing: Αντιλεῶν. (1) To right of the right bearded man's face: Τα[-]. (2)
- D] Ex Paris Market (Koutoulakis). Boardman lists as Athens Market. - A κηδεστής is an in-law (son, brother, father). - H. Mommsen, Exekias I: die Grabtafeln (Kerameus 11, 1997) 23: cites as an example of naming the specific members of the funeral as a parallel to the Exekias plaques. An 'angeheirateter naher Verwandter' had specific duties at a funeral, for which M. cites Miller, JHS 73 (1953) 46 and M. Alexiou, The Ritual Lament in Greek Tradition (1974) 10f.

(1)κεδεστε[ς] Beazley in AJA; in Para. he says: "For the inscription see also Eph., but the comment there must be withdrawn, as the inscription is not Κεδειδε, but Κεδεστε, cf. AJA 1957, 5-6." Perhaps: κεδεστε<ς> Αντιλεων, which would make him the son-in-law of the dead. (2)e.g. Τα[υρας]. Or τα[-], e.g. τα[λις], bride.

The name is also found on Florence 81,947 CAVI 3607 (RF hydria: the Meidias Painter's Phaon vase, 'Script' 804, True, fig. 6, part): Δημωνασ[σας]; and on Agora P 10,270, CAVI 416 (fr. of RF cup, early fourth century, another Phaon vase, wrongly(?) said to be by the Jena Painter in 'Script' 116 [after True], under no. 804; see *ibid.*, no. 828a: Δημωνασσα). Simon, GV 148, not knowing the Malibu cup, suggested (on Florence 81,947) that Demonassa is Aphrodite, a variant of Aphrodite Pandemos, despite the appearance of Aphrodite in person on the same vase; the idea is favored by Burn (see AVCA n. 27). Robertson translates Demonassa 'Lady of the People,' and seems puzzled by it. Probably mixed alphabet.

this the earliest of Smikros' psykters.

(1)but Robertson, in AVCA, does not attribute this and the other psykter in the Getty (83.AE.285, CAVI 4966) to Smikros, but to an inferior artist outside the circle, because of their poor quality. (2)Frel read Hegerthos and Add.(2) follows; psilosis for the root ηγε- is likely: hence Ἠγερθος(?).

- D] Two frs. may belong: 83.AE.235.1-2. The inscriptions on the Int. are in Dourian script; those of the potter's signature not certainly so. B.-O. 17: Hermolykos = the pankratiast in Hdt. 9.105 (at Mycale)? For the potter, see Malibu 80.AE.54, CAVI 4944. Four-stroke sigma, but three-stroke in the Kleophrades signature.

(1)495-490: transitional between very early and settled styles (B.-O.). (2)B.-O. puts punctuation between Douris'

signature and Hermolykos kalos. The photo. is not clear on this point, although it shows most of the other letters. (3)parts of the Kleophrades signature show in the photos. B.-O.'s text gives all deltas as normal.

is similar to that of Berlin 2280-2281, CAVI 2326, which is very early. This entry differs from that in 'Script'. Sigma is angular and perhaps recalls Euphronios.

(1)Williams discusses omega for ou in n. 55. See also 'Script', p. 167. (2)Williams thinks perhaps miswritten for Δαίφοβος, since Daiphonos is not a known name. (3)Williams says she is too young to be Hecuba and Helen appears elsewhere in the zone; if heta could be kappa, which is unlikely, then perhaps: Κλυμενε. (4)Williams: probably not Οφρυ[ο]ς ('supercilious'), but Οφρυ[υ]ο[ς], from Ophrynyon, a place in the Troad. (5)The heta is on 84.AE.80 and GettyMusJ 13, 169/20, does restore h[ε]λεν[ε]. Both letters are on a new fr.; see Williams, p. 61. (6)Andromache or Antiope (wife of Laocoon). (7)figs. 8, k and n; published by Heurgon. The second line is dedicatory; the first an owner's inscription(?). R.E. Wallace also discusses the two Etruscan Grr. Front: youth putting on greaves with one foot on a low base or altar; a woman faces him holding a spear and a shield. 2. Youth holding a helmet and shield; on his right, in the center, a stool with clothes; a youth faces the warrior holding a spear and sword.

Above the stool: Πανααπίος, for Παναίπιος. To right of the spear held out by the right youth: καλος. Between the youth holding the sword and the youth putting on greaves: Νι(κ)οδρομος.(5) Near the bottom: καλος. Under the foot, Gr.: ligature ΗΣ and Ionic Γ. Not in TGV.
- D] Douris' early style of lettering, still pioneer-type and sloppy. Very hard to read. D.C. Kurtz, 'Two Athenian White-ground Lekythoi,' *GVGettyMus* 4 (1989; written 1985) 123: Douris' WG lekythoi are early but not his earliest work; Buitron says 'transitional' to his early middle period. The readings are in part very uncertain.

(1)attributed by Ortiz and Zimmermann. (2)my reading, uncertain; differently Dörig. (3)I thought the first letter not a kappa. I suggest for Μφ[.]ος the restoration Μο[σ]χ[ος], a name that occurs on Malibu 83.AE.321, CAVI 4969. (4)so Dörig; I read: ...ιχικ[.]().()καλο[ς]. This is practically illegible. (5)the kappa looks like an Attic gamma. True reads Νικοδρομος, Guy: ηιπ<π>οδρομος, but thinks the mu is an omicron with a squiggle. Both readings have problems: the third letter is not a kappa, but the first is a clear nu; pi for the third letter is very attractive: Hippodromos with both heta and mu miswritten?

B] Int.: legs of a youth or man running to right. A, B, each: fight.
C] A: in the field, [nonsense]: γσλ/^λλ.(1)
D] No S. number; no Bareiss number. Not previously published.

(1)surely nonsense inaccurately rendered. Printed in text mostly in the Attic alphabet. First letter: Ionic gamma (perhaps intended by the author for pi as is sometimes done); second letter: three-stroke sigma; third: Attic lambda leaning back somewhat; then a slash; then a break; finally two rather odd Attic lambdas (meant for upsilons?). The photo., pl. 408,3, shows only one indistinct letter

(1) this looks like a miswritten(?) proper name. (2) it is not clear that this is really an omega. (3) so Bothmer in 'Greek Vases'; the reading in CV, text, is: ππετελευχ.

I give above Bothmer's readings in the Cat., p.72, supplemented by CV readings. Dotted delta. Three-stroke sigma reversed.

(1)so Bothmer. I read Αρτεμιδος from CV (not as retr. as the text in CV). I also vidi in the Met. Mus. 6/18/1969: Αρτεμιδος (the first four letters retr.). Απο[λ]ονος (retr. except for nu). ηρακλεος. Αθεννα (I put 'sic' with this). I wonder how accurate my readings were. But Bothmer's reading of the miswritten *Artemidos* needs confirmation.

The hand is certainly different from Painter N's. Matheson identifies the heads on B as Demeter, Kore and Triptolemos. Schefold: Demeter, Persephone, Hades. Bruckner and Beazley following him: Hera, Hebe, Zeus. Brommer leaves the question open.

(1)O. von Vacano, *Zur Entstehung und Deutung gemalter seitenansichtiger Kopfbilder auf schwarzfigurigen Vasen* (Bonn 1973), attributes a number of BF eye cups potted by the early Nikosthenes to a Painter of Villa Giulia 63613; some of the attributions are questioned by Clark; see CV, p. 63. - B] Shoulder: chariot race (parts of two chariots); in the center, the bearded charioteer of the first chariot is preserved.
- C] Nonsense(?, see below): above the horses of the left-hand chariot: [-]ευχς. Above the right-hand horses and to right of the bearded charioteer: παλευχ[-].
- D] Ex Bareiss 24. The inscriptions recall to me the Dikaios Painter. - Neer considers the two inscriptions one nonsense inscription, but I think they are two inscriptions giving the names of the two charioteers (rather than the nationality of the chariots). They may still be only nonsense imitations of real names [esp. if they recall the Dikaios Painter, as they appear to me]; or they may be real names, the second one perhaps miswritten. On p. 26, Neer says

that Bothmer suggests the first part of the inscription, εϒΧΣ, may refer obliquely to the potter Euxitheos; N. does not accept this. But Neer compares for the second half of the inscription: Γαλενε on Boston 10.221, ARV(2) 16/14, CAVI 2764, by Euphronios [this seems odd]. Bothmer thinks the fr. is from a lid rather than a hydria; there are marks of the underside which he declares to be Γrr. (they may resemble a mu), while Neer thinks they are not intentional and were put into the leatherhard state of the pot; see the dr., p. 25. Neer thinks the reverse is too rough to be the bottom of a lid, hence he lists it as a fr. of a hydria of BF shape. - The forward trace horse has a circular brand, for which Neer gives parallels.

(1) Neer 26: Beazley nearly gave the fr. to Phintias (letter to Walter Bareiss of 3/20/62: could be late work of his). But in 'Some Attic Vases in the Cyprus Museum,' ed. D.C. Kurtz (Oxford 1989) 26 Beazley says: several elements in the fr. are not without analogy, as a whole the fr. stands alone. Guy notes links with Euthymides. Neer lists other analogies.

B] Nereids bringing arms to Achilles: in the center, Achilles' tent, in which he sits to right; left of the tent down to the vertical handle: three Nereids to right; to right of the tent to the same handle: Phoenix (bearded old man) leaning on his stick to left, and three Nereids to left (the first of these perhaps Thetis.).

C] Above Achilles' head: $\kappa\lambda[\omicron\varsigma]$. Between Phoenix and 'Thetis', in two lines: $\kappa\lambda\omicron\varsigma|\kappa\lambda\epsilon$. To right of the head of a Nereid carrying a cuirass: $\kappa[\alpha\lambda\epsilon]$. On the upper surface of the [vertical] handle, Gr.: | plus three short diagonal scratches; space; B.(2)

D] Ex Bareiss 392 (86.AE.235 only). + Malibu 91.AE.2,3,8,14,16,21,28,30. Preserved is the top and upper body, but the neck is missing; the two side handles and part of the top handle are extant.

(1)probably Hector Painter (Bothmer). (2)the Gr. is apparently unique (Neer). Johnston suggests the Milesian numeral 22, but notes they are rare at this date. [The Gr. shows well in pl. 360: it looks clearly like a disjointed kappa (rather than an iota plus scratches) and a beta; the ph. is clearer than the facs. on p. 35. Hence 22 is attractive, but I wonder if it is not modern.]

- D] Old number Malibu S.80.AE.308. Ex Bareiss 348. Moore prints, without explanation: $\text{KA}\Lambda\text{II}$. The inscription is in red. This looks to me more like $\kappa\alpha\lambda\eta$ with the eta's cross stroke omitted than like a miswritten $\kappa\alpha\lambda\omicron\varsigma$. But what would $\kappa\alpha\lambda\eta$ refer to? The word for snake is masculine; perhaps

λογχη(?). Ionic alphabet.

(1)the eta consists of two vertical parallel strokes.

C] Int.: in the exergue, in BG, filling the space: εσατικ.(2) Under the foot, Etruscan Gr. (Bothmer): ΑΦ.

D] Old number S.80.AE.1. Ex Bareiss 145. Ex Swiss Private. E. Simon apud Cahn, Auktion 56, p. 50, suggests that Zeus is moving ες Άτ<τ>ικ<έν>. This is cited without a reference by

Bothmer ("interpreted as >>to Attica<<"). Or nonsense (but it does not much look like nonsense). Four-stroke sigma.

(1)E. Simon thinks perhaps a comic chorus; so also Auktion 56. Beazley called it a dance of men. (2)vidi; so also Bothmer.

(1)reported by Cahn to Beazley, in Attic letters. Bothmer has ΜΝΕΣΙΛΑ in Ionic letters (unlikely for the Ambrosios Painter). If the latter is right, it could be genitive of Μνασιλας.

- B] Int.: a small amount of reserved area is preserved. A or B: symposium: 330: at left, part of a couch pillow; to its right, upper part of a woman flautist to left. 331: perhaps a small part of a pillow; middle portion of a standing male flautist to left; at right, part of a reclining figure on a couch and a table. 343: perhaps from the same side as 330 (Moore): at left, handle palmette; at right, couch and a table with meat; at the far right, feet to left, probably of the flautist on 330.
- C] Ext.: 330: starting to left of the top of the flautist's head, and curving around the flutes, the last 'letter' above the pillow; probably incomplete at end as Moore also suggests: OOOOO[--].(1) These are not letters but representations of the sounds of music. 343: between the table legs, to left and right of the meat, in very large letters: λ^ε, retr.(2) This is very clear in the photo.; certainly complete.
- D] Old number S.80.AE.284. + 86.AE.331 (o. n. S.80.AE.285). + 86.AE.343 (o. n. S.80.AE.269). Ex Bareiss. Musical notation.

(1)some of the 'omicrons' are imperfectly formed: the first has a vertical hanging from its right side (cf. omicron S 12 and S 13 in the chart in 'Script'); the last is open at the right (like C) and not perfectly round; the rest are unclear in the photo. Moore's text has AOOCC[; the second and third letters are printed as open at the top. (2)lambda

Fr. 336.2: part of torso and sharply bent arm of an athlete; at right, part of a handle palmette.

 D] + numerous other frs. at Malibu. For the connection of
 Malibu 87.AE.43 and 90.AE.36, see B.-O. 60-61. R. Guy
 suggests that some frs. may be from a replica, to which a
 fr. with the inscription [Δει]φοβος may belong. Phaidrias
 occurs on Louvre C 10,917+, CAVI 6607 and perhaps the fr.
 Leipzig T 3637, CAVI 4179; see ARV(2) 1605. The attribution
 to Kleophrades is based on the similarity with the signed
 Douris cup Berlin 2283, CAVI 2328.

(1) this should be a Douris signature; the name is lost.

(2) B.-O. thinks this may be from a potter's signature. I

 D] Ex New York, Private. Oceanus is here the son of Ge and
 Uranos. Epaphus, the son of Zeus and Io, is the grandfather
 of Belus, who is the father of Aegyptus and Danaus.
 Tsetses, Lyk. 630 mentions a Belos as father of a second
 Epaphos (this from Shapiro). Themis is the daughter of
 Ouranos and Ge (hence a sister of Oceanus). GMusJ says that
 the relation of the figures on B to each other is unclear.
 I am not certain about B as it is not illustrated.
 According to Robertson, the name of the Copenhagen Painter
 was Syriskos ('little Syrian' (slave)). He also acquired
 the name Pistoxenos ('trusty stranger', perhaps after the

Persian Wars.) He is not to be confused with the Syriskos Painter.

(1)= Pistoxenos/Syriskos (Robertson; see p. 140).

(2)all-accomplishing, see LSJ, s.v. παντελής II. (3)i.e. one stater. GMusJ assume this is the cost of the vase (an extraordinary price); a silver stater is a tetradrachm in Attic, but this is probably not Attic. TGV has no parallel.

(see below); the same in black and white in pl. 65, fig. 8, and a dr. in Ill. 3. The Int. is best shown in Ill. 4 (dr.); a small photo., pl. 65, fig. 8.

(1)Bothmer, by letter, attributes the frs. to a painter in the neighborhood of the Painter of the Boston Polyphemus (ABV 198-99: this includes two other cups with merrythought handles). (2)nonsense or a garbled name? (3)nonsense? Unclear reading from Ill. 4. It is not certain whether a letter could be missing at the beginning (but no more than one). The second letter is quite uncertain; the last two letters are incompletely preserved, the last resembling the upper part of U-shaped digamma. Ramage thinks the two inscriptions are parts of a garbled epoiesen signature. (4)the pi is incomplete but had a sloping horizontal; the third stroke is missing. (5)the first letter may be read as the upper tip of an iota, but Ramage may be right in reading it as the upper right-hand tip of an upsilon, since it seems slightly inclined. He restores: [h]υς (the inscription would be above the boar's head, which is lost).

- D] Ex Baltimore, D.M. Robinson. The inscription is definitely
false. The reading $\tau\alpha\lambda\omicron\varsigma$ is also doubtful, as the first
letter need not be a tau. Beazley merely says: "the
inscription is said in the text to be genuine." He does not
include the signature in ARV(2).

- C] Under the foot, Gr.: υεος.
- D] Ex Baltimore, D.M. Robinson. The same word is found on
Boston 01.8058 and Copenhagen, Ny Carlsberg 2654, qq.vv.
The reading here is Johnston's, who says that the word is
"a common way of denoting a plaster foot." I do not know
the meaning of this remark. Note the ligature of nu and
epsilon. Three-stroke sigma reversed.
==>Correction: the graffito, which occurs also on CAVI 2713,
Boston 01.8058, and 3260, Copenhagen, Ny Carlsberg 2654, is
modern. A.W. Johnston, Trademarks on Greek Vases, Addenda
(2006) 67 cites Beazley, in JHS 54 (1934) 89 (a quote that
had escaped me) who says a propos of the graffito νεος on this
vase: "this *may* be an ancient graffito - νεος is undoubtedly
a Greek word; but I think I ought to point out that Mr. W.H.
Young has a pretty fancy of inscribing νεος on the vases he
restores, and I happen to remember that this vase passed
through his hands." Thus, despite the fact that the letter
forms are not exactly the same in the three inscriptions
(5104 has a ligature of N and E and the sigma is reversed;
on 3260 sigma is of shape S 6 in the chart, p. xxiii of
'Script'; 2713 is the neatest), Beazley's recollection
cannot be ignored.

- B] A: Heracles leading a monster (Lamia or Cerberus, author) to right on a chain. B: hunt (so the author): at left, a large animal (boar?) to right; behind it, a man lifts a double axe; at right, two men wearing piloi threaten the animal with spears (the author says they have punctured its eye, but the eye seems missing in a gap). Under each handle, a heron.
- C] A: between the monster and Heracles, probably diagonally downward, i.e., retr.: ο(ι)(κ)^ο(ν)(>).(1)

- D] The writing is very coarse. The writer signs as of the Italian embassy at Sofia, whence I assume that Monopoli is in Bulgaria.

(1)hard to read, although the photo. is excellent. I think nonsense, while the author on p. 56 reads: $\acute{\omicron}(\chi)\delta\kappa\alpha$ [sic?], from $\omicron\chi\omicron\mu\alpha\iota$: 'sono finito,' or 'sono rovinato'. The form she says is $\omicron\chi\omega\kappa\alpha$ or $\acute{\omega}\iota\chi\omega\kappa\alpha$. But the identification of some of the letters is quite unclear to me.

- D] Monte Iato is in Sicily. Owner's name? Isler says similar inscriptions are common at Segesta: see V. - B] No figured decoration preserved.
- C] Gr.: Πυρρῶνα·(Κ)ΑΣΚΑ|Σαμωνίδα·ΕΙΚΑΣ.(1)
- D] REG lists the vase as a RF stemless cup. The inscription is

Doric (Bell). Pyrrhias is known at Selinus and perhaps at Gela; Samonidas is not known in Sicily in the Doric form. The Ionic script is known in Syracuse by the mid-fifth century. The two words following the names are not explained by Bell. Are they tribal terms?

(1)the first kappa is dotted by Bell; the only alternative seems to be upsilon.

Palagia, *Athenian Potters and Painters: The Conference Proceedings* (1997) 209 and n. 52.
- B] Neck: A: Heracles and the Amazons: 11 figures. At the extreme left, the toes of a fallen Amazon, who is lost. A Greek to left, partially preserved, is probably Telamon (cf. Euphronios' Arezzo krater (1465, CAVI 165)). The opponent of Heracles (who has fallen to the ground) should be Andromache.(1) B: symposium: six symposiasts reclining.
- C] Neck: A: a crouching Amazon archer shooting; starting at her chest: Ἀνδρομαχε.(2) To right of Heracles' chest, along his outstretched left arm: Ἡρακλῆς.(3) At H.'s right, an Amazon with a large shield (device: octopus): there are some letters at her left that show in the photo., fig. 9, but are not drawn in fig. 3,a. Further to the right is an Amazon archer and a group of a Greek and an Amazon fighting. Between the archer and the Greek, facing the archer: Σοσιας.(4) Above the duel's fallen Amazon: Χαρα.(5) B: the leftmost symposiast (head missing) holds up a cup: between his lost head and a hung-up basket on his right, facing the basket: χα[ι]ρε. The second symposiast, bearded, wears a turban and hold a cup: to left of his head: χα[ι]ρε.(6) The third symposiast, bearded and facing left, plays the lyre: behind his head and to left of a hung-up basket: (Σ)οσιας.(7) The fourth man, bearded, turns to a young flautist and holds out a cup; a flute case is hung up: at its right: [-]ιος. The sixth symposiast, also bearded, is vomiting: he has no inscription.
- D] Listed by Wehgartner as Syracuse. Earlier listed as Serra Orlando. Neils mentions that Add.(2) declares the vase to be in Syracuse, where it was for a while being restored. The 'Museo Archeologico di Morgantina' is in Aidone, Sicily. The krater

was an heirloom: see Neils, p. 444. The original restoration damaged the surface; hence Neils uses both pre- and post-restoration photos; she has a section on the inscriptions, 437ff: χαίρει is a toast made by two symposiasts holding cups; she also discusses the two forms of the name Sosias. Extremely sloppy writing; thick strokes and blobs. Neils 438 n. 29 notes that in 'Script' I listed one χαίρει too many on B.

(1)but that name is given to an archer on the left; Neils does not explain. (2)the leg of a Greek intervenes. (3)the body of the fallen Amazon intervenes and seems to have led the painter to forget the lambda, if the dr., fig. 3,a, is correct. Neils prints: ηερακ[λ]ες. (4)Neils thinks this refers to the Greek to the right of the inscription; she thinks it is nominative as after the alpha a piece of the pot is missing. (5)so Neils and the dr.; this is considered by her the name of the Amazon, I think. I have χασα, nonsense, with reversed three-stroke sigma. χαρα should also be nonsense. The third letter is unclear. (6)the turban intervenes. The dr., fig. 3,b, omits the epsilon which is clear in the photo., fig. 11. (7)Neils prints Σοσια. The photo., fig. 12, shows a blot by a break, which may be the remains of a sigma: Σοσιας(?). The dr. shows Σοσια, which could be voc.; or final sigma is omitted.

(1)resembles the Syriskos and Copenhagen Painters; could be unusually precise work by the Syriskos (Beazley); but see Robertson who thinks that Pistoxenos and Syriskos are the same man: when the 'little Syrian' was given his freedom, he was named 'trusty stranger' and the double signatures celebrate this event.

(1)CV refers to CIG 4.7730 and other bibl. It could also be read Πονιρας. (2)so the photo. in CV; the facs. has: Θε(σ)(ε)(υ)ς, not retr. and clearly read upside down.

See TGV 86/33A 16, who gives a different sign.

inscriptions is not complete; there are some names so
sloppily written that they resemble nonsense inscriptions.

(1)close to Leagros Group, CV, but not in Beazley. (2)CV gives

Behind the back of the fourth: Διοδορος. To lower right of

(1)so CV in the index; but the dr. and photo. show:

The first letter resembles a smeared reversed sigma, the
fifth, a four-stroke sigma, the last a reversed sigma.
(2)LGPN ii, s.v. Μειλιχος. (3)perhaps for Μουσαιος, with the

(1)Kretschmer's Δειφ(ο)(β)ος (with non-Attic beta) is misprinted in K. R. apud K. also reads Δειθυνος, retr., but says the name is strange and may not be what the painter intended.

- D] Dot-band. Large but sloppy letters. The readings are
 uncertain. K.-G. calls the figures on B satyrs; Beazley,
 men in the komos; they have no tails. Hackl thought there
 were traces of a Dip. under the foot, but K.-G. denies that
 the traces of paint are of that; yet Johnston accepts it.

D] There probably were other inscriptions originally.

- C] A: to left of the left horse's legs: Αχι(λ)λεος.(2) To right of the right rider's back: Πενθειλεας.
- D] Note influence of Lysippides Painter (K.-G.). The photo. shows only part of the inscriptions. Both inscriptions are

oddly placed near the rear ends of the two horses, at the margins of the picture.

(1)Bothmer points out that he knows no parallel for Achilles on horseback, and that the names seem to be attached somewhat capriciously. (2)the lambda is miswritten as a three-stroke sigma.

- B] A: chariot to right; behind, Athena to left. B: Dionysus and satyrs.
- C] A: near Athena's head: [A]λκμεῶν.(2)
- D] This is the name of the charioteer; the vase is probably in memory of a chariot victory. Beazley suggested a memorial for the Olympic victory of Alcmeon I in 592 B.C.; I suggest possible contemporary identifications in 'Prakt.' and a victory other than an Olympic one, perhaps even in the Panathenaea. For another vase with Alcmeon see now C. Bron in AK 1997.

(1)listed among very late standard neck-amphorae ii, various; the dates of these are said to be between 480-450. (2)the reading is a combination of Beazley's and M. Ohly-Dumm's readings; the vase was formerly repainted and damaged in a fire in the second World War; I thank E. Kunze-Götte for sending me her reading which agrees with Ohly-Dumm's.

(1)CV prints 75716, a clear mistake. (2)the sixth letter appears as an upright stroke in the photo. and the facs.; the seventh resembles a C lying down or a lambda without a sharp angle. - C] B: above the horses' heads (more or less centered on them): ηετλρο ν καλος.(1)
- D] The name is clearly miswritten. LGPN ii wrongly(?) reads ηετάρων (s.v. Ἐτάρων). Add.(2), while reading HETLRON (with Bothmer), transcribes HETAPONKALOS.

(1)so the facs. and the photo. in CV, with Attic L-shaped

This makes it difficult to read ηετ(α)ρὸν.

(1)K.-G. attributes the vase to the Chiusi Painter. (2)nu is reversed; or sideways sigma? (3)the nu is reversed; alpha and delta are very hard to distinguish; the last letter is perhaps a disjointed upsilon. (4)the sigma is written kion.; the final alpha is a reversed high-kicker.

- C] A: to Hermes' left, facing him: *ἡρμης*, retr. Around the baby Heracles' head, in much smaller letters, curving around the head: *ἡρακλες*. Under Hermes' feet: *χαίρεσν*. On Hermes' right, not facing him: *καλος ἡο παις*.(1)
- D] The inscriptions recall red-figure; those on A can be interpreted as part of a story: Hermes brings the child Heracles to Chiron who, returning from the hunt, greets him. Hermes says: *χαῖρε σού*. Heracles is the *pais kalos*. This despite the position of some of the inscriptions and the fact that Chiron does not face left.

- D] Much restored (Beazley). Punning names? The readings are from the text in JHS and from Burow. Beazley says the letters are smaller than usual. The lettering is in fact much smaller than on Munich 1694 (below) and other vases by the Antimenes Painter; I think it is not by his hand. Harnessing: see Burow 50f.

(1) ηα(ρ)μipπος? Beazley, tentatively; Jahn had read; ηαμipπο(ς), with the third and fourth letters doubtful. Burow reads ηα[ρμ]ιππο[ς] or ηα[μ]ιππο[ς] [after Beazley] but the photo. does not show clearly that two letters are missing in the break. Is ηαμipπος possible? (1) Burow reads: Σχανθ[ος]. For σχ = χσ see Kretschmer, Vas. 180 and GAI i, 21. (2) so Beazley (name taken from the action); Αναξιδημος, Jahn. The final sigma looks like a partial nu and is given as a nu by Burow 41; it is probably a sideways sigma.

- C] Under the foot, Grr.: a large ligature ΛΗ. Opposite it delta surmounting a vertical with two cross strokes (TGV type 3F). Between them, on one side: ληκυ:κθ:λη. On the other side: a small ligature ΛΗ, retr., followed on the right by 21 parallel strokes.
- D] See further under Oxford 1948.236, CAVI 5986. 21 strokes do not agree with the numeral κθ'.

- B] Shoulder: fight, with women watching. Body: Harnessing a chariot.
- C] Body: in the upper corner of the picture: καλος Λεοχαρες.(1)
- D] Beazley, reading Λεοκ<ρ>ατες, has only this instance of the kalos-name. I read an X-shaped chi for the kappa and a disjointed triangular rho for the tau. Leochares is also not known as a kalos-name.

(1)so my reading from a small photo.; Beazley (ABV 337 and 669) reads: καλος Λεοκ<ρ>ατες. Leokrates is also read by Klein, and Kirchner in PA suggests that Leokrates Stroibou general in 479/78 and 459/8, may be the same man. For Leochares, see LGPN ii (the earliest, mid-fifth).

- A] BF lekythos. From Sicily. Acheloos Painter. Late sixth. *Haspels, ABFL 48, pl. 15, fig. 3. ABV 385/32.
- B] Athletes.
- C] Between the central and right-hand figures: nonsense: ι(χ)ι(ν)χεδκφ.
- D] Haspels 48 says the picture is a repetition of that on the Acheloos Painter's neck amphora, Würzburg 204, CAVI 8062. Her photo. shows a part of the picture only, I think (not the leftmost and rightmost portions): at left, trainer, jumper and flautist, all to right. The inscription is in small and thin letters between the jumper and the flautist, downward in a wavy line: ι(χ)ι(σ)χεδκφ. The first chi has one bar stopping at the crossing point, making the letter look more like an archaic upsilon, tilted. The nu is a sideways sigma. The jumper's outstretched arms intervene.

- A] BF lekythos. Athena Painter. First quarter fifth. *Photo. Haspels, ABFL, Athena Painter no. 18.

- B] A: in the center, Dionysus with oschos and drinking horn; at left a satyr and a maenad, and another satyr carrying a huge wineskin(1); at right, a maenad between two satyrs. B: similar. Under each handle, a satyr masturbating.
- C] A: nonsense: imitation letters: at least 15 inscriptions, some of only two letters.(2)

(1)so V.&K.; it could be a sack. (2)the photo. is too small to read the inscriptions.

- A] RF stemless cup.(1) From Vulci. Unattributed. Class of the Top-band Stemlesses. Third quarter sixth. *Para. 102/40. *CV, Germany 57, pl. 64,3-4,6-9. Hackl, Führer 91. E. Pierro, ceramica 'ionica' non figurata e coppe attiche a figure nere (Materiali del Museo Archeologico Nazionale di Tarquinia vi; 1984) 154.
- B] Lip: BG. Handle zone: no figured decoration.
- C] Handle zone: nonsense: A: mock inscription: [--]ΤΥ>ΟΠ[--]. B: similar: [--]ο(.)υ(.)ϋ vacat. The reading of B is quite uncertain.
- D] Squat letters rather high in the handle zone on A; on B, they are better centered vertically. Beazley lists three more cups of similar shape and decoration: Civitavecchia 1398 and Vatican (Para. 102/41 and 42). Both have mock inscriptions. A fifth cup is published by Pierro 154/41, pl. 52/41 [it must be from Tarquinia].

Munich 2125.

- A] Plain lip cup. From Vulci. Unattributed. Exekias potter. Third quarter sixth. 550-530. *CV, Germany 56, pls. 19,8-11 and 20,1, Beilage 5,5 (bibl.). CIG 4.8157b. Beazley, JHS 52 (1932) 180, 183, 200. ABV 147/3, *Para. 61. 'Script' 148. K. Vierneisel and B. Kaeser, eds., *Kunst der Schale: Kultur des Trinkens* (1990), figs. 27.5b-c (A, B, signatures only).
- B] No figured decoration.
- C] Handle zone: A: ΕΧΣΕΚΙΑΣ : ΕΠΟΙΚΕΣΕΝ. B: ΧΣΕΚΙΚΑΣ : ΕΠΟΣ.
- D] Thick squat letters. Both inscriptions are complete. The inscription on A is given incorrectly in JHS and ABV: see Para. The hand is not Exekias': see 'Script'.(1)

(1)see also the interesting discussion by Fellmann in CV. He attributes to the same hand: Louvre F 54, CAVI 6292; Basel Market (see AJA 88 (1984) 342 n. 8, CAVI 2106) and Civitavecchia (ABV 147/4, plain, CAVI 3191).

5210.

Munich 2126.

- A] Plain lip cup. From Vulci. Tleson Painter. Tleson potter. Third quarter sixth. *Fellmann, CV, Germany 56, pls. 7,7 and 8,1-4, Beilage 2,3. Beazley, JHS 52 (193) 182. Klein, MS 73/4. ABV 182/14.
- B] Int.: plain. Ext: A and B: lip: plain.
- C] Handle zone: A: Τλεσὼν ἠο Νεαρχὸ ἐποίησεν. B: Τλεσὼν ἠο Νεαρχὸ ἐπ[οίησεν].
- D] CV has excellent pictures of the inscriptions, pl. 8,1-2. The writing is very distinctive, especially sigma and nu (cf. Fellmann). Verticals tend to be thicker than the horizontals.

5211.

Munich 2127.

- A] Fragmentary plain lip cup. From Vulci. Tleson Painter. Tleson potter. Third quarter sixth. *CV, Germany 56, pl. 5, Beilage 2,4. Beazley, JHS 52 (1932) 182. ABV 181/13.
- B] Int.: plain. Ext: A and B: lip: plain.
- C] Handle zone: A: Τλεσὼν ἠο Νεαρχὸ ἐποίησε. B: Τλεσὼν <ἠο> εεαρχὸ ἐποίησε(.).σνε.
- D] The lettering is cramped. In the same style as Munich 2126, (above) but sloppier. Epsilon with extremely short hastae. The verticals are extremely thick. The signature on B is miswritten. The hand is typical of the Tleson Painter.

5212.

Munich 2128.

- A] Plain lip cup. From Vulci. Unattributed. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 35,1-5, Beilage 10,4. CIG 4.8332. Hackl, Führer 92.
- B] Lip: A-B: plain.
- C] Handle zone: nonsense: A: ἐποίη(σ)υτενσυ.(1) B: ε[--5--]ποίησε.(2)
- D] Squat and thick letters; the inscription on A is short and

well centered, that on B is not illustrated in CV. Fellmann compares the lettering of Munich 2125, CAVI 5209 (one of the Exekias cups). The inscriptions play with εποιεσεν (cf. the examples in 'Script', p. 54, 282-84) and with the ου of some drinking inscriptions. A truncated εποιεσεν is also found on Munich 2171 (? CAVI 5235). Perhaps written by an illiterate.

(1)the sixth letter is either a flat sigma (so Fellmann) or squiggly iota, presumably the former. (2)the number of missing letters is approximate.

5213.

Munich 2129.

- A] Plain lip cup. From Vulci. Unattributed. Third quarter sixth. *CV, Germany 56, pl. 36,1-4, Beilage 10,6 (no bibl.).
- B] Lip: A: plain. B: missing.
- C] Handle zone: A: nonsense: νεν(γ)τνεκφεφνοσ.
- D] The cup is fragmentary since World War II. A long inscription in small letters, but with vacats before and aft.

5214.

Munich 2131.

- A] Fragmentary BF lip cup. From Vulci. Unattributed. Third quarter sixth. 560-550 (Fellmann). *Fellmann, CV, Germany 56, pl. 4,4-8, Beilage 1,7. Kretschmer, Vas. 195. Hackl, Führer 92.
- B] Int.: siren (now lost); a portion of the tongue border is preserved. Lip: A and B: plain. B is now lost.
- C] Handle zone: A: well centered and in large and widely spaced letters: χαρτε και πτει ευ.(1) B: similar (Jahn), but now lost.
- D] Broken toward the end of the Second World War and now incomplete. Good letters, well and evenly spaced: early.

(1)the last two letters are more widely spaced than the others; there is also a break in this location (not well mended?).

5215.

Munich 2132.

- A] BF lip cup. From Vulci. Tleson Painter (Fellmann). Not signed. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 12,1-4,6, Beilage 3,3. Kretschmer, Vas. 195. Hackl, Führer 92. K. - B] Int.: siren. Lip: Ext.: plain.
- C] Handle zone: χαρτε και πτει ευ. B: χαρ[ε και π]τει ευ.
- D] Fellmann attributes this vase to the Tleson Painter, citing Haldenstein. He gives a list of other unsigned cups with

drinking inscriptions to be so attributed: New York 18.74.2 (with sirens), ABV 179/8, CAVI 5615; London B 416, ABV 416, 179/11, CAVI 4315; Nicosia C 438, 180/34, CAVI 5775; Tampa (ex Maplewood, Noble, ex Brussels) 180/41, Para. 74, CAVI 7578; Hamburg 1967.34, CV 1, pl. 35,1 and AA 1969, 347/31, CAVI 3877; Munich 9414 = ABV 180/37(?), CAVI 5375. Further cups assigned to the Tleson Painter with reservations by Beazley in Para. 76 are listed by Fellmann; also cups near the Tleson Painter.

- B] Int.: upper portions of a bearded erastes and an eromenos; at left, a chiton hung up; at right, a dead hare hung up. Lip: A and B: plain.
- C] Handle zone: A: χαίρε και πειε ευ. B: [--- πει]ι ευ.
- D] Broken at the end of the Second World War; formerly much restored. Fellmann: very early; the handle palmettes are vertical; large clear letters; style of interior, cf. Ergotimos and Nearchos; also London Market (Sotheby), cat. 14-15/12/1981, no. 270, CAVI 4788, which has similar inscriptions.

CV, Tübingen 3, 39, under pl. 27,5-7. K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), fig. 11.2a-b (A; b is the inscription).
- B] Int.: siren; around, tongue border. Lip: A and B: plain.
- C] Handle zone: A: χαίρε ου και πειε ευ. B: χαίρε ου και πειε ευ.
- D] Widely spaced letters fill most of the zones. The formula with ου is not common: see Tübingen [D 38,] S./10 1222 (CV, loc. cit., CAVI 7754) and Berlin 1771, CAVI 2234. Fellmann lists five vases where the ου is put first.

(1)Fellmann: some similarity to the Tleson Painter, but the cup is much closer to the Siren Painter.

5218.

Munich 2135.

- A] BF lip cup. From Vulci. Tleson Painter. Tleson potter. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 12,7-10, Beilage 3,4. Beazley, JHS 52 (1932) 176. Hoppin, BF 390. ABV 179/6. K. Schauenburg, AA 1974, 199 n. 6.
- B] Int.: siren. Ext.: lip: plain.

- C] Handle zone: A: Τλεσὼν ἢ Νεαρχὸ ἐποιε[σ]εν. B:
Τλεσὼ[ν ἢ Νεαρ]χὸ ἐποιεσ<ε>ν.
D] Fellmann says that this is the latest cup with sirens by
the Tleson Painter; on sirens see further Schauenburg. The
writing seems neater than on other Tleson cups: is it the
same hand?

5219.

D] Large clear letters. A mixture of signature and drinking

B] Lip: A, B, each: plain. Handle zone: A: Heracles and
Nessus: a youth with a drawn sword attacking a fleeing
centaur and a woman.(1) B: similar, but only the hero is
preserved.
C] Handle zone: nonsense: imitation inscriptions: A: to left

eight letters, one missing in a break; the right-hand
portion is not preserved.
D] = Jahn 706. Beazley in JHS 52 gives the wrong number (2169)

C] Nonsense: A: lip: above the ram, following its back:

(3) Under the foot, Gr.: a four-stroke asterisk, with two strokes lengthened toward the bottom (facs., CV, p. 44).

(1)the last letter read as Ionic gamma by Fellmann, but it is probably a miswritten tau. (2)a nonsense inscription (as are all the others), since koppa before an e-sound is inappropriate. However, the first nine letters resemble a proper name. (3)if this inscription is similar to that on A, the larger missing part should include a vacat.

C] Handle zone: well centered: $\chi\alpha\iota\rho\epsilon$ και $\pi\iota\epsilon\iota$ $\tau\epsilon\nu\delta\epsilon$. B: [χ] $\alpha\iota\rho\epsilon$ (κ) $\alpha\iota$ $\pi\iota\epsilon\iota$ $\tau\epsilon\nu\delta\epsilon$.
D] Sloppy and loose writing; some letters are disjointed.

B] Lip: A: a siren with outspread wings. B: similar.
C] Handle zone: nonsense: imitation letters: A: well centered: eight imitation letters: sideways sigma and upright chi are recognizable. B: similar: eight imitation letters: sideways sigma, upsilon, and upright chi (or near) are recognizable.
D] The letters are small and unclear. For sirens on lip cups see CV.

B] Lip: A: a bit to right: three draped youths. B: similar (only the left-hand figure and part of the second figure's head and shoulder are preserved).
C] Handle zone: nonsense: centered: $\alpha\pi\alpha\pi(\alpha)\lambda\pi\gamma\pi\alpha\eta$. B: $\nu\lambda(\nu)\gamma(\alpha)\epsilon\alpha\lambda\phi\alpha\pi\alpha\sigma$.
D] Squat letters, hard to identify. Some readings are uncertain.

(1)Fellmann: the figures recall the 'Läufermaler' (Brijder, *BABESCH* 50 (1975) 160ff.), but are not by his hand.

- B] A-B: lip: ivy wreath.
- C] Handle zone: A: ηερμογενες εποιοσεν. B: ηερμογενες εποιοσεν.
- D] Wrongly numbered 2553 in JHS 52. Fellmann: all cups with ivy wreath are potted by Hermogenes; two have nonsense inscriptions: Würzburg 418 (ABV 166, CAVI 8059) and Basel Market (M.M.; Sonderliste G [1964], no. 57, Para. 68, CAVI 2117). For the shape of the mu see K. Schauenburg, Ausstellung Hamburg 1990, 84/53. Rho with extended vertical.

- B] Lip: A, B, each: female head (bust) in outline.
- C] Handle zone: A: ηερμογενες εποιοσεν εμε. B: ηερμ[ογε]νες εποιοσεν εμε.
- D] The handwriting is similar to Munich 2155 (above), but there are differences: the epsilons have short hastae; mu is as in Munich 9418, CAVI 5379. The general ductus is much sloppier, but nevertheless by the same hand. Rho with extended vertical.

(1)for attributions of cups signed Hermogenes see 'Script', p. 51. The five head cups signed Hermogenes are by one hand: they are ABV 164/1-4 and Para. 68.

- B] Lip: A, B, each: female head (bust) in outline.

- C] Handle zone: A: ἡρμογενες εποιησεν εμε. B: ἡρμογενες εποιησεν εμε.
D] Writing as in Munich 2163 (above), but a bit smaller. Rho with extended vertical.

B] Lip: A, B, each: female head (bust) in outline.
C] Handle zone: A: shifted to left: Σακονιδες εγραφσεν εμ[ε].
B: also shifted to left: χαρε και περι τε<ν>δι.
D] The letters are short and smallish. The writing on A is better than that on B, but hardly by a different hand. Fellmann gives a list of head cups, especially by Sakonides; also of some cups with drinking inscriptions similar to 2165; he discusses variants of drinking inscriptions in general. The rho not with extended vertical.

B] Lip: A, B, each: female head (bust) in outline.
C] Handle zone: nonsense: imitation inscriptions: A: γσοτστσο.(2) B: (.)τσογσοογ.(3)
D] These are not real letters but imitations. Fellmann gives parallels of head cups with nonsense inscriptions: Boston 64.700, CAVI 2814; Basel Market (M.M., Sonderliste G [1964] 31/58, CAVI 2100); Private (Dörig, Suisse Romande, no. 160); Marseilles, Musée Borely (JHS 52 [1932] 175, CAVI 5073).

(1)imitation of Sakonides (Beazley). (2)my reading from a photo.; Fellmann reads: γσοτστσο. (3)my reading from CV's photo.; Fellmann reads: ιγτογσοογ. The photos in CV are unclear, as the writing is small and sloppy; the tau's are especially obscure. Beazley and Payne say (for A): πσο and five shapeless letters.

- A] BF lip cup. From Vulci. Unattributed.(1) Third quarter sixth.

*Fellmann, CV, Germany 56, pl. 23,5-8, Beilage 6,5. C. Fränkel, Satyr- und Bakchennamen (1912) 46 n. 1. ABV 677. Amyx, AJA 46 (1942) 577 (mention). R. Lullies in: E. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), figs. 25.3a-b (details of A and B with inscriptions).

- B] Lip: A, B, each: female head (bust) in outline.
- C] Handle zone: A: Καλ·λλιστ[αν]θε : καλε. B: Καλ·λλιστανθε : καλε.
- D] Beazley (and also C. Fränkel) consider the name human; Fellmann says it is related to the picture, perhaps the name of a well-known hetaera. Amyx compares New York 41.162.126, CAVI 5683, and parallels that are common on Corinthian vases (a figure of a woman and female praise in words). The lettering on B is a bit more careful: is it the main side?

(1)Fellmann attributes the cup to the same hand as Basel, Antikenmuseum Lu 18, CAVI 2025, which has the same decoration and inscriptions (see ref. above), although there are slight differences (no punctuation; nu omitted on B).

Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), figs. 2.10 (A) and 13.3 (A, detail).
- B] Lip: A, B, each: plain. Handle zone: A: in the center, a cock in outline. B: similar (only the rear half is preserved). No handle palmettes.
- C] Handle zone: nonsense: imitation letters, on either side of the cocks: A: at left: 13 letters, among them epsilon and sigma. At right: 11 letters, among them epsilon and Attic lambda. B: on the cock's right: 5 letters. Some letters degenerate into horizontal strokes.
- D] Illiterate nonsense? No incision in the cocks or elsewhere. Fellmann compares Cambridge 66 (CV 1, pl. 19,4, CAVI 3018) with pairs of fighting cocks in the handle zone and similar nonsense inscriptions right and left.

5235.

- A] Fragmentary BF lip cup. From Vulci. Unattributed. Second quarter sixth. 560-550 (CV). CV, Germany 56, pl. 1,2-5, Beilage 1,2. Beazley, JHS 52 (1932) 169 n. 15 and 180. K. Schauenburg, AA 1974, 212.
- B] Int.: part of a bearded man running; tongue border. Lip: A: panther. B: part of a panther.
- C] Handle zone: nonsense: imitation letters: A: seven letters.(1) B: similar: six letters, the first faint.
- D] Jahn 20. Broken at the end of World War II: only seven frs. remain. An early lip cup, part of a group that has figured

decoration and a tongue pattern on the inside; see Beazley, JHS 52, 177ff., and Schauenburg, AA, 198 n. 5. Cf. also Munich 9412, CAVI 5373. The inscriptions start at the panthers' hind legs and run considerably forward to right. See also CAVI 5212 for another reading.

- A] BF lip cup. From Vulci. Unattributed. Third quarter sixth. *Fellmann, CV, Germany 56, pls. 32,5-6 and 33,1-4, Beilage 9,5. CIG 4.7827c. G. Weicker, Der Seelenvogel (1902) 157 n. 7. ABV 668, Add.(2) 148. *K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), figs. 11.10a-b.
- B] Int.: siren; below, a plant motif. Lip: A-B: sirens replacing handle palmettes.
- C] Int.: above the siren's left wing, starting to left of the (lost) head and curving downward following the margin: εποιηποι, retr. To left of mid-body, somewhat downward and slightly curved: ε[.](σ)ε(.ι)γ, retr. (The 7th letter a near-rectangular blob.) (1) Handle zone: A: ηη<π>οτελε<ς> καλοσεν.(2) B: ηη<π>οκιμενος εαιοι.(3)
- D] The inscriptions apparently by a semi-literate: see CV, and KdS. Fig. 11.10b in KdS is a photo. of the 'Hipoteles' inscription. LGPN ii lists Hippoteles only from ABV 668. V. & K. compare Munich 2136, CAVI 5219.

(1)the two inscriptions together could be an imitation of a signature. Or the first inscription on the Int. may be an attempt to write a signature (Fellmann). (2)so CV and KdS; Beazley read ηηποτελεκαλος, wrongly. Hippoteles is apparently found only here. (3)KdS, p. 94, says that all letters after ηηπο- are meaningless; a name Hippokeimenos is not found in PA, Pape or LGPN ii.

- A] Plain band cup. From Vulci. Unattributed.(1) Third quarter sixth. *Fellmann, CV, Germany 57, pl. 54,1-4, Beilage 12,5. Hackl, Führer 93.
- B] Handle zone: A and B: plain.
- C] Handle zone: nonsense: A: υογνιυσννιυχ. B: υολ[.]ογιφ[.]γ[.]υιυ:.
- D] Large letters, not very neat.

(1)Fellmann: probably by the same painter as New York 41.162.72, CAVI 5672 (CV, New York 2, pls 18, etc. 'Script' 285, Fig. 67): palmettes and inscriptions are similar, with a group υηλ and triple punctuation at end. Similar are also the palmettes on the lip cup Munich 2148, CAVI 5221.

Munich 2186.

- A] Fragmentary plain band cup. From Vulci. Unattributed. Third quarter sixth. *CV, Germany 57, pl. 54,9-12, Beilage 12,6. *Kretschmer, Vas. 195. Hackl, Führer 93. K. Friis Johansen, Acta Arch. 31 (1960) 132. Jahn, no. 39. GAI ii, 458.
- B] No figured decoration; handle palmettes.
- C] Handle zone: χαίρ[ε] και π[αι]ς.(1) B: the same inscription, according to Jahn; now lost.
- D] Broken at the end of World War II and now fragmentary. Fellmann: the handle palmettes recall the Amasis Painter. The same inscription on B of the lip cup Copenhagen 13,966, CAVI 3257, by the Epitimos Painter [where however Beazley in Para. reads: χαίρε και π[αι] σ[υ]. This does not seem possible if Jahn's reading is correct. According to Kretschmer, π[αι] σ[υ] was read by Roscher and Bergk and accepted by Schulze [and Beazley], but is rejected by Kretschmer who reads π[αι]ς; he is followed by Fellmann.]

(1)complete in Jahn.

- A] Plain band cup. From Vulci. Xenokles Painter.(1) Xenokles potter. Ca. 550 (CV). *Fellmann, CV, Germany 57, pl. 1,6-10, Beilage 1,2 (bibl.). CIG 4.8265. Beazley, JHS 52 (1932) 191, 197. ABV 186/8. K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), figs. 11.6 (A), 25.1a-b (A, B).
- B] Ext.: handle zone: plain except for the signatures.
- C] A: Χσενοκλες : εποι(ε)σεν.(2) B: Χσενοκλες : εποιοσεν.
- D] Typical of this painter is the 'uncleaned brush.' Fellmann lists the group of seven plain band cups with this signature and compares the styles. Bibliography on problems with the decoration of Xenokles cups: Amyx, AJA 66 (1962) 229ff.; Para. 77; Schauenburg, AA 1974, 201, 203ff. (wrongly called a Tleson cup); Blatter, AK 24 (1981) 68f.

(1)the hand is typical of the Xenokles signatures; see 'Script', pp. 53-54 and CV. (2)the fourth epsilon corrected from a sigma.

- A] BF band cup. From Vulci. Manner of Elbows Out (Fellmann). Third quarter sixth. *CV, Germany 57, pl. 14,3-4 and 15,1-3, Beilage 3,3. Hackl, Führer 93. Beazley, JHS 52 (1932) 190. K. Schauenburg, AA 1981, 338 n. 23. K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), figs. 11.12 (A) and 12.2 (A, part).
- B] Handle zone: A: in the center, a stag, feeding; at the handles, panthers in lieu of palmettes. B: similar (part of the stag is missing).
- C] Handle zone: A: to left and right of the stag: long rows of

- dots in horizontal but somewhat wavy lines. B: similar.
- D] Fellmann thinks Munich 2205 (below) is probably by the same hand.

5241.

Munich 2205.

- A] Fragmentary BF band cup. From Vulci. Manner of Elbows Out (Fellmann). Third quarter sixth. *Fellmann, CV, Germany 57, pl. 15,4-8, Beilage 3,4. Hackl, Führer 93.
- B] Handle zone: A: in the center, two antithetical sphinxes. At each handle, a panther facing it, but with the head turned back. B: similar.
- C] Handle zone: nonsense: on each side, between the panther and the sphinx, a vertical row of dots. B: similar. Three of the four rows are completely preserved.
- D] Broken in World War II, now fragmentary. Fellmann thinks that Munich 2193, above, also with panthers and rows of dots (but they are horizontal), may be by the same painter.

5242.

Munich 2210.

- A] Fragmentary BF band cup. From Vulci. Unattributed. Third quarter sixth. *Fellmann, CV, Germany 57, pl. 30,1-5, Beilage 7,3. A. Greifenhagen, Eine attische schwarzfigurige Vasengattung und die Darstellung des Komos im VI. Jh. (1929) 80/105. *Photo. at Beazley's. K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990) 146, fig. 22.1 (A).
- B] Handle zone: A: (the left portion is missing:) four naked youths dancing. B: similar: parts of three dancers are preserved.
- C] Handle zone: A: nonsense: from the dancer's right to the handle palmette: five imitation letters.(1)
- D] Broken at the end of World War II and since incomplete. Fellmann compares Munich 2211 and 2182.

(1)so the photo. in CV; the photo. in Beazley's possession shows seven letters to left of the dancers (three letters are reversed nu's) and six letters at right, one of them an 'Argive' lambda, the last two being dots close together. This photo. may be of the vase before it was damaged in WW II and there may have been restoration.

Munich 2211.

- A] BF band cup. From Vulci. Unattributed. Third quarter sixth. *CV, Germany 57, pl. 29,5-8, Beilage 7,2. Hackl, Führer 93.
- B] Handle zone: A: in the center: a woman opening her gown; on either side two youths, some dancing. B: similar, but the woman does not open her dress.
- C] Handle zone: nonsense: imitation letters: A: at left and right, a horizontal row of imitation letters (blots), that at left having 4 letters, that at right, 5-6. B: in the

same position, but vertical: at left only one letter remains, at right there are seven.

5244.

Munich 2216.

- A] BF band cup. From Vulci. Unattributed. Third quarter sixth. *Fellmann, CV, Germany 57, pls. 50,4-5 and 51,1-2, Beilage 11,6. H.W. Burkhardt, Reitertypen auf griechischen Vasen (Diss. 1906) 22. Hackl, Führer 93.
- B] Handle zone: A: in the center, two horsemen facing; between them, a bird; on each side, a naked youth running toward the center. B: similar, but a nonsense inscription replaces the bird; the right youth is partly missing. (Three youths have a cloak over their arms.)
- C] Handle zone: B: nonsense: between the horsemen, in a downward curve, and facing left: $\rho(\kappa)\rho(\cdot)$.
- D] Fellmann compares the ff., both for style and subject: Vatican 328, CAVI 6977 (Albizzati, pl. 35) and a cup in Palermo, CAVI 6030; another similarity is with Brijder's 'Runners Painter' (BABESCH. 50 (1975) 260ff.), although the palmettes are different. - An interesting example of the importance given to the writing of letters.

5245.

Munich 2220.

- A] BF band cup. From Vulci. Unattributed. Recalls Amasis and Taleides painters (Fellmann). Third quarter sixth. *Fellmann, CV, Germany 57, pls. 30,6 and 31,1-4, Beilage 7,4. Hackl, Führer 93. *J. Neils et al., Goddess and Polis: The Panathenaic Festival in Ancient Athens (Hood Museum of Art, Dartmouth College, New Hampshire; Princeton University Press; 1992) 50-51, fig. 20 (A). K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), fig. 18.3 (A, large) and 25.4a-b (A, B, small).
- B] Handle zone: A: two boxers facing; between them a Panathenaic amphora as the prize; at left and right, a draped male with his staff ('judge'); handle palmettes. B: similar (the upper part of the right boxer missing).
- C] Handle zone: mainly nonsense: A: between the left-hand palmette and the left 'judge': $\chi\epsilon\omicron(\cdot)\omicron(\cdot)$. Between the left judge and the left boxer: $\chi\omicron\nu\chi(\cdot)(\cdot)$, retr.(?).(1) Above the amphora: $\chi\alpha\rho\epsilon$. Between the right boxer and the right 'judge': $\chi\omicron(\nu)\iota\chi(\nu)(\cdot)$. (2) Between the right 'judge' and the right handle palmette: $\chi\nu\chi\omicron(\nu)\iota\chi$. (3) B: four similar nonsense inscriptions, partly fragmentary. Over the amphora: $\chi\rho\iota[-]$.
- D] The letters are small and degenerate into blotches. Fellmann notes that all inscriptions begin with chi, and twice on A with $\chi\omicron\nu\chi$; on B, $\chi\rho\iota[-]$ is no doubt for $\chi\alpha[\rho\epsilon]$. On B, the nonsense inscriptions twice begin with $\chi\nu$, once with $\chi\omicron\nu$ and once they end in $\chi\omicron\nu$. Fellmann's connection of the band cup with both the Amasis Painter and Taleides Painter is based on the Getty lekythos Malibu 76.AE.48, CAVI 4926, by the latter, signed on the foot by Amasis. This is doubtful, as the inscription is, I think,

suspect. Neils connects the subjects with the Panathenaea.

(1)if retr., the inscription faces the boxer and nu is of the regular shape.; if not retr., the nu looks more like a sideways sigma; this is true of all the nu's. (2)if retr., the inscription would face the right 'judge', and the nu's would be OK. (3)uncertain reading.

- B] Handle zone: A: a chariot with its charioteer; behind, a warrior. B: similar.
- C] Handle zone: A: to left and right of the scene: $\eta\epsilon\rho\mu\omicron\gamma\epsilon\nu\epsilon\varsigma$ and $\epsilon\pi\omicron\iota\epsilon\sigma\epsilon\nu\ \epsilon\mu\epsilon$. B: similar: $\eta\epsilon\rho\mu[\omicron\gamma\epsilon\nu\epsilon\varsigma]$ and $\epsilon\pi\omicron\iota\epsilon\sigma\epsilon\nu\ \epsilon\mu\epsilon$.
- D] The hand is typical of Hermogenes signatures; see CV, p. 18, and 'Script', p. 51.

- C] Handle zone: eleven nonsense inscriptions are extant. B: ten similar inscriptions are extant. The inscriptions are basically imitation letters and blobs, but often begin with a retr. epsilon and once with pi and epsilon, not retr.: under the lion's belly, curving downward: $\pi\epsilon(\cdot)(\cdot)(\cdot)(\cdot)$.
- D] A multifigured band cup.

D] Now cleaned; the old condition is in Bothmer.

(1)Fellmann refers to Louvre F 72, CAVI 6295 (CV, Louvre 9, III H e, pl. 80,1-7), which is very similar also in the disposition of the inscriptions and may be by the same hand; Munich 2240 and Munich 2241 (both above) too are similar; both often begin with epsilon, which F. thinks recalls Sakonides (see CV on the two vases).

- D] Done from FR and checked with CV; note that the vase has been repeatedly recomposed since Reichhold's drawings. I give the inscriptions mainly from CV, although FR probably has a few more letters. A has 21 inscriptions for 18 figures: χαριε, twice, is supernumerary (I count ηεδε with the sphinxes) and one inscription seems to be nonsense (see note 4). B has 36-37 inscriptions for 19 figures, many of them nonsense (B had more empty space). Many of the names are not true mythological names. The vase is a model of the use of inscriptions on many-figured band cups, which are often purely ornamental; see 'Script', pp. 48-49. For the peculiar use of punctuation, see 'Script', pp. 49 and 168. The vase may be by the same hand as London B 419, CAVI 4318 (Beazley).

(1)it is not clear whether this is connected with the sphinx.
(2)the last two inscriptions are misplaced. (2a) so V. Schmidt; Ποδες, Threatte, GAI ii, 81. In either case, the name of a dog.
(3)so Reichhold's dr.; not in FR, text; not in CV. (4)so Reichhold; CV reads κινω; Κιμω, FR and CV. Nonsense? (4a) for the name see GAI ii, 263, with parallels. (5)so FR, dr.; not in text; CV reads ευγοπ. Nonsense? The gamma of ευ(γ)οι turned 90 degrees. - λυσω, FR; ισω, CV; both retr. - νρρν, FR; νερν, CV. - ενονο is my reading from the photo. in CV; I had read φνονο from Reichhold; CV reads ενοπο(?). - νφοπο: my reading from Reichhold; the photo. in CV shows rather νφφο; CV reads νετνω. (6)illegible in FR; CV reads νερνω, but the third letter is unclear in the photo. (7)for the name, see Hesp. 22 (1953) 215. (8)Athena has only the lyre as an attribute. (9)a name, or nonsense? Buschor thought it meant "wohlgezapft," since it is close to the ball of wool held by Ariadne. But it might also refer to Theseus: "well groomed"? μεσ follows immediately on the other side of the wool. (μεσ is FR's reading; CV reads τες; the photo. shows

only a high horizontal line for the first letter.) For ΕΥΤΙΛΑΣ see also GAI II, 534, with mention of the reading εὐτίλλας, referring to the ball of wool held by Ariadne ('you rolled it well') and a derivation from εὐτίλλω, referring as an epithet to the Minotaur as wellgroomed, which is preferred by Threatte. (10) Μινοταυρος, Buschor and CV. (11) i.e., Αριαδνε καλε(?). (11a) cf but the man has a name, Lykios. Clearly nonsense. (13) apparently not a known name; CV considers it nonsense. (14) so FR; CV and its photo. have Σο[λο]ν, retr. See also ARV(2) 1609. (15) I read συν: after Reichhold; Συδον, FR, text. CV: "der argbeschädigte" Συ[δ]ν, retr.

Notes from Rebillard: Ιδα^σος, retr. A dog's tail intervenes. Υδασος, Brunn. Lissarrague in A.-M. Christin, ed., Écritures ii (1985) 79 and fig. 4 (dr.) mentions Ιδαιος but rejects it. - Κινδ[ν]. So R. See 508 n. 4: Κι(μ)δον, Arias. [Λυ]κινος, Lissarrague, but no letter was written before the kappa and the name occurs on B for a companion of Theseus. Reichhold's dr. has a horizontal inscription above 'Kinon' and a sphinx, but today the photo. shows nothing and it may have been a modern inscription since removed. - Under the belly of the right sphinx, diagonally downward: :Σφιγς. No trace of punctuation at end; perhaps never written. - At right: :Σφ[-] downward, or [-]υς:, upward and retr. R. says the letters do not allow for a decision, but since he also says that the third dot while faint is certain, the first alternative must be right. - P. 511: 7 figures to left of Athena and 5 to right of Ariadne's nurse, a total of 6 men and 6 women, representing the 14 Athenian maidens and youths [but one is bearded!]. - Σιμδον. He is the only bearded member of the group, whence Bothmer has suggested that he is an indirect representation of Minos (the name an anagram); see BMMA 5 (1946-47) 224, not accepted by Beazley, Dev. 56. - R. discusses the Attic names of the Athenian youths and maidens. - Συ[.]ν, retr. R. does not restore, since a name Συων is unknown. Mon.: Σιρδον, retr. Brunn: ΙΝ[.]ν... (clearly wrong as the nu is retr. and Brunn reads as left to right). Arias: συ[ο]ν. Reichhold's dr.: ΣνΝ:. The photo. confirms this reading except for a gap in the middle [not shown in the dr.]. - B: above the outstretched hands of the nurse: καλε. Long discussion by R., 520-521: Arias: exclamation by the nurse; Guarducci, RG iii, 487: exclamation by the nurse: καλέ:, directed at Ariadne or for the spectator to apply to any woman he fancies. Scheller, MUsHelv 38 (1981) 222 also reads καλη. R. reads καλέ:(voc.) addressed by the nurse to Theseus. - Also part of the 'dialogue' and not meaningless are the ff. two inscriptions: between the ball of wool and Ariadne's face, along her outstretch arm, toward her: μφο. The first letter may be a tau, hence: τ'ές, perhaps τδ'ές. This is rejected by R. who suggests μ'ές, spoken by the Minotaur: μ<οι>ές 'lance<-la> moi' [I think referring to the wool.] R.

suggests also $\mu\epsilon\epsilon\varsigma$, 'let me be', spoken by the Minotaur, but prefers the first reading because the inscription is not near the mouth of the Minotaur. - Above Theseus' head, horizontal: ΕΥΤΙΛΑΣ: not nonsense because of its position. Guarducci, EG iii, 487 n. 1 combines ευτιλασ with μασ as a comment on the ball of wool but does not succeed in deciphering it. R. uses Hsch. s.v. εὔτε· ἤνικα, ὅτε· καὶ καλῶς, to suggest εὔτ' ἴλλας (ἴλλω is Perpillou's suggestion), 'tu l'as bien roulez', with a secondary meaning 'tu l'as bien acculé' referring to the Minotaur. - 'Le presque signifiant': all start with ευ-, are shouts of admiration or glorification. (Cf. already Ευανθε, Ευνικε, Ευτιλας). Meaningless, but the tone is set by the eu-: A: along the left front leg of the left sphinx: ευγοϚ, retr. R. reads the third letter as a gamma, although misshapen. Brun wrongly read EVTIV. The sigma also not certain. Reichhold's dr. is right. Unpronounceable, hence not a real shout. Above the tail of the sphinx, behind Empedo's shoulders, diagonally downward: ευσι, retr. Could be spoken exclamation or invented by the painter. Curving around Empedo's face: ευσυ. Mon. and Reichhold have γυσυ. B. Fellmann, CV .., p. 15 reads: υσυ. The first letter may be epsilon, pi or nu; only a vertical line remains by a break. To left of Eunike's face, but following the back of head of the receding figure whom it faces: ευτις. R. suggests it is a shortened form of ευτιλας. - 'Le non-signifiant': they represent the admiring comments of the bystanders (only one is near a sphinx). - GAI ii reports on Rebillard's interpretation (p. 522-24/47): ΕΥΤΙΛΑΣ = εὔτ' ἴλλας, 'you rolled it well', namely, Ariadne's ball of wool, but prefers an epithet of the Minotaur from εὔ + τίλλω. [τίλλω: to pluck, tear one's hair; ἴλλω = εἶλω, to roll up]. On p. 537 R. indicates that the word is spoken by Athena.

ho Πολ<λ>ι<δ>.

I.e.: Ευθυμιδες | εγραφσεν | ho Πολ<λ>ι<δ>. To lower left of Hector, not facing: ηεκτορ. Similar, but a little higher and facing: ηεκαβε, retr. B: Along the left-hand margin, facing it: ηος ουδέποτε Εύφρόνιος. To right of the left komast's forehead: Κομαρχος.(2) Between the central komast's legs: Ευ{ε}δεμος.(3) To left of the right komast's face: Τελες, retr.(4) To left of his leg: ελεοπι, retr.(5) Under the foot, Gr.: rho with extended vertical or a horizontal sign: see TGV 85/31A,4 as against Hackl 109.

D] Neumann: Teles could be Τελες or Τελλ<λ>ες, short for Aristoteles, Euteles, etc., cf. Bechtel, HPG 422f. [but why not for Telekles, etc.?). Eudemos (so also LGPN ii) is read E(γ)εδεμος, with gamma upside down [I doubt it, as the name is not in LGPN ii; but the first epsilon would look better upside down, so that two letters would be upside down ...]. Komarchos is here the only 'redender Name', although it relates to κώμη rather than to κῶμος. ελεοπι is read by N.: ἐγέου, not retr. He thinks the final iota may be a scratch. I believe N. thinks the pi is a miswritten upsilon. Robertson, *AVCA*: Komarchos might be a name, but is more likely a title; note the kantharos carried by him, which is often found in the hands of Dionysus or his followers, or of Heracles. Perhaps this is more than an ordinary revel. For the word order of the signature see 'Script', p. 65 n. 27. Gill and Vickers: "It has ... been recognized that the crucial inscription ... is part of a sympotic dialogue." They refer to other sympotic dialogues mentioned by Lissarrague, *Un flot d'images* (1987) 59-64, 80. Sara Morris seems to assent. A. Linfert, *Riv. di Archeologia* 1 (1977) 19f.: follows Neumann and restores (spoken by Teles, despite the separation of the words): ἐγέου{ι} ηος (= ὡς) ουδέποτε Εύφρόνιος. Engelmann connects: Komarchos + the statement: "(I am) leader of the komos such

as never before Euphronios". I.e. κόμαρχος is not a proper name. The next komast says: εὔ, ἔδε' μός.. "Gut! Jetzt (ist er aber) mein (der Kantharos)!". The inscriptions near the third komast may be read: τελέεις, ἐγέου, πῖ! "Du bist am Ziel (du hast es geschafft), fang an, trink!". Engelmann also gives another possible explanation. For πῖ, E. refers to M. Leumann, *MusHelv* 14 (1957) 77A.8. None of the komasts are named. All this is fanciful. Cf. also *M.B. Moore, *Attic Red-figured and White-ground Pottery (The Athenian Agora 30, 1997)* 86 n. 10: on Euthymides' signatures and on the name Pollias.

(1)the gamma an alpha according to FR. (2)PA 8954 (5 B.C.): a real name, but here also punning. For Κώμαρχος see also Deubner, *Attische Feste* (1932) 136, n. 4 and LGPN ii. (3)also read Ελεδεμος (FR), but see 'Script', p. 65 n. 28. (4)or Τελλᾶνης, see Pape. LGPN ii reads Τέλης. (5)see Beazley, *AJA* 40 (1936) 106, n. 8 (nonsense).

Lissarrague, *L'autre guerrier: archers, peltastes, cavaliers, dans l'imagerie attique* (1990) 49, fig. 18 (sketch); also 110.

B] A: arming similar to Munich 2307 (A) (above), but not mythological.

B: two young athletes and a bearded trainer.

C] A: to right of the left archer: Μαι[-4-]γ[.] vac. To right of his legs: χυχοοπι. To lower left of the arming youth, not facing: Θερυκιδόν.(1) To his lower right, vertically, non-stoich.:

Ευθυμιδες{εσ}.

I.e., Ευθυμιδες{εσ} |ε[γρα]φσεν| h[ο Πολᾶλι]δ. To left

of the right archer's face: Εὐθυβό[λος].(2) B: to lower right

of the left youth: Πενταθλ[ο]ς.(3) To right of the second

youth's middle: Φάυλλᾶλος.(4) To left of the trainer's face:

Ορσιμενες, retr.(5) On his lower left, non-stoich.

two-liner:

Ευθυμι(δ)εσ(6)

ho Πολᾶλιδ.

Both lines are retr.

D] See the comments on Munich 2307. Neumann reads χυχοοπι: χᾶλχασπις, citing Kretschmer, *Vas.* 185 for the omission of final sigma; he refers it not to the archer but to an

object. MAE is unexplained: a proper name or the beginning of spoken words beginning with μά? Thorykion and Euthybolos [-boulos?] are real names, here appropriate. Lissarrague notes the pertinence of the inscriptions: Thorykion puts on his corslet; the right archer is Euthybolos. The archer at left is called Chalchaspis by Neumann - and he holds a shield. But Neumann did not refer the word he read to the archer and his reading is fanciful. I believe the word to be nonsense.

(1)Cf. PA 7419-21. (2)see Pape. Perhaps punning on Εὐθύβουλος, which may occur in Attica: see Fifth Epigr. Congress, Acta (1971) 56/3. (3)see Pape, but here also punning; not in PA, but listed (here only) in LGPN ii. (4)see CB ii. (5)PA 11,492 (4 B.C.); see also LGPN ii. (6)the delta is D-shaped.

- B] A-B: Theseus abducting Helen (or Korone).
- C] A: between Perithoos' legs: ηερεις.(1) To right of his head: Περιθους.(2) To lower right of a girl trying to come to the rescue: ηελενε.(3) To left of Theseus' head: Θεσε(υ)ς, retr. To lower right of the captured girl: (K)(ο)ρονε. - D] Giuliani follows Furtwängler's interpretation. He considers the vase a joke on the many loves of Theseus; I argue for a mock inscription, perhaps inspired by εἶδον. Robertson 30 discusses the inscriptions; he thinks Korone is a mistake; Antiopeia is not the Amazon queen; Euthymides doesn't care; he also uses writing w/o meaning ...

(1)Furtwängler considers this a masculine name, probably a love name, although there is no room for καλος. Beazley does not list it. Further, 'Script' 65. (2)Cf. ARV(2) 328/115, where Beazley notes, (wrongly) a propos of a possible reading [B]ουκολος on Eleusis 607, CAVI 3427, the use of ou for õ. Cf. also GAI i, 240/4. (3)Not retr. Beazley follows Buschor in FR iii in assuming that the names of Helen and Korone have been

interchanged; he is followed by Brommer. Differently, FR i, 177: Furtw. thought it was a joke and is followed by K. Schefold, *Götter- und Heldensagen* 157 and by A. Linfert, RA 1 (1977) 22. (4)χαίρει is followed by a cross-shaped sign that looks like a tau. Furtwängler suggests a chi, for γει. (5)an Amazon loved by Theseus. (6)εἶδον· θέλωμεν (θέλωμεν), Furtwängler. Probably nonsense. - D] = Jahn 343. Coarse lettering.

(1)that should be Pelias except for the absence of the beard. Beazley says: A: Pelias and his daughters. [Some think the figure to the right of the cauldron is Medea.] Simon in Gymnasium 61 (1954) 207 and n. 26 identifies the male at left as Jason. (2)Beazley: B: Pelias seated, and his daughters.

Body: athletes: discobolus; runner; a bearded man all wrapped up (Lullies: trainer); a bearded man (Lullies: judge), putting a taenia on a youth already decked out and holding branches (the victor).
- C] Shoulder: done from the photo.: nonsense: χε[.]οπει. ε[1-2]ι. χοπελι, retr. In the opposite direction: χοπευκ, retr. L. does not describe the inscriptions, but he mentions them for both the shoulder and the body pictures; the photos in CV show: shoulder: a letter under the bellies of the chariot horses and the right trace horse. Body: to right of the victor's body, vertically down, nonsense: οπειλις.(2) Under the foot, Gr.: ligature AR.
- D] The vase, and its inscriptions, are similar to the RF cup Naples Stg. 5, CAVI 5488, of the same Group, ARV(2) 32/4. For the nonsense inscriptions of the Pezzino Group see 'Script' 71 n. 35 and my paper on 'The Lettering of Euphronios' in *Euphronios und seine Zeit* (colloqu. 1991; 1992).

- B] Shoulder: symposium of two reclining hetaerae playing kottabos. Body: music lesson.
- C] Shoulder: on the far left: καλῶι.(1) To right of the left hetaera's open mouth: (ο)οι(2) τῆν(δ)ι. On the far right:

Εὐθυμί(δ)ῆι. I.e.: σοὶ τηνδί, Εὐθυμίδη καλῶ, sc. λατάσσω.

Body: on the far left, facing the margin: ναίζον.(3) To right of a bearded onlooker: [Δ]εμετριος(ς). To right of a seated youth (pupil, not a boy) with his lyre, the first four letters retr. and not facing: Εὐθυμιδες, for Εὐθυμιδες. In front of a standing boy, the first three letters and the lambda retr. and not facing: Τλεμπο(λ)εμος.(4) Behind the bearded teacher (who also plays the lyre): Σμικυθος.(5) Under the foot, Gr.: XV : ΙΛ : and ΛΗ. Also Etruscan ME, retr.(6)

- D] Lullies' readings: ναί, ζῶν, 'wie er leibt und lebt'. καλῶ σοὶ τῆνδὶ Εὐθυμίδῆι, sc. λατάσσω, 'Dir, dem schönen Euthymides, schleudere ich diese Neige'. The first four letters of Εὐ(.)θυμιδες are upside down in the facs.; the third letter is in a break and shows only a corner, but Lullies transcribes: Εὐθυμιδες. In Τλεμπολεμος the first two letters and the lambda are upside down. [Δ]εμετριος. Lullies, p. 18, discusses Smikythos: he is here the teacher, not a kalos. Cf. also the New York psykter by Oltos (CAVI 5591) and the Euthymides kalpis in Bonn (CAVI 2679): in all these the name is near a musician and Lullies thinks Smikythos may have been a famous musician at the time. [But these are not the only occurrences.] Apparently all sigmas are reversed except in the kottabos inscription where the sigma is unclear.

(1)the καλῶι(dat.) is read καλοί by Furtwängler and is not by him (nor by Beazley in ARV(2)) connected with the rest of the inscription, but Houser in FR ii, 336 reads the dative. (2)the sigma is quite unclear, but apparently not a tau; Beazley also reads σοι. (3)ναί, ζῶν, Furtwängler, equivalent of καλός; but it is written near a bearded man. Klein read Σοζιας(for Σοοιας), but this was met with Hartwig's disapproval. Perhaps nonsense. (4)Parallels: see ARV(2) 1611 and 1699. (5)see ARV(2) 1608. (6)See TGV 152/2F,34 and Hackl 421; facs. publications. Some seem to make sense.

(1)Cf. Hackl 557 and 422; FR ii, 70, fig. 32 (facs.). Similar to Munich 2421, above. The beta sign is by a different hand. CV, text, says: to right of the right bearded komast's back: read νονοι, not ονοι as Jahn. Under the foot, Grr.: XV:|H:. Ligature ΛΗ (twice). In the center: Β with two horizontal lines at right. Similar for the third Amazon: ηυφο(π)υλε.(3) Along the right-hand margin: ηυφοιςεγραφοεν.(4) Under the foot: Gr.: ΛΗΚV. ΛΗ.ΜΕ, retr. (Etruscan).(5)
- D] Badly written, with odd shapes especially of pi, tau, phi and chi. ληκυ<θος-οι>.

(1)'Korrekturvorschlag von Νεδιος in Πεδιευς' (CV). (2)My suggestion from Reichhold's dr. This could be Πεδιός, gen. of Πεδιεύς (see ARV(2) 1605 and 'Script' 71.). Formerly read νεδιος or ηεριας (Furtwängler), the last thought possible by Beazley (ARV(2) 1583: ηερια<), who also thought of ηερ<μ>ιας. Cf. also GAI i, 145 (the Attic form was Ηρεας [but LGPNii lists Ηρίας from a fifth-century inscription from Thorikos]). Hence Ηρίας (perhaps in the form ηεριας) should perhaps be accepted here, a variant of Ηρέας. (3)perhaps for ηυφ<σ>οπυλε, itself misspelled for ηυφοιπυλε. (4)Furtwängler points out that Hypsis is a man's name, not a woman's, as had been thought; he thought it short for Ύψίας. The second word 'set off'. (5)TGV 153/2F,55. Facs. in FR ii.

(1)so Beazley following Watzinger in Gr. Vasen Tübingen 487. C. Robert, *Heldensage i*, 247 had suggested Heracles. - B] White ground with patterns in BG on the shoulder.
C] Among the palmettes that form the lowest band:
καλὸς Νικόλας. (1) Δορόθεος καλός. κάμοι δοκεῖ ναί.
χᾶτερος παῖς καλός, Μέμνων. κάμοι καλὸς φίλος.
D] The date given to the vase is based on the names (Beazley): the period of the kaloi Memnon and Dorotheos. Beazley interprets the inscription as a conversation. He starts correctly after the third palmette to right of the handle, where there is a bird in BG silhouette. [I wonder whether it could be a Nike.] The isle between the last two palmettes to left of the handle and the two on either side of that handle are blank and the inscription skips to fill the two isles to left of the one with the bird. This interrupts the last phrase: κάμοι-καλὸς φίλος. The letter forms are variable in this long text, but the writing is fairly fluent. - For χᾶτερος see GAI ii, 346.

(1)Threatte, GAI ii, 50, thinks the omission of final sigma is accidental, which I find hardly credible despite the parallels listed by him. Cf. also *ibid.* 778.

'Script' 697.

- B] A woman with an oinochoe at an altar.
- C] On the altar base: *καλος*.
- D] In 'Pan-Maler', Beazley wrongly gives *καλε*; but given correctly in JHS. The inscription could only refer to the altar, not the woman; but it is probably in reference to some youth, as such inscriptions were often found on public objects.

- B] Int.: satyr. A: Heracles and Alcyoneus. B: the Struggle for the Tripod.
- C] A: on Heracles' left, the first four letters horizontal and retr. (except for the rho), the last letters down: $\eta(\rho)\alpha\kappa\lambda\epsilon\varsigma$. To left of Alcyoneus: Αλκυονευς , retr. Below and parallel: $\text{Φιλτίαςεγ}(\rho)\alpha\phi\sigma\epsilon\nu$, retr. On Hermes' left: $\eta(\rho)\mu\epsilon\varsigma$, retr. On his right, near one handle, in large letters and two words, the second word down: $\Delta\epsilon\iota\nu[\iota\alpha]\delta\epsilon\varsigma[\epsilon]\pi\omega\iota\epsilon\sigma\epsilon\nu$. B: On Heracles' left, in large letters: $\eta\epsilon\rho\alpha\kappa\lambda\epsilon\epsilon\varsigma$, retr. To right of Apollo's back: Απολλῶν .
- D] Nearly all inscriptions have letters of different sizes. Note the peculiar rho's. The vase is earlier than the Pioneer vases and the writing is larger and less hasty, though not neat. - Threatte, *GAI* ii, 184, in his discussion of $-\kappa\lambda\epsilon\eta\varsigma$, notes the two spellings of 'Herakles' on the same vase.

- B] Int.: a young cup bearer at a column krater, about to decant wine into a cup. A: three seated youths (two on blocks, one on a stool): that at left stretches out his hands and holds a short stick (so Pöhlmann; I cannot see it); the central youth holds his staff; the youth at right looks into opened tablets. - C] Int.:starting above the krater, along the margin: ho παις καλος. A: ho παις καλος, ναιχι. B: ho παις καλος, ναιχι.(2)
- D] Compare Munich 2608, below. Pöhlmann interprets A as a singing lesson: the left youth holds the stick that was used to appoint singers at symposia (see WJbb 18 n. 77): he is having his turn; that at right is checking his song in the tablets (he will be next). The scene is an outdoor lesson. Pöhlmann thinks this the earliest school scene.

- B] Int.: satyr pouring from a wineskin into a large krater (smelling the wine). A: Peleus and Thetis. B: komos (three couples of a boy and a man, plus a single figure).
- C] Int.: to right of the satyr's face, in two curved lines: Σιλανος Τερπῶν. ἡἔδῦς ἠοῖνος.(1) Under his feet: Επελειος, and to left of his back: καλος, retr. A: Nereids, by heads: (Γ)αλυκ(ῶ), for Γλαυκῶ.(2) Χορῶ. Θετις, retr. Πελευς. Ερατῶ. Ἰρῖσια, retr.(3) Κυματοθ(α)ι.(4) B: by the heads of several figures (spread out): [Δ]φ[ρ]οθεος|[κα]λος|ναι(χ)ι. - D] Beazley says that the name is no doubt Ἐπίλεως [for Ἐπίλαος] but it is nearly always spelled Επελειος. Cf. GAI i, 137-41 (e for i) and 147-59, esp. 154-55 (ei for e before vowels). The form here should be Επελειος. Τερπῶν: also known as a human name; as a satyr name it occurs also on London E 65, CAVI 4473; Tarquinia RC 6848, CAVI 7648, and Louvre G 34, CAVI 6409. Many letters are miswritten, some smeared or disjointed.

(1)[the satyr's] name is Τέρπων; he says that the wine is sweet (Buschor). (2)Kretschmer 202 and CIG read Καλύκα "Knospe", which should be emended to Καλυκῶ, because the last letter is a triangular omicron. This might be preferable to Buschor's Γλαυκῶ. (3)see Kretschmer 202. (4)see Kretschmer 201. Buschor corrects into Κυματοθοα, but it should be -θοε. (5)the omicron is omitted in Reichhold's dr. (6)for the sp. see GAI i, 191/3. (7)uncertain reading: κ(α)π(ο)(.), Reichhold, alpha near S 2 (chart in 'Script'), lambda = pi, Omicron = delta, sigma a blob. (7)uncertain reading: κ(α)π(ο)(.), Reichhold, alpha near delta, lambda = pi, Omicron = delta, sigma a blob.

- D] A handle used in antiquity to mend a cup by Douris. Pi with the third bar 'pinched in.' The rho not tailed. Three-stroke sigma.

(1)Kunisch gives no date (see p. 37). (2)ARV(2) has *ιερὸν*, but that may be an error, since Beazley under 482/39 wrongly refers to no. 40. The picture in FR shows enough space to allow for at least part of the heta, and I wonder if it was ever written. The photo. in K. shows no trace of the heta, but it is possible that it is hidden in repainting made when the handle was attached to the Douris cup. K.'s sketch on p. 209 has *ιερὸν*. The letters are larger and neater than usual and I wonder if the signature is genuine. It may be a modern copy.

To left of Apollo's legs, downward, a stoich. two-liner: $\eta\omicron\pi\alpha[\iota\varsigma]\kappa\alpha\lambda[\omicron\varsigma]$. Under the foot, Etruscan Gr., including the word FUFLUNS.(1)

D] I have no information on inscriptions on the exterior. Arias-Hirmer, pl. 171 shows the inscription above Tityos well. The two final sigmas are NOT three-stroke sigmas sideways, but have the shape of M, not low, and could be four-stroke sigmas turned 90 degrees (so as to look upside down).

But I rather think they are sideways sigmas miswritten as mu's.

See also the comments in ARV(2) 1619. For the proper names see D. Ohly in Mü. Jahrb. 22. Robertson, p. 26, says the pictures on the Smikros krater in Brussels (CAVI 2893) are 'reduced and simplified versions' of those on the Munich krater; on p. 29 he suggests that Syko, the old hetaera, was a real person. For a parallel to the name, see LSAG(2) 276/14, from Akrai in Sicily.

- B] Lip: A: a stag facing a panther. B: fragmentary: a panther facing a stag (not so well centered).
- C] Handle zone: nonsense: A: in large letters, well centered under the figures, between handle palmettes: ε(ν)λεπλυ(ν)(ο)γυ(.)χτ. B: not well centered: shifted to left and extending beyond the stag's rear: ε(.)ν(.)τχ(ν)ο(τ)(.)ο(.)ιυγλοχ.
- D] The frs. put together by Fellmann. Nonsense with some imitation letters; the writing is large. F. attributes the frs. to the same hand as London Market (Sotheby), cat. 21/5/84, no. 375.

- A] Frs. of BF(?) lip cup. Unattributed. Kokylion potter. Third quarter sixth. 560-550 (CV). *Fellmann, CV, Germany 56, pl. 4,1-3, Beilage 1,6. ABV 187/5 (one fr.)?
- B] Plain so far as preserved.
- C] Handle zone: A: Κοκυλιῶν [: με]ποιεσε[ν]. B: [Κοκυλ]ιῶν : μ[εποιεσεν]. (1)
- D] Frs. a-c. The one fr. listed by Beazley is probably from this vase, although he gives no number. Fellmann refers to an Aetolian town Κοκύλιον, but the name could be Κοκκ<κ>υλιῶν or Κῶκυλιῶν (= Κωκυλίων) (the latter is LGPN's

reading). Good squarish letters widely spaced: early.

(1)only the lower dot of the two-point punctuation is preserved.

- A] Frs. of BF lip cup. Unattributed. Third quarter sixth. 560-500 (Fellmann). *Fellmann, CV, Germany 56, pl. 5,1-7 (no bibl.). GAI ii, 457.
- B] Int.: siren; tongue border. Ext.: the lip is not preserved.
- C] Handle zone: A: χαίρε και πιει vac. B: to right of the left handle palmette: χαίρε και πιει> υ. 1.(1)
- D] The frs. are burned and the inscription on B is faint (though clear in the photo.). For the border on the Int. see Munich 9412, below, and 2171, CAVI 5235. The writing is strong and well spaced: early style. The rho is triangular, on which Feldmann has a discussion, saying it is rare in Attica, but Megarian; it is open at the bottom, the middle point' is high.

(1)Threatte in GAI ii oddly reads χαίρε και πιει> or πι(ει), with reference to CV, Germany 56, textband, p. 20 ('epsilon und iota sind am Ende weggelassen').

- A] Frs. of BF lip cup. Unattributed. Third quarter sixth. 560-550 (Fellmann). *Fellmann, CV, Germany 56, l. 6,1-7, Beilage 2,1. *Beazley AJA 45 (1941) 597/5, fig. 3.(1) K. Vierneisel and B. Kaeser, eds., Kunst der Schale (1990) 28, 129, figs. 2.6 and 17.12. Beazley Archive db, no. 31,936.
- B] Int.: surrounded by an ivy-leaf border: part of a young horseman. Lip: A: a cock. B: similar.
- C] Handle zone: A: [Σδ]ταiros καλος. B: Σδταiros : κ[αλος].
- D] Σώταiros occurs in Athens in the fourth century BC: see LGPN ii. Beazley in publishing the three lost frs., was not aware of the fr. CV, pl. 6,5, which shows an initial sigma; he therefore restored:
[h]όταiros : κ[άλλ]ιστος or καλός, ναί]. Sotairos is known in the fifth century from Corinth and Selinus: LSAG 98/10, 271, 277/32. Fellmann rejects Beazley's καλος, ναί, as the spacing is satisfactory without it. Clear and well-spaced, but rather small, writing.

(1)three frs., now lost.

- A] Frs. of plain lip cup. Tleson Painter. Tleson potter. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 9,1-4, Beilage 2,5 (no bibl.).
- B] About 1/2 of the Ext. is preserved: no figured decoration.

- C] Handle zone: A: Τλεσὸν ἠο [Νεαρ]χῶ ἐποίησεν.
 D] The inscription is shifted somewhat to the right, the last three letters closer together. Letter forms and handle palmettes conform to other Tleson cups (Fellmann). Hence the attribution. "Sigmata in asymmetrischer Schreibweise mit rechtsgerichteter unterster hasta" (Fellmann). This is typical of some Tleson signatures.

Munich 9414.

- A] Frs. of BF lip cup. Tleson Painter. (1) Third quarter sixth. *Fellmann, CV, Germany 56, pl. 10,1-5, Beilage 2,7. *Beazley, Proc. Brit. Acad. 33 (1947) 197/8 (not ill.). ABV 180/37 (part(2))?
 B] Lip: A: a siren to right. B: similar.
 C] Handle zone: A: χαίρε [καί π]ιειεῦ. B: [χαίρε καί] πειεῦ.
 D] One of a group of cups by this painter with only drinking inscriptions: see Bothmer, AJA 66 (1962) 257 and n. 39; Para. 76; text to CV, pl. 12,1 (Munich 2132, CAVI 5215).

(1)unsigned; attributed by the shape of the siren. (2)In 'Proc.' Beazley lists two frs. with siren and the inscription: [χαίρε καί πειεῦ]; the latter probably from B when the letters [-]ρεκ[-] were still extant (Fellmann)?

Munich 9415.

- A] Frs. BF lip cup. Tleson Painter (Fellmann). Tleson potter. Third quarter sixth. *Fellmann, CV, Germany 56, pls. 10,6-9 and 11,6, Beilage 3,1. ABV 187/2.(1) K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), fig. 13.4 (A, part).
 B] Lip: A: cock. B: feathers remain of a cock.
 C] Handle zone: A: Τλεσὸν ἠο Ν[εαρ]χῶ ἐποίησεν». (2) B: [Τλεσὸν ἠ]ο Ν[εαρ]χῶ ἐποίησεν.
 D] Fellmann, pp. 26-27, gives parallels for the mixture of symmetrical and asymmetrical sigmas, which he uses for dating the series of vases by the Tleson Painter with cocks. - The letters are small and the ductus may not recall the Tleson Painter.

(1)one fr. from A with ἐποίησ, complete aft; no attribution.
 (2)the signature is pushed a bit to the right, whence there is a lack of space to finish the last word (the last three letters are closer together).

5377.

- A] Frs. of lip cup. Unattributed (Beazley). Tleson Painter (Fellmann). Third quarter sixth. *Fellmann, CV, Germany 56, pl. 13,1-3. Para. 75 (mention, under Geneva Market [Koutoulakis]). Bothmer, AJA 66 (1962) 257/29 bis.
 B] Only the handle palmettes are preserved.
 C] Handle zone: A: συχαίρε καί [πειεῦ τοί]. (1)

D] Frs. a-c. Fellmann's attribution is based on the handle palmettes. He also gives parallels for $\sigma\chi\alpha\rho\epsilon$: Oxford 1966.942 (Bea. Gifts 49/147)[?]; Basel Market (M.M.), Auktion 60 (1982), no. 18, CAVI 2108a. For $\chi\alpha\rho\epsilon\sigma\upsilon$, Fellmann cites: Munich 2134 (CV, pl. 31,1,3-4, CAVI 5217); Tübingen S./10 1222 (CV, pl. 27,5-7, CAVI 7754); Berlin F 1771 (Furtw., Beschr., CAVI 2234). This is probably the vase mentioned by Beazley, CR 57 (1943) 102; he compares Berlin 1769, CAVI 2232.

(1)restored by Fellmann after the parallels in Para. 75: Geneva Market (Koutoulakis), CAVI 3799; Berlin 1769, CAVI 2232; frs. of two cups in Florence which have ... $\epsilon\upsilon\tau\omicron\iota$ and ... $\tau\omicron\iota$ respectively (CAVI 3512-13).

- A] Frs. of plain(?) lip cup. Tleson Painter? Tleson potter. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 13,4-7, Beilage 3,5. Beazley Archive db, no. 44,237.
- B] No figured decoration preserved; parts of palmettes.
- C] A: handle zone: [T]λεσδν ho Neapρχδ [εποισεν].
- D] Tiny letters, ca. 1 mm. high. Fellmann compares the palmettes to those of the Tleson Painter, but does not attribute the cup outright, since he thinks the handwriting has no parallel. In fact, the writing does not seem to be that of the Tleson Painter.

- A] BF lip cup. Unattributed. Hermogenes potter. Third quarter sixth. *CV, Germany 56, pl. 17,6-7 and 18,1-4, Beilage 5,2 (no bibl.). Beazley Archive db, no. 44,238.
- B] Lip: A and B: an ivy wreath similar to Munich 2155, CAVI 5228, but the leaves are more delicate [i.e., not by same hand.] Dot rosettes between alternately black and red leaves.
- C] Handle zone: A: (h)ε[ρμoγ]ενες εποισεν εμε. B: ηερμο[γενες εποισεν εμε].
- D] Add this cup as no. 5 to Beazley's list of ivy cups in ABV 165f., Para. 68. London B 413, CAVI 4312, and Leipzig T 434, CAVI 4143, are closer to it than is Munich 2155. London B 413 has the same mu as Munich 9418, which differs from the mu of Munich 2155. Rho with the typical extended vertical.

- A] Frs. of BF lip cup. Painter of Vatican 61 (Fellmann). Third quarter sixth. *Fellmann, CV, Germany 56, pl. 20,2-7, Beilage 5,6 (no bibl.). K. Vierneisel and B. Kaeser, eds., Kunst der Schale: Kultur des Trinkens (1990), pl. 12,5 (detail of A).
- B] Lip: A: head of a panther between facing swans. B: probably similar: part of the left swan and tail of the right one are preserved.
- C] Handle zone: A: shifted somewhat to the right: $\chi\alpha\rho\epsilon\kappa[\alpha\iota\pi\iota\epsilon\iota]\tau\epsilon\nu\delta\epsilon$. B: centered: $\chi\alpha\rho[\epsilon\kappa\alpha\iota\pi\iota\epsilon\iota]\tau\epsilon\nu\delta\epsilon$.

D] Backhand; large letters (early?). Fellmann compares Vatican G 61, Beazley and F. Magi, *La Raccolta ... Guglielmi* (1939), pl. 21 (the inscription misprinted), Para. 77/2, CAVI 7025, q.v. Further by the same hand: Brussels R 386, CV, Brussels 1, III H e, pl. 2,4,a-b, Para. 77/3, CAVI 2953 (the inscriptions the same and complete).

- A] 2 frs. of BF lip cup. From Vulci. Unattributed. Third quarter sixth. *CV, Germany 56, pl. 24,1-4, Beilage 6,6. CIG 4.7791. Gerhard, *AdI* 3 (1831) 186/767. Klein, L. 51. *Beazley, *AJA* 45 (1941) 596/4, fig. 2. ABV 664/Andrias 1 and 673/Pyrrhos or Pyrrhias. K. Vierneisel and B. Kaeser, eds., *Kunst der Schale: Kultur des Trinkens* (1990), fig. 21.3 (A. detail).
- B] A: siren with outspread wings (the fr. is lost). B: similar.
- C] Handle zone: A: well centered: Ανδρίας καλ<λ>ιστος. B: Πυρρ<ρ>[-, i.e., Πυρρ<ρ>[s] with [εποιεσεν], [εγραφεσεν] or [καλ<λ>ιστος] following.(1)
- D] Andrias is also found on Vatican, Astarita, ABV 664/2, CAVI 7019. Beazley assumed the inscription to be by the same hand. The form of the name is discussed in CV. Gerhard and Klein speak of a cup with the Andrias inscription as being without figures; it must be this cup. The fr. with siren and the Pyr[--] inscription appeared at the beginning of the World War II but has since been lost again; it is illustrated in *AJA*. New frs. have recently been added.

(1)so CV; Beazley had read Πυρρ(.)[-]: in ABV, Beazley says that the letter after rho on A is either alpha or omicron and the restoration should be Πυρρ<ρ>ος or Πυρρ<ρ>ιας. In *AJA* he also says that London B 400, CAVI 4301 [Γλαυκυτες εποιεσεν, ηπ<π>οκριτος καλ<λ>ιστος] favors the verb [meaning εποιεσεν?]. Judging by the photo. in *AJA*, Πυρρ<ρ>ι[ας εποιεσεν] seemed to me the most likely before I saw CV, from which the above readings are now taken. Beazley in ABV 664 is unclear.

- A] Frs. of BF lip cup. Unattributed. Third quarter sixth. *Fellmann, CV, Germany 56, pl. 25,6-10, Beilage 7,2 (no bibl.). K. Vierneisel and B. Kaeser, eds., *Kunst der Schale: Kultur des Trinkens* (1990), fig. 10.16 (part of A).
- B] Lip: A: an animal made up of lion, male goat and bull. B: similar.
- C] Handle zone: nonsense: A: ενιυεπιυπιυπιυ[--]. B: [-]υ[.]υχνιυιυιυι.
- D] Fellmann compares Heidelberg S 35, CV 4, pl. 154,6, CAVI 3983, fr. of a BF lip cup with a bull on the lip and an inscription with the ωπ pattern. Is coincidence excluded? [I think so].

- A] Frs. of plain band cup. Unattributed. [--]n potter. Third quarter sixth. Ca. 550 (Fellmann). *Fellmann, CV, Germany 57,

- pl. 2,1-6, Beilage 1,3 (no bibl.).
- B] Handle zone: A and B: plain.
- C] Handle zone: A: [...]ν [ε]ποιε[σεν]. B: [...ν] εποι[εσεν].
- D] Squat letters with thick verticals. I give the inscriptions after Fellmann's text (except for adding the dot under the epsilon on A); he calculates that the space on B allows for a name of no more than five letters and suggests Χιρῶν. However, the Vatican cup with Chiron's signature (ABV 161, CAVI 6970) is lost and has apparently not been illustrated. Yet the photos. in the Munich CV suggest that there was a vacat between the name and the verb, whence Fellmann's calculations about the length of the name are probably correct: [-4-]ν.

5384.

Munich 9435.

- A] Frs. of BF band cup. Hermogenes Chariot Painter (Fellmann). Hermogenes potter. Third quarter sixth. *Fellmann, CV, Germany 57, pls. 9,6 and 10,1-5, Beilage 2,3 (no bibl.).
- B] Handle zone: A: a chariot with its charioteer; behind, a warrior (fragmentary). B: similar: the heads of horses remain.
- C] Handle zone: A: to left and right of the scene: [ἡερμ]ογ[ε]ν[ε]ς and εποιε[σεν] εμε. B: to left of the scene: ἡερμογ[ενε]ς]. The remainder of the inscription is lost.
- D] The lettering is exactly like that on Munich 2232, CAVI 5246, which see also for the attribution. Is the fr. reported in ABV 166 with the letters ἡερμογ[-] part of this vase?

Grünhagen, Antike Originalarbeiten der Kunstsammlungen des Instituts (Archäologisches Institut der Universität Erlangen, 1948) 7 and 43, no. I 850 (Erlangen frs.).
- B] Int.: Dionysus with a satyr and a maenad. Handle zone: A: in the center, departure of a warrior in a chariot; at left, a draped figure and a warrior; dog; at right, only the warrior is left. B: probably similar.
- C] Handle zone: A and B: nonsense: rows of dots or blobs related to some of the figures: A: pl. 22,2 shows one row, diagonally downward from the horse's crotch, and another, similar, below the neck. At left, the photo. shows a long downward row of dots to right of the left-hand warrior. B: pl. 22,6 shows a longish row in the same position as the second inscription on A. Pl. 22,7 shows another row behind a rider's back.
- D] + five frs. in Erlangen. A large ('parade') cup.

Vierneisel and B. Kaeser, eds., *Kunst der Schale: Kultur des Trinkens* (1990), fig. 12.34 (part of A).

- B] Handle zone: A: in the center, two panthers attacking an animal; at left, a human or satyr running; a group of two animals fighting; a portion of the scene is missing at right. B: (frs. of the right portion only:) a lion attacking a stag; the right handle palmette; at left, a satyr running.
- C] Handle zone: nonsense with imitation letters: A: the main remains are horizontal inscriptions above the scenes; remains of one downward inscription by the left handle zone; one letter near the bottom by the 'human'. B: similar: two letters are preserved above the lion; near the satyr, ends of two downward inscriptions; under the lion, starting from his crotch, diagonally downward: (ρ)(.)κ(λ)ϕ(.). Under the stag, in a similar position: ρογγ.
- D] Fairly large writing.

- A] BF psykter. From Tarentum. Unattributed. Last quarter sixth. 510-500? *J. Sieveking, Bronzen, Terracotten, Vasen der

Kaeser, eds., *Kunst der Schale: Kultur des Trinkens* (1990), figs. 36.2 (small) and 45.1 (detail with vomiting symposiast).

- B] Symposium: four men (one bearded) on four couches (one, a youth, vomits); a nude male musician at the left end of each couch.
- C] Nonsense: above the leftmost flautist, wavy: $\text{ho}\pi\nu\nu\nu\nu$.(1) Behind him: $\gamma\iota(\gamma)$.(2) In front: $\nu\epsilon\phi\gamma$.(3) Behind (to right of) the first man on a couch: four letters. Above the second symposiast and extending to the right of the second flautist, in a curve, to be read upside down(?): $\nu(\delta)\theta\nu\epsilon\delta\phi\nu$.(4) Behind the third musician (lyre player): $\nu\epsilon$ vac. $\nu\epsilon\delta$. To right of him(?) and above the third symposiast, an inscription beginning: $\nu\omicron$... , retr. To right of the fourth player: four letters. To left of the face of the fourth symposiast: two letters.
- D] The inscriptions recall the Leagros Group.

(1)an uncertain reading; the inscription extends to, or starts from, the mouth of a singing symposiast. (2)uncertain reading from a photo. (3)the digamma is uncertain. (4)the first delta is upside down. This shows in V.&K., fig. 45.1: the nu's may be sigmas. The theta is clear.

They may be puns on contemporaries. 1623, under Naples [Vatican], Astarita 280, CAVI 7039, gives parallels for the occurrence of Φλεβ- names on vases.

(1)Fränkel takes Stysippos to be one of the satyrs; Beazley combines it with one kalos. The last nu, as printed by Beazley, might be a sideways sigma: κάλο(ς). - D] = 3235. Theano, wife of Antenor and priestess of Athena, surrendered the Palladion to the Greeks. This restoration was suggested by E. Braun, *Annali* 1836, 298. But on S Italian vases Theano is fleeing in terror. Most prefer Helen, as suggested by F.G. Welcker, *Die griechischen Tragödien mit Rücksicht auf den epischen Cyclus* (Bonn 1839) i, 148. Helen helped Diomedes plot the capture of Troy and may have discussed the Palladion with him (Moret 74 n. 3). But Burn points out that the woman is not helping the Greeks but holding them back; she agrees with Welcker that Helen is arbitrating a quarrel of the heroes. LIMC iii, 359 (dr.) Deianeira II 2, Dexamenos II 1. *S.B. Matheson, *Polygnotos and Vase Painting in Classical Athens* (1995) 217-19 and nn. 18-20, 446/PGU5, pl. 164.
- B] A: Heracles and the centaur Eurytion. B: women fleeing to an old man.
- C] A: the centaur: Δεξαμενος, retr.(1) Δαιανειρα, retr. [sic]. Οινευς. B: the old man: Πυλαδες.(2)
- D] = 3089. The same subject on London 1898.7-16.5, not inscribed. Matheson: Beazley and others declared the inscriptions to be mistaken and the scene to be of Heracles and Eurytion, with the daughter of king Dexamenos. Vollkommer however accepts the inscriptions, citing parallels for the name Dexamenos and for Oineus as the father of Deianeira. [But there is a good deal of confusion in the sources about the names in the Eurytion story.]

(1)written in confusion for Eurytion (Beazley). (2)all inscriptions from Matheson's cat.

- B] A: a woman, with a lyre in the left hand, juggles a stick

the woman on B who is waiting.]
- C] A: at the top of the scene, widely spaced: [Z]εῦ σῶτερ.
- D] = RC 117. L.-H. points out that the letters ΕΥΣΩΤΕΡ cover
the whole scene horizontally and reads: 'Gut, Retter',
which I think is wrong. There is room for a zeta at left
but I do not know if it was ever written. Perhaps
<Z>εῦ Σῶτερ? For Ζεὺς Σωτήρ, see LSJ, s.v. σωτήρ. The words
are thought of as spoken by the woman, although they are
not written from her mouth. The inscription is in applied
white. Ionic alphabet. D-shaped rho.

 D] = RC 187. = R.C. 26? For Myrte (see below) cf. the phormiskos Ceramicus 691, CAVI 1748, 'Script' 436. CV 35 has much discussion of fountain scenes. The letters are thick and squat.

Αριστομα[χη]. Μονιχος. Κρεοσα. Φυλακος.
Αστνοχος.Ωκυα[λη]. Τειθρας.(1)
D] = RC 239. I have not seen pictures of the inscriptions. For the names of the Amazons, see Bothmer. For the names of the Greeks (mostly tribal heroes), see 'Script'. Teithras is the eponymous hero of the deme Teithras. Gabrici and others read Αντιανε[ιρα] for the leader of the Amazons, but L.-H. on p. 198 suggests Antiope, without realizing that the last letter should be an eta, not an epsilon. For Phylakos see L.-H. 28 and nn. 359-60 as well as Kron. Boardman discusses the relation to the Shield of the Parthenos (or lack thereof). All figures are named.

(1)these readings are from Bothmer. The ff. readings in L.-H., *Eretria-Maler*, differ: Λαοδοκη. Κ[ρεοσ]α [sic]. [Φ]υλ[α]κος. Αντι[.]ε[-]? (See above). Α[στν]οχος. Αριστομα[χη]. [Τ]ειθρας.-Threatte in GAI ii thinks the form Λαοδικη is probably due to epic influence.

- B] A: fishermen and a nereid: at left, a nereid seated on a rock; two fishermen in a rowboat, one putting out the anchor; a heron(?) flying before the storm. B: three youths.
- C] A: the nereid: Ποντια.(2) The left fisherman (the one with the anchor): Ἄλιμος.(3) The right fisherman (who is rowing): Κόμαρις.(4)
- D] Beazley: workmen are usually nameless; the scene is probably connected with the unknown founder of the deme Halimous. Welcker, not knowing the inscriptions had interpreted the scene as Odysseus Akanthoplex. Beazley's conclusions were reached independently by Gercke and Peterson. Mixed alphabet. Ionic lambda. Three-stroke sigma.

(1)"The short figures recall some of the bell-kraters of the Polygnotan Group," Beazley. (2)personification: pontos is the open sea [Beazley oddly speaks of the sea-shore]. Epiklesis of Thetis and Nereids; cf. Louvre E 869, CAVI 6273: Ποντια(α). (3)thename is not found elsewhere: 'belonging to the sea': a personification. (4)Stephani read Κομμαρις and thought it miswritten for Καμμαρις after the word for a kind of crab. But κόμαρις, a fish or sea delicacy is mentioned in

- B] A: komos. B: komos.
- C] Under the foot, Grr.: on one side: Κωρινθοί. On the other side, in two lines: σύμμικτ' ἔνεστι πάντα | καὶ κωθώνια.(2)
- D] σύμμικτα is abbreviated on Louvre G 356, CAVI 6533, and Munich 1464, CAVI 5169 (Hackl, pl. 2, no. 575). Κορίνθοι, sc. κρητῆρες, is the name for column kraters. Note the Iambic trimeter. For κώθων see TGV, p. 231 with nn. 2 and 3 (one shape is the mug). Threutte in GAI ii, 688 thinks Κορίνθοι may be part of the metrical inscription.

(1)a line is drawn across the foot. (2)Beazley translates: 'This is all a mixed lot, including cothons.' Johnston, p. 232 suggests that the writer is an Athenian, since he is not familiar with omega. Omega is used both for omicron and for omega.

- D] If the word on A were complete, it would settle the question of Zephyrus vs. Eos (see below).

(1)so ARV(2), followed by Sichtermann and Neuser among others; Smith suggested Eos pursuing Cephalus. Robertson, AVCA 169 thinks the pursuer is definitely female (as on Schwerin 731, CAVI 7469, q.v.). Schefold, Göttersage, suggested Chione, daughter of Boreas and Oreithyiaa. Robertson thinks the vase depicts another daughter of Boreas, Kleopatra (see Soph., Antigone). (2)not mentioned by Smith, but remains of καλος show in the photo. of B.

- B] Int.: a naked woman, seated, sponging her boot; a naked woman with an alabastron. A: Dionysus with satyrs and maenads. B: komos at a krater.

For the nonsense tradition stemming from Euthymides see my article 'The Lettering of Euphronius,' Euphronios und seine Zeit (1992) 52f. The lettering on Naples Stg. 5 is particularly close to that on Munich 2420.

Similar for the maenad at right: $\Sigma\mu\epsilon$. The left maenad is not inscribed.
- D] Cup proto-A. - The handwriting resembles that on Athens, N.M. 17,873, CAVI 928, by the same painter, q.v. K.-F. thinks the subject of A is the chthonic Dionysus bringing back Semele from the Underworld and celebrating the rising sap of the vine by raising his kantharos. Discussion of Buscher, Feldmäuse 5 and Bérard, Anodoi 72. The inscriptions are a mixture of sense and nonsense.

- B] Int.: young komast to right. A: three komasts, that in the center with a lyre. B: three komasts, that in the center playing the flutes.
- C] Int.: to left of his back: *Φυρμος*(ς).
- D] Type B. Beazley says the name was given in Heydemann's catalogue, but has since been overlooked; the position is unusual, but since there is no *καλος*, it is probably the youth's name. Phyrmos occurs in *Anth. Plan.* 322 and Phyrme in *CIG* 3.6205 [the examples are taken from Pape]. Oliver denies that the parallel from the *Anth. Plan.* for Phyrmos is valid, although he agrees with the reading. *φυρμός* means a mixture or confusion: *Φυρόμαχος* is a common Athenian name. The name Phyrmos is listed only here in *LGPN* ii.

- B] A: symposium with pyrrhiche: at left, a couch with a bearded man and a youth; at right, a couch with two youths, that on the right playing the flutes; in the center, in front, an armed dancer. B: komos.
- C] A: the inscriptions above the heads: the bearded man: Εὐαινετος. A youth on the same couch: καλος. The girl: Παρ[1-2]ιστε.(1) The third symposiast, bearded: Καλλιας.(2) Above the youth accompanying the girl with the flutes, slightly curved: Εὐαιὼν.
- D] There is much on Euaion in CB: he is here depicted as a portrait with his friends.

(1)so Beazley in CB: the third letter "is more like a rho than anything else; there is room for one letter, possibly two, between it and the iota. The name ought to be Pantariste, but if so the painter has miswritten it..." I read in the photo.: Παυ[.]ιστε, which does not give enough space for the name without a mistake by the painter. Matheson prints Γαλ[.]ιστε, but I do not know whether the first letter is intended for a gamma or a pi. M. also prints Εὐαι[ὸ]ν καλος, in error. Euaion is here without kalos. (2)Beazley says a youth: my error? A vacat after the first letter.

- B] Antiochos and women. Pandion and women.(1)

mid-height: Επιχαρις. καλη (goes with Epicharis).(2) Behind her, at the same height: Nikopolis or Nikepolis (hard to see in the photo.). Μυρρινισκη καλη.(2) Two other inscriptions on either side of a thymiaterion.

- D] An atticized paradise garden: Pandion and Antiochos appear with women: Klymene and Epicharis express general pleasantness; Nike (offering a libation to Antiochos, welcoming the Attic hero into her paradise garden) and Nikepolis are connected with Athens. Myrrhiniske kale may refer to the famous Myrrhine, priestess of Athena Nike. Pandion's shrine was probably located on the Acropolis. Antiochos is a visitor as he had no shrine (see Kron 109ff.). The inscriptions are done mainly from pl. 10 in Burn. They are usually at mid-height and horizontal, in very casual disjointed letters, which are hard to see in the photos.

B] Three women, that in the center carrying a chest. Under the foot: a painted scroll ornament over a preliminary sketch.
C] Under the foot, three Grr. in three separate areas: said by Shefton to be inscribed before firing(1): ΔΔ. ποικ. Ι-ΙΙΙΙ.
D] 20 decorated [vases]: 1 dracham 4 obols (= 10 obols). Shefton thinks this (at 1/2 obol per pot) rather cheap.

(1)"seeing that the epidermis of the clay is undamaged and the red miltos wash carries on over the signs (acrophonic numerals)." But see Johnston in TGV 225: all examples [of mercantile Grr.] he has seen are definitely post-firing.

- C] Below the top margin in widely spaced letters: Γανυμηδης and καλος.
- D] Beazley in ARV(2) 1313 says that the inscription is "not a real kalos-inscription;" on p. 1580 he lists it as "Tag-kalos." Richter thinks it is the nickname of a fair boy, while Deubner apud Richter-Hall 1, 200, n. 10, suggests reference to the banquet of the Choes. Clearly, Beazley is right on p. 1580 in attributing the inscription to the little boy, despite its position. Cf. also 'Script'. The two words are written on either side of the swing. L.-H. 202 notes the ritual shoes on the foot stool under the basilinna's chair and the new clothes on it; shoes are also worn by the boy and by one of the women. Mixed alphabet: Ionic letters with three-stroke sigma.

(1)= GR 1243. (2)Referred to the Choes festival by Deubner and Richter; Beazley speaks only of the perfuming of clothes.

- C] A: above the head, but uneven: καλος Μεμνῶ(ν). The

the letter must then be a sideways sigma).(3)
- D] + Amsterdam 2782 (permanent loan to New York), + Cab. Méd.
(2 frs. ex Froehner), + Once Naples, Bourguignon (2 frs.).
- In JHS Beazley says that a photo. in DAI Athens shows the fr.
[sic] when still in the Bourguignon collection and a bit
more, apparently with part of the love name Memnon. In CB,
he says that Memnon may be the καλος of Oltos, or more
probably the hero depicted (see CB for parallels to
mythical kalos-names). In ARV(2) Beazley definitely refers
the inscription to the hero Memnon, [which is clearly right.
It is a case of a heroic kalos.] He says that drs. of the
NY, Cab. Méd. and Bourguignon frs. are in the Arch. seminar
at Munich. - The Amsterdam fr.: Hauser, Arndt (no. 8164)
and The Hague, Scheurleer collections.

(1)not connected with Oltos. (2)Bothmer says probably not an
Amazonomachy as Beazley had thought earlier. (3)but my
information from the dr. and Beazley in JHS differs: one of
the lost Bourguignon frs. has καλο[-], the Amsterdam fr.
gives [-]σΜε[-], the New York fr. has [-]εμνο(ν). The
dr. has the last nu as three-stroke sigma, which I distrust;
the reverse nu shown in JHS is probably correct.

Kunisch, Makron (Kerameus 10, 1997) 100 n. 402, *114 n. 510, 196/332, pl. 111 (shows inscription).
- B] Int.: a dinner party(1): lower parts of two males reclining; a table with food; under it, a youth on the floor.
- C] Int.: above the youth: Αμυχος.(2)

(1)so R-H; Beazley says 'unexplained subject'. (2)R-H says the name is unknown and is hardly for Αμυκος [which is a mythological name; but is this really an objection? Chi for kappa is common and Makron is a poor speller]. Bothmer takes Αμυχος for Ἄμυκος: it refers to the incapacitated youth lying beneath the banquet couch; he is not drunk but captive. Hence the scene is probably mythological. The two banqueters are unusual: one holds a phiale, the other is half turned to left: perhaps they are the Dioscuri feasting after the defeat of Amykos. Beazley, by letter, is said by him to agree. The youth is lying on his back on the floor below the couch and under the table in front of it. The inscription begins to right of his face and to right of a table leg; it curves to follow the body. The chi is clear in the photo. Kunisch, pl. 111. - In note 510 Kunisch agrees with Bothmer who must be right. However, Amychos is accepted in LGPN ii as a contemporary name.

Some alphas resemble mu's. Some Attic lambdas have the vertical extending below the short stroke.

(1)so Beazley; my note from a photo. has alpha without cross stroke for the second letter, but Beazley must be right: is the upsilon upside down? Pausanias 7, 4.1, has Lykomedes as son of Apollo and Parthenope; there is no Lak(k?)omedes in Pape or LGPN ii. (2)the second letter is the tip of alpha or delta; the reading is unclear. B] A: A bearded man and an old warrior. B: Nike greeting a wreathed youth with spears and petasos.
C] A: to left of the warrior's middle, a Gr. made in the soft clay under the glaze: Τελεω, retr. B: to right of Nike's forehead, stoich. and horizontal: καλωσ|Εγελεωσ.(1)
D] Omega is here used for omicron, ou and omega (but the Gr. inscription may not be by the same hand). Τελεω has been variously interpreted. Richter (in Richter-Hall) suggests the genitive of Τελέας (cf. PA 13,500), or for τέλεος, sc.

ὀκράτηρ, or τέλειον, sc. τὸ ἀγγεῖον; the last two suggestions are unlikely. Beazley in ARV(2) 1677 suggests that 'the wildlooking warrior' may be Tereus, and the inscription may be for Τήρεω, genitive of Τήρης, which he considers a variant of Τηρεύς. The inscription is part of the preliminary sketch, but was not copied on the glaze; it is retr., probably because it refers to the old warrior on the right. Note that Τελεας is equally possible (cf. PA 13,557). This name (like Richter's suggestion) is not mythological, and the inscription would have to be an incomplete notation for a kalos-name. Beazley's suggestion seems to me philologically implausible. Robertson also disagrees; he thinks the old man may be Philoctetes on Lemnos meeting Neoptolemos or Odysseus to take him back to Troy. The kalos-name has also been variously read and interpreted, but it is clearly Hegeleos. Rumpf suggested that the Gr. should be read as Ε|ΓΕΛΕΩ|Σ, but the first preserved letter is a clear tau. The alphabet is mainly Ionic. [I would like to suggest that the inscription in the preliminary sketch is intended as a reminder that the kalos-name ΕΓΕΛΕΩΣ is to be inscribed. But perhaps the retr. direction is against this?] For reff. to Tereus see Oakley 47 n. 142.

- B] Return of Hephaestus: a grown satyr and a boy satyr lead Dionysus and Hephaestus, both riding on one donkey.
- C] High above the head of the satyr leading the procession (and playing the flutes), in letters larger than the other inscriptions: Κομος.(1) High above the heads of the two gods sitting on a donkey: Δ[ι]φνυσος. Εφαιστος. The first two inscriptions horizontal, the last nearly so.(2)
- D] The sketch in Lissarrague shows the inscription Κομος high above the two satyrs (the leader who plays the flutes and the boy satyr who leads the donkey and raises up a tall thyrsos, which may partly explain the height of the inscription); and the letters are larger than those of the other two inscriptions, which name Dionysus and Hephaestus. This is not noted by Liss., who says it is the 'stage name' of the lead satyr. [Could the Komos inscription have a double meaning?]

(1)despite this, the name is that of the satyr, not a heading. K.-D. reads: Κομος. (2)L.-H. has: [Κω]μος [sic]. [Διο]νυσ[ος]. Εφαισ[τ]ο[ς].

- D] Εὐδαιμονία: see Beazley in AJA. Ἀπονία: Shapiro: Aponia faces Eukleia who is carrying a chest; neither has an attribute. Her name is squeezed in vertically for reasons of space. The initial alpha was not recognized until after the plate in Richter-Hall was made: see Beazley, AJA 54 (1950) 320. Aponia may have a political meaning, as πόνος was a code word for the Peloponnesian War; cf. A. Boegehold, 'A Dissent at Athens,' GRBS 23 (1982) 147-52. Hence ἀπονία = εἰρήνη. Ionic, but note heta.

- B] Erotic conversations: Int.: a man and a seated woman. A: a youth and a woman; a woman and a seated man; a youth and a woman. B: similar.
- C] Int.: to left of the man's legs: Αντιφανες. To right of his head: καλιτος.(1) I.e., Αντιφανες|καλλιστος intended. Behind the woman: καλε. A: Νικοτρατε for Νικοστρατε. Νικων (youth). Κελιτραστε for Καλλιστρατε. Ευκλες (man). Πελεα for Πελεια. Νικοθενες for Νικοσθενες (youth). B: Χαρινιδες. Αφρο[δ]ισια. Διονισιγενες for Διονυσιγενες.(2) One girl is uninscribed. Λρακιας.(3) Ναυκλεα καλ[ε] for Ναυκλεια καλ[ε].(1) On the underside of one handle, Gr.: [h]ερων εποιεσεν.(4)

(1) κ[---]τος, Richter. καλιτος, de Witte, Descr., no. 12, according to Beazley in ARV(2), who thinks the inscription may have been complete in his time. Richter in AJA, however, denies this. Portrait-kalos as is also the Ναυκλεια καλ[ε] on B. (2) GAI i, 261. (3) probably for Larkias, though the name is unknown (but Lakris occurs); perhaps short for Lakriteides, a Eumolpid (Richter). For parallels to the other names see Richter-Hall. (4) [h]ερων εποιεσεν, AJA; [h]ερων Richter-Hall, ARV(2) and Kunisch.

- A] RF cup. From Cervetri. Onesimos (P). Euphronios potter. Early fifth. 500-490. Ca. 490 (Richter). Early (Beazley).
*Richter-Hall 60/39, pls. 37-39 and 179. *Richter, AJA 20 (1916) 125 ff., pls. 2-6 and fig. on 126.(1) ARV(2) 319/6, Para. 358, Add.(2) 214. *'Script' 504, Fig. 110. B. Cohen, 'The Literate Painter: A Tradition of Incised Signatures on Attic Vases,' MetMusJ 26 (1991) 65 and n. 99, fig. 26 (Int.). S.R. Wolf, Heracles beim Gelage (1993), fig. 131.
- B] Int.: Heracles with a boy carrying his luggage.(2) A: Heracles and the sons of Eurytus. B: very fragmentary: Heracles attacking a man or youth at an altar.(3)
- C] Int.: to left of Heracles' face: $\eta\epsilon\rho\alpha\kappa\lambda\epsilon\varsigma$, retr. Starting above his head: $\text{E}\upsilon\phi\rho\nu\iota\omicron\varsigma\ \epsilon\pi\omicron\iota[\epsilon\sigma\epsilon\nu]$. A: a man with a bow; to right of his forehead: $\text{I}\phi\iota\tau[\omicron\varsigma]$.(4) Under Heracles' outstretched arm: $(\text{h})\epsilon\rho\alpha\kappa\lambda\epsilon\varsigma$, end-boustr.(5) To left of a fallen youth's head: $\text{K}\lambda\upsilon\tau\iota\omicron\varsigma$. B: Between Heracles and his opponent, facing the former: $[\text{---}]\kappa\epsilon\varsigma$.(6)
- D] The signature is in larger letters than the name labels. Cohen wonders whether Euphronios made Onesimos write it large or whether E. wrote it himself; Guy apud Cohen n. 99 is sure of the latter. [Note that the rhos differ: but is that enough?]

(1)since augmented by frs. in Leipzig and Dresden.

(2)Philoctetes? (Beazley). Hyllos or a slave?; less likely, Philoctetes, Hyllos, Oionos (Richter). (3)so Beazley in ARV(2), who compares Louvre G 50, ARV(2) 70, CAVI 6422. Perhaps Heracles and Bousiris (Richter). (4)note that the tau resembles an Ionic gamma as on Munich 8935, CAVI 5363, which is by Euphronios. (5)the heta resembles a nu. (6)Herak<l>es or an unknown follower of Bousiris (Richter).

D] The layout of inscriptions is in the Exekian manner.

(1)manner of Lysippides Painter. (2)what looks like a pi with

curved top is probably the lower part of a heta; I see no other traces in the photo. in Shapiro, unless there is a smudge at a little distance; most of the surface is gone here. (3)there is probably not enough space in front of Hebe to restore Herakles there. (4)the first sigma is given as extant in ABV; the last is written under the omicron, as the inscription runs into the margin. The photo. in Shapiro shows all letters.

- D] There is much bibliography; the illustrations are largely of B. There is some word separation: a slight break between the first and second words and the nu of Αθηνεθεν is very low, while the alpha of αθλον is taller than the other letters. The lettering is strong, but not very neat.

 C] Above the spinning woman's head: καλος. Above the head of the woman being offered shoes, a bit to left, but not near the Eros: καλος. Above the head of the youth with the stick: καλος.

- C] Int.: ho [π]α|ις καλ[ος].
- D] Robertson, AVCA 111 wrongly says this vase is attributed to the Epidromos Painter; ARV(2) gives it to Apollodoros whom Beazley considers a continuator of the Epidromos Painter.

- A] RF amphora. From Greece. Unattributed. Last quarter fifth. Ca. 420 (Richter). *Richter-Hall 197/157, pl. 156 (photos; bibl.). D. Feytmans, Les vases grecs de la Bibliothèque Royale de Belgique (1948) 65 n. 1. Richter-Milne, Shapes and Names, fig. 30.
- B] A: Apollo and muses: Apollo seated at left, with his lyre; a standing muse; a seated muse with a wreath. B: Adrastus in a chariot to left.
- C] Inscriptions: Grr. filled with white(1): A: above Apollo's head: [A]πολλων. Above the standing muse: Ορα[v]ις. B: To left of Adrastus' forehead: Αδραστος. Above the horses' heads, in larger letters which are more widely spaced: καλος.(2)
- D] Is it certain that the inscriptions are ancient? The white (see below) has mostly disappeared. The name of the seated muse is missing. Three-stroke sigmas in the name of Adrastus; elsewhere they are four-stroke. The only RF representation of Adrastus; Richter connects this with the alliance with Argos in 420. Mixed alphabet.

(1)D. Feytmans cites a letter from G.M.A. Richter, in which she says that the white in the grooves of the letters is not incrustation; it could be modern, but then why not in all the letters; R. was not quite certain that it is

ancient, since there is some white also where there was once the nu of Ourania. A RF cup in Brussels shows the same technique. (2)not necessarily connected with Adrastus.

On handle B/A, in the BG area of the right hasta, Gr.:
ἱερῶν ἐποεσεν.(2)
- D] Type B. Richter in R-H says that vase is perhaps identical with Musée Etrusque de Canino, p. 10, no. 1988, which also has ἐποεσεν; she cites other bibl. derived from that reference. [No doubt this is why Beazley in Para. says that the vase is 'probably' from Vulci.] - For Rhodopis see Hdt. 2.134, Athen. 13.596b-c, BF hydriae London B 329, CAVI 4285, and Naples RC 187, CAVI 5467 (see ABV 678). Kunisch, p. 20 n. 88 lists Rhodopis as a kale-name. - Signature: pi very much pinched in; rendered erroneously as a rho in Hall's dr. The rho is tailed in Rhodopis but not in the signature.(3)
Three-stroke sigma.

(1)Kunisch's sketch on p. 201 has: κ[α]λε. (2)cf. Kunisch, n. 37; the iota omitted also on Berlin 2290+, ARV(2) 462/48, CAVI 2335. (3)pointed rho in sketch, Kunisch, p. 201.

These are the typical short nonsense inscriptions on Pioneer kalpides, cf. Vatican G 71, CAVI 7026 (Euthymides), Harvard 1972.40, CAVI 3921 (recalls Euthymides and the Kleophrades Painter), perhaps also Munich 2420, CAVI 5284 (Pezzino Group).

(1)recalls the Dikaios Painter; cf. also Louvre G 41, CAVI 6416 (Beazley). (2)the last pi is upside down. (3)the last omicron a dot. (4)except the sigma.

Matheson, Polygnotos and Vase Painting in Classical Athens (1995) 61, *280 and n. 57, 351/P22, pl. 47.
B] A: citharode with two men and a youth. B: three youths.
C] A: between the head of the man at left and the back of the citharode's head: $\kappa\alpha\lambda\omicron\varsigma$. Above the seated man and to left of the youth's face, horizontally in two lines: $\text{Νικομα}\langle\chi\omicron\rangle\varsigma\ |\ \kappa\langle\alpha\rangle\lambda\omicron\varsigma$.
D] The restoration $\text{Νικομα}\langle\chi\omicron\rangle\varsigma$ is Beazley's; see ARV(2) 1602, where the name Nikomachos is cited from a stamnos in Villa Giulia 3584, also by Polygnotos (ARV(2) 1028/15). [This is probably an error for London E 454, ARV(2) 1028/14, CAVI

4600.] Beazley also points out that the missing alpha in κ<α>λος is thought to be behind a spear. Disjointed letters and miswritten inscriptions.

- C] Int.: Με[μ]υνὸν καλος. B: καλος. Σμικρος. Λεκες. [-]ισχ[-].
- D] The readings after ARV(2). On p. 63 Beazley does not connect the καλος with Σμικρος, but on p. 1608 he lists Smikros as a kalos-name with a question mark. Ohly-Dumm considers Smikros here a kalos-name, and I would follow this. But cf. Williams: the youth on the left of B is Smikros; in the center is a youth on horseback to left, called Λεκες, (1) which Williams derives from λέκος or λεις, 'pot or pan.' He is not an aristocrat but a younger member of the workshop raised to a higher plane. Cf. Malibu 82.AE.53, CAVI 4959, attr. to Smikros, which has Euphronios as an aristocratic lover. Smikros is here tag-kalos.

Cypriote syllabary.

(1)the letters could also be interpreted as *[Κ]αδμος*,
although I thought this unlikely when I saw the vase. The
writing seems almost cursive. (2)there is the beginning of a
diagonal stroke after *καλη*. There is also a dot after the
alpha, which is probably accidental.

B] Int.: a boy seated on a stool before an altar, playing the
lyre and singing. Ext.: plain.
C] Int.: above the boy: *ακεστοριδες*.
D] Akestorides occurs with *kalos* on three vases, two by the
Oionokles Painter, the third by the Timokrates Painter.
Here "probably the name of the boy represented," Beazley,
p. 1560. The two archons by that name are earlier. Richter
explains *ακεστοριδες* = *ho Akestorides*.

(1)cf. δέφομαι (Beazley, BSA 32). (2)cf. Il. 5.759-60: οί δὲ ἔκηλοι τέρπονται (Richter as a second suggestion, accepted by Beazley in AJA). (3)from ψωλή. (4)Beazley originally doubted this signature [probably because the incision caused much flaking of the glaze], but later recanted; see JHS 52. Cohen points out that the BG segment under the handle was planned for an inscription (which was executed after firing); this BG segment imitates Corinthian practice. (5)ηεὺς ἔτι, "noble Perseus furthermore" (Richter), but Beazley rightly considers the letters meaningless (BSA 32). (6)ηερμῆς ηοδίτης has occurred to me, but the letters are in the wrong sequence and the last letter seems to be an iota.

τῆ Ἐρμῆς ὀδί (Richter) is hardly right. (7)Hampe's attempt to read these inscriptions as the cries of cranes (cf. Il. 3,1 ff.) is not convincing.

B] Three zones: Top (RF, fragmentary): uncertain subject: a man in a chariot abducting a woman, with six divinities. Middle, WG: Achilles mourning for Patroclus, and the bringing of the armor by Thetis and Nereids. Bottom, RF: Theseus and the Amazons.

Bottom zone: ... Ε[υ]μαχη. [-]ο[-]. No name for the

[-]ρος. Χαροπη. No name for figure 13. Δωρις [sic].

Ευδωρος. ... [The names not mentioned here are = the

readings from R-H]

D] Bottom zone: L.-H., fig. 81, draws the inscriptions in

relation to the figures, mostly horizontal and mostly above the heads, but sometimes to right of the figures. The inscriptions in the lower zone are hard to read. Ionic alphabet.

(1)The last alpha of Galatea lacks the cross stroke.
(2)Ευπλ[οια](?), rather than Eupompe, Richter. The fourth letter preserves the tip of a slightly diagonal down-stroke, suitable for an Attic lambda. (3)Richter: restored after the pyxis, London E 774, CAVI 4650, by the Eretria Painter. But R. reads the last letter wrongly as epsilon. (4)See Beazley, Proc. Brit. Acad. (5)Bothmer's readings; they supersede Richter's. (6)L.-H. wrongly restores an epsilon. She prefers Galene to Richter's Galateia. (7)Ευ[πλοια] or Ευ[λιμενη]. (8)Κ[υμω](?). Richter restored Κ[ymodoke], but L.-H. thinks there is not enough space.

Shapiro, Personifications in Greek Art (1993) 106ff., 241/48, 107, fig. 59, 204, fig. 165 (Peitho). LIMC, s.vv. Aphrodite, Eumolpos, Harmonia, Herakles.
- B] A: Musaeus with family; four Muses; Aphrodite with companions. B: Heracles and Deianeira.
- C] The inscriptions are often above the heads. A: Μοσ[α]ιος. Δηιοπη. Ευμολπος. Μελοπομενη. [Ε]ρατω.(2) Ποθος. Καλλιοπη. Αρμονια. Αφροδιτη. Τερψιχορα. Πειτω. B: Δηϊανειρα. κα[λη].(3) Ηρακ[λη]ς. At the top of the picture, below the palmettes, are faint traces of an illegible inscription, which Beazley thought, because of its position, might be a signature.
- D] For the relations of the personages, see Milne apud Richter, AJA. Robertson discusses the Meidian treatment of the myth. Shapiro: the theme of A is music at the wedding of Harmonia, who settles in the Attic landscape (the Attic singer Musaeus!). Cf. 'harmonia' in Euripides, Medea 830-32. The vase mixes the Theban Harmonia with the companion of Aphrodite. Burn 33: Peitho is the only companion that is seated. 54: Musaeus is connected with the Eleusinian mysteries: Deiope was a priestess of Demeter, her son Eumolpus is the ancestor of the Eumolpidae. See also L. Weidauer, 'Eumolpos und Athen,' AA 1985, 195-210, and LIMC iv, s.v. Eumolpos. Musaeus is here in Thracian costume, with five muses. Ionic alphabet.

(1)fig. 3 has the inscriptions repainted in white by Hall.
(2)irregular spacing. (3)Deianeira's name is above Heracles; kale is above Deianeira and apparently not related to her

name. Is it perhaps related to another woman?

- D] The inscriptions done after *AJA*. Mixed alphabet.

(1)part of a name; could also be ...ε or E... (2)The first is my reading from the photo. in *AJA*; the second is from Richter's text. The alpha resembles an eta; the delta is dotted (perhaps the dot is accidental and we have an incomplete nu). (3)Γλαυκε, Richter in *AJA*, but the letters are all there.

See stemma in *PA i*, p. 34 and biography under 14529. It seems to me quite possible that the king's name here is a mythical transfer of an Athenian historical name, as elsewhere in Polygnotos (Deinomache!). Ionic lambda and sigma.

- D] Boardman discusses the names of the two onlookers on A: Laodamas is a Trojan (Il. 15.516-17) or a Lycian (Quint. Smyrn. 11.20-21). Hippolytos is not known as Trojan or Lycian but the name may be an error for Hippolochos, a

Lycian and father of Glaukos, cousin to Sarpedon; he is found on Melbourne 1643/4 (see Boardman n. 5). Boardman also discusses side B. Bothmer had noted that Medon and Akastos were the first Athenian archons; the scene of early heroes arming he thought was directed against Hippias' disarming of the citizens after the murder of Hipparchos. Simon calls them 'attische Bürgernamen' (in GV 98). Boardman argues against both interpretations; he suggests an arming scene of Lycians and Trojans. - Note that the painter's signature is much more prominent than the potter's.

Palagia, *Athenian Potters and Painters: The Conference Proceedings* (1997) 145 and n. 43, fig. 7 (side view showing two goddesses, Iris, and the lower part of another figure, all to left; on the foot, a very clear picture of the Gr.: *ἐποίησεν*, with a vacat fore).
- B] Judgment of Paris: Paris, Hermes, Hera, Aphrodite, Athena, Iris and Eris(?).
- C] Alexandros, retr. Aphrodite, retr. Peitho is also inscribed.(2)

On the foot, Gr.: Εὐθυμίδες ἐποίησεν, the words separated.

- D] Ex Basel Market (M.M.). For the style see Cohen, n. 82. The word separation is peculiar, but the signature is considered genuine, although I have been doubtful (but see Cohen). D. Williams groups the vase with five other pieces he attributes to the Pythokles Painter: it is by the same hand as Cab. Méd. 570+, ARV(2) 399, CAVI 6180 (signed by Brygos as potter). According to Blatter, Cahn attributed the vase to the Sosias Painter, but Robertson did not agree. Cohen explains the placement of the inscription: it starts to right of the missing handle where there is a space between Paris and the figures before him. The gap between the name and the verb is beneath the center of the composition, probably where the spout was. On p. 45 Robertson suggests that the epoiesen phase of Euthymides is later than the egrafsēn, as is the case for Euphronios. On p. 59, he discusses the question of whether the signature is genuine, pointing to the vacat between name and verb; the dr. is clumsy and not attributed, the resemblance to the Sosias Painter is superficial.

(1)Bothmer in 'Not. Acqu.' says the vase was not painted by Euthymides; that Cahn suggested exploring any connection with the Sosias Painter, and noted surprising connections with very early work by Makron. D. Williams, GVGettyMus 5, 62 n. 19, tentatively attributes to the Pythokles Painter. Moore: this artist seems to have some ties with the Sosias Painter.
(2)to judge by the words of Cohen, there are other inscriptions.

(1)so Neils. Robertson thinks school of Berlin Painter, as late as Achilles Painter. He considers it to be from the workshop of the Berlin Painter, perhaps in the 450's and thus contemporary with the Achilles Painter's prize vases with gorgoneion. (2)Late but earlier than the Goluchow vase (Beazley; prize Panathenaic, ABV 408/2, CAVI 8002). The inscriptions on the two vases may be compared in VPol, pl. 1,1 and 2. CV: Ca. 480-470 [Robertson in AVCA would put it later.]

- B] Shoulder: two mounted warriors attacking a falling warrior. Body: Five mounted and armed Amazons to right. Predella: two lions attacking a fawn.
- C] Under the foot, Gr.: Καριθαιος εποισεν.(2)
- D] Now Reading, PA 32-769-1 (information from J. Neils). Ex Roman market (Depoletti). Bothmer, apud ABV, points out that C. Smith in Forman 47-48, no. 286, does not mention the inscription; hence it is suspect as being modern. In 'Amazons' he says it is not in any later sales cat. either; he wonders whether the foot has been replaced. The vase is later than those signed Charitaios and not connected in style. - Neils tells me that the vase has the signature on the underside of the foot as noted by Raoul-Rochette. The dr. shows the line nearly horizontal and the two words separated by a space almost two letter spaces wide; the name is in smaller letters than the verb; the alphabet is Attic and I think the dr. is not an accurate facsimile. - Further notes: The word separation

recalls that on the potter's signature of Euthymides which I also find suspicious (see 'Script', p. 72 n. 41, where I only say that the word separation is peculiar); Robertson 59 also questions the signature (but see Cohen in P&P (1997) 153 n. 43). The painted signature of Amasis under the foot of Malibu 76.AE.48, by the Taleides Painter, I also consider doubtful, see 'Script' 165. and now esp. H. Mommsen in P&P (1997) 17-18. For the sp. with kappa and theta (vs. chi and tau) see GAI i, 464ff. (metathesis).

- C] Shoulder: Τυλιος. Λυσιος. Μινουχης. Μικωνιος.(1)
Under the foot, Gr.: H with two diagonals and V. See TGV 139f./13E; this is common on vases by the Priam Painter.
- D] Bothmer says the inscriptions are hard to read and may be garbled. Illiterate? Mock inscriptions? Bothmer also refers to "another, similarly tantalizing" inscription on an amphora by the Priam Painter, Oxford 212, ABV 331/5, CAVI 5876, with the kalos-name Μυυ<ν>ιχος.

(1)so Bothmer in the text; the photos. are not much help. I think the first two names are written by the charioteers, the last two under the horses.

- D] Bothmer on p. 171 refers to another Centauromachy by the Copenhagen Painter, on a pointed neck amphora, Germany, Private, published by Cahn in the Copenhagen Symposium (1987) 107-57, CAVI 3812; Theseus and Perithoos are named.

(1)perhaps a variant of Λαπιθης, the eponymous ancestor of the Lapiths. (2)female; not attested. May be connected with Hoplon, a Lapith on the François Vase (Bothmer). See also O. and S. 36 and n. 105, who refer to Hoplon on the François Vase; Hopleus in Hesiod, *Aspis* 180; and an archon of the 3rd cent. B.C. (*Hesp.* 40 (1971) 109-11). They think perhaps a reference to the arms of Achilles. Cf. also LGPN ii, s.v. Ὀπλων (two entries). (3)the mother of Chiron who helped to bring up Achilles; only found here (Bothmer).

- C] Int.: in a curve above the figures: $\eta\omicron\ \pi\alpha\iota\varsigma\ \kappa\alpha\lambda\omicron\varsigma$.
- D] = 2587.

(1)ARV(2) 1672: Hauser apud Hartwig, *Meisterschalen*, pp. 421--25, has shown that the barbarians are Northerners and has made it very probable that they are Agathyrsoi; cf. also Bulle, in *JdI*. Beazley compares Louvre C 11,375, Athens, Acr. 702, and Swiss, Private (ARV(2) 837/10, CAVI 5019).

- D] I have read this inscription as $\kappa\alpha\lambda\omicron\varsigma\ \epsilon\acute{\iota}$, even though $\epsilon\acute{\iota}$ should be written as a true diphthong; but see GAI i, pp. 299-300. Sloppy lettering.

- C] Under each horse: a long row of nonsense, probably imitation letters.(1)
- D] = inv. 2488. The number given above is presumably in error.

- A] RF cup. From Orvieto. Antiphon Painter (Williams). Onesimos (O), Beazley.(1) First quarter fifth. *ARV(2) 329/132, Para. 359, Add.(2) 217. M.F. Vos, *Scythian Archers in Archaic Attic Vase-painting* (1963) 44f., pl. 14,b. T. Hölscher, *Griechische Historienbilder* (1973) 39, no. B 1, and 40f. W. Martini, eds., *Studien zur Mythologie und Vasenmalerei: Konrad Schauenburg zum 65.*

- B] Int.: Beazley: a mounted archer. Löwy, Klein, Vos and Hölscher: a mounted Persian. Vos refers to Hdt. 7.61 for the cuirass. The archer turns back his head and does not use his bow. Ext.: plain.
- C] Int.: κα[λος] Λυκος, ναιχ[ι]. τορι[. (?)]. (2)
- D] Tailed rho.

(1)Hartwig: Onesimos. Beazley, ARV(1) 223/10: manner of Onesimos; ARV(2) 329/132: Onesimos. Williams: Antiphon Painter. (2)G. Körte, *Annali* 1877, 139/33: τορι, unexplained. Löwy 140: for Δορις, restored [εγραφσεν], of which there is no trace. Hartwig: perhaps the rider's barbarian name. Beazley: ΤΟΡΙ[.], with only room for one letter, unexplained. Williams: χορις[.](?). W. notes that the chi in ναιχ[ι] looks rather like a tau; the cup dates soon after 490; W. compares the famous expression χωρις ἵππεῖς (cf. the Suda: connected with Marathon); W. thinks the cup shows one of the Ionian sympathizers on his way to tell the Greek army that the Persian cavalry is now separated.

- B] Undecorated.
- C] Handle zone: A: Χσενοκλες : εποιεσεν.(1) B: [Χσενο]κλες : εποιεσε[ν].(2)
- D] = inv. 2616. The fr. of B of Faina 91 does not go with this vase, despite Beazley's comment. The hand is typical of the

Xenokles Painter.

(1)a blank letter space after the first letter. (2)so JHS; ABV has [Χσεν]οκλες, but that is a mistake: see the remark in ABV about Faina 91, B.

- A] Plain lip cup. From Orvieto. Xenokles Painter. Xenokles potter. Third quarter sixth. *Beazley, JHS 52 (1932) 182 (not ill.). Hoppin, BF 426 (A). ABV 185/2, Add.(2) 51. *L.V. Borrelli, CV, Italy 41, pl. 2,1-3 (photos. of inscriptions: p. 4 (A and B)).
- B] Undecorated.
- C] Handle zone: A: Χσενο[κλ]ες : ε[πο]ι[ε]σεν. B: Χσενο[---].(1)
- D] = inv. 2618. Photos. of the inscriptions in CV show that the inscription on B does not fit on B of Museo Faina 90. Faina 91 is probably the cup mentioned by Schneider, AM 14 (1889) 332, top, as 'Orvieto'.

(1)unless this fr. belongs with Museo Faina 90 (Beazley); but see under Faina 90, above.

A: under the left eyebrow on the BG background in a narrow space: Επικτετος. The egrafsen is to left and right of the runner's head, the last letter going into the the space below the right eyebrow: εγρα^σφε^ν, for εγραφσεν.(2)
- D] = inv. 2581.

(1)CV prints a kappa for the chi, but the letter is in a break and I cannot tell what it was. (2)the photo., pl. 1,2, shows σφ clearly.

- A] Frs. of RF cup. Euergides Painter. Last quarter sixth. *Photo. (Int.). ARV(1) 62/54, (1) ARV(2) 92/60.
- B] Int.: komast: a youth with a drinking horn, running. A-B: komos.
- C] Int.: in a circle around the figure, facing him: h(o)(π)^α[ι]ς(κ)αλος. Ext.: one fr., once in the [Italian] market shows the upper part of the head of a youth and a piece of his arm(?) and: h[---].(2)
- D] + Oxford 1927.4075, 1953.1 and 1953.642 (gift of Bothmer) + Italian market. The writing looks like a copy made by an illiterate: the first omicron (only partially preserved) is a sharp hook; kappa resembles a triangular rho. But the Faina portion of the cup is very much restored; are all letters genuine?

(1)three frs. formerly in the Italian market, of which two are Oxford 1953.1. (2)my note from a photo. shows a standed laver, on the bowl of which, in BG, well spaced: καλος. This is fr. g in CV: two youths filling a laver from two pointed amphoras.

- B] Int.: upper part of a youth to left, with the right arm extended.
- C] Int.: [-]α<σ> : κ[α<σ>].(1)
- D] Beazley says that the name might be [Hippodam]as. Blatter does not restore it. The alpha is characteristic of Makron. Blatter's fig. 2 (a polarized photo.) shows the inscription very well.

(1)Beazley wrongly prints the alpha with a broken hasta. The alpha is in fact a bit miswritten so that the short hasta has a nick in it.

- A] Frs. of RF cup. Circle of Hermaios Painter? (M. Robertson(1)). Last quarter sixth. 510-500 (Blatter). *R. Blatter, *Antike Welt* 20 (1989), no. 2, 59, fig. 2,a-b (2 frs. only). *Blatter, letter of 12-7-88.
- B] A: fr. a: a hand holding out a kantharos. Fr. b: a hand with flutes. Fr. c: the head of a horse. Fr. d: the head of a youth and the outstretched hand of another.
- C] A: fr. a: above the kantharos: κἀλ[ος]. Fr. b: [-]θεφ[-].(2)

- B] Athena, armed, seated to right, with staff (spear?) and phiale, looks back; at left, a shield with an owl sitting on it; at right, an altar with an owl on it; the whole between columns and palmettes.
- C] Nonsense(?): blots: above the left owl, curved: four blots; at right, above a palmette that springs from the altar, curved: five blots.
- D] = Münster 24?(1) Fischer lists Haspels, ABFL 47,2, as a replica.

(1)S. Fischer in B. Kurzus, ed., lists as [Germany,] Private, and gives, in bibl., [Ostwestfalen,] D.J. Listed as 'Münster 24' by Bérard. I list the vase by the citation from 'Sammlung D.J.'

- B] Int.: a jumper. A-B: vintage: A: a satyr to right; another satyr crouching before a double vine; a satyr crouching to left with grapes; two satyrs with full skaphai. B: an ithyphallic donkey to left; a satyr with a very full wineskin and a goad running after him; a satyr carrying a skaphe to right; another satyr treading wine on a pressing table (while holding a drinking horn!) and a deep vat to left; a satyr. Under each handle, a lugless and a lug krater, respectively.

- A] Fr. of BF lip cup? From Naukratis. Unattributed. Ergoteles potter? Third quarter sixth. *Beazley, JHS 52 (1932) 183 (not ill.). Edgar, BSA 5, cols. IV (facs.) and 5/50b. Hoppin, BF 82 (wrongly assigned to Cambridge). ABV 162, middle.
- B] Int.: part of the tongue pattern.
- C] Handle zone: A: $\text{E}\rho\gamma[\omicron\tau\epsilon\lambda\epsilon\varsigma \text{---} (?)]$.
- D] Probably Ergoteles rather than Ergotimos [who signed some Gordion cups painted by Kleitias] (Beazley). The formula used by Ergoteles appears to be: $\text{E}\rho\gamma\omicron\tau\epsilon\lambda\epsilon\varsigma \epsilon\pi\omicron\iota\epsilon\sigma\epsilon\nu \text{ho } \text{N}\epsilon\alpha\rho\chi\omicron$. See Berlin 1758, CAVI 2222, and Florence Market (Pacini), CAVI 3730, ABV 162/1-2. Ergotimos signs without a father's name. The stemmata: 'Script', p. 47.

- A] Fr. of BF lip cup. From Naukratis. Unattributed. Polypous potter? Third quarter sixth. *Photo. Beazley, AJA 54 (1950) 311. ABV 170.
- B] A: handle zone: at right, part of a polyp.
- C] A: handle zone: on the polyp's left: $[\Pi\omicron]\lambda\upsilon\pi\omicron\varsigma$.(1)
- D] The inscription is either a signature or a kalos-name (Beazley). A signature is more likely; cf. the aidoion vase with the signature of Priapos, ABV 170, CAVI 2774. *polypus* is the word for octopus; this 'polyp' may have had 8 feet.

(1)no doubt completed on the right.

- D] Neat, but small, letters.

Oxford.

- A] Fr. of BF or BF/RF cup. See below. Oltos or near. Last quarter sixth. *Photo. in Beazley's possession.
- B] Int.: BF: head and shoulders of man (dotted beard?) to left, head held high.
- C] Int.: outside the scene, along the dividing line, Gr. in the BG: [-]αἰεϋς.(1)
- D] This could perhaps be Oxford G 141.3, ARV(2) 56/29 and 42/53, from Naukratis, although my note speaks of a man (and the sketch may show a beard), while Beazley says 'youth (head and shoulders remain; Paris, declining to judge?)'. The notation with Beazley's photo. says 'near Oltos,' while the Naukratis fr. is attributed to Oltos. The inscription is not Attic.

(1)a break at this point.

- A] RF pelike. Achilles Painter. Third quarter fifth. Ca. 440 (Cahn). 440-435 (Oakley). *M. Vickers, AJA 94 (1990) 616, figs. 3-4 (fig. 3 is a photo. of the Gr.; fig. 4 is A). *'Auktion' 70 (M.M.) 75/216 (note by Johnston). D.W.J. Gill, 'Pots and Trade: Space Fillers or objets d'art?,' JHS 111 (1991) 32, pl. 1. *J.H. Oakley, The Achilles Painter (1997) 14-15 and n. 34, 123/68, fig. 28C (profile), pls. 33B (A) and 51C (B); pp. 14-16 with nn. 33-35, and 15 chart 5 (dr. of Gr.) (bibl.).
- B] A: a young horseman galloping. B: a draped youth with stick.
- C] Under foot, Gr.: ΜΑΤΙΚΜΗ (3 1/4 obols) followed by xi turned 90 degrees, plus one vertical stroke.
- D] Johnston in 'Auktion' (by letter) reads MA as an introductory monogram of type TGV 2B; then the price of this vase is 3 1/4 obols, which is high; he does not comment on the ff. signs. Vickers reads the price as for four items, obviously interpreting the 'xi' plus the extra line as 'four' and ignoring the horizontals of the first two signs (drachmai?). Oakley: M is perhaps an abbreviation of a name (Johnston type 2B, 89-90 and 194), followed by ΤΙΚΜΗ and two-dot punctuation. Then 3 horizontal lines and C; four vertical lines, the first three of which are crossed by a horizontal line. [This should be a price Gr.] Oakley, however, tries other explanations (see p. 16) and believes the reading is uncertain. - The aim of Gill and Vickers is to show how cheap vases were.

 B] Int.: a man (probably dictating) and a seated youth. A-B:
 school: fr. 3 (CV, fig. 28): a bearded man playing the
 flutes.(1) A seated youth holds an open book roll. At right,
 a hand is writing with a stylus on open tablets. Another
 fr. (CV, fig. 27) shows the left part of the exterior: an
 Ionic column; a nude youth, with a reticule, aryballos and
 strigil, leaning against it. Figs. 30 and 31: probably one
 man, perhaps a column at right.
 C] Int.: on one fr., maeander and ---]ος. Ext.: on the book

1930, 66. ARV(2) 35/3.

- B] A: an erotic scene: head and shoulders of a bearded man holding a cock.(2)
C] A: to right of his face, facing him: [--](ε)χσις.
D] Lorimer suggests [Αλ]εχσις. Beazley, in CV, GB 3, suggests a kalos-name such as that given by Lorimer, or Δεξις, or Αποληξις. But Rumpf's interpretation in Gnomon suggests that this is the man's name. The epsilon is smeared.

(1)ARV(2): of the same type as those of the Pioneer Group, but the style of the drawing is not 'Pioneer'. (2)Beazley in CV, GB 9, following Rumpf. This supersedes the different description in CV, GB 3.

5867.

Oxford G 141.15.

- A] Fr. of RF cup. From Naukratis. Euergides Painter. Late sixth (Beazley). *CV, Great Britain 3, pl. 14,21. Lorimer, JHS 25 (1905) 116/5 (not ill.). ARV(2) 93/93.
B] Int.: only the offset lip is preserved. A: a satyr rushing.
C] Int.: on the lip, Gr.: [--]ων Ηροδ[---].(1) A: at the satyr's right, the lower part of the first letter of an inscription: (.)[---].
D] The Gr. is not Attic. The name may be the same as that mentioned in AA 1904, 192 col. 2; see CAVI 5847.

(1)Beazley suggests:

[τοις θεοις των Ελλην]ων Ηρόδ[οτος or -δωρος ---].

- A] Fr. of BF prize Panathenaic. From Naukratis. Unattributed. 560-530. Second half sixth (Beazley). *CV, Great Britain 9, III H, pl. 2,26. Brandt, Arch. Panath. I, 9/91.
B] A: at left, some of the side border.
C] A: at right: [τον] Αθε[νεθεν αθλον], retr.
D] Brandt says there were no columns. Should be before 530 B.C.

5869.

Oxford G 141.48.

- A] Fr. of cup skyphos. Unattributed. Fourth century. *Beazley, AJA 31 (1927) 352/15, fig. 3. Edgar, BSA 5, 56/115.
B] No subject is mentioned.
C] Under the foot, along the outside edge, in two curved lines, left-aligned:
Γοργίας φιλεῖ[τ] Τάμουνιν | καὶ Τάμουνις Γοργίαν φιλεῖ].
D] The vase is Attic, the inscription is not. Both lines are written by the same person, Gorgias; Beazley thinks it is a trochaic tetrameter, with the second φιλεῖ added; Porson's law is violated; the upsilon is long: the papyri spell the name Τάμουνης, cf. Syll.(3) 1266. The name is found in Egypt, apparently as a woman's name, although Pape seems to refer to the masculine.

- B] A: at left, a column shaft.
- C] A: to right of the column, kion.: [ὁ δεῖνα] ἄρ[χων].

- B] A: two Amazons arming, with a lion. B: a warrior restraining his horse; a dog.
- C] Nonsense: imitation letters: A: between the Amazons' heads: 5 letters. B: above the horse's rump: υχυ(γ)ιγχ. Under the horse's belly and around the dog's head: 7 letters. To right of the warrior's back: 5 letters.
- D] = 1885.710. The letters are close to imitation letters. The photos. in CV are too small to see the letter forms, but the imitation inscriptions seem to follow the Diosphos Painter's regular practice of varying the shapes of the letters to give the illusion of real inscriptions. B has more inscriptions than A; hence it is probably the more important side.

5872.

Oxford G 251.

- A] Fragmentary BF/WG oinochoe. From Capua. Athena Painter. First quarter fifth. *Vidi. EAA v, 808, fig. 980. Haspels, ABFL 59/110. ABV 527/25, Para. 189 and 264, Add.(2) 131.

- C] Nonsense: on Dolon's left: Ϝ[.]εδ(λ)[- (?)], retr. Above his head, in a curve: υχσεισοσ.
- D] = 226. Only the neck and shoulder are preserved. A good example of the Athena Painter's neater style.

- B] Int.: Gorgoneion; round it, hare hunt; sphinx; satyr and maenad; Heracles and a Centaur.
- C] ἔκεράμευσεν ἔμὲ Οἰκοφέλῃς· Οἰκοφέλῃς μᾶργρα(φ)σεν.(1)
- D] Beazley points out that the inscription is not intended for an hexameter, as Gardner thought and Pfuhl (M&Z 253) repeated. Οἰκοφέλης (so LGPN ii) or Οἰκωφέλης? LGPN ii lists the former, although IG ii(2) 415 (fourth cent.) has the latter.

(1)So ABV. "The painter seems to have written εγρασεν (thinking of εποιεσεν) and to have added the φ after writing the ε or the εσ." (Beazley).

- B] A: Heracles citharoedus mounting a platform; at left, his cloak and quiver hung up; in front of him, on the platform, his club propped up diagonally. B: an unclear scene: a bearded satyr, seated on top of a large stepped block, perhaps an altar, leans against a wineskin and plays the flutes; to left and right of the block are remains of a different scene, variously interpreted (at left, human legs; at right, animal (goat) heads to right); see CV, p. 11.
- C] Nonsense: A: to left of Heracles' head, at top of scene: 4 letters, mostly dots(?). Along Heracles' back, probably not facing him and not retr.: χοεκ^χο.(1) Between Heracles' legs: χοε. To right of the cithara, perhaps curved: at least 3 letters, probably more. Along the club, also not retr. and hence upside down: χοτεχο. B: above the satyr's raised leg: (φ)ο(.)(π). Behind the satyr's back: χοε(κ)χο.(2)
- D] = G 240. Small. Leagran-type nonsense.

(1)so the photo. and text in CV; part of the quiver intervenes.
(2)the kappa is unclear.

κορε.(2)

Above the heads of the attendants at right, similar:

D] For the ending -εους see GAI ii, 191.

(1)Early (Beazley in ABV); late sixth (in CV), but that is too late. (2)I doubt that there is enough space for a letter between heta and rho. 'Syllabic' heta or eta? Klein, L.(2) 36 doubted the inscription. Beazley in CV rightly rejects the reading Ἡρακλέους κόρη (cf. Kretschmer and others) and assumes a conflation of Διὸς κόρῃ with Ἡρακλέους. I think there are two inscriptions, put in the wrong order. Κορε stands for Athena by itself. For the sp. ου see the examples in GAI i, 240. (3)cf. PA 10,477. Klein wrongly read Μυνηχος. The name is Μύνηχος, not Μῶνηχος (i.e. Μούνηχος); see GAI i. 265. Both names exist, see LGPN ii. s.vv. Μῶνηχος for Μούνηχος is cited from Kretschmer, Vas. 120, Naples 86,496, CAVI 5473, by Aison, otherwise it is late. Μύνηχος is cited from Oxford 212 and in the 4th century. Are the names on these vases really two different names?

- B] Handle zone: A, B, each: a warrior mounting a chariot.
- C] A: to left and right of the chariot: ηερμογενες | εποισεν.
B: the like.
- D] = G 244.

(1)one of six 'chariot cups' (ABV), possibly by the same hand as the Hermogenean head cups, but "little comparison is possible" (p. 164). But the signatures have a distinct style, which suggests that they may be written by one painter (see 'Script' 51).

- B] Poseidon on a sea horse.
- C] Nonsense: above the figures, just below the top margin, horizontal: δογ(ρ)γ^ογ.(1) Complete.

(1)in Haspels' photo., the third letter looks like a reversed regular rho; it could be a koppa. Between the fifth and sixth letters there is a gap caused by the heads of Poseidon and the horse, but there are some odd little black strokes which I do not think are part of the inscription.

Iconography and Society in Ancient Greece (tr. D. Lyons, 1989) 63,
fig. 88 (shoulder, shows much of the inscriptions).
- B] Shoulder: between eyes: a hunter with a spear; a doe having been
hit by two spears (in thigh and head); a stag rushing off to right.
[The lower legs and feet of hunter and front legs of the right doe
are missing.]
- C] Shoulder: (.)υὸν καλὸς Κυνίππος.(1)
- D] Listed as Oxford 1889.1013, ABL 262/1. - Haspels 161:
shoulder: stag hunt. The inscription:
(.)VON,ΚΑΛΟ(.) [Attic lambda], ΚΥΝΙΠΠΟΣ [three-stroke sigma].
To left of the first word a piece is missing but H. disagrees
with Gardner that there was room there for another letter.
"Apart from these words, our painter strews a number of
small blots in the field, which give the illusion of an
inscription from a distance, but which do not even pretend
to be mock letters."

(1)Κυνίππος is known from the late fifth century, see LGPN
ii who also lists the present vase, although it is not in
Beazley. The ph. in Bérard shows: to lower right of the hunter,
[-]λον (there probably was more at left, not vis. in ph. and
probably lost). Above these letters, close to the right of the
hunter's left arm: six small nonsense (imitation) letters in
irregular sequence, typical of Athena Painter nonsense.
To the smitten doe's right, vertically down and facing it:
καλο(ς) (the sigma indistinct). Below the stag's belly,
horizontal: Κυν..., the rest cut off by the photo.(2)

 B] A mounted archer in Oriental costume. Beazley in CV 3 says that the question of whether the archer is male or female (Hartwig called the figure an Amazon) cannot be decided, although the impression is that of a male. He may be a barbarian or a Greek light-armed soldier; the costume is not Thracian (as Seltman said), but one widely worn by Eastern barbarians, Scythian being undistinguishable from Persian. 'Miltiades' may be applied to the archer, but there is no reason why it should be. The victor would fit chronologically [but see my paper in TAPhA].
 C] Starting from the head: Μιλτιάδης καλός.
 D] = 1879.175. Pemberton discusses the Miltiades kalos; she thinks the kalos refers to the victor and may not always be erotic.

 B] Eos.
 C] Nonsense: on the left: οε(.)().(1) On the right: καεακσ.
 D] = 1890.24. Done from CV, text. Beazley's description is confusing, as he speaks of a rough stoichedon, but gives the inscriptions as being on either side of the figures.

The photo. in CV may show some letters on the left, possibly kionedon. Attic sigma.

(1)the epsilon lacks the top horizontal, which makes it look like an upside-down digamma. Beazley in CV has lambda for upsilon, I think wrongly.  D] = G 303. Theano may be a sister, not necessarily a servant; the name occurs on the epinetron, Athens 1629, CAVI 804 (so Beazley in CV, (2) but in ARV(2) he thinks of her as the bride's mother). Theano is both a mythological and a historical name, see Pape, PA 6636 and LGPN ii: Plut., Alc. 22,5, of 415 B.C.: ἐρήμην δ' αὐτοῦ (Alcibiades) καταγόντες καὶ τὰ χρήματα δημεύσαντες, ἔτι καὶ καταρᾶσθαι προσεψηφίσαντο πάντας ἱερεῖς καὶ ἱερείας, ὧν μόνην φασὶ Θεανῶ τὴν Μένωνος Ἀγρυλῆθεν ἀντειπεῖν πρὸς τὸ ψήφισμα, φάσκουσιν εὐχῶν, οὐ καταρῶν ἰέρειαν (sc. of Demeter and Kore) γεγονέναι. This is somewhat later than our vase. The name is also found in PA 6637.

(1)name or καλη, Beazley. [-]ε[-], L.-H. On p. 242 n. 404a, she speculates on restoring *Helene* on A: she would be cared for by the motherly Theano. Beazley's old suggestion [Ενα]ντετε is now superseded. (4)this restoration is further discussed in ARV(2) 1564: since this is a man, he cannot be the same as the youth so named on the outside of a cup by the Ambrosios Painter in Villa Giulia (ARV(2) 173/5, CAVI 7190). The name appears also without kalos on a third cup by the Ambrosios Painter, Acr.

ii 58 (174/16, CAVI 1232), and the Villa Giulia cup may have him with kalos on the Int. Antimachos is found on several cups of the period (see ARV(2) under the kalos); Diodoros is on Louvre G 58, CAVI 6427 by Smikros, and on Munich 1416 (BF), CAVI 5152; the rest do not appear on other vases; Naubios is a new name. Beazley has further discussion of such names on vases of this period; generally speaking, they are ancestors of the Socratic and Platonic circle (Hipponikos, Kallaischros. See also AK 27, n. 23).

- B] A continuous scene: four boys playing with miniature chariots. Between the last and the first boy, a bag and an aryballos with sponge and strigil.
- C] Between the bag and aryballos, very faint: ..δα...(1) On the reserved mouth, in BG relief lines, making a full circle and facing out, the last three letters smaller:
ἡπποδαμας : καλος.(2)
- D] Add.(2) cites Bothmer as saying that the vase at Bloomfield Hill (Michigan), Cranbrook 1940.40, mentioned in ARV(2) as having the same subject, is a forgery based on [Leningrad 558,] ARV(2) 810/20, which also has the same subject as the Oxford vase. Attic alphabet. The delta in the field (but not that on the mouth) dotted. - Robertson, AVCA 106 says that Bothmer has been misquoted as calling this vase a forgery. A peculiar statement; what Bothmer said refers to another vase, see Add.(2). - Kunisch does not mention the letters ΔΑ. The kalos-inscription has punctuation (see Kunisch, p. 8). .

(1) BSA 206, n.9: "It would be natural to read [ἡππο]δα[μας]," but there is no trace of letters either at left or at right. The inscription slants upward. (2) the punctuation does not mark the beginning of the inscription.

- B] Shoulder: chariot race. Body: The Struggle for the Tripod.
- C] Under the foot, Grr.: ΛΗ. ληκυ:λ:λη. ΛΗ.(1) Next to it, along the central cavity, very many short parallel lines, some longer (I counted a total of 28(?)). On the other side of this ligature is a delta topping a vertical with two horizontal cross bars (type 3F in TGV; cf. also 2F and pp. 221f.)

- D] Ex [Rome,] Depoletti. CV, on p. 25, gives Alan Johnston's explanation: some marks are written over earlier marks. Lambda stands for 30 and there ought to be 30 strokes in the tally. The original notation was a small ligature ΛH (that found under the second large ligature) plus the tally plus $\lambda\eta\kappa\nu:\lambda:\lambda\eta$. The later notation are the two large ligatures and the deltoid sign. Parallels for the inscriptions: Munich 1717, CAVI 5195. and Toledo 1969.371, CAVI 7710 (qq.vv.). Johnston, TGV, p. 221 argues that ΛH is not a price as stipulated by Amyx, Jonkees and Webster.

- B] A: Athena (device: Nike). B: chariot racing.
- C] A: to right of the left column, facing it:
 $\tau[\omega\nu] \Lambda\theta\eta\nu[\eta\theta\epsilon] \nu \alpha[\theta\lambda]\omega\nu.$ (2)
- D] For the use of the Ionic alphabet in the Robinson Group, see 'Script' 184 (this vase should be added). Very fragmentary but put together. Clearly cleaned.

(1)a provisional publication; some frs. not yet placed. (2)CV gives: $[\tau\omega\nu \Lambda]\theta[\epsilon\nu\epsilon] \nu \alpha[\theta\lambda]\omega\nu$. Mixed alphabet: but the e-sounds are not clearly preserved and since the penultimate letter is clearly an omega in the photo., the whole inscription should be Ionic. This occurs in the Robinson Group as early as ca. 430. Otherwise, the photo. is not very clear; it shows only the two thetas, the alpha of athlon and the last two letters.

- C] Gr.: κολιξ, for κύλιξ. Μαν[δρι]ος(?).
- D] Threatte in GAI ii, discusses the non-Attic name Μανδρις (the writer of the Gr.), which had been suggested, but the gen. Μαν[δρι]ος is rejected by Oikonomides, Horos 3 (1985) 130-131, who reads Μαν[τι]ος as a good Attic name in the nom. He also reads κόλ<λ>ιξ, 'loaf of bread,' i.e. phallus, which Threatte oddly finds attractive, but both readings are criticized by Kritzas and Boardman in two articles in Horos 4, 162 and 166, answered by Oikonomides, ibid. 168ff.

- D] Ex Northwick Park, Spencer-Churchill. Beazley gives parallels in AJA 39; see also Sprunt Studies and Blatter. The same wording, with the peculiar eta's and the 'infinitive' ending, on Copenhagen, NM 169, CV, Denmark 3, pl. 117,5, CAVI 3239. The reading could be περιομην. In either case, it is badly miswritten. περιο is for πρω, 'buy'. 'Hail thee and buy me.' Open eta with second vertical shorter in 1-2 cases. GAI i, 38 reads the eta = short epsilon and prints: Χαρη{ν} (for χαρει) and μη{ν} for με. But it is surely miswritten.

(1)almost a normal lip cup. (2)In AJA 54 Beazley appears to print χαρει και πρω με. The correct reading is in JHS 52 (1932) 182. That in AJA must be explanatory.

He also refers to Berlin 2188, CAVI 2296, as having the same monogram (see TGV's better lists). For speculations on the meaning of μυρτωται (written by an Ionian, according to Beazley, which is accepted by Johnston) see TGV, p. 233. - 'Exhib.' translates: 20 Myrtotai: 7. Myrtotai being a kind of vase patterned with myrtle. For the inscription, cf.

- D] Ex Northwick Park, Spenser-Churchill. The digamma's may be incomplete epsilon's, the 'Argive lambda' is probably a truncated chi. For the type of inscriptions see Munich 1379. Beazley found the same inscriptions matched on five other vases which he attributed to the Painter of Berlin 1686 (ABV 296f., nos. 3, 6, 17-19). A similar type appears on three other vases by the same hand (nos. 3 ter, 4 (the name piece) and 7). The Oxford vase was attributed by him to the manner of the Princeton Painter and in Para. he compared it with Munich 1379 which he considered very close. Boardman thinks the Oxford and Munich vases should also be by the Painter of Berlin 1686, in an early phase; the inscriptions by the Painter of Munich 1379 (two other vases in Munich) are not very different.

(1)so ABV; in Para. Beazley says: "Compare Munich 1379 [CAVI 5146] by the Painter of Munich 1379 [ABV 303/1]." (2)Beazley in AJA reads, in the same order: ΕΙΩΥΡΙ(Ϝ)Ο, the digamma upside down. ΕΙΟΕΙΟΙ. Ε·ΟΧ(Ϝ)ΙΟΧ. ΕΙΟΤΧ·Σ, with three-stroke sigma.

EIOXE.EIOXEIO(Λ), the last letter, an 'Argive' lambda.

(1)Bothmer's suggestion; Beazley had thought of a lid (see ARV(2)).

C] Int.: in the reserved exergue: [---]ς εγρ[αφσεν]. (3)
D] Neat letters.

(1)very large: a parade cup. (2)Beazley: recalls Euthymides, the Sosias Painter and [Acr. ii, 176+, CAVI 1281] of Euphronios (his latest cup). (3)Beazley says that the letter preceding the sigma does not seem to have been omicron; the photo. shows no trace but a bit of an empty space following the break: the spacing must have been uneven, in which case any letter could be supplied.

- D] Ex Beazley. The first two inscriptions after 'Select'; Para. gives only the last two.

(1)it is not clear that this is read correctly in 'Select'; I suspect the sigma.

6014.

Oxford 1966.981.

- A] Fr. of a kantharos-like vase (head vase?). Unattributed. Charinos Class. Late sixth. *Beazley, *AJA* 81 (1957) 5/V, pl. 5,2. *Ashmolean Museum, *Select Exhibition of Sir John and Lady Beazley's Gifts* (1967) 44/120 (not ill.). ARV(2) 1532, Para. 502. B. Cohen, 'The Literate Painter: A Tradition of Incised Signatures on Attic Vases,' *MetMusJ* (1991) 79, fig. 54.
- B] At the top of the bowl, a band of black ivy.

- C] On the handle, Gr.: Χαρινο[ς εποισεν].(1)
 D] Ex Beazley. Charinos' signatures on plastic vases are incised, but that on London B 631 (ABV 423, CAVI 4378) is not. Cf. also Oxford 1966.982, ARV(2) 1532, Para. 502, below. Beazley obviously did not consider 1966.981 and 982 to be from the same vase.

(1)the signature runs along the middle of the broad BG handle as on Berlin 2190, CAVI 2298.

6015.

Oxford 1966.982.

- A] Fr. of oinochoe (head vase: woman's head). Unattributed. Charinos Class. Charinos potter? Late sixth. *ARV(2) 1532, Para. 502. *Ashmolean Museum, Select Exhibition of Sir John and Lady Beazley's Gifts (1967) 82/286 (not ill.). B. Cohen, 'The Literate Painter: A Tradition of Incised Signatures on Attic Vases,' *MetMusJ* 26 (1991) 79, fig. 55.
 B] No figured decoration; a head decorated with palmettes.
 C] On a handle, Gr.: [Χαρινος(?) ε]ποισεν.(1)
 D] Ex Beazley. ARV(2): "the inscription is in the same handwriting as on [Oxford 1966.981, above], and should be from a signature of Charinos."

(1)the signature runs along the middle of the broad BG handle as on Berlin 2190, CAVI 2298. Cohen rightly restores Charinos.

6016.

Oxford 1966.1003.

- A] Fr. of band cup. From Italy. Glaukytes potter. Third quarter sixth. *Ashmolean Museum, Select Exhibition of Sir John and Lady Beazley's Gifts (1967) 43/112, pl. 12. Para. 68, Add.(2) 47. 'Script' 238.
 B] No figured decoration preserved.
 C] Between the handle roots (the left stump is preserved), a horizontal two-liner, not stoich.: Γλαυκυτες | εποισεν.(1)

(1)Para. says: Under the handle Γλαυκυτες and below that εποισεν.

- A] RF cup. Briseis Painter. First quarter fifth. 480-470 (Martini). *W. Martini in: E. Böhr and W. Martini, eds., *Studien zur Mythologie und Vasenmalerei: Konrad Schauenburg zum 65. Geburtstag am 16. April 1986* (1986) 96, pl. 17,1 (Int). ARV(2) 408/37, Para. 371, Add.(2) 232. *Dover, Homosexuality* R 545.
 B] Int.: a bearded man having intercourse a tergo with a hetaera. Ext.: plain.
 C] Around the figures, widely spaced: a nonsense(?) inscription.
 D] Ex Oxford, Beazley. Martini, nn. 5-6, gives parallels for the subject, including Boston 1970.233, CAVI 2822 (Douris, *ἔχε ἡἔουχος*).

6017a.

Oxford 1982.889.

- A] Fr. of (Attic?) LG BG (brown) cup. From Al Mina. Unattributed. Late eighth or seventh century. *J. Boardman, OJA 1 (1982) 365-66.
- B] No figured decoration.
- C] On the outside, Gr.: [--](.)αβεϙ[--].(1)
- D] Boardman thinks the sherd is Attic, but there is no real proof. Very early script, perhaps 'clothes-line' (see 'Script'17).

(1)Boardman says the first letter is problematic, perhaps nu, less likely beta. I wonder if it is not an Attic lambda, with a 'foot'.

6018.

Oxford 1974.28.

- A] BG salt cellar. Unattributed. Third quarter fifth. *Archaeological Reports 1974-75 (1975) 32/29, fig. 9 (shows inscription).
- B] No figured decoration.
- C] Under the foot, Gr. in the BG, following the edge: παγϙ.
- D] This could be an abbreviation of παίγνιον, 'plaything,' cf. Pl., Leg. 803c; or [more likely] 'darling,' Ar., Eccl. 922.

- B] Int.: a youth in a wine shop. Ext.: plain.
- C] Int.: behind the youth, along the margin: ho παις καλος. From the youth's mouth: τρικτύλος, retr.(2)
- D] Loan from a private collection [in Oxford?]. Formerly loaned to Harvard (501.1937) by Cambridge, MA, (Mrs.) Jacob Rosenberg. Ex New York Market, Sotheby, 1986. Cf. Hsch.: τρικτύλος οἶνος οὗ τρεῖς κοτύλαι ὀβολοῦ πωλοῦνται. Cf. also Ar. Thesm. 741-47 and τρικτύλος οἶνος, Com. Adesp., Kock 3.1320. Triangular rho, disjointed at the bottom. B.-O. on p. 44 n. 307 says she could not read the τρικτύλος inscription, that much of it is so faint as to be illegible (she does not mention the other inscription). I had no problem reading it; the paint was gone but the shadow of the letters was quite clear. I hope that there

has been no further 'cleaning'.

(1)once on loan to Harvard; actually Cambridge, Rosenberg;
now listed in Add.(2) 241 as New York Market (Sotheby). (2)for
the gap after the first letter, see TAPhA 184.

- B] Neck: A: Heracles robbed by satyrs of his weapons while
asleep: at left, a flautist; next, four satyrs approaching
the sleeping Heracles and stealing weapons; Heracles
stretched out; two satyrs approaching from the right. B:
Heracles and the bull.
- C] A: Gr.: Σιβυρπιος κα[λ]ος. (For more, see below.)
- D] A: Wolf does not discuss the inscriptions. This is what I
can see in the phs.: all letters look like Grr.; the letters
are placed irregularly mostly above the figures: along the
flautist's back, vertically down except for the last
letter, which is on his right: κα[.]ο^ς. Above the leftmost

satyr and going over to the arm of the second satyr: Σιβυρτι^ος. I.e.: κα[λ]ος Σιβυρτιος. Starting to right of the second satyr's face and above the third: N(α)α[.]ος [?]. Higher up are the letters NT. Above the fourth satyr and going over to the fifth (not above Heracles), a blank of ca. two letters and: [--]ακλεε^ς. There are further letters in two lines above Heracles and the letters ναλ above the pair of satyrs on the right.

(1)with future publication in Apollo (Salerno) indicated; it is given in Para. 393/19 bis.

- B] Two-row: upper row: upper part of a female figure; at left, a bit of another? Lower row: a bearded male crouching with knees drawn up to his chin, which he supports with his right hand.
- C] Lower row: A[γ]α[μεμνων](?).(1)

(1)Beazley's suggestion as a possibility; the letters are given as ..A.A., which does not quite agree with the possible restoration. Beazley's suggestion is reported by Burn with a question mark. Agamemnon is certain on Tarentum 4529, also by the Meidias Painter, according to Burn M 23. On p. 62, Burn discusses the possibility of reading A[ι]ας, but rejects it.

- B] Theseus and the Minotaur, between women and men looking on.
C] Nonsense: imitation letters or dots: four rows, two to left and two to right of Theseus and the Minotaur. In the BG area below the picture, Gr. in large letters, in two irregular lines:
Ἀριστοκλείας ἐμὶ τὰς καλῖας καλᾶ·
ἡαῦτα δ' ἐμᾶ· Πίθαφος αἰτέσας ἔχει. (1)
D] M. and T. follow Gallavotti in reading two iambic trimeters:
Ἀριστοκλείας ἐμὶ τὰς καλῖας καλᾶ·
ἡαῦτα δ' ἐμᾶ· Πίθαφος αἰτέσας ἔχει.
The vase speaks. For the meaning of the graffito see the discussion in *ZPE*.

(1)The first line starts under the Minotaur, i.e. in the middle of the picture; the second line is written above it (but still in the BG) and starts much further to the left. The text is that of *ZPE*: the pictures show only a portion of the right-hand part of the inscription. The original reading ἐμὶ in line 2 is corrected to ἐμα by M. and T. after Tusa (see *ZPE* n. 7.).

- D] Fränkel and K.-D. list 'Ariagne' as a maenad, but she is a nymph at Nysa, where Dionysus was brought up.

(1)G. Neumann: 'die sehr Heilige.' Neumann (with Kretschmer, Vas. 198-99) compares the heroine Ariadne, who has undergone a secondary sound change: gn > dn (ἀγνός > ἄδνός). The spelling with gamma occurs also on Syracuse 22,177, CAVI 7559, RF pelike by the Villa Giulia Painter, 'Script' 710, and elsewhere. In 'Script' 103 n. 22, and in CAVI 7559, I wonder if the gamma could not be a dotted delta with the dot omitted; that is

perhaps unlikely as the spelling is not infrequent. For Αριαγνη, see also Kretschmer, Vas. 198-99.

- B] Arrival(?) of a youth(2): Pandion before Prokne and two other women.
- C] Πα[νδι]ῶ[v]. [Πρ]οκνε. Θεώ. Χρυσε[ις].(3)
- D] = Palermo inv. 1280, 12,480, N.I. 484. Formerly: Museo S. Martino alle Scale. According to L.-H., the inscriptions

are no longer visible. Pandion son of Erichthonios was the father of Prokne: so why is he shown as a youth? For the subject see Kron, Phylenheroen 117, and E.B. Harrison, Hesp. Suppl. 20 (Thompson Festschrift, 1982) 72-75. L.-H. in AK discussed the vase and at that time thought it early; she compared it with Agrigento V 1568, CAVI 97 (same shape).

(1)or 1280? (Beazley). (2)ARV(2); in AJA, Beazley says: 'Pandion pouring libation before departure', and compares Syracuse 30,747 [RF bell krater by the Dinos Painter, ARV(2) 1153/17, CAVI 7572, A: warrior (Pandion) leaving home.] The problem is that Pandion appears as a youth before his daughter Prokne. L.-H. agrees with the idea of departure. Robertson, AVCA 237 discusses the names. (3)Gabrici differs in two names: Παν[δ]ι[δ]ο[ν]. [Χ]ρυσ[ε]ι[ς]. Χρυσ[ε]ις, ARV(2).

Morris, eds., *The Ages of Homer* [Festschrift for E.T. Vermeule] (1995) 437ff., figs. 27.1-4.
- B] Sacrifice of Iphigeneia: the lower part of a warrior; Iphigeneia lead by another warrior (both warriors hold swords); altar; palm tree.
- C] To right of Iphigeneia's head: $\text{|\phi\rho\gamma\epsilon\nu\epsilon\iota\alpha}$. To right of the right warrior's head: $\text{[T]}\epsilon\upsilon\kappa\rho\varsigma$.(3) Above the altar: $\text{A}\rho\text{[-]}(\cdot)\text{[-]}$.(4)
- D] The treatment of the subject recalls the iconography of marriage scenes.

(1)a possible cult connection. (2)Transitional I (Rich), B.-O. (3)The photo. in 'Ages' shows that only the last letter is in any doubt; the text has $\text{T}\epsilon\upsilon\kappa\rho\text{[}\varsigma\text{]}$. The first letter is hidden under a large smudge. (4)Probably complete at left. (.) may not be a letter; it looked like the bottom of an upsilon. Kurtz in *GVGettyMus* suggests: $\text{A}\rho\text{[}\tau\epsilon\mu\text{]}$. B.-O. suggests $\text{A}\rho\text{[}\tau\epsilon\mu\delta\text{ος]}$, i.e. the altar of Artemis, which is better. I wonder if a final sigma shows on the fr. that comes after $\text{A}\rho\text{[-]}$, which would support B.-O.'s reading. For the readings see also B.-O. 18.

Both inscriptions seem to me to exhibit the same 'illiterate' confusion between types of inscriptions that are also found on LM cups (examples in Munich). In Beazley, CF 7 (pl. 1,17-18) the same vase is discussed and the inscription is given as completely extant(?). Bloesch gives the inscription as:

- D] De Ridder's facss. are worthless. Rho D-shaped. Sigma = <. Upright chi.

(1)not all of this is clear in the photo., as there is a break at this point. (2)CV gives another inscription, near horizontal, above and between the fighters, which I did not

see in the photo.: κνιοννκλ. (3)the rho's could be omicron's.
(4)CV has: ειοχαιοτχ.

- A] BF amphora. Painter of Würzburg 173. 530-520. *CV, France 7, III H e, pl. 35,2-3,5,8. ABV 327/2.

nonsense: imitation letters(?): ο(λ)ι(φ)ολο.(1)
- D] Poorly published. The phi is rendered as a cursive form in CV.

(1)so CV, text; the photo. is unclear; the text prints the first lambda as an Ionic gamma, but it is a lambda. The inscription is read upside down by de Ridder.

Haspels, ABFL 96 and nn. 5 and *6, *238/120 (bibl.). Fuhrmann, JdI 65-66 (1950-51) 110 ff., fig. 4. ABV 509/120, ARV(2) 300, Add.(2) 127. *Photo.
- B] A: Heracles and the bull, with Athena. B: The Birth of Dionysus, with Hera.(1)
- C] A: nonsense inscriptions: on Heracles' upper left: λχυλχ(ο)χ. On his lower left: (χ)εχλ. On Hera's lower right: χεχλχ. B: behind Zeus' head: καλο(ς).(2) To right of the boy Dionysus: Διὸς φῶς.(3) Behind Hera's head: ηερα.
- D] A small amphora. The inscriptions on A and B probably by different hands. - Haspels 96-97 n. 6 has a long discussion by Beazley of the three possible meanings of ΔΙΟΖΦΟΖ (with sigma 1); Διὸς φῶς, δῖος φῶς, and Διὸς φῶς. Beazley argues against the generally accepted Διὸς φῶς, 'man of Zeus', since Dionysus is not a man but a god; the second has the same problem; the third, suggested by Minervini, is perhaps no more unlikely than the other two. "It is always possible, of course, that the painter meant to write Διονυσος but let his thoughts wander halfway-through." -An important vase, since the inscriptions on A and B differ so

much that they can hardly be by one hand.

(1)the subject is not certain, but see Fuhrmann. (2)sideways sigma. Haspels 96 reads καλος with reversed three-stroke sigma. (3)de Ridder suggests καλὸς Διὸς φῶς and compares an etymology of Dionysus.
